This naturally brings me back to the famous scheme worked out some four years ago and which Taipe in the last few months has been very anxious to revive, under which Pan American would assume responsibility for operations and we for West Coast business management. If we had the business end in our hands along the lines of that plan the whole picture would certainly be greatly simplified and it may be that the necessity of this will become so great that it may be worth considering paying the price, [fol. 906] which would, of course, be letting Panair attend to the operation, along the lines of that plan. I am not sure that this price is as bad as we may think it to be at

that we cannot by certain modifications of the plan make it more to our liking.

In any event I wish you would ask Miss Boucher to dig the plan out of my files, give you a copy and send one along to me. I would like to think it over again on the ground and perhaps make such changes in it as the situation here may suggest and then take it up with you again after I have reached a more considered opinion.

The plain fact is that on the business side we have a rapidly growing enterprise which ought to be provided with an organization in many ways more effective than the present one, and, in view of our peculiar setup I really do not see how we are going to provide this going along as we are. Some really radical change in the whole setup is necessary and so far I do not see how this is going to be brought about unless it can be worked out along some line analagous to that provided in the above plan.

Very truly yours,

Harold J. Roig

GOVERNMENT'S EXHIBIT 432

Letter No 27
(HJR trip series)

Santiago, April 6, 1935.

A. Garni, Esquire,
New York.

Dear Garni,

PANAGRA OWNERSHIP

With Trippe's Transpacific development, doubtless followed by plans looking toward transatlantic service, Panagra is going to become an increasingly unimportant part of his kingdom. The time and thought which he is able to give to Panagra problems, always extremely slight, are likely to reach the vanishing point.

From Panagra's viewpoint, on the other hand, the association with Pan American, at one time an asset, may with this expanding program, become a positive liability. Not only will all this expansion undoubtedly be a drain on Pan American's financial structure, but it will put them more and more at the mercy of ample government subsidies, while at the same time their entry into the complicated political situation in the East will make them more exposed to political attack at home. As a part of the system we are likely to bear a part of the brunt of this exposure without any opportunity to benefit.

All of the above is fairly obvious, but the conclusion I draw from it is that, even more than heretofore, it might [fol. 908] suit us to acquire Pan American's stock in Pan American-Grace Airways and a situation might possibly arise where it would suit Trippe to turn his interest into cash.

Very truly yours,

(sig) H. J. Roe.

Lima, May 28, 1935.

A. Garni, Esquire,
New York.

Dear Garni,

PANAGRA FINANCIAL &
COMMERCIAL CONTROL

I was glad to get your cable N 57 and your cable N 4 to Kirby of the 28th inst.

The plan we have worked out for financial and commercial control has the complete and enthusiastic support of the Panagra management including Mr. Harris and I feel confident that it ought to go a long ways towards solving what has always been a very difficult problem.

It is thoroughly understood that Shea here and Tschumper in Sanitago are to supervise the control of the Panagra movement in exactly the same way as they would any part of the Grace business and that it is the Grace Organization, as Agents, which is assuming this responsibility and these two men are to act merely as instrumentalities of the Grace Organization. They will, of course, respond to the Grace Management in the respective offices where they are located but they will maintain direct contact as the Grace representative with Vidal in connection with this new aspect of the agency service.

NY 1/27/36

No. 4
(H.J.R. PANAGRA SERIES)

Lima, January 22nd, 1936

H.J. Roig, Esq.,
NEW YORK.

Dear Mr. Roig:

We have had occasion several times since your departure for New York to devote some serious thought to our future relations here with Harris and the Sago organization generally, especially in the handling of Panagra Peruvian Traffic. Since Harris' departure, as you probably realize, we have been able, with the authority left in our hands,

to accomplish a good many things in a comparatively short space of time. We feel that we have kept scrupulously withingthe authority given us both prior to and after your departure by the Panagra office in New York, and we have received the highest degree of cooperation from the entire Panagra staff here. We are a little bit afraid that this cooperation will disappear to a very considerable extent with Harris' return, and, to make a long story short, we feel that while he is in New York it should be definitely decided whether we are to be responsible hereafter his return, to him and to the Sago organization or to the New York office of Panagra in handling the phases of Panagra Peruvian business which we are now managing. If we are to be responsibles to Sago, we believe that our efficiency will be seriously impaired. One or two incidents will illustrate the point.

[fol. 911] A few minutes before the departure of yourself, Harris, and Vidal from Limatambo, Harris called Mr. Kirby and myself aside in the Waiting Room. Naturally, in view of the many important matters pending at that time, we thought that he was about to give us a few last-minute suggestions as to how some of them should be handled. Much to our surprise, however, he said that he just wanted to let us know that a good many people in the Panagra organization had the feeling that W. R. Grace & Company, Lima, was interfering too much in Panagra business; that in some cases these people were wrong but that in other respects they were right; and that he hoped that during his absence we would keep these remarks in mind. He then walked away.

. . . . .

Very truly yours,

/s/ Andrew B. Shea

H. J. Roig, Esq.,
NEW YORK

Dear Mr. Roig:

Receipt is acknowledged of your letters Nos. 7 and 8.

You may rest assured that Shea and myself have been watching very closely the Panagra results, and with Worsley's assistance we shall be very happy to exercise over this business as you say, "the same control as we do over the sugar estates or any of our other businesses". Moves that you have made recently will be of great assistance to us in this direction, citing as the best example the new capital appropriation form that gives us the opportunity to be in on Panagra expenditures from the time of their conception. Needless to say, our approval will not be placed on any such recommendation if we are not entirely in accord.

MEMO TO MR. ROIG

Herewith some interesting figures on express traffic.

I find that Vidal has a very definite idea that Grace solicitation for express traffic on coast is not active, is largely

left in the hands of juniors who do not understand the schedules and that the loss of business in 1935 as compared with 1934 is due to this.

Of course Smith has now been over the system and will be here next week and he will undoubtedly work some improvement, but the actual solicitation in all countries will have to be carried on by Grace and I suggest that the attached memo be sent to Grace management in all countries with the request to give this matter more attention and to make some senior official responsible for its development.

PRIVATE

SUBJECT: REQUEST FOR CAPITAL APPROPRIATION

LIMA
August 29, 1936.

Panagra,
NEW YORK.

Your attention is invited to your letter #4445-P of April
~~August~~ 10, 1936, to W. R. Grace & Company, Lima, on the subject of "Request for Capital Appropriation." This letter is not sufficiently complete in that it does not cover special cases, or rather, it covers special cases but in a way which is not satisfactory.

A particular instance has just arisen where it has been decided to purchase Kollsman altimeters as standard equipment for our various radio stations throughout the Panagra line. Under the pending instructions the local Grace office

is supposed to approve an R.C.A. form to be made out for purchase of these altimeters. Mr. Shea, the Grace local manager, has failed to approve this R.C.A. form as yet due to lack of knowledge of the reason for which these altimeters are required. Very obviously Mr. Shea has no knowledge of the requirement of these special instruments, particularly for use outside of Peru, and in future cases of Sago requisitions of this nature no time will be spent in trying to explain these matters to the local Grace people, but requisitions and R.C.A. forms will be forwarded direct to you containing the Sago section head's signature and the signature of the undersigned.

It is not often that such global purchases are required, and usually, as you know, the present method of handling R.C.A. forms has proven to be reasonably satisfactory.

H. R. Harris.

GOVERNMENT'S EXHIBIT 438

W. R. Grace & Co.
New York

September 18, 1936

MEMO TO MR. H. J. ROIG:

With the appointment of Muhlfeld as Panagra Traffic Manager, the designation of Smith to push air express and the education of Zalles in modern methods of traffic solicitation, I fear Panagra administration, when all of these

men are on the job, will become dissatisfied with the traffic solicitation by W. R. Grace & Co. as Agents for Panagra.

Muhlfeld told me that when he was stationed at Havana, he found it impossible to get any cooperation out of Chile and that Chile did not even answer letters regarding traffic which the Havana office wanted to develop. I gather that he has mentioned to Vidal his fear that he will be up against the same difficulty when he goes to the coast.

This may produce a state of mind rather menacing to Grace's position as Traffic Agent unless more thorough traffic solicitation is made apparent by Grace, not only at the principal cities, but throughout the provinces. Vidal has the idea that at lesser points the Panagra work is left to persons who do it rather perfunctorily and who do not exhaust the full possibilities. I have no personal knowledge, but I can imagine this may be true.

Kirby tells me that although W.R. Grace & Co. at Lima is the Traffic Agent, the actual traffic solicitors in Lima are on Panagra payroll. Possibly this impairs the effectiveness of Grace's supervision of the traffic solicitation. Generally speaking, pep can be infused only by the man who hands out the pay check.

I hope the letter to Shea, which I showed you and which goes forward today, will have the desired effect. It seems to me our head offices everywhere should be impressed with the necessity of giving all the traffic effort a big shove forward before Muhlfeld goes to the coast so that his obvious expectation of the lack of cooperation will be contradicted.

GOVERNMENT'S EXHIBIT 439

MEMORANDUM FOR MR. KIRBY:

October 23, 1936

PANAGRA—COLOMBIA

I. *General Set-Up.*

At the present time, although the Grace organization in Colombia is the agent for Panagra in that country, it functions almost solely in matters of traffic and takes very little direct part in administrative or government problems. The result of this is that when Panagra has some important matter to take up with the government, it is generally done through the New York office of Panair (Mr. Evan Young), who in turn takes it up either through their lawyer in Bogota, Juan Uribe Holguin, or through Scadta. As Panagra's interests in Colombia are in some cases at variance with the ideas of Scadta, and probably Panair (who own 85% of Scadta, but claim that they do not give Scadta definite instructions in administrative matters), the result is that Panagra's affairs in Colombia are handled by entities which cannot be expected to enter enthusiastically into their successful solution, to put it mildly.

I believe that we should strive gradually to make the Grace organization in Colombia the representative of Panagra to the same degree that the Grace organizations in Ecuador, Peru, Bolovia and Chile are functioning. As a first step in this direction, I would suggest that the Grace manager in Colombia be instructed to commence a series of private correspondence with the Panagra New York office along the lines of the series of letters which he has been addressing to Mr. Roig. Copies of these would, of [fol. 917] course, be sent to Mr. Roig with covering letter in the H.J.R. Series or, in other words, he would follow the same procedure which Shea uses in regard to correspondence about Panagra problems in Peru.

DOUGLAS CAMPBELL

[fol. 918]

GOVERNMENT'S EXHIBIT 440

December 23, 1936

MEMORANDUM FOR MR. ROIG:

PANAGRA - PERU MANAGEMENT

During my recent stay at Panama, Mr. Harris on three or four occasions brought up the question of the scope of the participation of W. R. Grace & Co. Lima in the management of Panagra and Aerovias affairs in Peru, which seemed to be a matter of considerable concern to him.

In general his attitude appeared to be that during the last year W. R. Grace & Co. had been taking over more and more of the functions of management of the airways in Peru. I pointed out to him that it had been agreed by all concerned that Grace was to play a more active part in the supervision of accounts and expenditures and in the development of traffic, as well as matters of local policy, to which he agreed but said he felt that there was a tendency for the Grace organization to attempt to take over the entire management in the course of time and he felt that since he, as Vice President of Panagra, was responsible to Pan American Airways as well as to Grace, that he should oppose this tendency.

His point of view in this matter may be the result of his personal reaction to having his own authority somewhat curtailed by the arrangement giving the Grace management a greater measure of control in Panagra matters; on the other hand, certain points which he mentioned specifically would seem to give some basis for his point of view unless they have other aspects which were not brought out in [fol. 919] my conversation with him. I would suggest that these matters be taken up with Mr. Shea with a view to developing a more complete picture of the situation.

Panagra Budget Meetings

Mr. Harris stated that the first of the meetings to determine the budget for the succeeding month in accordance with

the policy suggested by Mr. MacGregor some months ago, was called by Mr. Worsley and was attended by the Panagra department heads but no notice of it was given to Mr. Harris himself. It appears that Mr. Worsley on the following day merely advised him that it had been held and stated that he had assumed that Mr. Harris would not be particularly interested in attending it.

Budgets for a subsequent month, according to Mr. Harris, were prepared by Mr. Worsley practically single-handed without even calling in department heads of Panagra and this, it appears, gave him the idea that the Grace organization was working toward taking over the entire management. I told Mr. Harris that while it had been agreed that the Grace management would exercise close control over expenditures of Panagra and Aerovias, it was certainly not my understanding that they would prepare these budgets without consulting the Panagra people, and suggested that perhaps it had not been possible for Mr. Worsley to get all the men together before the deadline date. He still seemed to feel, however, that this procedure had been followed with the express approval, if not instruction, of the Grace management at Lima.

[fol. 920] *Aerovias*

Mr. Harris expressed himself as being dissatisfied with the way in which Aerovias is being managed as he feels that it is merely going along on its own momentum and that there is no single person in authority to tie all the phases of it together and push the business as it should be pushed. He repeated his remarks about being the only representative of Panair on the West Coast of South America and said that he felt that he should manage Aerovias and have some definite title in the company. I pointed out that the necessity of making Aerovias appear to be a Peruvian concern as much as possible made the question of a title for Mr. Harris rather difficult, but he felt that he should have at least a nominal title and that all concerned should be instructed that he was the person in authority.

I pointed out to him that since Aerovias was a local company in Peru, the question whether its manager was tech-

nically a representative of Panair did not seem to me to make much difference so long as the company was well managed, to which he replied that even on this basis, he thought he ought to run it. I then asked him whether the development of Ayulo to take charge of Aerovias would not solve the problem of tying the organization together and pushing its development, to which he replied that he did not consider Ayulo an effective man and that Ayulo had taken very little hold of the business. I then mentioned having seen in correspondence that Ayulo had done some [fol. 921] effective work in connection with permission for Aerovias to use a leased Panagra Ford on the freight contract and he admitted that possibly Ayulo had been useful in this respect but that in the active management of Aerovias Ayulo had done very little. He described Ayulo as being of a somewhat retiring nature and not the type to jump in and take hold of things.

He brought up as a further grievance the fact that in connection with proposed Aerovias sightseeing flights over Lima, he had been overruled by the Grace management and finally wound up by saying that somebody had to step in and really manage Aerovias and that as long as he was there he proposed to do it unless he received definite instructions to the contrary.

I have, of course, heard only one point of view on these questions and I believe it would be desirable to take these matters up with Mr. Shea and get his ideas on all of the points raised by Mr. Harris in order to determine whether some further steps are necessary to coordinate the Aerovias management more effectively. While it would be undesirable to take any action which would tend to weaken the position of the Grace management in carrying out its proper functions of control over Panagra and Aerovias matters in Perú, I believe something should be done to change Mr. Harris' attitude toward a situation which seems to exist, perhaps only in his own mind, between the Grace management and himself, and which cannot help but prejudice the best interests of the companies if it is allowed to continue or become further aggravated.

/s/ Douglas Campbell

W. R. GRACE & CO.
LIMA-PERU

Lima 1 4 37
NY. 1 4 37
No.

Lima, December 31st, 1936

H.J. ROIG, Esq.,
NEW YORK.

Dear Mr. Roig:

I am sorry to have to write you of a serious error of judgment on Worsley's part which I am absolutely at a loss to explain and of which you will undoubtedly be hearing from Panagra.

A short time ago Worsley made a trip to La Paz to look over the accounts, and arrange certain details in connection with expenses, control, etc. While he was there our office in La Paz made the suggestion to him that Panagra might agree to a reduction of 50% in the postal tariffs covering Christmas and New Year's cards mailed from La Paz by air mail. Worsley, without consulting anyone authorized this action, and La Paz on the strength of his authorization officially notified the Post Office that the reduction was effective.

The first that I or anyone else knew of this action was when Panagra received La Paz letter, No. 417, a copy of which I enclose, to which were attached copies of the correspondence exchanged with the Bolivian Post Office on the subject. Harris brought this letter to me yesterday afternoon and I immediately called Worsley in with Harris present, and he admitted that he had given this authoriza-

action on his own initiative, with no explanation other than that he had done so without thinking. I told him in force [fol. 923] ful terms that his action constituted an absolutely unwarranted assumption of authority which could not be justified and that it was incredible that he had so conducted himself, especially as it was his job to see that the funds of Panagra are not disbursed except with proper authorization. I also told him that it seemed to me that the only possible explanation of his action was that he disliked to admit to the La Paz people that he lacked the authority to approve any such suggestion affecting postal tariffs.

There is nothing more to be said of the incident except that I fear that it will impair his relations with Harris and will give a good deal of color to the feeling on the part of a good many Panagra people here that Worsley carries out his duties in too high-handed a way. This feeling to my mind is unwarranted but it is most unfortunate that he has now done something which might be considered as a justification for it.

Very truly yours,

ANDREW B. SHEA

GOVERNMENT'S EXHIBIT 442

PAN AMERICAN-GRACE AIRWAYS, INC.
135 EAST 42nd STREET, NEW YORK, N.Y.

LETTER NO. JDM 2154

SUBJECT: OFFICE FURNITURE FOR SANTIAGO

LIMA
March 11, 1937.

Mr. J. D. Mac Gregor,
NEW YORK.

Attached herewith please find signed R.C.A. form for office furniture for Santiago. You will note that all copies are attached herewith in spite of the fact that Santiago has definite instructions to send one copy to you prior to my signature, to avoid delay.

You must have received your copy of Santiago's letter #4794 to Sago on the subject of office furniture in the last mail. This is the letter to which these R.C.A. forms were attached. I have just received a cable from Santiago as follows:

"35 REFERENCE TO OUR LETTER #4794 AFTER DISCUSSING WITH VIDAL SUGGEST THAT YOU CABLE NEW YORK FOR APPROVAL AS FURNITURE MUST BE ORDERED WELL IN ADVANCE."

I am at a complete loss to know why after a great many months of work on this office it suddenly becomes necessary to cable about furniture. Therefore I am not following their suggestion of cabling you for approval on this R.C.A. since I feel that better results can be obtained if you have the whole story before you rather than have to depend upon a sketchy cable for your decision.

I don't know whether the desks already in use by our Santiago office are to be used, since it is my understanding that we have not taken on any additional employees, ref

tainly not six additional employees. I have discussed this with Muhlfeld, and he thinks that the general idea is to have new desks and fittings to harmonize with the Grace Line desks and fittings, which I think is a good idea and worth the investment. However, there is one very important matter that Muhlfeld told me about on my inquiry, and that is that there is not going to be enough space for Panagra in the new arrangement. He drew up a cable to me on February 16th when he was in Santiago, as follows:

[fol. 925] "PALMETTO NEWYORK
FOLLOWING IS FOR H R HARRIS FROM J. E. MUHLFELD LOOKING OVER FLOOR SPACE ALLOTMENT PANAGRA SECTION SANTIAGO BELIEVE SAME DEFINITELY INADEQUATE ACCOMMODATE MINIMUM FORCE REQUIRED TO EFFICIENTLY HANDLE OUR BUSINESS. SIMON NOW NEWYORK KNOWS SMALL ADDITIONAL SPACE REQUIRED AS DISCUSSED WITH HIM BY SHANNON CONSISTING ONE THIRD SPACE NOW ASSIGNED TEXTILES SENTENCE SUGGEST YOU PUT MATTER BEFORE PROPER AUTHORITIES WITH IDEA THEY GIVE GRACE Y CIA (CHILE) S.A. NECESSARY INSTRUCTIONS TO PROPERLY PROVIDE PANAGRA OFFICE SPACE HERE. SUGGEST CABLE REPLY IN ORDER ALTER CONSTRUCTION PLANS NOW UNDERWAY WITHOUT ADDITIONAL EXPENSE"

The Grace people refused to allow the cable to go out, and Muhlfeld was at a loss to know what to do. Unfortunately, Muhlfeld was so anxious not to cross wires with our Grace friends that as a result of their turn-down of his cable he did not forward me the letter which he wrote on February 17th giving further details on the matter. In order that you may be familiar with all of the background of this matter I am attaching herewith a copy of Muhlfeld's letter which, as noted above, was not sent.

If Simon is still in New York I believe you should discuss this matter in detail with him since apparently our Grace friends in Santiago failed to provide any means for

Panagra expansion in their new office setup, which, incidentally; was never approved, as far as I know, by either me or you for Panagra.

Copy of letter from H. R. HARRIS to J. D. MACGREGOR

Subject: ECUADOR

On business at Guayaquil,
April 5, 1937

Mr. J. D. MacGregor,
NEW YORK.

Dear Mr. MacGregor:

This will confirm the various exchange of cables between you and me during the week I have been in Quito.

. . . . . .

On Friday, the President sent for me again, and again I was accompanied by Flores Guerra. The President made some very startling remarks about Grace's lack of interest in Ecuador, . . .

. . . . . .

I feel very strongly that when Campbell arrives in Ecuador he must be a direct representative of Panagra New York and not a representative of W. R. Grace & Co., if our interests are to be properly served. I naturally pointed out to the President that I was not a representative of W. R. Grace & Co. but that Grace acted as our agents at various points for business reasons, that Pan American-Grace Airways was an international operator entirely dependent

upon U. S. Government subsidy and that consequently we have to be neutral in every country through which we operate, since our business is not primarily with any particular country with which we are working, but with all of the countries. * * *

S. A. G. O.,
LIMA.

Att: Mr. J. E. Muhlfeld

* * * * * *

I note the various recommendations made by agents. These agents, of course, speak entirely from one point of view, which is to make it easier to sell and anything that will make it easier to sell is always their first thought. They, of course, do not have the background in connection with the Faucett competition and the reasons which dictated our present differential. Nor are they cognizant of the costs of running extra services. Nor do they see the red figures which so many of our extra services have occasioned.

In connection with recommendation #3. Here is a prime case in which a salesman may be distinguished from a

man who sells tickets. The Grace agents, for so many years, have sold tickets that they know very little about selling service. Yet I have never heard that they raised any strenuous objection to the differential between the SANTA INEZ and the SANTA LUCIA. Why, then, should they object to a differential between the DC-2s and Fords?

A. Garni
First Vice President

NEW YORK, September 29, 1937.

Harold J. Roig, Esq.,
LIMA, Peru.

Dear Roig:

PANAGRA

I had a session with Juan last night, the purpose of which was to go over that chart, which he has covered with a memorandum.

As before, I feel that he is on pretty sound ground and that, generally speaking, the new alignment of responsibilities should be adopted. It is understood, however, that if in your talks with Harris, you and George should find it necessary to make some minor modifications, there will be no objection.

Looking over the chart carefully as well as the memorandum, it will, of course, be apparent to you that Grace & Co.'s direct authority over the local management is somewhat curtailed. This, however, does not mean that they have not every opportunity to confer with Harris, etc., making suggestions, but the final decision rests with the president of the company and his respective advisers, particularly with reference to maintenance and operations. With reference to traffic matters, that, of course, will be the direct responsibility of the local representatives.

[fol. 929] Personally I see no objection and I believe that if the new set-up is accepted with enthusiasm the company will be more efficiently run and with much less trouble than before. I told him that in principle I thought well of the set-up and saw no objection to his sending the chart and memorandum to you by George Rihl for further discussion, emphasizing, however, that I wanted to make two reservations: First, that neither this nor any other system is going to function unless we get a competent man to take the presidency of the company, and second, I wanted it understood that while *on paper* it would look as if Grace & Co.'s direct activities or intervention were somewhat curtailed, I did not want this to be used as an argument against us when we next discuss the making up of our respective expense accounts.

* * * * *

Very truly yours,

(s) A. Garni

[fol. 930]

GOVERNMENT'S EXHIBIT 446

NEW YORK COPY

PRIVATE

TRAFFIC REORGANIZATION
AND CORRESPONDENCE

LIMA, December 28, 1937.

Panagra, Agents, Lima
La Paz
Santiago
Buenos Aires
Cristobal (for record only)

Effective January 1st, 1938, Panagra traffic in South America will be established by countries and not by divisions.

The head Grace office in each country, and Buenos Aires in the Argentine, will be responsible directly to SAGO Traffic for the traffic work of all Panagra agencies in their country.

Inasmuch as Argentina, Bolivia, Chile and Peru are already organized on this basis, the principal change occurs in the Northern Division.

In this respect Cristobal office will supervise traffic in the Canal Zone and Republic of Panama; Bogota in Columbia, and Guayaquil in Ecuador.

As Buenaventura and Cali have at various times been on line stations, correspondence between national head offices should be directed to Buenaventura or Cali, as the case may be, with copies to Bogota.

For obvious reasons we wish the national head offices in each country to maintain complete control over their national territory.

In order to accomplish this, national head offices are requested to write directly only to other national head offices.

In like manner SAGO Traffic will address correspondence only to the national head offices in each country and will expect the latter to follow the same procedure.

In those cases where time does not permit, offices will, of course, be obliged to divert from the above procedure and correspond directly with other than th national head of- [fol. 931] fices, however, in all such cases copies should be sent to the national head offices concerned.

In addition to the above each national head office must refrain from corresponding with New York direct on traffic matters. All correspondence must be addressed to SAGO Traffic.

Following the same procedure we have arranged with New York to refrain from writing national head offices directly on traffic matters.

Naturally occasions will arise when this procedure cannot be strictly followed because of lack of time, however, if everyone will follow as closely as possible the above plan, we feel certain that much lost motion will be eliminated, greater attention will be given to your work by this office, and it will be possible to coordinate the efforts of all offices to carry out the principal function of traffic department, which is to promote business.

In line with the above the so-called national head offices will be Cristobal, Bogota, Guayaquil, Lima, La Paz, Santiago, and Buenos Aires. Montevideo will come under Buenos Aires.

For your further information and so you will appreciate the System organization, SAGO Traffic is in direct contact with the Panair System Division Offices and the Panair General Traffic Manager, New York.

We believe the above is clear, however if you have any questions to ask, please communicate with us immediately as the above becomes effective on January first.

MEMORANDUM

Garni and Roig were in Washington, and Garni took advantage of the opportunity of talking frankly to Harllee Branch about our problem of control and management of Panagra.

Branch appreciates the situation, sees the difficulty of dealing with Trippe, and says that they have somewhat the same problem in endless conversations, etc., etc., with him.

Branch expressed a definite opinion that Panagra ~~should be separated from Pannir, and~~ should have its own independent life and management.

It is very clear to me that Panagra, once it gets into the heart of Colombia, and, provided we can put on a service

three times a week, would become the most important and dominating trunk line through South America. If this can be brought about promptly we need not fear competition from Europe.

D.S.I. (Ogleby)

[fol. 933]

GOVERNMENT'S EXHIBIT 448.

W. R. Grace & Co.

New York

Delfax, February 28, 1928

Dear Roig:

Your letters on the subject of Panagra I find extremely interesting, and I am happy to have the opportunity, in view of a more complete knowledge of what is going on, to express an opinion on various points which you raise.

Expenses—

I quite agree with you that we should cut out unprofitable mileage, and I am entirely in sympathy with the idea of cutting out all local lotsipes from which we cannot make money.

The most important task, I think, that you have to perform in going to the Coast is to begin to educate all of Panagra's men in a spirit of strict and studied economy, and you will decide whether or not it is going to be a practical thing to get Harris to really understand the value of money. After all, it is a pretty inexcusable thing for us to suddenly wake up to the fact that we are making such enormous losses in Aerovias, which losses have been going on for some time. The probability of such losses should have been sensed by the local management and their action guided by a desire to make money rather than a desire to expand in a thoroughly uneconomical way.

I think it is of tremendous importance to concentrate on getting a third trip a week from Washington, and I feel

rather confident that we will get it. Garni, with Patchin's assistance, should in your absence press to obtain this, for without it I don't see how we are going to get Panagra into the black. But it is to be kept in mind that even if we get this [fol. 934] third trip, the increased income will be consumed before long unless we can dominate the management and force upon it a spirit of economy.

As I have said, Harris is a great fellow in many respects, but he doesn't understand a P and L account and he doesn't really understand the value of money. MacGregor also is extravagant.

I agree with you that Douglas Campbell is going to be needed in Colombia for the present, but after all, this matter of economy is going to be a long pull and there will be plenty of time, after Douglas has finished his task in Colombia, for him to get steadily to work on the plan of dominating the spirit of the administration of Panagra. He is the only man that I can see who is equipped with the knowledge, character and experience to accomplish the task. Therefore, I would keep him closely posted as to what is going on and prepare to have him jump into the task once he is finished in Colombia and once you have laid out with Rihl the general lines of policy which the management of the business is to follow.

After you have worked out a plan for putting out unprofitable mileage, and have carried out your excellent idea of simplifying operations, then it seems to me that the business divides itself into two broad phases, one is operation, including maintenance, and the other is developing international traffic through improved publicity and solicitation, both there and *particularly here*.

The plan that I suggest for Campbell will set the stage for dropping him into the South American management a [fol. 935] little later in case you find it feasible or advisable to do so.

MEMO TO MR. IGLEHART

PANAGRA TRAFFIC

At the present time Panagra head office in New York has no Traffic Department and no person in any way steadily occupied with the promotion of traffic or publicity.

W. R. Grace & Co. has done much more to promote the interest of *Panagra traffic in the United States* than Panagra itself but this effort is and has been intermittent for lack of a man working on it exclusively.

My idea is that the new traffic man to be employed by W. R. Grace & Co. should occupy the same relation to Panagra operations in South America that the New York Traffic Representative of the Union Pacific or Santa Fe do to those lines. He should be constantly visiting all sources of air travel or combined steamer and air travel agents and stimulate travel by air either by steamer or air to be routed via Panagra.

He should work up and push closer interchange of traffic between Grace Line and Panagra. Now that Grace Line is giving first-class passenger service to the west coast only fortnightly instead of weekly there ought to be a considerably larger opportunity than hitherto for interchange of passengers.

I am prepared to direct this effort and to get the best results would like this man to be one who has already acquired traffic experience, has acquaintance among the travel agencies, railroads, etc.

[fol. 937] This work ought to dove-tail with Grace Line and in view of the close association with Grace Line it would be desirable to have somebody who understands steamship traffic and for this reason Mr. Shiner seems to

me to be the best suggestion yet, but I do not think he would care to undertake it unless the job offered some real future.

PERSONAL 2105

REED CHAMBERS' COMMENTS

NEW YORK,
April 14, 1938

Mr. H. R. Harris,
LIMA

Mr. Vidal and myself had lunch yesterday with Reed Chambers, who was good enough to communicate quite freely, and with very little reservation as far as I can see, upon the impressions he gained during his recent visit to South America.

* * * * *

The second matter of vital interest to Chambers was developed in the course of a conversation concerning the Fawcett Company. I made the remark that both Lufthansa and Fawcett, as concrete examples, overloaded their planes and took chances which were against our Company policy, and in spite of that fact they were lucky enough to escape accidents, whereas we had them. Chambers said that, from his personal observation, my statement that we did not overload our planes was made under a very grave misapprehension of what actually is taking place.

Reed stated that upon his arrival at Talara he found an Aeroxias Ford was delayed there because of motor change. The pilot of the plane expressed himself as extremely annoyed because his plane had been overloaded en route and he said there was nothing he could do about it. It seems that at one of the stops the Grace Agent had booked three passengers in excess of the loading limits. This Agent insisted that the passengers be taken, and in order to get the passengers aboard he loaded a Peruvian lady of about 45 years of age at half fare as a minor, instructing her to set on her husband's lap from airport to destination.

Chambers said that the Grace Agent seemed to, as he put it, "rule the roost" and force the pilots to do something in fringement of our loading regulations.

He said that the situation at Talara demonstrated that there seemed to be nobody charged with the responsibility of making arrangements for handling either planes or passengers on off schedule non stops. It would seem that a motor was sent to Talara to be installed when occasion offered for little other reason, according to him, than to give the personnel at Talara some work. The motor was installed on the Aeroxias Ford by the Talara mechanical force and on the test flight "the bottom almost dropped off". I did not ask him just exactly what he meant, but it was very evidently a serious mechanical error.

[fol. 939] On other matters not particularly connected with his own mission, but commenting as a passenger, he considered that we were miles behind the Panair service on the East Coast as far as looking out for the comfort of passengers, and of course the purveyance of meals, was concerned. He stated that several passengers with whom he had talked who were Americans and accustomed to flying told him that they would prefer to travel via the West Coast on account of the saving of time, but that this time saving was far outbalanced by the courtesy and prompt attention to passengers' wants on the East Coast. He gave numerous examples of what he meant. He mentioned particularly the careless way in which the comfort of passengers was provided for at Arica, Talara and Buenaventura. I believe you are familiar with his comments from what Kirkland must have told you. I of course explained that Talara was an off schedule stop and that we had always had difficulty with the International Petroleum about accommodations for both personnel and passengers. There was, however, no excuse that I could offer for the perfectly awful meals served at Buenaventura and for the fact that, although the plane left Talara at the crack of dawn or possibly earlier, after the passengers had had the skeletonest possible kind of breakfast, there was no offer of bouillon and saltines, or any kind of food, before the arrival at Buenaventura approximately at one o'clock in the afternoon. As a matter of fact, the passengers did not even know they were to be

fed at Buenaventura until one of the ground personnel informed them of the fact as they left the plane.

Chambers is of the distinct impression that our stewards are put on the planes without any sort of training whatsoever. He said that one of the stewards was so untrained that, after the pilot had rung for him five or six times, Chambers had to go forward and wake him up and send him to the cockpit. This was on an international plane. Of course Chambers was at Lima when one of the stewards was killed and he attributed the accident entirely to lack of training.

(HJR Trip Series)

Air Mail 5.6
Lima 5.9

W. R. GRACE & CO.
7 Hanover Square, New York

A. Garni
First Vice-President

NEW YORK, May 4, 1938.

Harold J. Roig, Esq.,

LIMA, Peru.

Dear Roig:

CENTRALIZATION OF CONTROL, ACCOUNTING ETC.

Your No. 24:

I think I touched upon this briefly in my letter No. 27, wherein I endeavored to report to you the net of my conversation with George Rihl.

There never has been any doubt in my mind as to where the control, accounting, etc., should be concentrated and I

heartily subscribe to the views expressed by you to this effect in your various letters, quite irrespective of how this might affect our firm's direct intervention in Panagra's local activities.

Here again, however, I think no definite move should be contemplated until we get the major question of management settled in one form or another. When that is done, and I hope successfully so, very few people will be required at this end and I feel sure that with concentration of control on the Coast rather than here, together with concentration of accounting in perhaps less detail than is now done, the general supervision over Panagra's functions will become infinitely easier at this end and the final result will be eminently more satisfactory than it is now.

During one of my talks with Vidal, I led up to the above [fol. 941] ideas and he immediately took advantage of the occasion and said that he would like to refer to some previous conversation in which he expressed a very definite desire to come back to our firm. It occurred to me that if we all agree, as appears to be the case, to transfer the accounting and the direct control to Lima, and provided we can take over the full management of Panagra's affairs, Vidal, instead of being transferred to Lima as Comptroller, might possibly be the very man required here as the president's righthand man.

With such a man, plus a technical man—perhaps Harris or someone else a little less rigid and more conservative when it comes to money matters—plus a stenographer and a bright young boy, it ought to be easy sailing.

In all these discussions I am, of course, somewhat incensed over the impossibility of making any further headway with Juan. However, I have not given up hope to make some progress under this heading and I am, in fact, at the moment endeavoring to contact him here in New York, with a view to resuming my conversation where I left off some few months ago.

Very truly yours,

(signed)
A. Garni

[fol. 942]

GOVERNMENT'S EXHIBIT 452

August 10, 1938

MEMORANDUM FOR MESSRS. ROIG AND GARNI

I think it important that you, one or both, should see Mr. Trippe as promptly as you can arrange it and endeavour to get him to agree to a plan under which Panagra will have an independent management and name a president who would take the responsibility for the administration of the company.

If you can agree with him in principle as to the advisability of following this procedure, then the question comes of the selection of the man. I am hopeful that you will be able to agree with him as to this selection.

I think it would be well for you to advise Mr. Trippe that we have taken an interest in Eastern Air Lines and that our idea in doing so was to develop a collaboration that would result in a traffic benefit that was mutual.

I think you will be able to make clear to Mr. Trippe that in view of the train of thought both of the public and of the Government, the theory of a monopoly of foreign aviation in the hands of Panair is a mistaken one.

D.S.I.

Iglehart.

[fol. 943]

GOVERNMENT'S EXHIBIT 453

PRIVATE March 8, 1939

Memorandum To: Mr. H. R. Harris

Following your instructions, the following observations on last year's results are submitted. In addition I would like to make several general observations in which you may be interested.

* * * * *

One or two general observations regarding the Panagra picture as a whole may be in order here.

It is my frank opinion that after ten years of operation, Panagra finds itself, so far as the Sales Department is concerned, miserably represented throughout the majority of its territory. This may not be at all true and probably is not where operations and executive affairs are concerned, but in matters of this type the local agency manager or a competent assistant handle them. Not so with sales. This branch of work, which is certainly not unimportant, is left as a general thing, to a local employee of a not-too-high type. Where this condition obtains, and it does rather generally throughout the line, results have been very poor indeed, though probably no poorer than might have been anticipated long ago. SAGO Traffic has spent much time and effort in trying to convince various agency managers to assign better personnel to its work, but so far with comparatively little success. My own experience has been that the local managers do not believe that the amount of extra business a better staff might obtain would, in agency commissions, justify an increased salary expense. This, almost invariably, has been the excuse given when we have found it necessary to demand better attention from the smaller agencies. On several occasions it has been definitely pointed out to SAGO Traffic that despite what might be heard to the contrary, our West Coast agents are very well paid indeed for handling our work. If this is the case, it occurs to me that the method of compensating them might be improved upon from the Sales Department's point of view. If the agents regard their Panagra representation and the direct compensation therefrom, as being relatively unimportant as compared with some of their other activities, but are nevertheless properly compensated, would it not be a good idea to find some way to rectify their ideas in this regard? One way of doing this might be to pay them as, if and when they accomplish something for us and only then. This is the way we are presently operating along the Diagonal in Argentina and except for the stations where we obviously have the wrong man acting for us, it works very well.

[fol. 944] SAGO Traffic regards, for example, the Salta and Tucuman representatives far superior to most of those on the West Coast in similar posts. There is plenty of reason for this feeling. These two agents are always on their toes, know all there is to know about our rules, regulations, what we have to sell and how to sell it, because their only hope of making anything out of their Panagra representation lies in their ability to obtain business for us. If these agents have not so far set the world on fire with sales, it is certainly not because they have not tried, but almost entirely because we have given them, up to this time, so very little to sell.

Another indication that we may not be following the right plan as regards dealings with our agents, can be drawn by making a comparison of the results obtained in Peru by Faucett's agents as compared with those obtained by our own. Certainly few of Faucett's representatives have anything like the standing in their respective communities that our own agents do. They get better results and there can be no question but what they do and and have done for years, simply because they know that they must pay attention to their representation, or, in other words, sell, if they mean to stay in business. This is not so vitally important to our own agents, and the results are only what we might have expected, which is to say that Faucett out-sells us by a wide margin.

With but very few exceptions our Agency managers and sub-managers are unable, as pointed out above, to take a long view of the situation and remember that in the long run their Panagra representation really is a rather good thing. On the other hand, they do keep a very close watch on current receipts and there is some justification for this reason in believing that our sales work is for them a relatively unimportant matter. Where this is not the case, for example, in Cali, Colombia, we are, in my opinion, quite ably represented, although in the case of this particular station the staff is comparatively small. The personnel that they have assigned to our work, however, is distinctly high class. To some extent the same might now be said of the Guayaquil Agency, where a competent foreign

employee is directly in charge of all phases of Panagra work and does not forget that sales are a very important part thereof.

Other considerations may of course, make it impossible to follow the course suggested above, which is paying for actual accomplishments when they are effected and not at any other time. If it is impossible to follow a plan of [fol. 945] this kind, then some other means should be found to make it very clear to our agents that we expect the kind of attention to our sales work as they give, for example, to Grace Line sales. In a great many of the Coast agencies the Grace Line has succeeded in obtaining services of the very best employees of the individual agencies, in some cases having supplied Grace Line trained men to the agencies, whose salaries, we believe, are nevertheless for the account of the local agency.

Merely in passing it might be worthwhile mentioning here that no later than yesterday, while lunching with a former passenger, whose company gives us a considerable amount of business first and last, I was frankly told that the attention this man received on the West Coast—and apparently the attention shown several of his acquaintances who have made the same sort of trip he had—was markedly inferior to that received on other sections of the system. I personally have heard the same story so many times during the past two years, that there must be some truth in it unpleasant as it is to believe it. However, in the last analysis it is only reasonable to believe that if our routine affairs are not handled to our satisfaction, as they certainly are not, there is no reason to believe that this particular phase of the work is handled any better. Indeed there seems to be quite a sufficient amount of evidence to support the theory that we are not up to scratch in handling passenger traffic, and I believe that the failure occurs largely on the ground and not in the air.

* * * * *

[fol. 946]

GOVERNMENT'S EXHIBIT 454

SERVICES RENDERED PAN AMERICAN-GRACE AIRWAYS, INC BY W. R. GRACE & CO.

In South America

The South American houses and subsidiaries of W. R. Grace & Co., including Panama Agencies Company in Panama and the Canal Zone, Grace & Co. C.A. in Colombia, Guayaquil Agencies Company in Eduador, the Lima office of W. R. Grace & Co in Peru, Grace y Cia (Chile) in Chile, and the La Paz office of W. R. Grace & Co. in Bolivia, act as the general agents of Pan American-Grace Airways, Inc. in the countries named and in the various cities of those countries where the planes of the Company call or where the Company has business. W. R. Grace & Co. maintains (and has done so for many years) offices in the capitals and principal cities of all of these countries and the personnel of these offices, a considerable number of whom devote their entire time to this work, perform these functions. These general agency functions do not include intervention in any way in the flight or ground operations of the line, which are under the control of the Company's own staff. They do include all of the general commercial, financial, legal and governmental phases of the Company's business in all of the countries on the West Coast of South America through which the line operates.

1. Executive and General

The executives in charge of these respective territories handle personally the negotiation of government conces-
[fol. 947] sions, post office contracts and the Company's arrangements with local competitive lines, national and foreign. Such negotiations are, of course, carried on in strict accordance with the Company's instructions and in consultation with Company's executives both in its South American General Office in Lima and in New York. The Company's current day to day relations with the govern-

ments of the respective countries in which the line operates (viz., Canal Zone, Panama, Colombia, Ecuador, Peru, Bolivia and Chile) are also maintained under the supervision and in more important matters, with the personal intervention of the local Grace executives stationed at the respective capitals of these countries. In Peru, the W. R. Grace & Co. management also attends to the commercial, governmental and financial activities of Cia. Administradora de Aeropuertos, a subsidiary of the Company, which owns and operates the official public commercial airport of Lima and operates under government contract the official public commercial airport at Arequipa, Peru. As illustrating the extent of these services, the negotiation of the purchase of the site of the Lima airport and of the government concessions under which both airports are operated, required a substantial percentage of the time of the Peruvian Manager and his associates over a period of two years. The Company's relations with local government officials are also maintained by the Grace agency heads at points such as Cristobal and Balboa in the Panama Canal Zone; Panama City in Panama; Bogota and Cali in Colombia; Quito and Guayaquil in Ecuador; Chiclayo, Trujillo, Lima and [fol. 948] Arequipa in Peru; La Paz, Oruro, Uyuni and Villazon in Bolivia; and Arica, Antofagasta, Valparaiso and Santiago in Chile.

Employees of W. R. Grace & Co. are especially designated in each of the countries mentioned who handle under the supervision of the local W. R. Grace & Co. management, routine day to day dealings with the several governments and the various departments thereof in connection with operations, changes of route, schedules and tariffs, airports, radio, and the constant mass of detailed departmental matters arising in connection with the conduct of the Company's business in each of the territories specified.

2. Traffic

Traffic work in connection with passengers, mail and express is performed either directly by the South American houses of W. R. Grace & Co. or under their immediate supervision over the entire West Coast. This includes so-

licitation of traffic, publicity, sale of tickets, attending to customs and collections on air express and guaranteeing COD charges, attention to incoming and outgoing passengers, mail and express, attending to overnight accommodations, and in general, the whole matter of traffic sales administration. Grace employees are in charge of the Panagra traffic staffs in Lima and Santiago where Panagra has its own traffic personnel and in Cristobal, Balboa and Panama City in Panama; Bogota and Cali in Colombia; Guayaquil and Quito in Ecuador; Chiclayo, Trujillo [fol. 949] and Arequipa in Peru; La Paz, Uyuni, Oruro, and Villazon in Bolivia; and Arica, Antofagasta and Valparaiso in Chile; where Panagra has no traffic staffs, all of this work is done directly by Grace employees alone. The local Grace management in each of the countries named is responsible, under the general direction of the Panagra Traffic Sales Manager, for the development of traffic and for traffic results. In addition to traffic sales and the other matters referred to, attention to receipt and dispatch of planes in the year 1938 involved 2,432 Panagra arrivals and departures (apart from Lima and Santiago where Panagra's own staff assisted by W. R. Grace & Co. personnel does this work) at 13 different ports of call in Colombia, Ecuador, Peru, Bolivia and Chile, and 650 Aerovias Peruanas arrivals and departures in Peru at the regular Panagra ports of call and at Cartavio, Casma, Chimbote, Ica, Pisco, Mollendo, Pacasmayo, Paita, Paramonga, Piura and Sullana, not on the regular Panagra schedules.

3. Financial

All capital expenditures of the Company in South America are passed upon by the local management of the W. R. Grace & Co. offices as well as by the South American General Office of Panagra. In each of the countries named, the Grace accounting and cashier's departments attend to the handling of receipts and disbursements; collection of accounts and guaranteeing certain of them; preparation of payrolls, including the proper deduction from salaries [fol. 950] and wages of income tax, social security and other contributions required by law; the handling of workman's compensation insurance and insurance claims in connection

with passengers public liability, automobile transportation, marine air express, etc; the provision of foreign exchange; the keeping of special local books of account where required to comply with local laws; and the invoicing and collecting of mail charges due from local post offices.

[fol. 951]

GOVERNMENT'S EXHIBIT 455

PRIVATE

AGENCY PERSONNEL IN ECUADOR

QUITO
November 7, 1940

Mr. Harold J. Roig
Pan American-Grace Airways, Inc.
New York, New York

Dear Mr. Roig;

I am writing to you privately in connection with an important problem requiring attention.

With a view to overcoming the general inefficiency prevailing in Ecuador and maintaining Panagra standards and the type of service to which our passengers are entitled, it appears essential that Grace Agency personnel attending to Panagra business be well paid and carefully selected, irrespective of the type of personnel which the other businesses being handled by the Agencies may require.

Berenson has just spent three days with me in Quito and he is very anxious to render an A-1 service. He is, however, handicapped by the fact that he is under general instructions to reduce expenses in Ecuador and, apparently, has not been told specifically that any such instructions do not apply to Panagra as our business is expanding. The net result is that all sorts of serious mistakes are being made in connection with our operations, such as mishandling of the U. S. mail, over-carriage of passenger's baggage, etc., all of which must appear unexplainable to airmail users and to passengers who pay adequate rates for the services we offer.

I would urge that the Grace management in Ecuador be advised that Panagra is making adequate payments in New York for Agency services and that it expects and should receive excellent attention under all headings, including suitable office space, and that the attention given to Panagra passengers should be of a type comparing favorably with that provided by the domestic airlines in the United States and by Panair.

It seems to me important that the retrenchments that may be necessary in connection with the other Grace business should not be extended to Panagra.

Yours sincerely,

G. Vidal

GV:DM

[fol. 952]

GOVERNMENT'S EXHIBIT 456

PERSONAL

QUITO
November 21, 1940

Harold J. Roig, Esq.
New York, New York

Dear Mr. Roig:

Your personal letter of November 14 renders it evident that my private letter to you of November 7 was not clear to the extent that I seemed to be referring to the Quito Agency, whereas I was actually speaking of all agencies in Ecuador and I had in mind particularly the Agency at Guayaquil, which is responsible for most of the recent mistakes.

Holguin has been in Quito since then and he also appears anxious to render A-1 service at all points. I hope that his recommendations to New York will be approved without delay.

As I see it, the basic problem in Ecuador, so far as Panagra is concerned, is that the nature of our service requires higher standards than those generally prevailing

in the country. I am citing but one or two examples: In November 1939 I pointed out that the inside appearance of the Quito office was most unsatisfactory, particularly the paint job. Today, a year later, the situation is exactly the same and Holguin tells me that, as the lease expires next June, it is no longer worthwhile to paint the office. An international passenger stepping from one of our planes into the Quito office has every right to be somewhat shocked.

The plane dispatcher at Guayaquil, until recently, the source of the majority of the mistakes made, has the mentality of a 15-year old and was paid a salary of 600 sucres ($40 USC) a month. In an effort to assist the Ageney at Guayaquil we offered the services of Panagra pûrser Gonzalez, a very bright young man possessing all the necessary qualifications and earning a salary of about 1200 sucres ($80 USC) a month. Some doubt has arisen as to whether the Ageney can afford such a salary in view of those paid to employees handling other work.

This is why I feel that the Grace management in Ecuador should be told by Grace, New York, that Panagra operations are being compared constantly by passengers and others with domestic operations in the U. S. and with Panair's and that, regardless of what the local standards or the requirements of the other departments may be, Panagra must have excellent attention under all headings, suitable, clean and well furnished offices, and the highest type of personnel available, particularly so far as intelligence is concerned.

. . . . . .

Yours very truly,

G. Vidal

GOVERNMENT'S EXHIBIT 457

W. R. GRACE & CO.
NEW YORK

Letter No. 42
A. B. S. Trip Series

Air Mail: 11/27
New York: 11/29

Lima, November 26, 1940

D. S. Iglehart, Esq.
New York, N. Y.

Attention: Mr. H. J. Roig

Dear Mr. Iglehart:

CIVIL AERONAUTICS BOARD
GATES/HARDIN TRIP

Your letter No. 7.

Mr. Gates and Mr. Hardin arrived here Sunday afternoon from the South. You will, I presume, be hearing from Harris as to the details of his trip with them.

Gates was especially interested in the relationship between the Grace organization on the Coast and Panagra, and Garcia and I have spent practically the entire day with him today, with Harris and Campbell present, discussing this whole subject. Gates practically conducted an examination, and rather surprised me with the thoroughness with which he went into every phase of the agency arrangement. I explained to him in detail the way we are set up in Lima to handle the Grace agency functions, just what these functions are, the facilities available, and the men in our management and associated with us (Miranda and Ayulo) who are charged with the responsibility and who are available for consultation in connection with this phase of our business.

[fol. 954] Gates touched, among others, on two rather familiar themes. One of these was the competition which he said he presumed existed between Panagra and the Grace Line. Both Harris and I explained to him that this

supposed competition had never existed to any great degree and that with the development in air transportation and the trend of business travel away from steamers and toward the planes, it had grown and is growing steadily less.

The other subject which we discussed at some length was the possible detrimental effect which might result to Panagra's business by reason of its association with a firm such as ours, whose interests are so extensive and perhaps conflicting at times with those of Panagra. He stressed particularly the growing nationalistic feeling which he has observed in the South American countries which might lead to hostility against the Grace interests and therefore against Panagra. This, of course, was easily answered, and I went rather fully into detail in describing the policy which has been and is being steadily followed of associating ourselves ever more closely with influential and friendly national interests in all the countries in which we operate.

A third subject in which Gates displayed great interest was the matter of the compensation paid to Grace & Co. as Panagra agents. I told him that I was not prepared to discuss in any way the basis on which the Grace compensation has been fixed, as this is a subject of which I [fol. 955] know nothing, and that full information on this point was available to him in New York. He persisted in returning to this frequently in the course of our discussion and evinced particular interest in the method in which the compensation received by Peru is distributed among the Grace agencies here. We explained this to him fully, and finally he asked point blank how much Lima had received in 1939 from New York. As the only alternative to giving him this figure was to refuse to do so, I gave it to him as $34,507, but without any details.

In this connection you will, of course, appreciate that Garcia and myself went into the fullest description of the services performed by Grace in Peru and impressed upon him that the same functions as we attend to here are also performed by the Grace offices in the other countries on the West Coast.

Gates made copious notes of everything that was said and stated that he was doing so simply in order to refresh his own recollection.

Time will not permit me to go further into detail as to our conversation, which extended all told over four and one half to five hours, but I believe I have covered the high points of the talk.

Harris and Campbell were, of course, of great assistance in backing up and supplementing my description of the advantages to Panagra of having our firm as its agent on [fol. 956] the West Coast, and Gates expressed himself as being thoroughly appreciative of the time we had given him and of our discussion, which he said gave him an excellent picture of the arrangement under which we operate. I believe he grasped the picture quite thoroughly.

Very truly yours,

/s/ ANDREW B. SHEA

Mr. Harold J. Roig
New York, New York

Dear Mr. Roig:

COLOMBIA—What I am about to say is written in a constructive spirit, is intended for both you and Kirby and is based upon my own observations during the 30-day period I spent in Colombia last year and upon the comments made by responsible men in our organization who have had occasion to spend some time in that country more recently.

You will recall that I have felt for years that one of the important reasons why Panagra was pretty much of a stranger in Colombia until recently, was the fact that the Grace Agencies in that country did not have the time, the inclination or the knowledge to become interested in our problems and to protect us against moves made by Scadta's local management. In my opinion there has been a decided improvement since the Buenaventura stop was shifted to Cali and we are now much better known, particularly in the Cauca Valley. The fact that we are now in direct communication with Dr. Juan Uribe-Holguin, and that he understands the Panair-Panagra set-up better than he did a year ago, has also improved the situation in Bogotá quite a bit.

What I think still remains to be done is for Helbling and the rest of the management in Bogota and Cali to become faully familiar with our operations and with our problems, and for them to realize that our business has now grown to a point requiring a great deal of attention. Coffee and shipping have been their livlihood to-date and, whether they realize it or not, they have looked at Panagra as a relatively small business more or less foreign to them, causing a great deal of work and yielding little.

* * *

[fol. 958] Just an example: In Quito the Agency now has on its payroll, in addition to a first class Ecuadorean like Colonel Flores Guerra, Ballantyne, Cabeza de Vaca, Contreras, Barona, Vallejo (four of these speaking English fluently) and two other men, in addition to a secretary. This group is devoting approximately 95% of their time to Panagra matters and are busy every minute of the day with our four trips per week and incidental problems. The only addition since the domestic service started was Cabeza de Vaca.

In Cali, on the other hand, Morison, with one assistant given to him a few months ago, has been attempting to handle all Panagra work. It must be remembered that since September 1st Cali has been an overnight stop, whereas Quito is not. Airport Manager Wiggins at Cali, trained

by Panagra, is handling so many Avianca and Panagra schedules that, for all practical purposes, he is less available to Panagra in Cali than Airport Manager Vasquez is in Quito, for the latter handles only Panagra work.

* * *

Very truly yours,

(Sgd.) G. VIDAL

LETTER NO. DC-74

Mar 22 1941

SUBJECT: LA PAZ OFFICE

Lima
March 17th, 1941

Mr. Harold J. Roig
Pan American-Grace Airways, Inc.
New York City, New York

Dear Mr. Roig:

I enclose copies of our letter No. 1823-P to La Paz and of their reply No. 728-P, which are self-explanatory.

As I recall it, when discussing the matter of Sheldon's assignment a year ago with Dr. Guzman Tellez, he did not have any definite plan for re-engaging Brito, but he is correct in stating that he did not commit to take Sheldon permanently, having agreed to take him "for at least a year".

Personally, I feel that we should leave Sheldon in La Paz for an additional period and, in fact, figure on having

an American at the office there indefinitely, if not Sheldon, then someone else of the same type. Although Brito has his good points and can probably be of considerable assistance as a general contact man, the fact remains that, even during his period in charge of the Panagra work at the office, the actual work of selling, ticketing, and handling traffic was pretty sloppy, owing, I think, to the fact that there was simply no one at La Paz who had a real appreciation of how it ought to be done. Furthermore, with the development of the tourist business, some of which has already started to flow to La Paz, I feel that we should have a man in the office there who can speak the same language, literally and figuratively, as our passengers and can help us in our task of polishing up all phases of [fol. 960] our service to passengers and contact with them.

Another reason why I do not think Brito would be a good man to count on for this routine work is that he has always seemed to be pretty much interested in politics and there is no reason to believe that he would not leave us again, if a really good Government job were offered to him, as was the case before. I feel, however, that, if Guzman Tellez is so very anxious to re-engage him, that there is no reason why both Brito and Sheldon should not be in the Agency's employ to handle Panagra work, Brito to handle more general matters of Government contacts and Sheldon to handle the strictly sales and traffic handling matters.

This effort of the La Paz office to eliminate Sheldon seems to me to be rather important in principle, as it places somewhat of a stumbling block in the way of the training program on which we have embarked, namely, that of training young men for this type of work in the Panagra organization and then turning them over to the agencies to handle our work there. Naturally, if the agencies are going to oppose this program, except as a stopgap measure and are going to offer the young men in question no incentive for getting ahead, the whole program will bog down, and I believe Panagra work at the agencies will suffer.

As you know, in many cases it has been a pretty constant problem to get the agencies to be willing to employ and

pay the type of men we think are required for our work; and, although some improvement has taken place in recent years, it is always a real struggle at some points. If the agencies, such as the La Paz office, are opposed to employing this type of man or are opposed to paying the salaries required to engage and keep them, the only alternative left to us is to have some of the office personnel on our own payroll, as we do at Lima and Santiago; but I can fully appreciate that you would prefer to try and work the matter out with the agents, before resorting to this step.

In view of Dr. Guzman Tellez' positive statement in his letter attached hereto, I am afraid it is going to be difficult to get him to change his mind. I had thought some [fol. 961] of perhaps making a short trip to La Paz for the purpose, among other things, of selling him the idea of keeping both Brito and Sheldon; but, first, I would like to have your reaction to the problem as a whole and your approval of my approaching it in the manner I have indicated.

Sincerely yours

Douglas Campbell

GOVERNMENT'S EXHIBIT 460

Letter No. 4

A. B. S. Trip Series

Lima, April 19, 1941

D. S. Iglehart, Esq.
NEW YORK

Dear Mr. Iglehart:

PANAGRA

In line with our conversation in New York, I have discussed at length with Campbell, Kirkland and Stebbins, as

well as with Garcia, the question of the housing of the Panagra Staff.

With respect to Stebbins, I spoke with him privately and took him severely to task for his action in approving Kirkland's recommendation in the form in which it reached New York.

It is quite apparent that Stebbins signed the RCA form without giving the subject very much thought and upon the urging of Kirkland. Kirkland told him that the idea of putting up a new building in Limatambo had been approved in principle by everyone concerned and while Stebbins did raise the point as to the provision of space for the SAGO staff, he states that he finally signed the application in order to "raise the issue". He then wrote a letter on the side, calling our attention to his action but the letter, as you know, is so weak that it was hard to determine from it just what Stebbins' attitude was on the matter. I told him in Garcia's presence that he had no business to sign the application unless he approved the whole project and I also reminded Garcia, whom Stebbins had consulted, that the signing of these forms is by no means an empty formality. I repeated that the purpose [fol. 963] of requiring Lima's approval of the applications is to exercise control over proposed capital expenditures and that if they are to be signed simply to complete the form then the signature will become meaningless.

It is evident of course that Stebbins' action was taken without due thought. He has admitted his mistake as has Garcia and after the discussion we had on the whole subject, I am sure that matters of this nature will be studied in the future with great care by the Lima Management before its approval is given.

I then asked Garcia and Stebbins how they felt as to the merits of the proposal that Kirkland's department and the Accounting Department move out from Lima to Limatambo. I explained fully to them our policy with respect to Panagra affairs as covered in our discussion in New York and they both agree that it would be wholly undesirable to make this move.

I then discussed the whole subject fully with Campbell and with Kirkland. Campbell, of course, had been absent in Chile when the RCA form was signed and forwarded and he told Kirkland upon his return that he thought the latter had gone much too far. I explained to each of them clearly the importance we attach to the maintenance of contact between them and our organization here and Campbell very readily admitted that if he had an office in Limatambo he would undoubtedly spend practically all of his time out there and as a result his contact with Garcia and Stebbins would probably diminish to the vanishing point.

Both Campbell and Kirkland also agreed that in view of the fact that either of them is almost constantly absent from Lima and as it is desirable that the head of the Panagra [fol. 964] business keep in constant touch with the Grace Management here, it would be undesirable for Kirkland to move to Limatambo.

With respect to the Accounting Department the principal object in view apparently is to have both the SAGO Accounts and the Limatambo Accounts under one head. I agree with this which I also discussed with Nelowet and which simply means that we shall have to provide additional space in Lima for approximately 14 employees now occupied in the accounting section at the field.

I must say that as a result of my discussion of this subject with the men concerned I feel that there was no deliberate or concerted effort to lessen the present influence of the Grace Management here on Panagra matters. There is no doubt at all in the case of Campbell and as far as Kirkland is concerned, I believe that he looked only at what he considers to be the practical advantage of installing himself and his assistants in Limatambo.

. . . . . .

Very truly yours,

SHEA

LETTER NO.
5634

SUBJECT: TICKET OFFICES

Lima, May 7, 1941.

PANAGRA NEW YORK

Att: Mr. C. de Groot

LIMA OFFICE:

Further to our letter #5572, the other day I arranged a meeting with Messrs. Shea, Stebbins and Woll during which I pointed out the need for providing Panagra with a first class modern air line ticket office, located either in the Hotel Bolivar or near vicinity, with neon sign, modern show windows and all the other trimmings which go to make up a modern airline office. Three years ago I had a similar meeting in which the idea was turned down but after pointing out to Mr. Shea that Panagra was now selling more passenger business than Grace Line he took the attitude that whatever was best for Panagra's interest should be carried out.

As a result of our conversation we decided that Mr. Woll would submit to me a budget with full details regarding the proposed new office and that in the meanwhile both Mr. Shea and myself would write to New York to inform Messrs. Iglehart and Roig. Mr. Shea pointed out that Mr. Iglehart had definite ideas regarding Grace offices on the west coast, and it is my understanding that his ideas are that Panagra should be located in the Grace buildings. In any event, it appears that Mr. Iglehart will have to approve the plan of separating the ticket office from Grace & Co., therefore, it is my suggestion that you speak to Mr. Roig and explain to him the need for making the change and also point out that the change in no way affects

the Grace Co. organization insofar as Panagra's representation is concerned.

Regarding this last point I would like to state that when Mr. Shea asked me whether this would bring about a change in the Management, I advised him that it would not for the reason that it would merely mean that the ticket office would be moved out of the Grace building to a new location with no change whatsoever in personnel or management. In other words, insofar as Panagra is concerned, we will continue to address our letters to Grace & Co., agents for [fol. 966] Panagra, and as far as running the ticket office is concerned, Mr. Woll, Sales Manager, will continue to work directly under Mr. Stebbins and the Grace Management in Lima.

I believe the above should be carefully explained to Messrs. Roig and Iglehart at the time you bring this matter to their attention, otherwise I am afraid it will be a difficult job to sell Grace on the proposed plan.

Ticket Office

New York, June 4, 1941

Mr. Douglas Campbell,
Lima, Peru

Dear Douglas:

When I first read Lima's No. 5634 regarding Lima Sales Office, I did not take it very seriously. In speaking with

Woll the other day, however, it appears that he regards this change not only seriously but imminent. I am therefore calling the matter to your attention in order to prevent time being unnecessarily wasted in this connection.

It is my understanding that the facilities provided by the proposed extension to the Grace Building will give ample opportunity for a Panagra Ticket Office in whatever form seems most suitable. I see no reason for considering any change in the meantime. I have no objection to trying on an experimental basis, the idea of having a representative on an inexpensive basis at the Hotel Bolivar but I see no reason for considering a complete removal of the traffic office.

Very truly yours,

Roig

GOVERNMENT'S EXHIBIT 463

PAN AMERICAN-GRACE AIRWAYS, INC.
135 East 42nd Street New York, N. Y.

Letter No.
DC-87

Lima, June 9, 1941.

Mr. H. J. Roig,
NEW YORK.

Dear Mr. Roig,

With reference to your letter No. 64, you have no cause for concern with regard to my own point of view on this matter as I have repeatedly told Muhlfeld that any consideration of moving the entire traffic office to another location would simply be a waste of time.

This whole matter is to a certain extent the outgrowth of DeGroot's recommendation that our ticket offices at all points be "streamlined" in order to make them similar to modern travel ticket offices in the States, and also his suggestion that some of them could be better located in the re-

spective cities in order that the traveling public would be more likely to see them. However, DeGroot was looking at this from the point of view of the American tourist who is still only a small part of our business and I think that he overlooked the fact that in a town such as Lima any one who is likely to travel by plane is fully aware of the location of the office.

I am in favor, however, of having a representative with a desk in the Hotel Bolivar or vicinity with proper telephone connections to the ticket office, airport and Reservations Control, as I feel that our tourist clients as well as overnighting in transit passengers are entitled to the additional convenient service that such a setup would make possible.

As Muhlfeld is leaving for New York tomorrow on account of the unfortunate critical illness of his father, you may have an opportunity to point out to him your ideas and general policy with respect to the above.

Sincerely,

(Sgd) DOUGLAS CAMPBELL

Cable Address "PANAGRA"

Letter No.
TJK-8

Subject: ECUADOR

Lima, February 3, 1942.

Mr. H. J. Roig,
NEW YORK

Dear Mr. Roig:

I refer to your letter No. 7 dated January 16th on the above subject.

I believe that you will find that a large number, if not all, of the points mentioned in your letter are covered in my letter No. 7222-P which is going forward by this same mail.

We cannot, in my opinion, be content to blame these recent flare-backs in Ecuador on one specific thing such as maintenance. That item as well as many others should come in for its share of corrective measures and we intend to spare no effort in what we can do towards making improvements in the situation when even so it is not as bad as it sounds.

* * * * *

In any event, we have the problem ahead of us in Ecuador to combat the feeling that the DC-2 is an obsolete and worn-out type of aircraft. I made progress with Minister Long in giving him the details of the amount of money we have recently spent on keeping the DC-2 aircraft modernized, and so forth. I also went into further detail with Mr. Long pointing out the demands now on us regarding our mainline operation, etc. I further reminded him of the investments we had effected in making the airport in Ecuador all-weather year-around fields. Points such as Cuenca, Manta and Esmeraldas were this year enjoying uninterrupted service on all-weather fields whereas a year ago these points either had no air service whatsoever or were having interrupted service when field conditions were wet. I feel certain that considerable progress was made with Mr. Long in outlining these facts to him.

Mr. Moscoso and I called on the President of the Republic and spent a very worthwhile visit with him. He was [fol. 970] most cordial and again reiterated his understanding of our problems, but he did wish to advise us that he had heard certain criticism on the part of the public and certain Ecuadorean officials as regards the use by Panagra of obsolete type of aircraft. He said that he felt this was the result of an abnormal number of delayed schedules, a number of which had resulted from mechanical difficulties. He also said that this unfortunately came immediately on the heels of Panagra's withdrawal of the international planes from the Quito stop and consequently this did not

help us any in the public reaction. This conversation with the President was, in our opinion, very favorable. We did not find anything in his attitude to make us feel unduly concerned.

• • •

In the meantime, I am in receipt of a cable from Shannon in Bolivia urging that we approve the exchange of Griffis for Stringer and stating that after going over the situation with Shea that the latter also heartedly agrees with our opinion in the plans of exchanging Griffis for Stringer.

While I have a high regard for Mr. Moscoso and the intelligent manner in which he and his office appreciates and helps with our problems in Ecuador, I must confess that I am somewhat taken aback by his letter of January 29th to you on the subject of Ecuador. Our agents there have already been aware for sometime that the criticism around our service in Ecuador is only in part due to the remarks stressed in Moscoco's letter to you as to maintenance and Operations. It seems that all our agents should realize that they share with us in the responsibilities of conducting an efficient service and should not appear too ready and willing to duck out from under by laying the blame to the strictly technical end of the business. The handling of our passengers, reservations, and counter, and information service in Ecuador shares equally in the blame in the recent flare-up of criticism and complaints. We have many cases of mishandling of passengers and misrouted express and baggage etc, over that part of the route. Perhaps, sitting at this distance we are inclined to misinterpret and overshoot on our own importance, but when we notice what far reaching effects this recent criticism in Ecuador can bring about, I often wonder whether I am out of order in think- [fol. 971] ing that in Ecuador possibly our agents should set themselves up primarily on footing required to properly handle Panagra business and to take their other activities in the stride, rather than appear to take Panagra business in the stride. I am, of course, in communication with Mr. Moscoso with the details of the problem we were confronted with last week and I hope to receive his usual good cooperation.

In conclusion, I again reiterate that we are sparing no effort to keep behind this matter and I will keep you well advised of anything out of the ordinary.

Yours very truly,

(sgd) T. J. KIRKLAND
T. J. Kirkland

AIR FREIGHT STUDY SERVICE

Lima, March 13th 1942.

W. R. Grace & Co.
La Paz.

Att: Mr. A. C. Poole

* * * * *

In connection with my recent trip to Bolivia, I found that our interior Agents are making any number of errors because they have not been properly trained as regards ticketing, airway billing and traffic handling. Furthermore, I noticed a definite lack of coordination between pursers, dispatchers and city Traffic Representatives, all of which has resulted in our giving poor service to the public.

* * * * *

In connection with your reports following each inspection trip, please limit same to what has been done, and minimize what must be done. In other words, what we want here is a report on what progress has been made, and not a report loaded up with detail as to what should be done, unless, of course, certain matters require action being taken here at S.A.G.O., in which case you should carefully present to us each problem and, in your opinion, its proper solution. As stated, therefore, your work should be largely one of on-line inspector and prompter.

SALES AND SERVICE—BOLIVIA

La Paz, Bolivia
October 24, 1942.

South American General Office
LIMA.

Attention: Mr. J. E. Muhlfeld

Having completed an inspection trip with stopovers between schedules at each of the Bolivian Sawtooth stations, the undersigned wishes to submit the following report for your information.

Our agents at these points can be made to handle the simple duties required of them only under the strictest supervision from our central office. Following a careful check with the municipal authorities at each town and from first hand observation, I am certain that the individuals now acting as our agents are better qualified to represent us than any other men we could obtain locally, yet it must be borne in mind that under the present W. R. Grace budget, living conditions in this region require us to find our agents from among established residents of these villages. The alternative, of course, is to send down trained employees from La Paz or Cochabamba on short-term assignments at salaries adequate to maintain them as full-time agents and compensate for the miserable standard of living such agents would have to put up with. Since this is an expense W. R. Grace & Co. is not in a position to assume, we must do our best with the poor material on hand, and by steadily pounding away with first hand instruction, make the present organization operate to our satisfaction.

Such supervision must take the form of inspection trips involving stopovers at the points concerned by a responsible member of the central office at least once every two months, notwithstanding the fact that such a tour takes nearly three

weeks according to schedules and represents some physical discomfort of an enlightening variety. While from time to time we have sent subordinate employees from La Paz and Cochabamba on training assignments to the Sawtooth stations, the unsatisfactory progress made to date clearly shows that such field work must be undertaken only by our chief traffic representatives if we are to achieve the required results. It has been found that circular instructions emanating from La Paz, regardless of simplicity and clarity, are of only partial effectiveness in dealing with employees of limited education and intelligence.

At Concepcion, our agent is Mr. Juan Asin Jemio, a man of two years experience with Lloyd Aereo Boliviano under former management. In addition to his agency fee [fol. 974] he earns an income from the Bolivian state radio at Concepcion, where he spends two hours of the day working as operator. His work to date has been fair, yet discrepancies have been reported in his gasoline statements, now being investigated, which may disclose manipulation of funds which will require his dismissal.

At San Ignacio our agent is Mr. Carlos Mayser, a German of Bolivian citizenship and a former employee of LAB. The question of Mayser's nationality has been under discussion for some time. In December of last year we advised the U.S. Embassy of this man's status and it was suggested that he be removed. Subsequently Grace & Co. attempted to find a replacement in San Ignacio without success, and since there appeared to be no danger from this quarter the matter was dropped. The undersigned made a point of investigating this man's activities in conversation with people in San Ignacio, in particular with Mr. Samuel Decker and Mr. Frank Pickering, american missionaries stationed at Concepcion and San Ignacio respectively, both of whom have known him for a number of years. Mayser has lived in San Ignacio for thirty years, is married to a Bolivian and has four children, none of whom speak German, the eldest of whom fought in the Chaco war with the Bolivian army. He is a respected citizen of San Ignacio with a good reputation, and in partnership with is brother represents the only business unit in the town. Under one roof is the

Post Office (his brother is Postmaster) consisting of a battered desk and shelves at one end of the room, while at the other end is the "Panagra Office". In the center is the General Store, run by both brothers. My personal impression of Mayser during four days stay in San Ignacio confirms all reports I have heard regarding his character, namely that he is 100% honest (a rare virtue in these parts) and loyal to the company. While we cannot be certain that his private sympathies are not on the side of Germany, he has kept his views to himself and steered clear of political activities, nor has he been known to have expressed any opinion derogatory to the company. On the contrary he has shown more interest in the company's welfare and a greater conscienciousness toward his job than any of our agents in this sector, and we firmly believe that Mayser would be in a position to do us greater harm in San Ignacio if we dismissed him for political reasons than if we maintained him as our agent, a job he is handling satisfactorily. Recently Mr. Shea of the United States Embassy visited San Ignacio and has reported to his superiors that this man is harmless. We have outlined the above for your information in case the question of our agency in San Ignacio should come up for discussion again in the future.

Our agents at San Jose are La Torre Hermanos, two brothers who own the town's general store. These are the only agents on the Sawtooth who have not had previous [fol. 975] experience with LAB, having been appointed as replacements to the former agent, Neptali Cuellar, when it was discovered that the latter, an old LAB employee, was engaged in anti-american activities. La Torre has shown interest in his work and as he and his brother are young men we should be able to build up an adequate permanent agency at San Jose, which point, located on the line of the projected transcontinental railroad, will increase in importance in the coming years. At present there are a number of Brazilians of the Comision Mixta Ferroviaria working on the railroad project at San Jose, promising an increase in traffic between that point and Corumba, headquarters of the comission.

In Robore our agency is managed by Luis N. Landivar, with two assistants. This man has had five years' experience with LAB, and is the only employee on the Sawtooth who does not run a private business on the side. He is the most intelligent and capable of our Sawtooth agents, yet dissatisfaction with his salary has recently expressed itself in drink and a lack of interest in his job; the cure, stricter control and increased salary. More serious is the probability that he has been selling company gasoline against falsification of his gas reports, now being investigated by Mr. Brookshire. Here is a situation similar to that in Concepcion, which, if proved, would under normal circumstances demand the immediate dismissal of these agents, yet in view of the impossibility of finding qualified local replacements, we must think twice before taking the obvious measures and look for a way to bring these men into line.

Robore is probably the only village in the Oriente region which should show real signs of material progress in the near future. As the center of activity for engineers of the Comision Mixta, it provides a growing movement to and from Brazil, while the town itself has natural resources in the form of agricultural land, good sanitary conditions, and a potential source of hydro-electric power which should insure its rapid development as soon as the railroad line reaches it in an estimated eighteen months' time. Stoppage of supplies due to Brazil's entry into the war will handicap progress on the railroad to a serious degree, and, with the exception of Robore, it is doubtful whether this project will alter the primitive and poverty-stricken aspects of the towns served by Panagra in Eastern Bolivia for a number of years.

In April Mr. Federico Knaudt was sent to Puerto Suarez to replace Antonio Rivero, now assistant to Miranda in Cochabamba. Knaudt is a third-generation Bolivian of German origin, former cashier of LAB's Cochabamba office, and a high type of employee who has done an excellent job at Puerto Suarez in spite of a lac of familiarity with Panagra methods at the time of his transfer. Our staff at Puerto Suarez consists of the agent and two assistants, with a spacious office which on arrival of new furniture

[fol. 976] and fixtures being shipped from Cochabamba will be well equipped. From the standpoint of traffic movement this is by far our most important agency east of Santa Cruz. Excessive heat, mosquitos, poor food and sanitation plus the exhorbitant cost of all prime necessities make living conditions in Puerto Suarez a real hardship for any man assigned to that point from La Paz or Cochabamba, and unless a system of station allowances is set up, a matter which will be discussed further in this letter, our personnel turnover at this and other points will remain a chronic problem.

As outlined in my letter of October 5th, adequate passenger overnight facilities at Corumba are now available with inauguration of the new guest house, and we assume that you are taking up with Rio the question of joint payment of costs. Panair do Brasil has opened a new office, and the deficiencies resulting from Rocha's lack of experience, involving reservations handling and mail transfer documentation as noted in my letter No. 2 from Corumba of last April 15th, have been straightened out to our satisfaction. You will be interested to know that Panair has nearly completed installation of a powerful new receiving and transmitting station at Corumba which will provide direct circuits to Lima and vastly improve our local communications to that point.

Training activities of the undersigned at the stations listed above covered all aspects of traffic handling involved in the work required of these agencies, including the following basic points: (1) Review of reservations procedure, disposition of allotments, use of purser's control card, etc. (2) Handling of express, with particular emphasis on tracing of claims, filing of claim forms, use of revised express receipt procedure, documentation of valuable shipments. (3) Mail handling, reception and delivery to planes and routing in accordance with new schedules. (4) Drill in passenger and express tariff calculations, particularly as applied to international rates to Brazil. (5) Revision of discount procedure to be followed on extension of special rates under CL-19, CL-20D, members of the Comision Mixta, etc. (6) Use of Weight Report, AUL's, and general

dispatch. (7) Handling of reservations requested by blocked nationals. (9) Complete revision of files and inventory of accountable forms on hand. (10) Establishment of requisition vouchers whereby inventory of supplies will be submitted monthly to La Paz, which office now controls distribution of all traffic forms.

It was found that the filing of circulars and tariff revisions at all of these agencies was in a thoroughly disorganized state, while stocks of accountable forms and office supplies, dependent on the former uncertain distribution system out of Cochabamba, were incomplete and in some cases lacking in the most fundamental necessities. Accordingly the undersigned devoted considerable time to [fol. 977] sorting out the files, revising tariffs, dividing correspondence into separate folders and arranging circulars for ready reference. Large accumulations of old english circulars from Sago, which are useless for these agents who understand only Spanish, were thrown away, and the whole filing system pared down to the simplest essentials. As you know, for the last six months all bulletins from Lima have been cleared through La Paz, edited, and redistributed to the interior stations in the form of highly simplified instructions in Spanish. We have gone to a lot of trouble at La Paz to cover important phases of traffic handling in this manner for the benefit of our smaller agencies, yet, while each station was found to have this series of circulars on file, their comprehension and adherence to these instructions, due to the mental limitations of the agents themselves, will never be satisfactory unless backed up by periodic first-hand supervision.

We can state that there has been a definite improvement in reservations handling along this route, through a better understanding of procedure by the agents, revision of allotments, and a more efficient control of space maintained at Cochabamba. In hand with a smoother operation of reservations, dispatch problems in the nature of overloads have been cut down substantially. Poor radio service as a result of inadequate equipment and a serious shortage of trained operators will remain a handicap to our reservations set-up until this problem is finally straightened out by the Communications Department.

Our most important objective toward improving service along the Sawtooth is in seeing that mail and express is handled in strict accordance with documentation and receipt procedures standard over the rest of the system. In sounding out the status of our public relations at these stations, I have found that complaints are limited almost exclusively to mishandling of mail and express. Our training efforts along these lines have resulted in some improvement, but the few cases of mail overcarriage, loss or damage to express caused by sheer carelessness, represent irritations to the parties concerned which go a long way toward wearing down progress made in other directions. Some of the technical aspects of this problem have been covered in our recent correspondence to Sago. Primarily we are interested in speeding up payments on claims, which you will agree is a service of vital importance to our public relations. Delays due to lack of familiarity with claims procedure on the part of our agents is one side of the picture we are doing our best to improve; on the other hand, the [fol. 978] fact that claims must be cleared through Lima and sometimes through the insurance company represents an additional delay which, though largely unavoidable, does not sit well with the Bolivian public accustomed to the less formal methods of LAB. It is obvious that the delayed payment of a claim, rather than satisfying the claimant, leaves him with a feeling of resentment that he has been casually treated by a company which has little interest in the satisfaction of its customers, and, while he is waiting for his reimbursement, feels free to air his criticisms among his friends, a type of adverse publicity which spreads like wildfire in the small communities served on our Bolivian routes. With improved express handling our claims are becoming less frequent with each month, and those that are encountered involve insignificant sums which should make the whole problem a very minor matter, were it not that delayed settlements cause irritations entirely disproportionate to the original injury incurred. If our recent efforts at training agents to speed up tracing and filing of claims, coupled with the streamlining of Sago's claims department, fail to improve this service, we intend to propose a system whereby La Paz may be authorized to effect immediate pay-

ment on claims up to a limited value per month, pending receipt of Lima's credit against clearance of the proper documents through the customary channels.

All agents have been drilled by the undersigned in the new express receipt procedure which has replaced the old Lista de Embarque system with use of purser's waybook sheets. We have prepared at La Paz fifty new special mail sacks, designed for the carriage of paid and company only, for use within Bolivia. On arrival of the Transcontinental at La Paz, twelve of these sacks will be put on board, tagged with the names of each local station, and as mail is received en route, it will be placed by the purser according to destination in its corresponding sack. On arrival at destination sacks will be emptied at the field and the contents delivered, but under no circumstances will the sacks themselves be turned over to the agents, since these will remain on board the plane, to be offloaded at La Paz on the return trip to Lima. Such a system will avoid the dangerous practice of loading mail in express sacks subject to offloading due overloads en route, and will further prevent overcarriage of small mail packages which are often piled indiscriminately on the rear seat by the purser. These sacks are now ready for use. We have further suggested to Sago Operations the construction of detatchable metal shelves, with [fol. 979] compartments marked for each station for insertion in the rear parcel racks, as a means of filing documents and remesas for delivery along the route, in addition to ordering a number of large expanding leather briefcases for the same purpose. With little more than half an hour between stations on the Sawtooth the purser is obliged to be a sleight-of-hand expert. With mail, mail guias, express lists, weight reports, company mail and all sundry documents stuffed into his clipboard or piled on the rear seat he must rush to make up his transit weights, load distribution, discharge lists, and gather together his papers for delivery to the next station while passengers are clamoring for his attention up and down the aisle. Our job, then, it to simplify the purser's functions as far as possible, and one way this can be done is to set up a physical filing system on board the planes, as outlined above, so

that distribution of documents can be effected in an orderly manner.

It is clear that any amount of efficiency we can develop in our agents can be nullified by sloppy work on the part of pursers. This subject has been covered at length in previous correspondence but we are still not satisfied that pursers assigned to this route are the best men available. If a new man is to be assigned to the Transcontinental run, he should not be allowed to work alone until he has completed at least two trips as extra crew, travelling NSPL, under the guidance of an experienced purser. Since his work on this sector is highly specialized, involving use of forms and procedures not encountered on our coastal services, a new man is bound to be at sea if he is sent out green without proper instruction. The agent at San Jose mentioned that one of the new pursers stepped off the plane at that point and asked the agent the name of the station! I have found new pursers with only a hazy comprehension of the reservations charts placed on board the planes at Cochabamba, with Guias de Remesas, the new running load chart, and other fundamental documents. We cannot afford to run these risks, and it is essential that new men be sent out on the line under the direction of experienced pursers before assuming responsibilities on their own.

Unless we can count on the establishment of training courses at Limatambo, under the control of a purser's technical department dependent on Sago Sales, and *not* under the Steward's Department, it does not seem likely that we [fol. 980] will ever satisfactorily solve the problem of obtaining efficient service from pursers operating out of Lima. Besides the actual handling of their duties, which depends on training and experience, these men are under a considerable physical strain in flying from Lima up to the Altiplano and down again to the heat of the Oriente region, and it is only natural that they lose their normal efficiency when working under pressure in the face of these conditions. Hence it seems difficult to break them away from the attitude that they are travelling on a barnstorming operation, a frame of mind enhanced by the physical strain they are working under which in some cases develops impatience and

irritability in dealing with our local passengers and agents along the line. As a rule Bolivians have a national inferiority complex and sensitivity which resents a lack of the proper deference from a Peruvian or an Argentine, so that it is all the more important that our pursers be trained to give efficient and courteous service.

The root of the problem lies in the fact that pursers have become so bogged down in paper work that they no longer exercise the function for which they were originally intended, namely service to passengers on board the aircraft. In Bolivia, where there are a greater number of stops in one day's run than on any sector of our international routes, the problem is accentuated to a point where, unless these men are rigidly trained, we may either have to revise the whole theory of pursers' functions or fly with two pursers, one to handle the load documents, and the other to attend passengers, an extreme measure which should not be called for were the system properly organized. Thus our efforts should be directed toward freeing the purser of as much paper work as possible, and as an example, we have been working at Cochabamba on an idea developed by Mr. Sampson, Airport Manager, whereby transit weights and discharge lists can be radioed between stations from the ground thereby relieving the purser of his two most complicated duties. While the theory looks fool-proof on paper, its execution depends on a highly efficient radio service which as yet does not exist in Bolivia, and we shall have to try it out in practice between Santa Cruz and La Paz before proposing its operation to Lima.

Recently an operations circular was published announcing the adoption of waybook sheets in place of the old Lista de Embarque system. We accordingly instructed our agents [fol. 981] in this procedure, yet we have not seen a single purser handling these documents correctly. As a matter of fact we do not think much of the system itself, a question we are taking up in a separate letter, but that is beside the point; the fact remains that the pursers are not following it out. We must insist on their filing express receipts in the Waybook designed for that purpose, instead of stuffing them at random into their clipboards; we must insist

on their collecting their mail packages, discharge lists, and express lists for orderly delivery to the next station, and insist on their cooperating with agents in checking cargo on and off the planes. There is nothing unduly difficult in this procedure, yet to date there has been no organization set up at Limatambo capable of training pursers to a point where they will show a better comprehension and sense of responsibility in the handling of their documents.

Obviously the Chief Steward has neither the technical experience nor the inclination to instruct pursers in this aspect of their work. We understand that at present Mr. Fuentes is in charge of documentary matters. It would appear, however, that there is a crying need for the establishment of a full-fledged purser's control section independent of the Stewards Department, as an integral part of either Sago Sales or Sago Operations, under the jurisdiction of a specialized administrator. This man should remain constantly in touch with purser's handling problems, investigate deficiencies, and take frequent trips over the line to consult with agents and examine documentation on board the planes. In view of the increasing complexity of the paper work required of pursers we can no longer afford to leave purser's training in the hands of the Stewards Department. We do not doubt that you already have this situation in mind, and look forward to the opportunity of inviting the chief of the purser's handling department to take a trip over our local routes, so that we can finally get down to business in straightening out these deficiencies.

[fol. 982] Last week, following a planned investigation, we succeeded in clearing up the express losses at Santa Cruz which have been puzzling us for the last two months—nothingless than a series of robberies committed by the assistant express clerk of that office. In addition to the Gonzales case, and a subsequent discovery of thefts at Cochabamba in August, this makes the *third* example of air express robberies committed by agency personnel in Bolivia during the last six months. We have turned the case over to the Santa Cruz police with the recommendation that it be dealt with in the strictest manner possible, and will advise you of the full details as soon as the prosecution has been carried out.

How are we going to avoid this sort of thing in the future? There is only one answer, and that is the payment of adequate salaries to agency personnel. The employee caught in the Santa Cruz robberies, responsible for the reception and delivery of hundreds of valuable local and international express shipments per week, was receiving a wage of Bs. 1500, or $33. U Sey per month, after one year's service with the company. In Santa Cruz, where the cost of living is exorbitant, such a wage scarcely permits subsistence on the lowest level. Is it any wonder, then, that a man employed under such conditions fails to value his job highly enough to dissuade him from resorting to dishonest means in order to increase his income? If the budget of W. R. Grace & Co. prevents us from obtaining high-grade, satisfied personnel, then we must continue to hire and fire, at the expense of efficiency and prestige, around a diminishing nucleus of those rare employees whose ambition surmounts considerations of gain.

It is indeed discouraging to have to report that after a year's effort the development of Panagra's sales and service organization in Bolivia is still hopelessly handicapped by low-scale agency payrolls, and we cannot emphasize too strongly our contention that it is high time the matter was brought to a showdown. I am not exaggerating when I say that unless the Bolivian payroll is increased by at least $2000. per month, spread over all twelve agencies, our organization stands in real danger of disintegrating. Such a figure will strike W. R. Grace & Co.'s comptrollers as an appalling expense which will create a prohibitive disproportion between the wage scale of employees engaged in Panagra work and employees engaged in the merchandizing line of W. R. Grace & Co.'s business, yet it seems difficult to get the idea across that the duties performed by a Panagra employee, down to the lowest counter clerk, demand a knowledge of complex procedures and above all involve individual responsibilities far and above other types of selling jobs. As an illustration, we need only cite the case of the express clerk at Santa Cruz, a low salaried, dissatisfied employee, who in committing a series of air express robberies has done irreparable harm to our public relations and prestige in Santa Cruz.

[fol. 983] The nature of our work calls for an intelligent, educated employee who in many cases must speak English. In Bolivia such a type comprises only a tiny fraction of the population, limited to the highest social levels, consequently in great demand by the government, banks, and all large commercial houses. So far we have been very lucky in obtaining a few exceptionally capable employees of the best type, boys who through ambition and a genuine interest in Panagra have stuck to their jobs with a loyalty well out of proportion to their wages, yet any one of these men can walk across the street and in twenty-four hours land a job with the Foreign Office, Hoschild, Aramayo Mines, the U. S. Embassy, at double the salaries they are paid by Grace. Today the glamor is wearing thin. After two months' travel in the interior listening to a monotonous chorus of salary complaints at all our agencies, I have returned to La Paz to find that the situation in this office has reached critical proportions. Four of our men have announced their intention to resign within a month, while I have found specific cases of other employees deliberately slacking on their jobs in order that the company shall fire them, and in so doing pay the indemnizations required by law. Morale throughout Bolivia is deteriorating so fast that we shall need more than a prayer to hold the structure together in the coming months, and it is quite correct to state that if we were to lose three key men tomorrow, let us say Ballivian at La Paz, Miranda at Cochabamba, Pictor at Santa Cruz, our traffic organization would fold up overnight. This is a very real possibility. As one example out of many, Ballivian, chief traffic representative at La Paz, last week was offered a job by Aramayo Mines, Inc. at a salary just *double* the Bs. 3500 ($75. U.S.cy. per month.) he now receives. Ballivian, however, happens to be one of those rare people who have our company's problems at heart, so he refused the offer; but of course we can't expect him to display such gallantry indefinitely.

In taking this matter up with the local W. R. Grace management I expect to receive a very understanding response, and as in the past, several salary increases will be authorized. These increases, however, will be tied to the strict

budget scale set up by New York, with the result that token increases will be apportioned in small amounts just barely sufficient to persuade the employees that it may be worth their while to hang on a little longer. This won't do. For in another three months, the pressure of dissatisfaction will build up again, and we have gotten nowhere.

Fundamentally we are working against a time-honored policy of getting as much as possible for as little as possible, of squeezing payrolls down to a point where the organization will just get by on the lowest required minimum of efficiency. Thus our personnel structure remains one step behing the normal development of our business, and in [fol. 984] Bolivia, with traffic increasing month by month, promising the establishment of additional schedules in the near future, we are faced with a continuation of the uphill battle to adjust our agency payrolls to meet the growing demand. While we are spending thousands of dollars on airport expansion and technical equipment, our agency sales organization lags dangerously far behind, when a revision of policy, involving relatively low expenditures, can rapidly provide us with the quality of personnel we so urgently require.

I believe the local management of W. R. Grace & Co. are sincerely endeavoring to better these conditions, while forced to operate under a rigid expense control established by the executive offices in New York. The problem goes far deeper. It calls for a revision in our way of thinking, the abolishment of a wage policy which has brought W. R. Grace & Co. a very distasteful reputation throughout Bolivia. Until we adopt the theory that salaries must be calculated to give us satisfied, enthusiastic employees with *pride* in their jobs, we are simply fighting a losing battle.

* * * * * * * * * *

In order to round off my report on our traffic and service set-up, I wish to outline briefly our projected program.

Regarding agency personnel at Santa Cruz and Puerto Suarez, the volume of business at these points requires us to place responsible employees from our central offices in

charge, since it has been impossible to obtain sufficiently qualified local men. Chief of the Panagra section at Santa Cruz is Mr. John Pictor Blanco, formerly of our Cochabamba office. Working under him are five employees, natives of Santa Cruz, each with from eight to twelve months experience with the company. Within the limits of Grace & Co.'s wage scale, these men are the best obtainable, but like most Cruzenos, are basically lazy and unreliable. Add to this racial characteristic wage dissatisfaction which saps enthusiasm for their jobs, and you can understand why we have so far seen no possibility of being able to staff Santa Cruz and Puerto Suarez with 100% local personnel, where increasing traffic demands a first-rate organization.

In order to develop a more flexible organization in Bolivia, we plan to send our advanced employees from the La Paz office on six-month assignments to the smaller stations. Such a procedure is necessary, for example, at points such as Puerto Suarez and Santa Cruz, where the poor caliber of local employees requires us to place these offices in charge of trained men from La Paz or Cochabamba. Santa Cruz, beyond the robbery incident mentioned above, has been working excellently to date, but only through the efforts of Pictor, who has had to supervise and drive his [fol. 985] subordinates to a point where he has been carrying most of the weight on his own shoulders. By obtaining a small salary increase he has been willing to stick to the job, although overwork, illness from bad food, and the necessity to help support his family in Cochabamba makes it a tough proposition. No one-man show is a healthy condition, so that we must lend Pictor a well-trained assistant, and subsequently relieve him for another post, replacing him with two men from La Paz who will take charge of the office for a limited period. At the end of six months, these men in turn will be shifted, in line with a definite program which aims at giving our more promising personnel a broad background of experience on different sectors of the line. This is just wishful thinking at a time when we have little more than a skeleton staff to spread over our Bolivian stations, but we confidently hope, with a reform of agency policy, to build up a reserve of trained personnel at La Paz,

where a higher type of employee can be obtained. In order to send men from La Paz and Cochabamba on long-term temporary assignments to our interior stations, it is absolutely essential that special allowances be set up at these points. The exhorbitant cost of all price necessities at Santa Cruz and Puerto Suarez, not to speak of the physically harmful living conditions, make it almost impossible to maintain an employee sent down from our central offices at his regular base salary. We have already encountered this problem in the case of Pictor at Santa Cruz and Knaudt at Puerto Suarez. Each have had their salaries increased in a small amount as an adjustment to their local expenses, but in consideration of the fact that an increase adequate to meet their demands would throw their salaries out of proportion to the normal scale upon return to their bases, the adjustment has remained only a half-way measure. Consequently the agency wage policy, as applied to temporary assignment of this nature, should be revised in accordance with Panagra practice over the rest of the system, which establishes the payment of special tropical allowances over and above the base salary, which should remain pegged to the average scale of periodic increases.

In order to perfect the coordination of agency traffic handling methods, it has been our purpose during the last months to centralize control of sales and service activities, insofar as possible, at La Paz, and we are pleased to report that much progress has been made in this direction. Copies of tracer radios relating to claims between agencies will be sent to La Paz for our supervision of procedure; TRF's, claim forms, and other traffic documents are now being funelled through La Paz for our inspection before being sent on to Lima; we have set up an orderly system of monthly inventories as a means of controlling and supplying each agency with accountable forms and office supplies from a large reserve stock requisitioned from Lima and printed locally; Sago sales bulletins and tariff revisions are edited at La Paz and sent out in the form of simplified [fol. 986] circulars in Spanish adapted to our local requirements, while these in turn we are now consolidating in a revision of the Bolivian domestic traffic manual.

Our training program has been set up as follows. For the next six months and until we can develop equally qualified personnel, this work will be handled exclusively by Mr. Ballivian and myself, one of whom will be out on the line at all times. It has been decided that one should remain at La Paz in a supervisory capacity over all domestic traffic while the other is out on training work, and whenever possible both should not have to stand by together at La Paz for longer than two week-intervals. This program recognizes the necessity for stopovers at the Sawtooth stations at least once every two months, and is based on the rule that only by constant, painstaking review and repetition of all fundamental traffic instructions can progress be made toward developing higher standards of service at our interior stations. There are obvious advantages in carrying out this program with two men working jointly. Supposing the job were confined to one man, he would have to layover at La Paz several weeks between trips in order to catch up with local events and keep up to date on developments directed through Sago Lima. With two men working in rotation, we have a supervisor continually on tour, while his partner on duty at La Paz keeps him posted on instructions from Lima and at the same time transposes the former's reports from the interior into circulars for general distribution. Ballivian and I are coordinating our training schedules in such a way that one will be able to review and expand upon the other's work along the line, and we expect to make headway in the coming months by steady repetition of the type of first-hand treatment recently applied by the undersigned along the Sawtooth.

We are going to work on three important items relating to our Bolivian services. First, a study of proposed rate increases over the entire line, in accordance with LAB's petition to the government. Our tariffs should be drawn up ready for presentation just as soon as LAB's revisions have been approved. Second, an up to date survey of sales reported by all local agencies during the current year. Third, a study of space refusals and traffic growth in connection with the very apparent necessity for inaugurating a third transcontinental service in the near future.

Such is the rough framework of our traffic program for the coming months. We cannot, however, begin to carry it out until the personnel situation is drastically reformed, and to this end I feel it is important that you come up to La Paz as soon as possible, so that we can work on the problem at first hand.

PAN AMERICAN-GRACE AIRWAYS OPERATIONS

As a result of my recent trip over the lines of Pan American-Grace Airways, Inc., I feel it necessary to make the following report and recommendations. Operations and traffic were well handled in Buenos Aires and Santiago, Chile and this is the only constructive remark that I can make in this report.

On arriving at Lima, I found that the entire operation and management were in a state of complete bewilderment and inefficiency. I talked at length with Captain Discher, Operations Manager, Captain James Walker, loaned by Pan American Airways as Technical Advisor to help straighten out the CAA difficulties, Mr. Goakes, local representative of the CAA, and many other department heads. As a result of these conversations, I believe that it is impossible for Pan American Airways to go along any further supporting the present management. By this I mean both the direction furnished through W. R. Grace and Company and the actual department heads in the airline itself.

On May 7th I spent three hours at the Limatambo Airport during which time there were continuously on the ground two DC-2's, nine DC-3's and one C-54. My inquiries into this situation were answered by various people in a most unsatisfactory and inconclusive way. Walker and Goakes both report that the airline is operated and managed in "country club style". There is no discipline, there is no leadership and, as a result, there is very little morale.

I had a long private conversation with Goakes in which he told me that on December 23, 1945, and again on April 30, 1946, he had written to the CAB suggesting that the management of Pan American-Grace Airways be taken away from the present operators and turned over to Pan American Airways. I requested copies of these letters but was advised that undoubtedly I could secure the same from Washington and that he felt it inappropriate to furnish them himself. The pilots have gone to Captain Walker and suggested that they unanimously refuse to fly for the air- [fol. 990] line unless the management is changed. Captain Walker advised me that he could get this expression in writing if I thought it would be helpful. I told him that it would be most unfortunate to have such an expression made formally at this time in view of the fact that there was considerable rumor and a second U. S. airline operating down the West Coast and that I would advise him later if we desired to have any formal action from this source. Mr. Goakes further stated that in his opinion the Grace agencies were "choking" the life of this airline through their complete control of traffic, purchasing and policy matters and that it was inconceivable that we, as half owners, should sit blandly by and take no action to protect our property.

As a result of my questioning about when we could expect to have the onerous CAA restrictions lifted—1,000 foot ceiling, two miles visibility, contact flying—Mr. Goakes replied that only this morning had two incidents occurred which made it impossible for him to make such a recommendation. The first was that he went through the pilots records and found that seventeen pilots were overdue—some as much as four months—on their regular six monthly

CAA pilot check and, secondly, that three months ago he had reported to the management that the standby power plant was not being adequately maintained so that it could operate in the case of an emergency. On May 6th the city of Lima had a power failure which resulted in a shut-down of all city power for three hours. When the standby unit, which the CAA requires to be maintained, was turned on, it failed to function and, as a result, there was no power at the airport during the period of the city failure. Mr. Goakes further stated that there were only three men in the whole organization who seemed to have any idea of how to conduct the operation of an airline or who he could depend upon to correct situations which were contrary to CAA regulations. These three men were Captain Walker, Captain Nelson and Captain Achilles. He further stated that the Chief Dispatcher of the airline resigned in December, 1945, and that, notwithstanding his continued requests, to date there had been no replacement and that there had not been a check of the dispatching system over the airline, outside of Lima, in years.

There were many other smaller matters discussed, all contributing to the reason for Mr. Goakes' refusal to remove present restrictions. As a result of my talks with others, I am convinced that Douglas Campbell is unsuited and incapable for the position which he holds. I am also satisfied that while Captain Discher is personally a fine man, he has not got the experience and the ability to hold the position of Operations Manager. I am further convinced that with Kirkland, Shannon and Vidal all in New York trying to run an airline from 4,000 miles distance, the results will never be satisfactory.

[fol. 994] I recommend that Pan American Airways immediately make known to W. R. Grace and Company their position with regard to continued management and supervision by them and that we insist upon providing at least three key men; namely, the Operating Vice President, Operations Manager and Maintenance Superintendent for the continued operation of this airline. The results of this inefficient operation are reflecting very seriously on the good name of Pan American throughout, not only Latin America,

but also throughout the United States and the public demand, as a result of this condition, for competition on the West Coast, is greater than I had ever realized.

ARRANGEMENTS WITH PARENT COMPANIES

July 23, 1948

Mr. J. W. Walker, Jr.
Pan-American-Grace Airways, Inc.
Lima, Peru

Dear Jim:

Herewith the following documents:

1. Memorandum Agreement regarding services rendered and to be rendered to Panagra by the Parent companies and compensation therefor. This agreement was signed on July 14, 1948 by Panagra, Panair and Grace.

* * * * * * *

A. *Transfer of Activities to Grace*

The spirit of the agreements is that, aside from our Regional Manager's office, Panagra will not have on its payroll anywhere along the line any personnel other than that required for all phases of operations, namely Maintenance, Communications, Meteorology and Operations, including Passenger Service. In other words, any sales and promotion, accounting and other administrative personnel presently on Panagra's payroll (except for the Regional Manager's group) are either to be taken over by the Grace organization or eliminated.

* * * * * * *

Since Panagra personnel are theoretically being taken over by Grace as of January 1, 1947, the question of Social Law reserves becomes somewhat involved, both as to the extent that the salaries of such personnel have increased since that date and as to the accrual to such reserves for services since that date. The only practical solution that we can think of is that either we make a liquidation with such employee and obtain from him a signed release, and collect from Grace the portion of such payments as pertain to longevity and salary increases made subsequent to January 1, 1947, or that we turn over to Grace the corresponding reserve as of January 1, 1947, and obtain a full release from Grace that all Social Laws liabilities will be covered by them on all employees taken over by the Grace organization. We recommend that the latter method be adopted since we believe this has been our policy in the past. The local attorneys in each country must, however, approve the method adopted. Naturally, no contingent reserves (such as dismissal payment reserves) would in any case be transferrable or payable to Grace or to employees.

. . . . . .

[fol. 1000] Mr. J. W. Walker, Jr.

Sincerely yours,

G. Vidal

GOVERNMENT'S EXHIBIT 476

ABS Trip Series No. 8

W. R. GRACE & CO.
Hanover Square, New York

Harold J. Roig
Vice Chairman

New York, October 29, 1948
Santiago, 11-3-48

Andrew B. Shea, Esq.
Santiago, Chile

Dear Andy:

I was glad to note from your Trip Series No. 1 that Shannon and Mason have expressed themselves as "very well pleased with what has been done" in connection with the General Traffic agreement.

Now that that is on the rails, I would like to find a way to move in with equal effectiveness on the portions of the Three Cornered Agreement related to Grace financial control. While Panagra has always received assistance under this heading, it has not been as effectively organized under an overall plan as it might be. Vidal feels that very important results can be attained if this is done. The desirability for moving in on this in connection with our continuing drive to reduce expenses is obvious.

Some months ago Walker worked out, in a good deal of detail, a proposed outline of Agency functions including the functions under the heading of Financial Control. Correlated with these he prepared memorandum instructions for Superintendents of Stations and Station Managers. We have now modified all of these somewhat to pick up ideas of Vidal and Lanning. Copies of these memo-
[fol. 1010] randa, as so modified, are enclosed. I would appreciate it if you could look them over and, if you think well of it, give copies to the Heads of our Houses concerned for their comments and suggestions. With these in hand we would then make necessary changes in the

memoranda and send them out as definite instructions. Do not, however, give these to the Heads of Houses until I cable you to do so as I want to check over the changes we have made with Walker first to be sure he is fully aboard. I am sending them along meanwhile to gain time in the mail in an effort to get the matter cleared before you leave the Coast.

What Panagra is getting at is obvious. They would like to see their expenditures in South America controlled in the same rigorous manner by the Agents as the Agents control their own business. This is easy to say but carrying it into effect without too much conflict between the Agency and the local Panagra management is not easy. Panagra is prepared to cooperate to the fullest extent to that end. It seems to me that the way to accomplish what we have in mind is to reach a clear agreement as to the points of control at which the Agents are authorized to intervene and then see to it that they are freed of all inhibitions and really do intervene effectively at these points.

Sincerely yours,

Roy

[fol. 1011]

TO ALL AGENTS

Subject: AGENCY FUNCTIONS AND RESPONSIBILITIES WITH RESPECT TO PANAGRA

In an effort to avert possible future misunderstandings, we outline, as follows, our ideas of Agents' functions and responsibilities in connection with the handling of Pan American-Grace Airways, Inc.'s affairs:

1. Handling of governmental relations for Panagra, including contracts between Panagra and the various governments in South America.

2. Sales efforts and sales administration, in accordance with the General Sales Agency Agreement between Panagra and W. R. Grace & Co.

3. Handling of commercial problems and negotiations relating to the business phases of technical transactions.

4. All legal work.

5. Acting as commercial advisors.

6. Handling of all Panagra accounting work (excepting only maintenance and flight operations accounting at airports) including our collections and disbursements.

7. In matters of personnel policy, Panagra representatives will make the decisions, but will request the advice of the Agency in every case prior to taking action.

Personnel records, which will be maintained by the Agency, must be approved and initialled by the Station Manager at each airport. Payrolls, etc., must also bear the Station Manager's approval prior to their being sent by the Agent to the Lima office of Panagra.

The interviewing and employment of employees and "obreros" will be under the supervision of the Station Manager, or duly authorized Panagra representatives. In every case, however, the advice of our Agents will be sought. On the other hand, dealings with "Sindicatos" or governmental agencies will be handled directly by the Agency, with Panagra representatives in attendance.

[fol. 1012] In the case of dismissal of personnel, Panagra will consult with the Agency. When, after consultation between Panagra and the Agency, a decision has been reached to dismiss personnel, the Agency will sign the necessary papers to effect the dismissal. In all cases where an employee's or "obreros'" connection with Panagra is severed for any reason, the Agency will handle all financial and legal details, including the calculation of amounts due the employee or "obrero" under social laws.

8. Agents will receive copies of Panagra's station budgets and are expected wholeheartedly to assist in controlling expenses at the airports. Panagra requests the Agents to watch these budgets carefully and to consult with Panagra regularly concerning any ideas

the Agents may have with respect to expenses at the airports. The Agents, of course, will control disbursements for airport expenses by means of the dual signature system presently in effect.

9. Insofar as it is possible, the Agents will inform the New York and the Lima Managements of Panagra of the activities of all competitors.

The foregoing outline is in no way intended to *limit* the activities of the Agents on behalf of Panagra. On the contrary, at all times, the Panagra Management expects and welcomes the suggestions and recommendations of the Agents with regard to any matter affecting the interest, welfare and development of Panagra. The main purpose of this memorandum is an effort to make clear the functions and responsibilities of our Agents and to further develop the existing esprit-de-corps between our Agents, on the one hand, and the Panagra Management, Station Managers and Operating Superintendents, on the other hand.

To assist our Agents in understanding fully our ideas regarding the necessity for complete cooperation on the part of everyone connected with Panagra, we attach copies of instructions which have been issued to our Department Heads, Station Managers, and Operating Superintendents on this subject.

[fol. 1013]

GOVERNMENT'S EXHIBIT 477

December 2, 1948

MEMORANDUM

Captain James W. Walker, Operations Manager for Pan-American Grace Airways in Lima, stopped in to say goodbye to me this morning as he is on his way back to Peru.

He told me that he had had several very frank talks with Mr. Roig during his stay in New York and that he had told Mr. Roig that the operation of Panagra was an abso-

lute disgrace as far as the cost and efficiency of the service were concerned. He pointed out the fact that they run five DC-6s, one C54, and a handful of DC-3s at the largest operating cost of any airline in the world.

He said that Lima should be nothing more than a line station such as Santiago or Balboa; that to have five vice presidents, a traffic manager and an assistant traffic manager and their staffs in New York was absolutely unnecessary; that it was only a question of a very short time before Panagra would lose cabotage rights in Peru, Ecuador, and Bolivia and that this would make Panagra's operation simply a Miami-Buenos Aires through flight.

He told Mr. Roig that he felt that the Grace Agency was milking the airline dry and the only solution he could see was to throw the operation into Pan American's Latin American Division as a subdivision of that operation; that because there were two stockholders there would have to be separate accounting for that operation but otherwise the entire show could be run out of Miami and the savings would be gigantic.

He said that Mr. Roig had listened to him very carefully but had made no comment. He also said that he did not know whether he would be fired for having made these remarks, but that his conscience would not let him continue in Panagra's service without doing so, and that if he lost his job he hoped that I would try to help him find another.

I telephoned Morrison and told him about this conversation and asked him to meet Walker in Miami on his arrival this afternoon and to have dinner with him. I suggested that he get detailed figures and facts from Walker and send them to me in a confidential memorandum.

April 2, 1949

Mr. Ernesto Aranibar
Grace & Cia., S.A.
La Paz, Bolivia

Dear Ernesto:

I am greatly perturbed over a report of an incident which occurred in your office about one month ago concerning the action of one of your employees in the handling of a reservation.

In the presence of Mr. Haro of our Lima office, your employee advised a prospective customer that no space was available on a flight scheduled from La Paz to Lima on the following day. On overhearing this remark, Haro, who was aware that space existed on the trip in question, intervened and saw to it that the customer was given correct information.

Your employee gave as a reason for stating that no space was available that the papers for the flight were already closed and that it would be too much trouble to re-open them to include additional passengers.

Naturally, this is not the type of service we want to give to the public, nor the service which results in the greatest possible revenue for the Company and, for that matter, your agency.

* * *

This subject has become particularly pertinent in view of the preoccupation which already seems to exist concerning our reservations procedure within Bolivia. Naturally, no procedure is any better than the people who manipulate it and, as a consequence, we cannot emphasize too greatly

the importance of having it handled by our very best and most competent employees.

* * *

With kindest personal regards, I am

Sincerely yours,

John T. Shannon

QUITO, Ecuador
April 22, 1949

Mr. D. Campbell
Pan American-Grace Airways, Inc.
New York

Dear Doug:

This will confirm our telephone conversation of yesterday in which I suggested that you again approach the proper officials of W. R. Grace & Co. in New York in an endeavor to secure action on the filling of two important posts in their Panagra Sales organization in South America.

Several months have elapsed since there was a head to the Panagra sales section in the Agency in Lima. Actually, the last man who filled the post only worked for a few months and you might say was really ineffective. Hence, to be realistic about it, we can say that there has not been a proper head to this section since it was decided that Braman would not be taken over by our agents. This is very unfortunate since Lima is now the most competitive spot on the line and one where our competitor is gaining ground every day.

Mr. Aranibar wrote to W. R. Grace & Co. in New York stating that he was ready and willing to take on a young

American to strengthen the Panagra Sales section of his organization in Bolivia. Since writing this letter he has not heard from New York and apparently no action has been taken to fulfill his request.

Even disregarding the competitive angle for a moment, I feel that the posts described should not be allowed to be vacant and taking into consideration the competitive angle which cannot be ignored, filling them becomes a "must". The man for Lima is, of course, the more urgent of the two.

I know that there must be very good reasons why proper action has not been taken with regard to this matter, how- [fol. 1016] ever, I feel that the time has come now that we must again bring it to the attention of our General Sales Agents for South America in the most forceful manner possible.

Sincerely yours,

J. T. Shannon

GOVERNMENT'S EXHIBIT 480

April 27th, 1949

MEMORANDUM TO MR. SHEA

One thing to be remembered in this mail pay case is the fact that 7,100,000 revenue passenger miles (which as you will recall is the top figure on which we get the 4.35c mail pay) means a load factor on the basis of available seat miles flown in 1948 of 47%.

We have often discussed the fact that every one percentage point drop in revenue passenger load factor means a drop of $4,000 a week or about $15,000 a month in revenue. This will still be true for every drop in load factor down to 47% but from there on down we will be losing

not only the $15,000 a month in commercial revenue but also $6,500 in mail pay, so the one-percentage point drop below 47% means a drop in revenue of $21,500 a month or approximately $5,000 a week.

In other words, we get more mail pay with a load factor of 47% than we do with a load factor of anything below that so we have a double reason not to have our load factor go below 47%—commercial revenue and mail revenue.

The formula in the mail pay case seems to me to be a severe detriment to lowering passenger rates since not only would you lose all the revenue involved in such reduction [fol. 1018] but you *might* increase the number of passengers carried by lowering the rate and therefore lose mail pay.

This case gives every incentive to increasing passenger rates to the point where we would get the maximum commercial revenue and still have 7,100,000 revenue passenger miles per month less than we now have.

miles per month, i.e. about 2,000,000 revenue passenger

J.P.G. Jr.

GOVERNMENT'S EXHIBIT 481

JTK TRIP SERIES NO. 66

AIRMAIL

NEW YORK, August 26, 1949

J. [redacted] Kirby, Esq.

BOGOTA, Colombia

Dear John,

HANDWRITTEN
(no copy available)

Enclosed is copy of Mason's report on Santiago. As you may know, we instructed him, a short time ago, to proceed to Buenos Aires, Santiago, La Paz, Lima, and Guayaquil to exert every effort personally, and working with our own

offices, to reverse the serious downward trend in our load factors which has been evident for the last two months.

As a result of his recommendations and those of our own office we authorized, while he was there, a reversal of the tariff policy put into effect a short time ago of collecting all southbound passages in dollars as it was very evident that this was causing serious inroads into our movement and was starting to build up BSAA movement to the U. S.

As you will see from the enclosures, Mason devotes the major part of his letter to comments on the sales effort of our Santiago Organization. Unfortunately, assuming, of course, that his facts are correct, it appears that we are open to very serious criticism because of the failure of our [fol. 1020] Santiago management to remedy any of the outstanding defects in our handling of Patagra traffic and sales promotion which we all have known for some time existed in Santiago. For example, on page 5 of his letter Mason says "During July our solicitation fell off sharply and the records show fewer calls being made each week. During the week of July 25th to 30th, according to the reports, there were no official solicitation calls." Mason says, however, that this situation has improved in August and that the salesmen are now attempting to contact eight clients every day.

He further says that the card files for direct mail and solicitation purposes were not completed and when he arrived there only 300 cards had been made out, while more than 5,000 names of firms and individuals, clients and potential clients, were waiting transfer from the various lists to the cards. He says that only one passenger direct mail letter with a circulation of 1,200 and one cargo mailing piece with a circulation of 400 have been sent out to Santiago clients all this year. Further, he says that new sales stationery was designed by J. Walter Thompson in Buenos Aires, and the mats are in Santiago but the letter heads have not been printed. There are other comments which you will read, but I have mentioned the foregoing

particularly as they emphasize very sharply the lack of the [fol. 1021] intensive, active sales and solicitation effort which Panagra must have in the face of the increasingly sharp competition we are meeting in all countries.

Aside from the specific criticisms made by Mason (and, by the way, he praises very highly the public relations and free newspaper publicity we get there), the conclusion to be drawn is, of course, an obvious one and that is, that our responsibilities as Panagra's general sales agents are not being discharged in a way that is at all satisfactory and that the outstanding deficiency is the lack of top direction and management.

Yours very truly,

(sgd) A.B. Shea

Enc.

(written in by A.B.S.)

John: Shannon told me you were fully cognizant of these matters and are in the process of correcting them. The trouble seems to be that Koch and Davila promise a lot of things and don't come through with them.

Best regards,

A.B.S.

[fol. 1022]

Government's Exhibit 482

MEMORANDUM

To:	Vice President	From:	General Sales Manager
Dept.	Traffic & Sales	Dept.	Sales
Location	New York	Location	New York

Date: March 3, 1950

Subject: SOUTH AMERICA—PASSENGER FARES

Reference:

With reference to the enclosure which you gave me yesterday, I believe you will be interested in the following in-

formation which explains why Panagra's rates are on the high side. My comments are based on the nine years during which I was General Traffic Manager of Panagra, and I request that you treat them as confidential.

1. Historically it has been the policy of W. R. Grace & Company to follow a high tariff policy with respect to Panagra. This policy was maintained during the nine years that I was connected with the company, and from all indications there has been no change to date, although I believe that Panagra's new president and several of its officials are now in a receptive mood to at least consider a modification of this policy.

2. It is interesting to note that Panagra's high rates are in those areas where historically Panagra has not been confronted with local competition. Also please note that the high rates correspond to Panagra's operations across the Andes, the reason for this being that payloads used to be restricted for operating reasons and rates of surface carriers were also high for the same reason. This explains the lopsided tariff which Panagra now has, with rates ranging from a high of 29.04¢ per mile to a low of 5.78¢ per mile.

• • • •

5. Panagra has participated in through rates with PAA, but here again the competitive factor has always been the primary reason for so doing. Also I can recall many instances when Pan American was unable to go through with a rate program at least carried out to the extent desired—because Panagra's management was unwilling to make full reductions. On the other hand, Panagra initiated a rate program and was the first to establish commodity rates as far back as 1936 and long before Pan American got into the picture. In fact, Pan American was not interested in establishing through [fol. 1023] commodity rates, so Panagra was forced to restrict such rates to it's own routes.

6. In the past Panagra has also been somewhat reluctant to take its share of reductions where through rates have been considered, but I see no reason why this

policy should be continued as there is no reason at all why Pan American should maintain a lower rate structure than Panagra on through rates.

To summarize, Panagra's past policy has been indicated by W. R. Grace & Co. on the basis that high rates should be maintained, with few exceptions.

GOVERNMENT'S EXHIBIT 483

July 11, 1950

MEMORANDUM TO MR. HOWARD L. CLARK

Subject: BOLIVIA—PANAGRA OFFICE

With reference to your request I herewith submit the following memorandum on the Bolivian office.

1. It was my understanding that the sole reason for inaugurating DC 4 service into Bolivia in this particular instance was to combat our competition. Actually what has been accomplished up to date has been to offer the traveling public two additional days DC 4 service to Lima with connections to the North.

As a result we still do not know actually how strong Braniff really is. If a potential traveler wants to leave for Lima on the day when we have a DC 3, and our competitor has a DC 4, it is almost impossible to sell. It is the old story, two engines versus four engines.

You asked me why we lost so many passengers to Braniff. One of the main reasons especially during the rainy season, is the fact that the DC 3 flying the Jungle Run east of Santa Cruz due to weather, would be anywhere from three to twenty four hours delayed enroute and the majority of passengers booked with us would cancel and have their tickets endorsed over to our competition. I understand that this situation will be remedied somewhat

due to the fact we are now flying into Santa Cruz and turning around there the following morning with DC 4.

2. The two travel agencies that we do business with (Exprinter and Tur-Bol) have repeatedly expressed their complete dissatisfaction with the way they have been treated by Grace in Bolivia. They maintain that the Grace Company is in open competition. Mr. Keiler, of Tur-Bol [fol. 1025] and Mr. Hecksner, of Exprinter, have told Mr. McCoun of that treatment, and I know that they sent a very strong cable of protest to Mr. Masson of Lima. I understand a letter from Mr. Shea to the Grace office in Bolivia explaining and clarifying the Grace Agency situation was sent, but I am sorry to state there is still quite a bit of bitterness left. It is my firm opinion that unless this situation is immediately rectified the travel agencies will end up by giving Panagra as little business as possible. One of their main complaints is that we contact the passenger that they have already booked on a purely social and personal basis and have passenger cancel with the travel agency and make the reservation with us. When one passenger asked the Grace management what the difference was with who he made the reservation with as long as he was traveling Panagra, the answer was that we get the full commission. The agencies are being run by German Jewish refugees, and a good percentage of the people who travel in Bolivia fall into that category. I know that Mr. Hecksner of Exprinter is still quite bitter. On the Cochabamba-Santa Cruz highway, which was awarded to MACO, Pan Pacific Construction Company, Hecksner became very friendly with a Mr. Thompson and also a Mr. Abbot of the above company. Before I left he told me he was going to obtain an exclusive on handling all of MACO's transportation needs, and he was leaving for Los Angeles, to discuss this further with them. I don't know if he has left or not as yet. This movement I understand involves round trips from the western part of the United States of some 150 technicians. With a volume of business of this magnitude and Mr. Hecksner feeling as he does toward us. You can readily see how ticklish this situation could develop into.

[fol. 1026] Another sore point with travel agencies is the fact we do not issue them our tickets so they may make them out right on the spot for their customers. They claim we do not trust them. This again creates a very unfavorable opinion for us, in view of the fact that Braniff does issue tickets, and we do also in every other office with the exception of Bolivia.

* * * * *

5. I realize that the following subject is very ticklish at best. Quite a few of the Americans on the various missions resent pressure tactics employed by Dr. Elio. The case I recall particularly was that of Mr. Arthur Jenkins, formally of the CAA mission. Mr. Jenkins preferred to travel to Lima on several occasions with Braniff. Dr. Elio has seen and talked to Mr. George Benson, Chief of the mission in an effort to find out the reason for Mr. Jenkins preference. Mr. Benson talked to Mr. Jenkins who in turn told me about it and he very much resented that he was being questioned as to his preference in travel. I have heard the same story from several other people to the point where some individual groups flatly refuse to do business with Panagra in the Grace office. If they fly with us they will do so only through travel agencies.

[fol. 1027]

GOVERNMENT'S EXHIBIT 434

JTK/RS Series
Letter No. 225

NEW YORK
June 27, 1951

Mr. Raul Simon
SANTIAGO, CHILE

Dear Raul:

PANAGRA LIQUIDATIONS

We have carefully reviewed the contents of your JTK/RS Series letter #597 of June 8th, and our comments are as follows:

You state that as of March 1st Panagra was indebted to you to the extent of 583,000 pesos. Panagra advises that Lima's books on February 28th showed a balance against you of 743,000. What are the items making up the differential of 1,326,000 pesos, and what was the correct balance as of February 28th? Panagra has instructed the Lima group in the future to analyze and dispose of pending items promptly after the close of each month, and Lawder solicits your cooperation under this heading.

Panagra and we agree that outstanding accounts representing uncollected sales need not be remitted to Panagra until actually collected, to the extent that credit has been extended in accordance with Panagra's written concurrence. If you desire, it will be in order for you to adjust February and subsequent remittances to conform. Panagra suggests [fol. 1028] that a separate current account be opened to include credit sales approved by Panagra and not subject to be remitted until collected. Do you concur?

You advise that March sales can be broken down as follows:

Dollar fare travel	4,167,000 pesos
Peso fare travel	7,292,000
	11,458,000 pesos

According to Panagra's records, dollar fare travel amounted to 9,029,000 pesos during March, and only the balance represented peso fare travel. We suggest that you verify your figures and then adjust your March remittance accordingly, submitting full details to Panagra both in Lima and in New York.

On the subject of buying and selling exchange rates, in our JTK/WFK Series letter #335 of March 29th, we expressed our views as follows:

> "As for exchange rate differentials, it appears to us that since Panagra could cover its entire peso disbursements by means of its peso collections, the average daily rate for the month used for the conversion of Panagra peso disbursements into dollars

should be based upon the daily buying rates (actually used during the month for the conversion of Panagra peso collections into dollars) rather than on the daily selling rates (applicable to the purchase of pesos with dollars). Otherwise Panagra would be subjected to an unjustifiable exchange loss caused by the spread between buying and selling rates."

So long as its peso collections exceed its peso disbursements, Panagra could not be expected to agree to the conversion of peso collections into dollars at the *selling* rate of exchange, and to the conversion of peso disbursements [fol. 1029] into dollars at the *buying* rate of exchange, only to incur an exchange loss. Panagra would simply apply peso disbursements against peso collections. The Grace Line situation is different, for they are faced with large peso disbursements and they have practically no peso collections to cover them. We see no basis for comparison between Panagra and the Grace Line.

The plan developed last February in connection with Panagra peso collections and disbursements was intended to be of benefit to the Grace organization. In other words, by converting Panagra peso collections into dollars—as is currently being done—it became possible to provide additional profit cover for the Chilean territory to the extent that we collect dollars from Panagra in New York for peso disbursements you make in Chile for their account. It follows that any exchange differentials should be absorbed by Grace and not by Panagra, and we do not understand your reference to your being penalized under this heading.

Very truly yours,

SALE OF SALTINES TO PANAGRA

Dear Frank:

Further to my letter No. 86 and to your No. 84, we are, of course, most interested in continuing to sell saltines to Panagra and it would therefore be interesting to follow up with Panagra, presumably through Manuel Arevalo, the fate of the 17 cartons recently sold to them and get an idea, if possible, of what their monthly requirements will be.

Andy Shea's memorandum to me of November 14, a copy of which was sent to you, of course, speaks for itself and

it is perhaps needless for me to say to you that I feel all concerned, including myself, are most anxious that La Rosa get the business and we do not want Panagra to take their trade elsewhere nor give it to Arturo Field in view of previous experience.

Very truly yours,

J. H. J.

PANAGRA-GRACE REORGANIZATION

It has been noted in a previous report that I felt that the Panagra-Grace office in Santiago was lacking in basic

organization, delineation of individual duties and supervisory procedures. I was extremely happy, therefore, to find on my recent trip to Chile that Mr. Don Huff of the Panagra staff in NYC had been sent to Santiago to assist in setting up an organization chart for this office and to establish efficient sales office procedures. Mr. Huff had done a similar job in Lima which would have shown excellent results if the Panagra-Grace officials had carried out his plans and ideas. Even so, his Lima re-organization permited the elimination of at least six employees from the payroll without hardship or loss of effort whatsoever. Mr. Huff has had a wealth of experience in this type of work and if Mr. Brunson and Mr. Burke will continue his good work I am certain that all of us will benefit.

The amazing thing to me is that in all of these Grace offices there is practically no way that officials of Panagra can insist that their plans and ideas be carried out. The chain of authority is so long in numbers of people, in files of correspondence and in geographical distances and the follow up is so uncertain and so uncoordinated that a person like Mr. Brunson in Santiago and Mr. Velarde in Lima can show complete unconcern towards any plans for suggestions submitted by a person like Mr. Huff unless these happen to strike their fancy at that particular moment.

[fol. 1033] I am attaching copies of the functional and personnel assignment charts which Mr. Huff prepared for the Panagra-Grace organization in Chile. I feel that all System offices should be set up in this manner to achieve maximum efficiency of personnel and materials.

GOVERNMENT'S EXHIBIT 489

March 4, 1953

CONFIDENTIAL

NOTE TO: DIVISION MANAGER

You will recall that a year or two ago we were endeavoring to assemble evidence which might support the contention that the other ownership interests in Panagra exercised undue control and influence over their policies even to the extent of being detrimental from the standpoint of a purely airline operation.

As this subject tends to flare up from time to time, the attached piece of evidence may be of interest to the top levels of our company. You will note that this evidence consists of a routine reservations and VIP teletype message in which it is indicated that a flag stop will be made at Antofagasta, Flight 300 March 30, to pick up the Executive Vice President of Anaconda Copper per okay by Grace Line, New York. Anaconda Copper, of course, is an important ore shipper on the Grace Line.

A check has been made to see if the okay for the flag stop might be tied in with a minimum revenue figure, but apparently this is not the case and it is clearly the case of the airline effecting a flag stop to pick up an executive who is important to the steamship company.

GOVERNMENT'S EXHIBIT 491

HRH #534

NEW YORK,
September 3, 1930.

Mr. H. R. Harris, Vice President,
Pan American-Grace Airways, Inc.,
Lima, Peru.

Dear Mr. Harris:

With regard to the Delfino representation at Buenos Aires, Panair has made us an offer to represent us through the Alas Company at a cost not to exceed the 15,000 Argentine pesos guarantee offered by Delfino.

Under ordinary circumstances this would be attractive because it would obviate the necessity for having two associated Companies in the Argentine with different headquarters. Unfortunately, your opinion of Mr. Summers, who, I understand, would be the active head of Panair's activities in the Argentine, makes us unwilling to have our Company occupy a position in which in any conflict of interests a man would be in charge of the joint operations who was not in sympathy with Panagra.

A number of things have happened which would seem to bear out your opinion that Summers will never give Panagra an even break.

A final decision of the Delfino proposition has been held pending, therefore, so as to give Mr. Roig another opportunity of discussing the matter fully with Mr. Trippe. I shall keep you advised as to the final result.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

1930

Pan American-Grace Airways Inc.
New York

Dear Sirs:

Receipt is acknowledged of your HRH # 534 on the subject of our possible representation in the Argentine by the Alas Company rather than Delfino. It impresses me that it is not desirable for us to be represented by Alas until we are convinced that Alas will give us genuine representation and not use their appointment as an opportunity to stifle our business. Whether or not Mr. Summers or any other Panair representative would give us the proper type of representation would depend entirely upon the instructions which the Alas Company received from Panair. Consequently the decision should be entirely based on the actual attitude which Panair will take toward us. If there is to be competition in passenger, mail and express between PAN AMERICAN-GRACE AIRWAYS INC. and Panair in serving Buenos Aires we should under no circumstances be represented by Alas. On the other hand if there is a definite allocation of traffic between PAN AMERICAN-GRACE AIRWAYS INC., Panair and Alas, which is satis-

factory to us, there is every reason to have Alas as our representative instead of Delfino.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS INC.

Mr. J. D. MacGregor, New York.
NYQUIST

Dear Mac,

With reference to Mr. Vidal's letter to Panagra, New York, #96 of May 20 on the subject of agency fees at B. Aires, I note that he recommends Nyquist be sent back from B. Aires to Santiago. I do not agree with this at all since I feel that we must always have a competent Panagra man at B. Aires to keep us thoroughly informed of any Panair schemes which may develope and which we would have no knowledge of otherwise. I feel that the reason we have such a good arrangement at present is because of the effective work which Nyquist has done and am sure that we will again have trouble if we pull Nyquist out of B. Aires. I am not referring in this letter to operations problems but to the general Panair Panagra background in B. Aires.

NEW YORK,
June 2, 1932.

Mr. G. Vidal,
SANTIAGO.

MR. OSCAR I. PEZET

As I cabled you today, I have just received a letter from Pezet stating that he has been hired by Rihl and yourself as contact man in Buenos Aires. This is something which should have been definitely referred to New York.

I received your cable asking whether I would recommend the employment of Pezet at a salary of 800 Argentine pesos per month. This cable was received the same day of the Directors' Meeting and was handed to me after the Meeting. I did not reply to the cable, but by next airmail I wrote Mr. Harris, with a copy to you, stating what had been done in the Directors' Meeting and informing you by means of this letter that I had been asked to make a Budget for the Argentine to cover the employment of two contact men. Although I do not think that I shall have any difficulty in confirming your actions, I would suggest that before committing yourself at any time, you await definite approval [fol. 1041] from this office.

In the case of the Buenos Aires personnel, you, of course, understand that the employment of Pezet is an additional expense not contemplated in the agency fee, and for that reason I presume you have already arranged with Rihl the proportion of the salary which should be assumed by

Panagra. I may state that even if you and Rihl agreed to a 50 50 split, I do not believe Mr. Trippe will agree to it. Mr. Trippe will consider the salary should be split on the basis of sailings and arrivals, that is, $^2/_3$ Panagra and $^1/_3$ Panair. That is another reason why I did not want to commit myself until I knew what percentage Panagra would have to assume.

I presume also that Pezet is hired and paid by Panair and is now an employee of our Panair agency. If this be so, I presume you have thoroughly explained to him the relations of Nyquist to the agency and the fact that Panagra operates as a separate entity with separate officials and separate organization. An explanation of this kind is due Mr. Pezet because, otherwise, he may think that Mr. Rihl or any other of the Panair officials can instruct him to travel on Panagra planes. Pezet should be thoroughly advised that matters pertaining to Panagra should be cleared through Nyquist. I am sure you see my point.

My dear H.R.:

PANAIR FACILITIES AT MONTEVIDEO AND BUENOS AIRES.

* * * *

Mr. Trippe is still unwilling to concede that we should go fifty-fifty on expense and propaganda in the Argentine. He is sticking out for two-thirds for Panagra on the basis

of scheduled sailings. To my insistance that the fifty fifty deal is equitable because we have no control over the expenditure of the Panair office at Buenos Aires, he replies that if I consider the Panair office expenses too high a budget can be appropriated and jointly approved reducing these expenses to what we consider a fair figure. I wish you would, in your next visit to Chile, discuss with Shannon what it should cost us to run our own office at Buenos Aires. This would contemplate transferring the accounting to Santiago and maintaining Buenos Aires as a representation and traffic organization only. It seems to me that with Bradley, Nyquist, Pezet, Schurz, and Miss Grinham, we could carry the office along and not lose traffic. I should like [fol. 1043] to know whether the payment of 50% of Bradley's services and two-thirds of the salaries of the other employees mentioned, together with two-thirds of the office rent and general expenses would not be quite considerably less than $750. U.S.G. per month. Will you please advise.

J. D. MacGregor

B. AIRES SITUATION

Dear Mac,

Herewith you will find copy of letter I have written today to Geo. Ribl, which is somewhat rambling but almost self-explanatory.

I trust that you will be able to give this serious consideration, particularly with regard to the business of moving Shannon over to B.Aires, which strikes me as being a fine idea if a sale can be made of the scheme to Panair and Grace. My thought is that we would move our whole Southern Division headquarters to B.Aires, leaving Grace, Chile, to handle Chile in the same way that Guayaquil Agencies Co. handle Ecuador. It would, of course, be necessary for us to put a good operating man in Santiago, possibly Farris, who would naturally be under Shannon.

The accounting system I have mentioned to Rihl is really a keen thing, and although it may not be possible to put it into our organization, at the same time I know you will be very much interested in observing what can be done with this punch card system of recording and accounting.

Harold R. Harris

[fol. 1045]

SANTIAGO, December 8, 1932.

Mr. Geo. L. Rihl,
Panair do Brasil S.A.,
Rio de Janeiro.

Dear George,

My recent visit to B.Aires has impressed me more than ever with the disorganization of the joint set-up at that point. There seems to be misunderstanding and friction of a more or less serious nature between the various department heads, and there is apparently no centralized control of any movements or work of the personnel. I may be quite wrong and all may be lovely, but it impressed me that Bradley, who apparently considers himself to be the chief executive of the entire organization, is quite incompetent to handle any such important position, and is completely overcome by the sense of his own importance. In our own business we could not for an instant tolerate any such

office hours as Bradley keeps. He never arrives in the office before 10.30 am., and more often 11 am., and leaves promptly at noon, to return at or after 3.30 pm. in the evening, usually later. I agree that he has outside contacts which he is able to take advantage of in the evening, and I presume that occasionally he has similar contacts in the morning before he comes to the office, but you and I also have contacts which we take advantage of in the evening without interfering with our regular business day. You may think from the above that I have some personal prejudice toward Bradley—quite the contrary, but I do feel that he could spend a reasonable time in the office and accomplish a great deal more than he is now accomplishing. In addition to the fact that the presumed general manager of the B.Aires set-up is not on the job, I feel that even if he were on the job he is not competent to handle the problems which present themselves, in a first class manner.

It seems to me that we might consider very seriously the question of a completely new set-up in the Argentine. One possibility which appeals to me is a combination of joint Field Manager, a scheme which you have previously suggested, with a General Manager idea for the joint office. It seems quite feasible, if Panair will agree to it, to have the Division office of our Southern Division moved to B.Aires from Santiago, in which case it would be possible to put Shannon in charge of the joint office at B.Aires, in addition to his Division duties with Panagra. Naturally I have not had an opportunity to discuss this matter with Mr. MacGregor yet and do not know what his reaction would be; he might have some very real reasons for not desiring such a shift. I feel that Shannon is quite competent to either make Bradley work, or make him resign under pressure of the work which he would be required to carry out, our requirements being met by either result in the long run, since we have either got to get work out of Bradley or get rid of him. In addition, the junior members of [fol. 1046] the staff, who are now working pretty well up to capacity, particularly Moore and his crowd, would be assisted and encouraged in their work, and their work coordinated with the other work of the office in a way which may now be lacking.

In addition to the institution of a joint manager scheme similar to the scheme which fell down so badly when it was attempted with Summers, we would have in Shannon a man who had had complete experience, with NYRBA background, and could in any emergency handle either land planes or seaplanes for either company, being thoroughly familiar with the operations in both directions.

*****

There seems to be a general feeling among our friends in the Argentine who are not in any way connected with the Company, that we do not have a sales organization, but rather the attitude of accepting any business which is offered us. I know you have given this a great deal more thought than I have, and it would seem that if we are to build up a selling organization we should either pay our present employees more, so that they can take their place among the class of society which is financially able to use air transportation, or else we should get rid of our present low price employees and take on people who would be paid a higher figure and who are already accepted socially in the proper spheres. There are, of course, any number of well connected Anglo-Argentines who might prove satisfactory for this work, but I feel that no change of this sort should be made until after a very exhaustive study of the background of the individual or individuals whom we have in mind, in order that no errors be made in selection of proper personnel.

* * * * *

Warm personal regards,

Sincerely,

HARRIS

BUENOS AIRES SITUATION

NEW YORK
December 20, 1932.

Mr. H. R. Harris,
LIMA.

My dear H.R.:

Thank you for your personal letter #1055 of December 8th and for the copy of your letter to George Rihl of the same date.

Your idea of moving the whole Southern Division headquarters to Buenos Aires, leaving Grace & Co., Chile, to handle our Chilean business on a purely agency basis is, of course, not new to me as I have had the thing in mind for some time. The reason I have not written you about is because I wanted to find some good reason for making the change. As a rule, in these matters, we only have one section of the Board to contend with. In a scheme of this nature, I would have to buck both divisions.

Grace & Co. would undoubtedly oppose the scheme through a fear that their influence in our southern picture would be minimized beyond even the present almost vanishing point. They would, of course, not oppose, I think, the transferring of Shannon to the Argentine, because, as you know, they have never been pleased at having Shannon in Santiago, but they would undoubtedly say that the transferring of all the people who are at present working 100% for us, even although not on our payroll, would involve the leasing of an expensive office in a country in [fol. 1048] which their influence is not great, and would involve other expenditures foreseen and unforeseen.

Panair, on the other hand, would say that by an inter-Company agreement *it* is the prominent factor in Buenos Aires and that if it is felt, and if George Rihl agrees, that Shannon would be a good man to be placed in Buenos Aires as manager, he should be transferred to the Panair payroll and we would be charged $^2/_3$ of his salary on the basis of sailings. Grace & Co. would say, as they have already said, that if we pay $^2/_3$ of the expenses of the Buenos Aires office, we should run the office.

These are just some of the things that occur to me and which will give you an indication of the situation I would have to confront. I wanted, therefore, to let this year pass and liquidate our accounts with the parent Companies before starting something more than ordinarily controversial.

I also have in mind that Alessandri takes over at the end of December and that this change of administration is liable to bring our old friend Merino into the picture. If this happens, and we again have Merino on our neck, it would offer an added argument for transferring the Santiago office to Buenos Aires. I shall, therefore, ask you to go slow in this matter in the assurance that I have the matter before me and will handle it to our best advantage when I see the moment opportune. I am just as convinced as you are that the present set-up at Buenos Aires is not to the best interests of either Company. There has been bad [fol. 1049] blood, as I am sure you have found out, between Lopez and Bradley and I certainly do not think that Bradley would be any good as a manager, even if he kept decent office hours.

GOVERNMENT'S EXHIBIT 498

PAN AMERICAN-GRACE AIRWAYS, INC.
135 EAST 42ND STREET NEW YORK, N.Y.

LETTER NO. 100
(HJR trip series)

Cristobal, June 8, 1935.

A. Garni, Esquire,
New York.

Dear Garni,

PANAIR—CRISTOBAL OFFICE.

Owing to delay of cable company in not delivering your No 64 until this morning I had to continue my conversation with Rihl and Chenea without the benefit of your views. For reasons indicated below I rather discouraged their suggestion of moving into the Grace Building but the matter was handled in a way which leaves it open for further discussion and decision after we all return to New York.

While I agree in general with the principle that anything which helps to bring the two companies together is to be favored, I am not sure that this would have that effect, and, largely with the idea of making a memorandum of the points involved for use when the question comes up for decision, I am putting down here some of my thoughts on the subject.

* * * * *

From the standpoint of Grace Line, Brown does not feel that they lose anything by having Panagra in the same office or that they would lose anything by having Panair there also. He feels, just as I do, that there is an advantage to all concerned from combinations which bring the largest numbers of the travelling public into contact with both ser-
[fol. 1051] vices. It may be rather remote but I also feel that since most air travellers are businessmen and shippers to these countries, there is some little advantage to the Grace Line by reminding these people who may be travelling by air that the Grace Line is the way to ship their goods.

With two separate personnels of companies to some extent competing in the same office considerable friction might develop with bad results. Rihl has suggested that we ought to have a combined office the same as in Buenos Aires. I immediately pointed out that, while I considered they had a good office there, it was ridiculous that Panair with the smaller volume of business and paying the smaller part of the office expense, should be running the office which should really be run by Panagra; stating further that I was not satisfied with the total business which that office was sending to Miami or with the portion of it which was going via Panagra (that being less than twice the movement via Panair which we were entitled to) and, although in view of the small total I was not inclined to press the porportions at this time, I would always have that in mind and would never be satisfied unless we were getting our full share. He immediately replied that so far as he was concerned he would be perfectly willing that Panagra should control the Cristobal office. While that is obviously the only form in which we could consider a joint office, I do not much like it as we would be continuously in the [fol. 1052] position of having to lean backwards. Moreover, owing to the lower cost of doing business here as compared with Buenos Aires and the very favorable arrangements we have in the Grace building, the consideration of economy is not here of the same consequence that it is in Buenos Aires and I am inclined to feel that so far as Panagra is concerned the added expense of a separate office is offset by the added advantages.

Very truly yours,

[fol. 1060]

GOVERNMENT'S EXHIBIT 503

PAN AMERICAN AIRWAYS SYSTEM

MEMORANDUM

No. 383

DATE July 21st, 1937.

TO Regional Director

DEPT. Executive

LOCATION RIO DE JANEIRO.

FROM Commercial Manager

DEPT. Pan American Argentina, S. A.

LOCATION BUENOS AIRES.

SUBJECT REPRESENTATION OF PAN GRACE.

CONFIDENTIAL

Supplementing our memorandum n° 332 of May 31st, you are advised that Pan Grace appears to have definitely turned over to this office all details pertaining to traffic and accounting matters in connection with their Argentine sub-agents, and you will recall that Alejandro spent about a month between Salta, Tucuman and Cordoba in connection with the organization of their new Diagonal service to La Paz.

* * * * * * *

While handling these different agencies increases the burden of this office, it is felt that it is highly desirable from a political point of view, and we also believe it will be instrumental in dissipating any ideas that Pan Grace may have had for the organization of their own local Company.

Later on I hope to send one of our solicitors on a similar trip, and I am sure that this will also redound to the benefit of Pan American Airways through the dissemination of information regarding the services of the entire system.

(SHD) C. E. MOORE.

np

[fol. 1061]

GOVERNMENT'S EXHIBIT 504

COPY OF HANDWRITTEN LETTER

No. 14
Argentine

Buenos Aires, 22 Oct. '37

Dear Mr. Iglehart,

The set-up here is far from satisfactory. Without going into details, the whole problem to my mind resolves itself down to the fact that we have no one really in command of the B.A. office where we should have a good business man on that job.

Bradley is the President of the local company but his activities are confined to governmental matters and endless diplomatic correspondence with Rio, Santiago and N.Y. Moore is in charge of traffic (he and Bradley working quite independently) and responds to Rice (in Rio) and Clemens? (in N.Y.) with reference to Panair matters and to Santiago and N.Y. with reference to Panagra. Panagra operations are controlled from Santiago. The inevitable result is scattered effort, lost motion and dissipated responsibility. With the growth in complexity and importance of Panagra problems here this is not good enough.

Nor do I think the idea of Panagra having a man of its own here in an indefinite status—as we did with Kirkland—will fill the bill tho concededly that is better than nothing. The trouble is that except in respect to operating matters a man in such a position cannot really make himself felt except in a very slow and roundabout way. My feeling is that we must have a competent man in full charge of all activities here—i.e. in charge of Pan-American Argentine S.A. As Panagra is paying 2/3rds of the expenses of the local organization, I think we should have the dominant voice in the selection of that man and that he should be someone [fol. 1062] we can depend upon to look after our interests.

If we could find a satisfactory Argentine for this job that would be best, but I fear this will take too long. I have

thought some of the second men in the Munson organization here who has just left them (he is not an Argentine) and is I think enroute to New York. I think his name is Colgan. Perhaps Daulton can find out about him. Everyone here speaks very highly of him but I am afraid he may be too much just a traffic man, and, of course, he knows nothing of our problems or of aviation problems in general.

The more I think of it, the more I feel that if Juan does not accept Douglas Campbell for the job we have in mind—or if there is long delay in filling that job—as there may be, he would be just the man for the post. He would get on well with everyone. He has just the qualifications we need. He would also have a fine opportunity to develop into the other job. Juan might not readily agree but I am not sure that it might not appeal to him for various reasons—and in any case be as acceptable to him as anyone else we would be likely to select. Of all the general jobs in the field this one properly handled should rank second only to Harris'.

I have stayed over here waiting for Rice. He and Simon will be here for the week-end when we will go into all the local problems in detail. I expect to urge the necessity of resident management but will not, of course, propose Campbell. I have, however, mentioned the idea to Mac who thinks very well of it volunteering that it would also be ad- [fol. 1063] vantageous as putting him in line for N.Y. I am just passing this suggestion along for your consideration.

I spoke to George in Lima about the Argentine agency contract of Sept. 1, 1937 which Mac signed without consulting anyone and he assured me if it was not satisfactory it would be cancelled. I also, of course, spoke to Mac about it.

Very sincerely,

Harold J. Roig

W. R. GRACE & CO.
7 Hanover Square, New York

A. GARNI
First Vice-President

NEW YORK, April 18, 1938.

Harold J. Roig, Esq.,

LIMA, Peru.

BUENOS AIRES OFFICE

Dear Roig:

Your No. 12:

There is no question but that the whole set-up at that place is out of gear in every respect. As I understand that about 75% of the in and out traffic is Panagra's, it does seem rather anomalous that the office should be run by Pan American Airways, instead of by Panagra. In spite of the fact that our past efforts in the latter respect failed, I shall take this question up specifically with Juan, but have no particular illusions that he will agree to turn this office over to Panagra.

From the difficulty which arose some time ago with reference to the itinerary of the Diagonal line it is apparent that we will never get first class service in the Argentine as long as affairs are looked after there by Bradley, whom I happen to know and who in turn has to report to Rice in Rio. The other day I also met the latter in New York and was rather disappointed as I expected to see a man of a much broader calibre.

[fol. 1065] Mr. Iglehart, who saw a copy of your letter No. 12, returned it to me with a note saying, "Can't we get Sanchez Elia to recommend a man?" As it will probably take an unusual effort and considerable time to get Juan to agree, if indeed he ever will agree, to turn that office over to Panagra might not the first step be to get an "Argentine Simon" to be the head of that office and then put alongside of him somebody of the type of Kirkland and let Juan take over Bradley, Moore, etc.?

With such a set-up, together with Sanchez Elia's increasing interest in Panagra's affairs, the task of getting operations of this office under our own wings will become easier than it is under existing conditions.

While discussing this Buenos Aires situation with Mr. Iglehart he expressed the opinion that it is most important for you to go to Buenos Aires. I mentioned that it was not your idea to do this as you had just been there recently but in view of the ever-changing conditions and the rather precarious position Panagra is in, it now seems as if every place should be gone over with a fine-tooth comb so that on your return you have the most up-to-date facts, with which we could then confront Juan in an effort to shake down the whole picture.

While we are going over the situation at this end I will avail of every suitable opportunity to shake Juan down as [fol. 1066] much as I can as I fully appreciate that something radical will have to be resorted to not only with reference to the running of the Buenos Aires office but also with reference to the entire present form of managing this company, which I am sure you will agree is far from satisfactory and at best extremely painful.

Very truly yours,

A. Garni

[fol. 1067]

GOVERNMENT'S EXHIBIT 506

NEW YORK, May 3, 1938.

Personal

Juan Trippe, Esq.,
Pan American Airways, Inc.,
Chrysler Building,
New York, N. Y.

Dear Juan:

BUENOS AIRES OFFICE

As you know, we receive continual complaints with reference to the unsatisfactory service Panagra is getting from Panair's Buenos Aires representation.

* * * * *

The absence of a competent business man in charge of the Buenos Aires office seems to be the basic trouble there. Additionally, expense accounts incurred by Bradley and I believe some of the others, are unduly excessive, and all in all Panagra is exposed to the maximum expense and the minimum service.

* * * * * *

As you know, it is difficult to manage any business, even with well organized offices in full cooperation, but to manage a business with service such as we are receiving from the Buenos Aires office is quite impossible. We have, I think, discussed the Buenos Aires situation on previous occasions and I intended fully to discuss it again with you, together with other items which I have in my mind. However, time passes so quickly and both you and I are always [fol. 1068] so busy that it seems impossible to get together as promptly as is desirable. For this reason I am writing you specifically on the subject of the Buenos Aires office, asking you to give serious consideration to the suggestions made in the past to the effect that Panagra should have its own office and select its own personnel rather than continue

to have their affairs looked after by an incompetent and detached personnel.

I wish you would think this over so that we can get together in the near future in an effort to reach an agreement.

Very truly yours,

(Signed) A. GARNI

[fol. 1069]

GOVERNMENT'S EXHIBIT 507

January 9, 1940

MEMORANDUM TO MR. YOUNG:

B. A. OFFICE

The B. A. office was one of the major points of controversy in the discussions of a year ago. Its promised satisfactory solution was one of the essential inducements to the settlement reached at that time.

We (and by this I mean not only Grace but all of the operating officials of Panagra) felt then and still feel that in view of the relatively greater importance of Panagra's interests in the Argentine and the fact that Panagra contributes two-thirds of the expense of the office, Panagra should own and control the local company and the B.A. office. Our second choice would be a separate organization of our own. We are willing to acquiesce in Pan American's idea that we continue to endeavor to work out the problem through the joint office only on condition that there is a basic reorganization of the existing setup.

* * * * *

4. So far as Panagra's relations with the office are concerned, it is essential

(a) that it be understood that the office is a joint office maintained by Panagra as well as by Panair on a partnership basis and that the viewpoint be that of a joint enterprise and not that of a Panair office incidentally and secondarily serving Panagra.

[fol. 1070]

(b) that it be understood that the office is not a mere service station but on the contrary has the definite job of building up traffic in a very important way and that in view of the large unrealized potentialities of the Argentine nothing short of a very large increase in traffic movement will be considered a satisfactory performance.

(c) that Panagra through its Lima and New York offices deal direct with the B.A. office on all matters affecting any phase of Panagra's business and that the B. A. office deal direct with Panagra on these matters without going through the Regional Director in Rio or Pan American in New York.

(d) that it is not sufficient to merely deliver the Panagra route to those asking for it but that the route must be definitely and specifically sold and that we require a definite persistent sales campaign with reference to our route.

We realize, of course, that the foregoing cannot be accomplished overnight and that the personnel changes involved will have to be carried out carefully and with due regard to all concerned. We feel, however, that Roll should approach the problem with the foregoing objectives in mind and should be able to make this definite recommendations for their consummation within two or three months.

H.J.R.

[fol. 1071]

GOVERNMENT'S EXHIBIT 508

TJK-21

NEW YORK COPY

JOINT FACILITIES, ETC.

Lima, June 19, 1942.

Mr. H. J. Roig,
NEW YORK.

Dear Mr. Roig:

The present and future need for economy in our operations, as reflected by the contents of your Palmetto #73 and all that it implies, brings with it the thought that it may be about time for us to reconsider our position with regard to joint facilities arrangements we now have in effect with Panair, particularly at the Canal Zone. The way present costs are running leads us to believe that the $2,900. which we now pay per month (April 1942) is apt to increase steadily to the point where we might find it desirable again to have our own organization at the Canal. In order to complete the picture, we might also mention that we pay Panair about $1,200 a month for serving our aircraft at Balboa, in addition to the Joint Facilities charges.

* * *

In addition to the foregoing, we have a feeling that since we entered into the joint facilities idea in 1937, and particularly as a result of the elimination of our own division office in Cristobal in 1938, we have lost our identity in the Canal Zone area. We not only have lost our identity but we have in many ways put ourselves at the mercey [fol. 1072] of Penair in matters of financial control.

* * *

As to the Buenos Aires town office organization, we honestly feel that sooner or later we must work toward a setup where Panagra control of the office is made dominant. Aside from the fact that we have always paid the larger share of the office's running expenses, there is the

inescapable fact that the entire Argentine territory (all Panagra's) comes under its direction, whereas it is little more than a terminal office for Panair. Despite this preponderance of factors in favor of a dominant Panagra control, we believe the Buenos Aires organization has always felt that they are a Panair, rather than a Panagra, institution. Consequently, Rio has had more influence in shaping its morale, financial attitude, etc. than SAGO. Without any attempt to discredit the fine performance of that office in recent years, we have the belief that the same results might have been obtained under the admittedly stricter Panagra conception of operating economy and control.

We shall be pleased to have your reaction to all of the foregoing at your convenience. Once we have had the benefit of your general attitude on these rather large questions we will be able to proceed with a more detailed study of all factors involved.

Sincerely,

T. J. Kirkland

GOVERNMENT'S EXHIBIT 509

April 15, 1948

MEMORANDUM TO MR. DOUGLAS CAMPBELL

Reference: Your memorandum of April 14th

I have already transmitted to the Latin American Division for comment the following excerpt regarding the facilities provided by our Argentine company from your draft of the proposed intercompany agreement between Pan American Airways, W. R. Grace & Company and Pan American-Grace Airways:

"Pan American will cause its subsidiary, Compania de Aviacion Pan American Argentina, S. A., to continue

to render sales and other services jointly to Panagra and Pan American in Argentina, and the same joint basis of reimbursement of Compania de Aviacion Pan American Argentina S. A. as is now in effect will continue. Pan American shall regularly consult with Panagra regarding the joint activities of Compania de Aviacion Pan American Argentina, S. A., and with particular reference to sales policies, personnel, the annual budget, advertising programs and expenditures, subject to joint reimbursement."

I am transmitting to Mr. Morrison your memorandum of April 14 and again requesting that matters of the type referred to be cleared through the New York office for "consultation with Panaga". As expressed to you yesterday we are most desirous of coordinating the activities of the Argentine company to meet the needs of ourselves and of Panagra and we shall at all times be willing to discuss the entire set-up with you from every angle including efficient sales activities, control of expenses and all other pertinent factors. We shall endeavor to discuss important changes with you in advance, and in every case will give full consideration to any observations and recommendations which you advance.

However, since the Argentine company is owned one hundred percent by Pan American Airways we wish to have it [fol. 1074] clearly understood that the ultimate decision regarding any action taken by or with respect to that company must rest with us.

E. Balluder

GOVERNMENT'S EXHIBIT 510

August 1, 1929.

J. T. Trippe Esq., President,
Pan-American Airways Inc.,
122 East 42nd Street,
New York City.

Dear Mr. Trippe:

Mr. Van Dusen called us up this afternoon and inquired whether it would be acceptable for him to omit the name of Pan-American-Grace Airways from future publicity regarding South American service, and simply to use the term "Pan-American Airways System."

Mr. Rogers, with my approval, told him that this would be entirely unacceptable.

Mr. Van Dusen seems to have found it impossible to include, in many of his recent releases, the name of the Pan-American-Grace Airways, even when the news was news only because of developments in operations South of the Panama Canal. I enclose a copy of his release of yesterday which was sent to us only today.

We are proud of our association with Pan-American Airways and we like to have this association made publicly evident as in the name Pan-American-Grace Airways and if Mr. Van Dusen is to continue to make public news regarding any phase of the operations of Pan-American-Grace Airways, we respectfully insist that the name be fully and correctly included in his releases.

I am sorry to have to write you on this subject, but I am sure your views are identical with ours and that you will wish to see that future publicity conforms to the true situation.

Sincerely yours,

(Sgd) R. H. PATCHIN

Dear Roig,

I received a letter from Trippe as per copy attached.

My inclination is not to reply to it at all as I do not want to reply contentiously and I do not quite see how I could reply otherwise. Nevertheless it may be advisable to answer in some form. What do you want me to do?

Yours very truly,

D. S. Iglehart

[fol. 1079]

PAN AMERICAN AIRWAYS, INC.
General Offices—122 East Forty-Second Street
New York City

January
9
1 9 3 2.

Mr. D. Stewart Iglehart, President,
W. R. Grace & Company,
7 Hanover Square,
New York, N. Y.

Dear Mr. Iglehart:

On returning to New York today, after a week's absence, I am in receipt of your letter of December 29th, addressed to Mr. Whitney, which Mr. Whitney has forwarded to me for acknowledgment.

In your letter you refer to two recent matters that have come to your attention, prejudicial to the interests of our joint enterprise—Pan American-Grace Airways, Inc.

The first has to do with the recent traffic map issued by the Traffic Department of Pan American Airways, Inc. This map, following the usual practice, makes no pretext at geographical accuracy. I refer you to timetables and similar data, as released by our principal railroads. It does, however, accurately convey the arrival and departure days at all points covered, including points on the West Coast—the purpose for which it was conceived and released. Personally, I thought the information was presented in a very clear, concise and economical manner. In this connection, it has been favorably commented upon by other aviation officials in the United States and abroad.

* * *

The map should, however, as you have pointed out, contain the legend "Pan American-Grace Airways" appropriately placed. Also, the legend "Scadta Airways System" [fol. 1080] should have been included with the routes operated by that company. Furthermore, there should have been included in some clearer way, the fact that there is an over night stop in Haiti or Santo Domingo Southbound, and Porto Rico Northbound. A circle, with supporting arrows adjacent to the routes, would accomplish this result. I will call these matters to the attention of the Traffic Department, that our next map released contain these corrections.

* * *

I am sorry to hear that a friend of yours who applied at the Pan American traffic office here at New York regarding air passage to Buenos Aires, was not even advised of the West Coast Route.

* * *

Mistakes have been made in the past, no doubt, by both parties to our partnership. Pushing the East Coast to the detriment of the West Coast, in the case of your friend, mentioned in your letter, is an example of Pan American in the past, not having "played ball". However, on the other hand, our traffic people have felt that your steamship advertising might be improved from the point of view of Pan American-Grace Airways and also Pan American Airways. For instance, they feel that it would be more correct

were the constant reference to "the fastest service between the United States and the West Coast" changed so as to read "the fastest steamer service . . . etc." I am enclosing copy of a recent advertisement illustrating this point.

* * *

Yours sincerely,

J. T. Trippe

GOVERNMENT'S EXHIBIT 513

PAN AMERICAN-GRACE AIRWAYS, INC.
13 First 42nd Street, New York, N.Y.

PERSONAL LETTER NO. 1786

SUBJECT: PANAIR PUBLICITY IN U. S.

HRH/FL

LIMA, January 29, 1934

Mr. J.D. MacGregor, New York.

Further to the question of whether or not we are part of the Pan American Airways System, I call your attention to the article in the New York Sunday "Times" for January 14, 1934, under the heading "Along the world's far-flung airways" and the sub-heading "Ocean line for Reich", where it is brought out how important it is for Panair to operate twice a week Miami to Rio in order to "result in closer affiliations between the businessmen of Brazil and the Argentine". The article also states that Panair have purchased twelve 200 mph. landplanes to be used between the U.S. and the Canal Zone on the overland route from Brownsville. Nowhere in the article, nor on the map, is any showing or mention made of the West Coast service, nor the fact that it is the fastest connection to B.Aires.

I presume you have seen the issue of "Cosmopolitan" with the Wilson and Knight article about Panagra. As you recall, we spent a large sum of money on these people, in addition to the time we spent on them, and we end up by only a word or two, and that word not too complimentary. I haven't personally seen the article, but have heard of it; it would seem that we are not getting a fair break on the publicity which I presume we are paying for.

February 25, 1936

Dear Mr. Inglehart,

In accordance with your request I am sending you herewith copy of your letter of November 29th to Mr. Trippe re publicity. We do not appear to have received a reply to this letter, but Mr. Garni tells me that he and Mr. Roig took this matter up at a Panagra Board Meeting.

Mr. Garni has today written to Mr. Trippe as per attached copy of letter. He has asked me to tell you that he advised Mr. Harlee Branch of this incident when he was in Washington on February 22nd.

Yours very truly,

Helen R. Quilty

D. S. Inglehart, Esq.,
Delray, Florida

[fol. 1084]

NEW YORK, November 29, 1935.

Juan T. Trippe, Esq.
Pan American Airways, Inc,
Chrysler Building,
New York City.

Dear Mr. Trippe:

Some days ago I saw a copy of Pan American Airways System schedule corrected to November 1, 1935.

I am surprised to note that there is no reference by name to Pan American-Grace Airways, Inc, except in the Index to Airports, Traffic Offices and Agents. While as a matter of fact twice weekly service via the West Coast route is the only 5½ day service to Buenos Aires, the natural impression from the caption on the cover is that Pan American Airways is furnishing a 5½ day service three times a week with its clipper ships.

Today I saw a further notice with reference to express shippers; which says that elapsed time from the United States to Buenos Aires has been cut from 7 days to 5½ days, and to Rio de Janeiro, to 5 days, and that this improvement is a further contribution by Pan American Airways to American industry. This presentation is decidedly misleading as through this linking up of the 5½ day trip to Buenos Aires and the 5 day journey to Rio de Janeiro, [fol. 1085] anyone reading the circular who is not thoroughly familiar with the matter under discussion must take it for granted that the notice refers exclusively to the air service between the United States and Buenos Aires via the East Coast only.

The above are just two examples taken at random of the entirely inadequate publicity which Pan American-Grace Airways is receiving under the present arrangement. For some time I have felt that Pan American-Grace Airways should have its own publicity and publish its own schedules in this country and I am therefore asking our representative on its Board to discuss this whole matter at the next Board meeting.

Very truly yours,

(sgd) D S IGLEHART

[fol. 1086]

February 25, 1936

Juan T. Trippe, Esq.,
Pan American Airways, Inc.,
Chrysler Building,
New York City

Dear Juan,

I spent two weeks in Miami Beach and had occasion to visit the airport. While there one of the Pan American men, whose job it seems to be to enlighten the public on the mysteries of aviation, explained to Mrs. Garni and myself and others the qualities, etc. of the big clippers. He went on to say that these planes covered 15,000 miles on each round trip to Buenos Aires and that they are making the trip in 5½ days. I asked him whether this was via the East Coast, and when he answered affirmatively I said, "Is there not also a line to Buenos Aires via the West Coast, and is that route not somewhat shorter and quicker". He answered emphatically in the negative saying that the only way to get to Buenos Aires in 5½ days was via the East Coast, and I let the conversation go at that.

This incident, in which I am sure you will be interested, seems to jibe with other stories that reach us from time to time tending to put the West Coast service in the back-[fol. 1087] ground. While on this subject I am reminded of Mr. Iglehart's letter of the 29th of November addressed to you, to which he does not appear to have received a reply.

With best regards,

Yours very truly,

(Sgd) A. Garni

October 24, 1939

V. E. Chenea, Esq.,
Pan American Airways, Inc.,
Chrysler Building,
New York City

Dear Chenea:

Referring to our telephone conversation this morning, I enclose summary of Mr. Godoy's interviews with the travel agents, etc.

As I explained to you this morning, Mr. Godoy undertook this checkup on his own initiative from his home yesterday when he was laid up with a cold. Mr. Godoy has made his report in question and answer form as a convenient method of summarizing the interviews but the questions and answers are not verbatim as they were not taken by a stenographer at the time. They were written out, however, immediately following the interviews and may be taken as virtually literal. The interviews are a terrific shock to me and I know will be to you. They show the existence of a problem of the first magnitude in the immediate solution of which I know I can count on your fullest cooperation.

I would appreciate it if you would give me a ring after you have been over this memorandum. If you would like to check up on the interviews with Mr. Godoy, I would be glad to arrange for him to come in to see you.

Sincerely yours,

Enclosure

[fol. 1093]

American Express —65 Broadway

Q.—How can I travel by plane to B.A.?

A.—By way of Pan American Airways from Miami. The Clippers go from Miami to B.A. You can also go by airplane from New York to Miami.

Q.—How many departures a week are there?
A.—Only twice a week, leaving Wednesdays and Sundays from Miami, arriving at B.A. on Mondays and Fridays respectively. You must leave New York the day before in the morning plane. You can lease in the night plane, but you might miss your connection.

Q.—What are the rates?
A.—To B.A. from Miami, $550 one way, $990 round trip.

Q.—Don't you have a through rate New York to B.A.?
A.—No. You have to add to the above, the New York Miami rate, $71.75 one way, $129.20 round.

Q.—What's your baggage allowance?
A.—On through bookings from Miami to B.A., 77 lbs.

Q.—Does the same allowance apply to your trip from New York to Miami?
A.—Yes.

Q.—The trip you have described takes seven days, or at lease six days if you fly from New York to Miami at night. I thought you could make a faster trip. Isn't there a 5-day trip?
A.—Never heard of trip in five days. It cannot be done.

Q.—Why—isn't there a shorter route over the West Coast?
A.—There is no shorter route over the West Coast. The West Coast takes longer than the East Coast.

[fol. 1094] Q.—What is the West Coast Schedule?
A.—Leaves Miami Saturdays and Tuesdays, arrives B.A. Wednesdays and Saturdays.

Q.—What are your rates over the West Coast route?
A.—I am unable to give them to you now because they are not in the tariff. I will have to call the line.

Q.—Have you found out?
A.—Yes—the same as on the East Coast.

Q.—Which line is the one running the West Coast service?
A. Pan American Airways.

Q.—Why—isn't it the Pan American-Grace Airways?
A.—No, Pan American-Grace Airways is only from Chile to Argentina. From Cristobal to Chile is Pan American Airways.

American Express—605 Fifth Avenue

Q.—What companies are there running planes to B.A.?
A.—Only one—the Pan American Airways.

Q.—How many departures are there?
A.—Twice a week from Miami to B.A., via the East Coast, and twice a week via the West Coast.

Q.—What are the rates?
A.—From Miami to B.A., via East Coast, $550 one way, $990 round trip.

Q.—What about the rates via the West Coast?
A.—From Miami to Santiago, $488, and from Santiago to B.A. $100.

[fol. 1095] Q.—And what would be the through rate?
A.—The through rate would be the addition of the two, or $588, but you would not do it that way, as it would be more expensive.

Q.—Well, suppose I wanted to go down one way and up the other, what would the round trip be?
A.—Then you would take a Round South America trip, going from Miami down the West Coast to Santiago, then to B.A., and up the East Coast, and this would cost you $1150.

Q.—I don't understand this, as this would be more than the aggregate of the two one way fares.
A.—I find that my figures were wrong. The price of your Round South America ticket would be only $1007.

Q.—But, suppose I wanted to go to B.A. Via the West Coast, and return the same way, what would be the round trip fare?
A.—The figure I first gave you, of $100 from Santiago to B.A., is incorrect, as only $80 is added to the $488 from Miami to Santiago, so that your through rate Miami

to B.A. via Santiago is only $568, and your round trip would be only $1,022.40.

Q.—Which is the better way to go?

A.—If you go to B.A., the East Coast is better, because it is faster, less expensive, and saves you the trouble of passing through all those countries and getting visas. There's no point in going to Argentina with a stop at Santiago, when you can go direct via the East Coast.

[fol. 1096] Q.—I don't see where the East Coast is faster. Your East Coast schedules are six days. Aren't your West Coast schedules five days only?

A.—Yes, that's true. Still, the East Coast service is faster, and if it takes longer it is because the distance is greater.

Q.—What's your baggage allowance?

A.—From Miami to B.A., 77 lbs.

Q.—And from New York to Miami?

A.—If in connection with through passage, 77 lbs.

Q.—Who operates the West Coast line? Is it the Pan American Grace Airways?

A.—No. The only service is Pan American Airways. Grace is only a steamship line. There is no Pan American Grace Airways.

American Express—150 West 41

Q.—What airplane lines are there to B.A.?

A.—Only one—the Pan American Airways.

Q.—What departures have they?

A.—Two a week, leaving Miami Wednesdays and Sundays, arriving at B.A. Mondays and Fridays respectively.

Q.—Those planes take six days. Aren't there some faster planes?

A.—No.

Q.—What about a route down the West Coast?

[fol. 1097] A.—That's down to Chile. It is no good. It does not go through to Argentina.

Q.—Why—I thought that was a faster way.

A.—Will go to Chile if you go to Argentina. It would be like going to New York to Chicago by way of Miami. There is no through plane. You have to change planes at Santiago, and then go across the Andes.

Q.—What are your schedules on the West Coast route?

A.—Planes leave Miami Saturdays and Tuesdays, you arrive at Santiago on Tuesdays and Fridays, and at B.A. on Wednesdays and Saturdays respectively.

Q.—Well—doesn't that make five days instead of six?

A.—Still, one always takes the East Coast route, and there you need Brazilian and Argentine visas only. Over the West Coast route you need other visas.

Q.—What are your rates?

A.—$550 one way, $990 round, on either route.

Q.—What's your baggage allowance?

A.—77 lbs.

Q.—What about your rate from N.Y. to Miami?

A.—About $78 one way. Round trip, twice that less $10.

Cooks-Wagons-Lits—221 Broadway

Q.—What are your airplane departures for B.A.?

[fol. 1098] A.—The East Coast flyer leaves Miami twice a week, on Sundays and Wednesdays, by way of Porto Spain, San Juan, etc. This is considered the most direct route. Fare is $550 one way, $990 round.

Q.—Isn't there another route?

A.—Yes, by way of Cristobal, down the West Coast. These planes leave Miami twice a week, on Saturdays and Tuesdays. Fares are the same.

Q.—You referred to the East Coast as the most direct route. Wouldn't the West Coast seem more direct, since it takes one day less?

A.—Yes, but from our experience most people travel down the East Coast. However, at this time of the year the West Coast route may be very desirable over the Andes.

Q.—What do you mean?
A.—As the seasons down there are reversed from ours, it is not likely that they will have bad weather over the Andes now.

Q.—What route would you advise me to take?
A.—The West Coast, because it is shorter and the time of year is okay.

Q.—What company runs the West Coast service?
A.—Pan American Grace Airways.

Q.—Does the West Coast route have some special name, similar to the East Coast Flyer for the East Coast route?
A.—No.

Q.—What's your baggage allowance?
[fol. 1099] A.—77 lbs from Miami to B.A., but only 44 lbs. from N.Y. to Miami.

Cooks-Wagon-Lits—587 Fifth Avenue

Q.—What are your plane departures for B.A.
A.—Twice a week, leaving Miami Sundays and Wednesdays, arriving at B.A. Fridays and Mondays.

Q.—Isn't there another schedule?
A.—No.

Q.—I thought there must be another schedule. The above schedule takes six days, whereas I have been told of people making the trip in five days.
A.—I don't care what you have been told. I can tell you positively there is no other schedule. I am looking at my schedule, effective October 1939.

Q.—Still, I understand there is another schedule by way of the West Coast.
A.—But why go down the West Coast. Why go to that trouble.

Q.—What are your schedules on the West Coast route?
A.—You can leave Miami twice a week, on Tuesdays and Saturdays, stopping at Cristobal, and then stopping at Ecuador, and then stopping at Arica, and then stop-

ping at Santiago, and then crossing the Andes, and then arriving at B.A. on Saturdays and Wednesdays.

[fol. 1100] Q.—Well—doesn't that make a faster schedule, of only five days, instead of six days on the East Coast route?

A.—Yes, but the fare is about $100 higher.

Q.—What is the fare exactly?

A.—(After a long wait): $550 one way, $990 round—same as on the East Coast.

Q.—Which route would you prefer to take?

A.—I would go down the East Coast, as this saves high flight over the Andes, which some people can't stand.

Q.—Would you really prefer the East Coast route?

A.—Yes, especially on account of height and flight over the Andes. I have heard you have to fly as high as 20,000 feet, and the planes are equipped with "air tanks", with individual appliances enabling passengers to have the proper "air". I wouldn't take the chance, if I could avoid that route. Then, the East Coast gives you the chance to stop at Rio. Yes, I would much prefer the East Coast. Then again, from Miami to Trinidad you fly over a group of islands, visiting the most scenic part of the West Indies.

Q.—Doesn't the West Coast route also take you over the West Indies?

A.—Yes, I can see that you stop at Cienfuegos, and then at Kingston, and after that you fly to Cristobal—about the same distance as the flight to Bermuda.

[fol. 1101] *Eastern Air Lines—51 Vanderbilt Avenue*

Q.—I should like to have some precise information on airplanes services to B.A.

A.—Why don't you call Pan American Airways for more complete information. We can give you their number.

Q.—Can't you tell me yourself?

A.—There are two planes a week, leaving Miami on Sundays and Wednesdays, arriving at B.A. on Fridays and Mondays. Fare, $550 one way, $990 round.

Q.—Isn't there another schedule?
A.—No.

Q.—Are you sure there is no other schedule? I understood there were more frequent departures than two per week.
A.—There is absolutely nothing else.

Q.—Are you sure you have looked at all your schedules?
A.—I have the Aviation Guide in front of me.

Q.—What about the Pan American Airways schedules?
A.—That's what I am looking up in the Aviation Guide.

Q.—What about the route down the West Coast of South America?
A.—Oh, yes. You also have two weekly planes that way, leaving Miami on Saturdays and Tuesdays, arriving at B.A. on Wednesdays and Saturdays. Fares, the same as the East Coast route

Q.—What's your baggage allowance?
A.—From New York to Miami, 55 lbs. From Miami to B.A., 77 lbs.

[fol. 1102] Q.—I was told today by one source that your allowance from New York to Miami, in connection with a through passage to B.A., is 77 lbs. Another source said your allowance from New York to Miami is only 44 lbs.
A.—They are both wrong. 55 lbs from New York to Miami is the correct allowance.

Pan-American Airways—Reservation Department.

No memorandum was kept of this conversation, as the employee handling the inquiry was very obliging and efficient, and from the outset stated that there are four planes a week, two via the West Coast and two via the East Coast, also that the West Coast Route takes 4½ days and the East Coast 6 days.

October 23, 1939.

New York City

Dear Sonny,

My attention has been called to the Pan American Airways System Organization Chart effective January 15th, issued with Executive (System) Memorandum No. 55. This is the first time I have seen one of these charts.

In this chart Pan American-Grace Airways occupies merely the position of a division of the System.

This is obviously not a correct picture and I cannot but feel that it is definitely prejudicial in connection with the question of services of which I spoke to your Executive Committee on the 14th inst.

I would appreciate it if you would have appropriate correction made.

Sincerely yours,

H. J. R.

MEMORANDUM TO MR. EVAN YOUNG

PUBLICITY—TRANSFER OF MR. ARTHUR CURTIS

Referring to your memorandum of March 27th, for the reasons there referred to and others which we have discussed, I entirely concur with your decision not to transfer Mr. Curtis to the position in question.

Much as I appreciate your efforts in this connection (and your cooperation has been 100% as always), I feel that I must again emphasize the importance of reaching a prompt solution of this really burning problem. Although it is no fault of yours, the fact remains that many weeks have been lost while Curtis was under consideration and the problem is no nearer solution than it has been for the past ten years.

Referring to the last sentence of your memorandum, for reasons which I will explain to you verbally and confidentially, I have reluctantly but definitely reached the conclusion since we last discussed the subject, that it is impossible for Panagra publicity to receive proper attention under Mr. Van Dusen. I therefore propose that as from January 1, 1941, the fee which Panagra pays Pan American be reduced by the sum of $50,000 per annum and that Panagra use this amount to set up its own independent publicity department and attend to its own publicity, Pan American being, of course, thereupon relieved of any further obligations in respect of our publicity work.

H.J.R.

[fol. 1109]

GOVERNMENT'S EXHIBIT 526

May 29, 1942

Thomas A. Morgan, Esq.,
Chairman, Executive Committee,
Pan American Airways Corporation,
Chrysler Building,
New York City.

My dear Mr. Morgan,

I am informed that Pan American Airways have engaged a new advertising agency and that an advertising campaign is proposed with the general objective, in effect, of selling the idea of the efficiency and desirability of world monopoly in American foreign aviation. I understand that the last Annual Report of Pan American Airways Corporation, featuring "Pan American World Airways System", is indicative of the general theme of this campaign.

Although Pan American-Grace Airways, Inc. is an independent company with its own directors and officers, the Annual Report referred to assumes to list Pan American-Grace Airways, Inc. along with various divisions and 100% subsidiaries of the so-called Pan American Airways System. It also shows as the so-called "Executive Officers" of the "Pan American Airways System" (and that in a manner clearly intended to indicate their seniority to the officials of the divisions and companies listed as a part of this [fol. 1110] System) various individuals who are, I understand, the officers of Pan American Airways Corporation or of Pan American Airways, Inc.

We do not subscribe to the idea of world monopoly in American foreign aviation. Pan American-Grace Airways, Inc. is not a subsidiary of any "World Airways System". For these reasons as well as because of the pending proceedings before the Civil Aeronautics Board, we must request that Pan American-Grace Airways, Inc. be not included in the proposed advertising campaign in any form implying its acquiescence in the above thesis or its being

a part of any such monopoly. Moreover, we must request that all such representations of Pan American-Grace Airways, Inc.'s status as that in the above mentioned Annual Report whether in publicity, advertising, annual reports or other publications of Pan American, be discontinued as we consider such statements to be unwarranted and damaging to Pan American-Grace Airways, Inc. and to its standing as an independent company.

Very truly yours,

D. S. Iglehart

[fol. 1116]

GOVERNMENT'S EXHIBIT 531

March 3, 1948

Memorandum to Mr. H. J. Roig

Grand Tour—Joint Advertising

Returned herewith is a copy of proposed joint PAA and Panagra ad for the New York Herald Tribune for March 21st.

The specific problem proposed by this script is the merger of the identity of Panagra into Pan American World Airways.

This type of advertising, selling the notion of the "Grand Tour", has obvious sales advantages. On the other hand, suggestions of the identity of the two airlines are not only factually inaccurate, but raise serious policy questions involving (a) Government control aspects and (b) Trademark identity.

On the first point, it is patently advantageous not to becloud the fact that Panagra and Pan American World Airways are in direct competition with each other.

On the second point, the trade-marks "Panagra" and "Pan American-Grace Airways" are valuable properties. The creation of a public impression that the service represented by these trade-marks is performed by Pan American

Airways Inc., instead of by the trade-mark owner Pan [fol. 1117] American-Grace Airways Inc., might be held to having vitiated the ownership of the trade-marks.

It is, therefore, recommended that all such expressions as "Only PAA system offers daily service to every major city on both coasts" and "Name any country in South America—Pan American flies you there" should be eliminated. This can be done without giving up the advantage of advertising the "Grand Tour".

* * * * * * *

Another objectionable feature of the ads in question is the use of a distorted map which conceals the advantages of the West Coast route to Buenos Aires. It should be noted here that Panagra over-emphasizes that advantage. It would seem highly desirable that all maps used depict accurately the relationship between the two routes regardless of which line creates the advertisement.

June 1, 1948

Mr. Howard B. Dean
Pan American World Airways System
Chrysler Building
New York 17, N. Y.

Dear Howard:

Referring to my telephone conversation last week, I enclose herewith letter received from Jimmy Walker and memorandum of Ben Oehlert's interview with a Pan American counter clerk at the Air Terminal Building in New York on May 26th.

It seems to me from these and other instances which have come to our attention that the understanding which exists

at the top is not getting down to the people who are actually in contact with the public. I know that you will agree that these instances call for some very specific action. My suggestion would be that a very specific set of written instructions be prepared with the approval of the Panagra Traffic Head and that these instructions be issued to all selling offices of Pan American, directly to counter clerks and all others having direct contact with the public in the sale of Panagra transportation.

Very truly yours,

/s/ HAROLD J ROIG

[fol. 1119]

RM-99

Miami Traffic Office Handling
of Passengers

May 21, 1948

Pan American Grace Airways Inc.
NEW YORK

Attention Mr. J. T. Shannon

Gentlemen:

Ex-employee Robert Kelly, who has just returned from the States, visited this office yesterday and reported the following:

A friend of his whom he met in Miami inquired of him why it took so long to travel Miami/Buenos Aires. Kelly asked to see his tickets and he was sold over the east coast route. Mr. Kelly proceeded with his friend to the downtown Pan American Airways traffic office and when he asked the traffic clerk why he sold this passenger over the east coast, the clerk replied, "We are instructed to sell all passengers over the Pan American Airways route unless the passenger particularly specifies the west coast or Panagra".

In addition Captain Achilles on Monday evening, May 17, was standing in this same office when a passenger in-

quired if he could travel on the DC-6. The traffic clerk replied that there was no DC-6 that evening, whereupon Captain Achilles reminded him that we were now into daily service with DC-6's. The traffic clerk in front of the passenger refuted this argument and went further by saying that there was a DC-4 the evening before (May 16) and Captain Achilles of course told him he was incorrect. The rest of the discussion is wordage but the point is clear.

Reasons such as the above are probably partially responsible for the falling off in our southbound loads over El Interamericano. We trust you will be able to use this information advantageously.

Yours very truly,

James W. Walker, Jr.

MEMORANDUM TO MR. H. J. ROIG

At lunch today John Shannon and I had a general discussion with Messrs. Lipscomb and Friendly of Pan American regarding advertising.

Both Mr. Friendly and Mr. Lipscomb agreed with John and me that a standard map of the Western Hemisphere should be agreed upon which would not have any distortions and which would be uniformly used. It is my understanding that John and Lipscomb will work this out together.

There was no such meeting of the minds on the question of Pan American's advertising, "Name any Country in South America—Pan American will Fly You There". Lipscomb took the position first that the words "Pan American" as used above mean "Pan American World Airways System"; second, that Panagra is a part of "Pan American

World Airways System" and third, that the type of advertising was good for Panagra anyway.

Henry Friendly agreed with Lipscomb, stating that there never had been any competition between Pan American and Panagra and never would be, but conceded that, had the issue come up with him, he would have felt it advisable to consult with Grace before running such an ad.

Although there is a basic disagreement as to whether Panagra is part of the "Pan American World Airways Sys- [fol. 1121] tem" in such a manner as to justify a statement such as "Pan American Will Fly You to Any Country in South America", we at least came to this general agreement—that so far as practical (meaning not including foreign advertising prepared by Pan American Regional Offices) Pan American would advise more closely than it has with us before running advertising referring to or featuring either Panagra or its routes.

When I left the Chrysler Building I walked across the street to the Air Terminal Building and at Pan American's counter inquired of the clerk for information regarding Buenos Aires, whereupon approximately the following colloquy took place:

Oehlert: I should like to have some information about flying to Buenos Aires.

Clerk: Yes sir, what would you like to know?

Oehlert: How much does it cost?

Clerk: How long will you stay in Buenos Aires?

Oehlert: About two weeks, why?

Clerk: A round-trip ticket good for 90 days is cheaper than one good for a longer period.

Oehlert: How much is the difference?

Clerk: About 10%.

Oehlert: What is the 90 day rate?

Clerk: It is $180 round-trip from New York to San Juan and $828 from San Juan to Buenos Aires for a total of $1,008.

[fol. 1122] Oehlert: When do the flights leave?

Clerk: Daily at 11:15 p.m. Eastern Standard Time.

Oehlert: When do they arrive in Buenos Aires?

Clerk: At 4:00 p.m. on the second afternoon.

Oehlert: How many hours is that?

Clerk: 37

Oehlert: What kind of plane do you use?

Clerk: DC-4 and you are entitled to 66 lbs. luggage.

At that point I turned away from the counter but immediately turned back and the following discussion took place:

Oehlert: 37 hours is a long time. Isn't there *something* quicker than that?

Clerk: Yes, you can go by way of Miami but you have to change planes there and it costs more.

Oehlert: How much does it cost?

Clerk: (looking at several books) Counting the extra constellation fare, it is $86.83 each way to Miami for a total of $173.66 round-trip and $928.80 round-trip from Miami to Buenos Aires for a total of $1,102.46 or about $100 more than the other way.

Oehlert: How long does it take?

Clerk: It is 20 hours from Miami and 4 or 5 hours from New York to Miami and a day over in Miami of 11½ hours.

[fol. 1123] Oehlert: That is about 26½ hours then.

Clerk: Well you leave New York at 6:30 p.m. and counting change-over arrive in Buenos Aires at 6:15 p.m. but, of course, there is a difference in time zone.

Oehlert: What equipment do you use on that flight?

Clerk: DC-6.

Oehlert: Is that your flight, too?

Clerk: Yes.

BENJAMIN H. OEHLERT, JR.

GOVERNMENT'S EXHIBIT 533

June 2, 1948

W. R. Grace & Co.
Hanover Square
New York 5, N.Y.

MEMORANDUM TO MR. J. P. GRACE, JR.

It is apparent from the attached that there is a great deal of ignorance shown on all counts from both the agents and the airlines contained in this survey.

As far as the airlines are concerned you will note that both EAL and NAL quoted west coast connections. However, EAL referred to Pan American Airways with no mention of Panagra as opposed to NAL who quoted the connecting flight as Panagra. We would like to call your attention to the telephone conversation with PAA reservation bureau as compared with the personal contact with the downtown office. In the first case it becomes obvious that there is a definite tendency on the part of the main reservation of PAA to sell the east coast and avoid any mention of the west coast service to say nothing of using Panagra's name. This conversation is almost word for word what Mr. Oehlert received at the uptown counter. In the personal conversation at the downtown office it should be pointed out that although Mr. Ford of this department was unknown to the clerk in this office that nevertheless

a great deal of our business is done through this particular clerk whose name is Mr. Smyth and we feel because of the [fol. 1125] unusual amount of business that he does on the west coast and also because we know personally that he is a high type fellow and would react in a more reasonable manner. As for the "outside" airlines such as TWA, UAL, etc. we more or less expected them to refer us to Pan American Airways, but we feel that closer relationship with these airlines would be extremely helpful in obtaining sales as we know from personal experience a great many calls come to these airlines regarding travel to any point regardless of whether these airlines have routes to these points.

As far as the agencies are concerned, we feel that their tendency to sell PAA is completely due to lack of knowledge concerning Panagra rather than a preference to sell PAA. This is based upon the fact that the fastest and more comfortable service is offered on the west coast route and therefore it is to the benefit of the agent to sell this service rather than the other particularly in view of the fact that there is only a few dollars difference in the cost.

Our own personal opinion concerning PAA's tendency to sell the east coast over the west coast is not good judgment since Panagra although an affiliate is part of the PAA system and it is to the best interest of PAA to sell the best [fol. 1126] and the most comfortable service to any point on their system and that in failing to do so they are more apt to create ill will and lose repeat business than the gain they make by selling an inferior service. The point being that a passenger having arrived in Buenos Aires after flight on the east coast will unquestionably discover in due course that the trip could have been made with a good deal of time saved had he been told of the west coast service. It will be difficult to understand why he was sold this inferior route and not told of the Panagra route.

R. E. Montgomery

REM:DMcA

[fol. 1127] We list below several conclusions which we feel can be drawn from our contacts with the 22 agents listed:

1. In all but two of the conversations with the agents the name Panagra was not mentioned and it should be pointed out that in one of the two instances in which it was mentioned it was mentioned by a woman who had spent a great deal of her life in Buenos Aires and Santiago.

2. Most of the agents questioned had no or at the best very little knowledge of west coast service to Buenos Aires.

3. Sales effort in over 75% of the agents was directed to travel on the east coast.

4. In the majority of cases where west coast service was mentioned sales effort was directed in the following pattern.

   First, east coast reservations
   Second, Round South America
   Third, Information was given on west coast service.

5. Most agents showed a lack of knowledge of the Pan American schedules and rates and many quoted erroneous information.

6. All agents who were forced to consult the schedule either in the American Aviation Guide of the Pan American World Airways System Schedule invariably turned to the east coast service which is on the left hand page directly opposite the west coast service and their hands usually covered the west coast service. We believe that this is not a desire to hide the schedule but a lack of knowledge as to its existence.

[fol. 1128] 7. In some cases where agents knew of the existence of DC 6 service they were not cognizant of the fact that the service charge had been abolished or that there are now daily DC 6 flights out of Miami.

8. Most agents over emphasized the necessity of paying U. S. Transportation Tax between New York and Miami when using the west coast route.

9. Most agents emphasized that a change of planes occurred at Miami on the west coast in lieu of the through plane service offered on the east coast.

Comment

In those cases where knowledge of west coast service was present and east coast service was stressed, we feel that one reason for this may be the fact that passengers would be desirous of breaking the trip at known stop-overs en route, thereby enabling the agent to obtain a commission on the hotel reservation secured.

GOVERNMENT'S EXHIBIT 534

W. R. GRACE & CO.
Hanover Square
New York 5, N.Y.

June 3, 1948.

MEMORANDUM TO MR. SHEA

Montgomery's representatives personally called on:

(1) 22 travel agencies

(2) PAA Reservations, 100 Broadway,

and further they telephoned six airlines as follows:

(1) PAA Reservations
(2) American Airlines Reservations "
(3) United Airlines "
(4) TWA Airlines "
(5) National Airlines "
(6) Eastern Airlines "

We can divide these various contacts into three groups:

(1) The personal contact with PAA Reservations, 100 Broadway, and the telephone conversation with PAA Central Reservations.

(2) The telephone call with each of the five other airlines.

(3) The personal visit with each of the 22 travel agencies.

CATEGORY I

With reference to Pan American, as explained in Montgomery's memorandum, the man who was seen at 100 Broadway works with our people all the time and is thoroughly familiar with the Panagra flights and, therefore, mentioned them right off the bat. He did say, however, that the flight leaving New York for the East Coast is simpler and more direct, which is wrong and shows what kind of instructions he is receiving:

PAA Reservations failed to mention Panagra at all until the mythical customer said, "I was just wondering would there be a shorter way of going". In other words, unless the customer had known about Panagra, Panagra would never have been mentioned. So much for Pan American Airways.

CATEGORY II—Telephone conversations with the 5 domestic airlines.

We can divide up this category into the following divisions.

(1) Those that mentioned the service out of Miami and called it "Pan American"—Eastern Airlines and National Airlines (obviously because they would benefit by it).

[fol. 1130] (2) Those who simply referred the applicant to Pan American Airways. TWA, United and American are also mentioned and Air France. This latter situation may be explained by the fact that Pan American handles all traffic in the United States and, therefore, it might be considered logical for the domestic airlines to refer the applicant to Pan American. But you can see what happens when they refer to Pan American as per the interviews that we have had at Pan American counters. So it is the same old run-around no matter where you go.

CATEGORY III—22 Travel Agencies

These can be sub-divided into the following main categories.

(1) Those who mentioned Panagra service right off the bat without any needling from the customer but called it Pan American.

(2) Those who mentioned Panagra service right off the bat without any needling from the customer and called it what it is, Panagra.

(3) Those who only mentioned Panagra service after they were needled and prompted by the customer.

(4) Those who failed to mention Panagra service at all, regardless of the amount of needling and prompting.

The analysis follows:

I Those who mentioned Panagra service right off the bat without any needling from the customer but called it Pan American	II Those who mentioned Panagra service right off the bat without any needling from the customer and called it what it is Panagra	III Those who mentioned Panagra service after they were needled and prompted by the customer	IV Those who failed to mention Panagra service at all regardless of the amount of needling and prompting
Paul Tausig & Son "Panagra a subsidiary of PAA"	Continental American Travel Inc.—	Embassy Tours—"Mentions PAA all the way but says DC-6 might be used northbound from B.A."	Gaul Travel Service (No amount of needling could evoke any mention of Panagra and the pay off was that they first mentioned a Constellation in th Pan American East Coast Route.) "El Interamericano poster on the floor."
Haley Corporation—"Mentions via Miami but better to go direct from New York to avoid changes and the possibility of missing connections".	Exprinter Travel Service "Best way down east coast, back via west coast."	A. T. Henderson Co., Inc. —"May go via Miami but it is a PAA flight".	
Columbia Tours, Inc.—"Mentions El Interamericano."	Travel Arrangements—"Mentions El Interamericano."	The House of Travel Inc., —"DC-6 best service but must pay service charge."	United States Travel Agency—"Pan American best and fastest way."
Volaye Air Inc.—"East Coast best way to go".			American Express Co.—"Constellation or DC-4." (Downtown)
American Express—"West coast faster, more comfortable, better equipped". (Uptown)			Overland Overseas Tours —"PAA best way of going".
Marcha Owen Travel—"Mentioned El Interamericano but called it a PAA Service".			Martin Travel Bureau—"East coast fastest and most direct route".
Marsh Tours—"West coast service takes longer than east coast service".			Ask Mr. Foster—"East coast best service to B.A."
Ambassador Travel Agency, Inc.—"PAA use consteilations all the way".			Thomas Cook & Sons—"PAA east coast best service to B.A."

GOVERNMENT'S EXHIBIT 543

July 5, 1950

INDUSTRIAL DEPARTMENT

MEMORANDUM TO MR. B. H. OEHLERT, JR.

NO. 2948

PANAGRA SURVEY

This memorandum is concerned with the results of a survey designed to evaluate the attitude of selected travel agencies toward Panagra. More specifically, we were interested to learn:

1. What recommendations the agents make with respect to plane travel to South America.
2. The general familiarity of the agents with the various airlines going to South America.
3. The attitude toward and familiarity with Panagra.

Our point of destination was Buenos Aires, since it is served by all of the major air lines flying to South America and is generally considered at the cross-roads of South American plane travel. Our list of travel agents was originally taken from the Manhattan Classified Telephone Directory, consisting of approximately 300, which was then checked and refined by Grace Line. The final list consisted of 88 agents, presumably above the average, from the point of view of knowing about the facilities available for travel in South America.

[fol. 1150] We made our contacts by telephone and assumed the position of an independent businessman contemplating a flight to Buenos Aires. We were generally concerned with convenience, time of travel and cost. Other than that we had no predetermined ideas and requested their suggestions. Our objective, of course, was to obtain noted above. If this was not adequately brought out, then the agents' viewpoint with respect to the three objectives we attempted to lead the conversation by asking them directly about Panagra and its service in relation to the

other services available. Of the 88 contacts made, representative replies were obtained from 65, the balance was not able to give the information immediately or, as in most instances, the office was closed on that day (July 3rd).

Analysis of the answers received indicates that the agencies contacted are generally familiar with the air routes to Buenos Aires, but there is some confusion as to the desirability of either route. While most agents seem to be aware that Panagra is an affiliate of PAA, others show remarkable ignorance of Panagra's identity. The general pattern of answers to our inquiries seem to be the following:

1. By far the greater portion of agents are plugging the new Stratocruiser service to Buenos Aires via San Juan, on grounds of luxury, convenience, directness and saving of time.

[fol. 1151] 2. Most agents suggest as second choice one of Pan-Americans other flights to Buenos Aires.

3. Most agents say the east coast is shorter to Buenos Aires since Buenos Aires is on the east coast, indicating lack of knowledge of geography.

4. With few exceptions, none recommended Broniff because it flies out of the Midwest. Some reported that Broniff has no service to South America.

5. None recommended PAEA, the Argentine line, although a few mentioned it as an alternative to PAA.

6. The majority recognize that Panagra is an affiliate of Pan-American, but they think in terms of one airline rather than two competing systems; consequently few proposed Panagra as such.

In response to our direct questioning about Panagra, the following answers are indicative of the agents' understanding of Panagra's position in South American plane service.

> Panagra is the South American Division of Pan-American.
>
> Panagra part of Pan-American.

Panagra same as Pan-American.

Panagra part of Pan American system.

Panagra works in conjunction with Pan American.

Panagra combination of PAA and Grace Line.

Panagra must be something new.

Panagra an associate of PAA.

Panagra a subsidiary of PAA.

[fol. 1152] Panagra best and most direct.

Panagra flies in Latin America or part of Pan American System.

Panagra is a little company owned by Pan American.

Panagra best for West coast.

Pan-American controls Panagra space.

Panagra is the South American name for Pan-American and is linked up with Grace Steamship.

Pan-American's Interamericano is best way.

All lines are subsidiaries of Pan-American. Rates are the same so why not take the best.

Panagra did have best service between New York and Buenos Aires prior to PAA's new Stratocruiser flight.

Don't know anything about Panagra.

Didn't know that there was any difference between Pan-American and Panagra.

Oh yes! they also fly down.

There were a number of variations of the foregoing but in the overall they represent the concensus of the travel agents surveyed. It is obvious that the identity and individuality of Panagra are lost in the offices of the travel agencies and that plane travel to South America is automatically associated with Pan-American Airway.

A number of agencies stressed the tax savings involved in a direct flight out of New York via San Juan as against the flight to Miami. As was pointed out before, the Stratocruiser flight of Pan-American has apparently been well [fol. 1153] sold to the agencies with the result that they are pushing it. This may well mean some diversion of air travel from the west to the east coast.

It is apparent from this brief survey that Panagra's promotional activities are not sufficiently effective to compete with those of Pan-American and immediate steps should be taken to correct this situation, especially in the light of recent activity by competing airlines, as exemplified by Pan American's Stratocruiser flight and Braniff's increased promotional campaign.

Dear Ted:

Thank you for sending me a copy of your letter to Harold Roig proposing an interchange of equipment at Miami which, you state, would provide through service between cities on National's routes north of Miami and cities on Paragra's routes in South America.

* * * * *

You state in your letter that an interchange of equipment between Panagra and National at Miami "would handle the majority, if not all, of Pan American's traffic through the Miami gateway to and from cities in South America." Haven't you overlooked the bulk of traffic through the Miami gateway carried by Pan American to Colombia, Venezuela, Mexico, Central America, Nassau, Cuba, Ja

maica, Haiti, the Dominican Republic, and other points in the Caribbean, for which through service is just as essential as for traffic to points on Panagra's west coast route in South America?

Sincerely

JTT:ke

January 6, 1949

Mr. G. T. Baker, President
National Airlines
3240 N. W. 27th Avenue
Miami 37, Florida

Dear Mr. Baker:

This is in reply to your letter of December 15th proposing equipment exchange between Miami and New York.

The day after I received your letter and of course before I had an opportunity to reply, the newspapers announced that this and similar letters addressed to other airlines had been made the basis of some petition or representation to the Civil Aeronautics Board and since then I have noted repeated reference to these letters in connection with C.A.B. Docket No. 3500. All this has left me in considerable doubt as to how to reply to your letter.

You are aware of Panagra's interest in giving its traffic through service to New York and how vitally important I consider this to be. You are also aware of the great efforts we have made through the years (always with National's opposition) to accomplish this. At the present time we are, as you know, seeking this objective through C.A.B. Dockets No. 1803 and No. 3500. In the former the C.A.B. Examiner has recommended the award to Pan American of a route between Miami and New York which would be available to Panagra under our Through Flight Agreement with Pan American. For many reasons a Panagra interchange with Pan American would be more satisfactory than with any other line.

Until the determination of the above proceedings, obviously neither you nor we would be in a position to reach any final agreement or even to determine if such an agreement as you propose would to any extent assist to accomplish either your own or Panagra's proposes or would be consistent with the desires of the Civil Aeronautics Board in the premises. Nor would we be willing to take any action which would in any way prejudice our position in the above proceedings.

If you wish to discuss the matter without prejudice I would be willing to meet with you or your representatives.

Yours very truly,

Harold J. Roig

NATIONAL AIRLINES
Incorporated
"Route of the Buccaneers"

3240 N.W. 27th Ave.
Miami 37, Florida

January 14, 1949

Mr. Juan T. Trippe, President
Pan American World Airways System
135 East 42nd Street
New York 17, N. Y.

Dear Juan:

I refer to your letter of January 5 and your wire dated January 7, 1949, on the subject of possible interchange agreements between Panagra and/or Pan American and National.

In your letter of January 5 you cite your efforts to obtain a Miami-Boston route and ask if I have not overlooked the traffic carried by Pan American from Miami to Colombia, Venezuela, Mexico, Central America, Nassau, Cuba, Jamaica and the Dominican Republic. As you are aware, much of this traffic such as that from Mexico, Venezuela and Cuba and the Dominican Republic, already has one carrier service to New York. An interchange involving Panagra's planes would serve all Colombian traffic except that from Barranquilla. This would mean that the only traffic areas in Latin America left without direct service to Northeastern United States would be Jamaica, Haiti and Barranquilla. The CAB traffic survey for March, 1947, reveals that the combined through traffic between these areas and the New York-Washington areas represents only seven passengers per day in each direction. The most originating in any area would average less than 3½ per day in each direction. (This is the Barranquilla, Kingston, Montego Bay, Camaguey traffic.)

Our conclusion that the Panagra entry would serve the bulk of the Latin America traffic now lacking one plane service to New York is borne out by these figures from the Board's survey. I am quite willing, however, to discuss an agreement where by National would operate one or more of Pan American's schedules through the Miami gateway to Washington and New York. Despite the position expressed in your wire of January 7th wherein you state your belief that "mere interchange agreement" would not meet your problems, we believe that upon reconsideration you will find that our proposal would provide a fully adequate pattern of through service for your Latin American [fol. 1164] traffic.

With best wishes, I am,

Sincerely,

NATIONAL AIRLINES, INC.

Miami 37, Florida

January 14, 1949

Mr. Harold J. Roig
Office of the President
Pan American-Grace Airways, Inc.
7 Hanover Square
New York 5, N. Y.

Dear Mr. Roig:

I refer to your letter of January 6, 1949, in response to my proposal for an equipment interchange over National's

Miami-New York route. Frankly, I am disappointed that you feel it necessary to condition any such discussions on the proposition that any agreement would have to await decision in Docket 1803 and 3500. We are well aware of Panagra's long efforts, first, to enter the United States and later to obtain a New York entry, and we had felt that Panagra would be glad to accept National's practical suggestion for achieving this goal.

We want to make it clear that we have proposed an interchange with your company not only because we felt it mutually advantageous for both carriers but to provide an improved service for the public. It is apparent from Pan American's past and present actions that it is willing that such improvements be made only on its own terms or not at all. Pan American's action in blocking Panagra's entry into Miami until virtually ordered to permit such entry and its generous action in agreeing to let Panagra use the Miami-New York route (which Pan American does not yet have) speaks for itself in this respect. In this connection, if you will examine the record in the Panagra Through Flight Agreement Case you will find that National did not take a position in opposition to the agreement unless the CAB believed it would block the approval of National's then pending Balboa application.

Although I am not quite clear as to the meaning of the last sentence of your letter in which you express a willingness to discuss the matter "without prejudice", I am desirous of discussing an interchange proposal to be implemented within a reasonable period of time and will attempt to meet the convenience of you or your representatives.

With best wishes, I am,

Sincerely,

NATIONAL AIRLINES, INC.

G. T. Baker, President

[fol. 1166]

GOVERNMENT'S EXHIBIT 553

COPY

January 25, 1949

Mr. G. T. Baker
National Airlines, Inc.
3240 N. W. 27th Avenue
Miami 37, Florida

Dear Ted:

Juan has asked me to reply to your letter in answer to his letter of January 5 and wire of January 7.

You refer to certain figures from the Board's March 1947 survey. It is well known that these survey figures are nowhere near the full traffic movement between points in the interior of the United States and points abroad. However, even forgetting this major factor, our analysis of the March 1947 figures shows through traffic approximately twice as great as that stated in your letter. For September, 1948, our figures, which we believe are still incomplete, show an even higher amount of through traffic for Pan American Airways alone. For example, these figures show an average of some 12 passengers a day in each direction for the Camaguey-Jamaica-Colombia area, in contrast to the 3½ for March, 1947, alleged in your letter.

Everyone knows that the northeastern area always has been and still is the great producer of traffic to Latin America. Even excluding the Panagra through flight and flights to Havana and Nassau, we are now operating five passenger schedules per day between Miami and the Latin American points mentioned in Juan's letter. You are going to have quite a task in convincing anyone that these schedules, and those operated by other lines, are filled primarily with traffic generated by Miami itself or by parts of the country that have never had the community of interest with Latin American possessed by the New York-Washington area.

With best regards, I am

Sincerely,

Howard B. Dean
Vice President

Cable Address
"Natair"

NATIONAL AIRLINES INCORPORATED
"Route of the Buccaneers"

3240 N.W. 27th Ave.
Miami 37, Florida

February 24, 1949.

Mr. Howard B. Dean, Vice President,
Pan American World Airways System,
135 East 42nd Street,
New York 16, N. Y.

Dear Howard:

I refer to your letter of February 15, 1949. Frankly, I am very much disappointed with the statements and the attitude reflected in your letter in which you make it clear that Pan American has no desire to provide an improved service for its Latin American traffic except on conditions which will promote Pan American's selfish interests. National is sincere in its offer to provide improved through plane service by equipment interchange between points on the East Coast of the United States and points served by Pan American in Latin America.

Pan American's blunt refusal to give consideration to the interests of the traveling public in this instance is a clear continuation of the policy of Pan American over a long

period of time wherein it first blocked the entry of Panagra into the United States and later attempted to prevent creation of any one carrier service between the United States and overseas points. Your attitude appears to be inconsistent with the position which Pan American took in the *Latin American Case* illustrated by the following quotation from your Brief to the Examiner in that case: *** As a practical matter, only a few points in Latin America would appear at present to warrant through plane service even from the Northeastern United States which are the heaviest traffic producers. In such cases, interchange of equipment offers very largely all the advantages that could be afforded by through plane operations by a single carrier. Pan American has long advocated such arrangements. It reaffirms that position."

Best regards,

Sincerely yours,

NATIONAL AIRLINES, INC.

Ted

/s/ G. T. BAKER, President.

Miami 37, Florida

Dear Ted:

I have your letter of February 24th. I though my last letter sufficiently indicated that we had had enough of this record-making correspondence which you began some months ago, but evidently you and John Cross decided there

had to be one more. Why dont you spend more time trying to get your airline on time and less time signing these letters written by your lawyers?

I am not going to take any time or ink answering the statements made in your letter, all of which we have heard many times before and which have been thoroughly answered in our corespondence and conversations. Therefore, you can consider this letter as a sign-off by me.

Looking forward to seeing this in the record in Docket 3500, I am

Sincerely,

Howard B. Dean
Vice President

GOVERNMENT'S EXHIBIT 556

February 28, 1949

W. R. Grace & Co.
7 Hanover Square
New York 5, N. Y.

Dear Sirs:

Referring to our letter to Pan American-Grace Airways of December 15, 1948, their reply of January 6, 1949 and ours of January 14, 1949 and confirming our recent conversations with you, we make you the following offer, subject to the provisions of paragraph 8 hereof and approval of the Civil Aeronautics Board where required:

1. We will enter into an "equipment interchange" agreement with Pan American-Grace Airways (Panagra) in the form attached hereto and into any further agreements which may be necessary to make such "equipment interchange" agreement operate provided Panagra executes such "equipment interchange" agreement not later than March 30, 1949.

2. Provided we enter into the above "equipment interchange" agreement with Panagra we are also prepared to enter into a substantially similar "equipment interchange" agreement with Pan American Airways, Inc. (PAA) provided PAA shall notify us in writing not later than March 10, 1949 of its intention to execute such agreement and provided we can agree with PAA on the terms of such agreement not later than March 30, 1949.

3. Until the "equipment interchange" agreement or agreements referred to above have been approved or disapproved by the Civil Aeronautics Board, we will not enter into any "equipment interchange" agreement providing for the operation of airplanes over our certificated routes or any part thereof, with any other carrier operating in South or Central America, except interchange agreements which would provide only through service between cities on National's routes and cities located within the continental United States on the domestic routes of such other carriers.

4. We hereby grant you an option to purchase 174,000 shares of our stock at $5.50 per share, provided you exercise the same by payment in cash not later than March 30, 1949. Upon the approval by the Civil Aeronautics Board of the "equipment interchange" agreement referred to above between Panagra and ourselves, we will sell to you and you will buy from us 346,000 shares (or 172,000 shares in the event you purchase the 174,000 shares mentioned [fol. 1170] above) of our stock at the book value thereof (as agreed to by the parties or in the event of failure to agree then as determined by independent auditors mutually agreed upon)

* * * * *

It is understood that if at the time you are to purchase the above 346,000 shares or 172,000 shares, Pan American shall not have entered into the "equipment interchange" agreement with us referred to in paragraph 2 or said agreement shall not have been approved by the Civil Aeronautics Board or PAA shall not have purchased the stock of our company referred to in Paragraph 5 below, you shall have the right at your option to reduce your total purchase of

our stock referred to in this Paragraph 4 to the 174,000 shares mentioned above, purchased by you not later than March 30, 1949.

5. In the event that PAA shall enter into an "equipment interchange" agreement with us as provided above and said agreement is approved by the Civil Aeronautics Board, PAA shall have the right until ten days after such approval to purchase from us and we will sell to them, at book value as defined in Paragraph 4 above, up to the same number of shares of our stock as you may purchase. We may also sell to PAA such additional shares of our company at such price and terms as we may mutually agree with them.

6. It is agreed that should you sell to Panagra all or any part of the number of shares retained by you after the exercise of the rights provided for in Paragraphs 4 or 5 such sale shall be on the condition that the voting rights of the shares sold to Panagra may be exercised by the President of Panagra in his absolute discretion.

* * * * *

being awarded the route between Miami and New York, Panagra shall have the right at its option upon thirty days notice to terminate any "equipment interchange" agreement entered into with us pursuant to this offer.

Very truly yours,

NATIONAL AIRLINES, INC.

Dear Ted,

We hereby exercise the option given us in the first sentence of Paragraph Four of your letter of February 28th to purchase one hundred seventy four thousand shares of the stock of National Airlines at $5.50 per share.

We are prepared to make payment for these shares upon delivery of certificates therefor. We understand that you are endeavoring to call a meeting of your Board on March 4th to authorize the issuance of these shares, and that you will be ready to make delivery immediately following this meeting.

Very truly yours,

—Copy—

MEMORANDUM OF UNDERSTANDING

Subject to the approval of the Civil Aeronautics Board:—

1. National and Panagra will enter into an "interchange agreement" substantially in accordance with Paragraph "1" of National's Proposal to W. R. Grace & Co., dated February 28, 1949, except that the term of the "interchange agreement" shall be for a period terminating July 1, 1953 to be automatically extended to July 1, 1960 if Pan American and

Grace shall both exercise their respective stock options referred to in Paragraphs "4" and "5" below. Pan American will consent to such modification of the Through Flight Agreement dated July 30, 1946 as may be necessary for this.

2. National and Pan American will enter into an "interchange agreement" substantially in the form of the "interchange agreement" between National and Panagra except that

(a) The term of the "interchange agreement shall be for a period terminating July 1, 1953 to be automatically extended to July 1, 1960 if Pan American shall exercise its stock option referred to in Paragraph "4" below,

(b) said "interchange agreement" shall provide that National shall operate three daily round trips between Miami, Washington and/or New York, any of such three daily trips to operate as through flights to appropriate points in Latin America served by Pan American.

[fol. 1175] 3. Upon approval by the Civil Aeronautics Board of the Panagra and Pan American "interchange agreements" with National, Grace will sell to Pan American 30/48ths of the 174,000 shares of National which Grace has purchased (108,750 shares) at cost plus interest at 4 per cent per annum from date of purchase by Grace to date of purchase by Pan American less any dividends received on said shares during said period.

4. National will sell to Pan American at Pan American's option as specified below 30/48ths of an additional 518,000 shares of the capital stock of National (323,750 shares) at book value at time of purchase determined as provided by Paragraph "4" of National's Proposal payable, at Pan American's option, in cash or in the capital stock of Pan American at average closing price of said stock on the New York Stock Exchange during the period of 60 days immediately prior to the date of purchase.

5. National will sell to Grace at Grace's option as specified below 18/48ths of said additional 518,000 shares of

the capital stock of National (194,250 shares) at book value at time of purchase determined as provided by Paragraph "4" of National's Proposal Payable in cash.

[fol. 1176] 6. Pan American and/or Grace may exercise their respective options to purchase National stock under Paragraphs "4" and "5" above at any time within eight months after approval by the Civil Aeronautics Board of the "interchange agreements" between National and Pan American and/or between National and Panagra respectively.

7. (a) The capital stock of National referred to above is understood to be the presently authorized stock of this company, plus a contemplated duly authorized increase of 500,000 shares.

(b) If between the date of this Memorandum and the exercise of any of the options to purchase National's capital stock as herein provided, National should require additional financing by the issuance of stock in excess of its presently authorized stock and said financing is not provided by Pan American and Grace then exercising their options, National may secure such financing by selling such additional stock as it may be authorized to issue provided, however, that in such case National shall hold sufficient unissued stock subject to further options in Pan American and Grace and Pan American and Grace shall have further options to increase their purchases of National stock so that at the conclusion of such additional financing and by the exercise of all options by Pan American and Grace, they [fol. 1177] shall own 30% and 18% respectively, of the then outstanding capital stock of National. If Pan American and/or Grace shall elect to purchase such additional stock, National will sell it to them at the price and on the terms herein provided.

(c) If between the date of this Memorandum and the exercise of any of the options to purchase National's capital stock as herein provided, National shall merge or consolidate with, or sell substantially all of its assets to, any other air carrier, or issue stock for any purpose other than as provided in paragraph (b), Pan American and Grace shall have further options to increase their purchases of stock so

as to permit them, by the exercise of all options to own 30 per cent and 18 per cent, respectively, of the outstanding stock of National or of the continuing company, as the case may be. If Pan American and/or Grace shall elect to purchase such additional stock, National will sell it to them at the price and on the terms herein provided.

(d) Between the date of this Memorandum and the exercise of any of the options to purchase National's capital stock as herein provided, National will not increase its authorized capital stock beyond the amounts required for issuance pursuant to paragraphs (b) and (c), and for the exercise of said options, and stock sufficient for the exercise of said options shall be reserved until the same are exercised or expire.

[fol. 1178] 8. All obligations of Pan American and Panagra hereunder are contingent upon the Civil Aeronautics Board, as a part of the proceeding seeking the approval of the above "interchange agreements," continuing its approval of the Through Flight Agreement now in effect between Pan American and Panagra, dated July 30, 1946, for a period expiring July 1, 1960.

9. Upon confirmation of the sales of shares pursuant to Paragraph "4" or "5" it is understood that subject to the approval of the stockholders of National in the form prescribed by the laws of Florida National's certificate of incorporation and By-Laws will contain whatever provisions may be necessary to fix the total number of directors at eleven and to insure at all times cumulative voting rights in respect to the shares purchased under said Paragraphs.

10. All of the parties hereto agree forthwith to enter into such complete agreements as may be necessary to accomplish the objectives of this Memorandum of Understanding and to cooperate in expeditious presentation of these agreements to the Civil Aeronautics Board and prosecution of the proceedings for the approval thereof with a view to securing the earliest possible approval by the Civil Aeronautics Board, and Pan American, Panagra and Na-
[fol. 1179] tional agree immediately to petition the Civil Aeronautics Board for termination of its investigation of

National in Docket 3500. In the event of the Civil Aeronautics Board's disapproval of these agreements, all obligations of the parties hereto shall terminate and National shall be under no obligation to repurchase, or Pan American or Grace under any obligation to tender to National, any shares of National's stock which Pan American or Grace may have theretofore purchased.

Minutes of Special Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways, Inc., 135 East 42nd Street, New York, N. Y. on the 31st day of March 1949 at 4:00 o'clock in the afternoon.

PRESENT:

Messrs. Erwin Bailluder
Howard B. Dean
Henry J. Friendly
James V. Hayes
H. Preston Morris
B. H. Oehlert, Jr.
H. J. Roig

being a quorum of the Board.

Mr. H. J. Roig, President, presided. Mr. W. F. Cogswell, Secretary, acted as Secretary of the meeting.

There was presented to the meeting Memorandum of Understanding dated March 30, 1949 between National Airlines, Inc., W. R. Grace & Co., Pan American Airways, Inc., and Pan American-Grace Airways, Inc., executed in the name and on behalf of this corporation by Mr. Harold J. Roig, providing among other things for "Interchange Agreement" between National Airlines, Inc., and this corporation, and National Airlines, Inc., and Pan American Airways, Inc.

On motion duly made and seconded, it was unanimously

RESOLVED that the action of Mr. Harold J. Roig in [fol. 1181] executing, in the name and on behalf of this corporation, Memorandum of Understanding dated March 30, 1949 between National Airlines, Inc., W. R. Grace & Co., Pan American Airways, Inc., and Pan American-Grace Airways, Inc., be and the same hereby is in all respects approved, ratified and confirmed.

RESOLVED FURTHER that the officers of this corporation be and hereby are authorized, in the name and on behalf of this corporation, to enter into any and all agreements which may be necessary to carry out the objectives of said Memorandum of Understanding and cooperate in expeditious presentation to the Civil Aeronautics Board for approval of such of said agreements as require approval, provided any such agreements so signed shall have first been approved by Mr. Roig and Mr. Dean.

The President recommended purchase of an additional DC-6, either new or used, depending upon which could be purchased most advantageously. Such purchase was authorized, subject to the approval of Mr. Roig and Mr. Dean.

The officers were authorized, at such time as they should deem appropriate, to convert dollar fares into soles in the case of nationals or residents of Peru at the "street rate" of exchange rather than the official rate as at present.

There was discussion as to coach fares.

There being no further business, the meeting adjourned.

H. J. Roig
Chairman

W. F. Cogswell
Secretary

[fol. 1182]

GOVERNMENT'S EXHIBIT 562

January 21, 1949—Roig had lunch with Baker at Carlton discussing interchange as per previous correspondence. At same time Peter had lunch with Juan at India House in which Juan said was negotiating with "a domestic carrier" regarding interchange. Baker told Roig of his discussions with Pan American.

Week of January 24th—Shea and Roig discussed Pan American/National negotiations with Dean and Friendly; Roig and Peter discussed with Tripper, Dean and Friendly; and Roig, Peter and Shea had two or three talks with Baker and Scott.

February 8, 1949—(Date of Braniff informal conference when Roig went down with Friendly and Gesell). Friendly intimated that PAA/National discussions had terminated without result.

Week of February 7, 1949—Roig developed idea since National/PAA negotiations had broken off of trying to work out independently of Pan American, an offer from National to Grace covering both the Panagra and Pan American situations and endeavoring to bring Pan American in later. Shea advised Peter (who was on his South Carolina farm) of the plan. He approved it. Roig and Shea discussed with several Grace directors and arranged to meet Baker and Scott in New York the following week.

Week of February 14th—Roig, Peter and Shea met with Baker and Scott on two consecutive days and worked out outline of National proposal along above lines.

Weekend of February 26th—Roig, Peter and Shea spent weekend in Miami working out details with Baker and

Scott particularly the form of interchange agreement. Late in the afternoon of the 28th Baker signed and delivered the proposal.

March 2nd—Peter delivered National's proposal to Trippe and explained to him the circumstances under which it had been arranged. At the same time, Roig, Shea and Gesell informed Chairman O'Connell and Mr. Adams of the CAB regarding the proposal.

[fol. 1183] Week of March 14th—March 10th, the date fixed in the proposal for Pan American, having gone by without hearing from Pan American, Roig called up Dean and arranged a meeting to discuss Panagra's position with reference to National's proposal. Roig and Shea met with Dean and Friendly and following several meetings and telephone conversations a basis for further discussion with National was arrived at.

March 23rd—Peter and Shea went to Miami to discuss matter further with Baker and Scott and remained there until March 29th, Roig in the meantime carrying on the Pan American end of the discussion with Dean and Friendly.

March 29th—Panagra meeting to pass on proposal set for 4:00 o'clock. Early in the afternoon Peter and Trippe had conference on matter as a result of which basis of agreement was reached and Roig, Peter and Shea with Trippe and Dean went to Washington (Friendly was already there) and discussions were continued with Pan American and Baker leading to signing of Memorandum of Understanding dated March 30th.

November 9, 1950

MEMORANDUM

Baker called me this afternoon and proposed that W. R. Grace & Co. deliver to National a letter to the effect that W. R. Grace & Co. is willing to release National from the Grace option to acquire additional shares of National stock, the Panagra National and Pan American National interchange contract remaining in full force and effect; provided Pan American will also release National from the option now running to Pan American to acquire National stock.

I said that this would be most difficult but that we would think it over and I would consult my associates and would call him either tomorrow morning in Washington or later in Miami. He said that he is returning to Miami tomorrow morning and will probably be in New York sometime next week.

I told him, of course, that I saw the point of his request but asked him what he thought would happen from there on. He then said that he did not see how if Grace were willing to waive its option Pan American could insist on retaining its own option in effect. I told him I did not see anything in this but he assured me as he assured Peter that the thing could be worked out.

I asked him if has had any conversations with members [fol. 1189] of the Board and he said that he has not. I also asked him if he has had any conversations with Pan American and he said he has not.

The conversation was cordial.

MEMORANDUM November 13, 1950

Telephone conversation with
G. T. Baker—November 13, 1950

Pursuant to my conversation of November 9th with Mr. Baker I telephoned him today to say that after serious consideration W. R. Grace & Co. could not comply with his request that it deliver to National Airlines a letter waiving Grace's option on the terms he had proposed. He then asked me if I could give him my verbal assurances that the option would be waived on the same conditions and I replied that I could not give him such verbal assurance either. I said that the most I could tell him was that should he persuade Pan American to waive its option to acquire additional National stock Grace would give its sympathetic consideration to similar action on its part.

GOVERNMENT'S EXHIBIT 568

CONFIDENTIAL (Handwritten)

MEMORANDUM December 20, 1950

At a meeting in the Carlton Hotel in connection with the Air Transport Association Annual Convention on December 13, Eddie Rickenbacker approached me and stated he had heard that Baker was not going through with the National, Panagra, Pan American contract. He suggested he and I having lunch in New York the following week to discuss the possibility of a cooperative agreement with Eastern in the event the National deal blew up.

Eddie Rickenbacker and I were guests of Pete Jones at a large Christmas luncheon party today. Following the luncheon Eddie and I discussed the National situation. I confirmed that Baker yesterday had formally advised us

he was withdrawing from the National confract on account of being unwilling to go through with the stock option phase of the deal. Also that he had formally advised Grace in similar vein and had confirmed his action to the CAB.

I told him that public counsel for the CAB had indicated to us they were confused as to the position this left the CAB in, and that we felt public counsel would shortly ask the Board for instructions.

Eddie indicated he thought it would be distinctly to Eastern's advantage to make an interchange with Pan American although he still was not interested in an interchange to Mexico City (notwithstanding the fact that we might make such arrangement with C & S), which I told him we were considering). I told him that National had indicated they still favored an interchange independent of the stock option feature.

I asked him in view of the obvious traffic advantage of a deal with Pan American and Panagra, whether he would now favor an interchange at Miami to one daily Panagra DC-6 schedule, one through PAA Connie schedule, and one Boeing shuttle. (handwritten: JTT 12 20 50 on a basis similar to that offered by Nat'l)

Eddie advised he would like to study the matter further, but definitely he would favor "an equitable deal" and that he would let me know tomorrow afternoon if, in principle, he felt the above arrangement good business for Eastern.

J.T.T.

CC: Mr. Friendly

[fol. 1192]

GOVERNMENT'S EXHIBIT 569

MEMORANDUM OF DISCUSSIONS WITH W. R. GRACE & CO.

(Dictated January 20, 1951)

Mr. Trippe and Mr. Friendly called on Mr. Peter Grace, President of W. R. Grace & Co., and Mr. Andrew Shea, Vice President of W. R. Grace & Co. and President of Pan American-Grace Airways, at the Grace office at about 10:15 A.M. on Friday, January 19, 1951.

Mr. Trippe said that he and Mr. Friendly had come down to give what he believed, and hoped would be considered, some very good news. This was that, as a result of negotiations with Eastern Air Lines, which had ben initiated at Captain Rickenbacker's suggestion, it had proved possible to work out arrangements whereby Panagra's and Pan American's planes could be operated from Miami to New York over Eastern's route. Mr. Trippe said that this gave Panagra what it had long wanted, namely, the right to have its airplanes operate directly into New York. Mr. Trippe felt certain that the relationship with Eastern would prove much more satisfactory than one with National would be since Mr. Baker's conduct had shown that he had no respect for contracts.

Mr. Shea inquired whether there was any stock arrangement with Eastern. Mr. Trippe replied that there was not. Mr. Shea inquired why we would be willing to make an arrangement with Eastern without stock participation, whereas we were not willing to do this with National. Mr. Trippe said that he felt that Eastern was an entirely different sort of company from National. It was one thing to deal with National when it appeared that Pan American and Grace, as large stockholders and with substantial board representation, could build National up. If, however, there was to be nothing but interchange, Eastern was clearly the better bet.

Mr. Grace said it was necessary to take a long view of these matters, Mr. Baker would not last forever, and neither would Captain Rickenbacker. National would ultimately get a professional management with which it would be possible to work. Mr. Friendly responded that this was looking a long while ahead; that Mr. Baker was always talking about quitting and going fishing but that [fol. 1193] he showed no signs of doing this; and that even if National had the same kind of management as Eastern, which it now did not, Eastern would be a stronger and better partner. Mr. Grace said that Eastern was no better than a merger of National and Delta. Mr. Friendly said this was going still more into the future.

Mr. Friendly explained in somewhat more detail the nature of the arrangements with Eastern. He also said that in his opinion an arrangement with Eastern was much more likely to win approval from the C.A.B. than one with National since it was not open to the objection of running counter to the intention of the C. A. B. to build up the connecting service of National and Braniff at Havana. Mr. Grace referred to the fact that Braniff in its original application had not sought Havana. Mr. Friendly said that Braniff had an answer to this, namely, that the important thing was not what Braniff had applied for but what the Civil Aeronautics Board had done.

Mr. Grace said that an arrangement with Eastern was less attractive than one with National in that it left National free to work with Braniff. Mr. Friendly said that, apart from the fact that an arrangement with National might not be approved for precisely this reason, he personally had always feared that if the arrangements with National were approved, the gap between Braniff and Eastern might be closed, and that such an alliance would be more serious to Panagra and Pan American than one between Braniff and National.

There was considerable discussion as to how long it would take to get the interchange agreement with Eastern approved. Mr. Grace and Mr. Shea talked of periods as long as two years. Mr. Friendly challenged these statements, saying that the long delay in the National case had

been due largely to the difficulties in arriving at agreements with National rather than to the C. A. B. procedures. Furthermore, the record which had been made in the National case would be of great help with respect to a hearing in the Eastern case since the basic traffic data was the same. Mr. Trippe emphasized that a part of the Eastern arrangement was a leasing of planes on regular schedule but not for through service, which Eastern thought could perhaps be put into effect immediately. Mr. Friendly expressed some doubts on this score.

[Fol. 1194] Mr. Grace stated that he and Mr. Shea were not in a position to give any answer to Mr. Trippe's and Captain Rickenbacker's proposal; but they would have to think about the matter and talk it over between themselves.

* * *

Mr. Grace raised question as to Panagra's being permitted to apply for a certificate expanding its operations from Lima to Rio. He made a long speech, citing figures, as to how Pan American and other airlines had expanded, whereas Panagra's business had not shown any growth in recent years. Mr. Friendly said that this was irrelevant, since Pan American had been free from the beginning to extend its lines to other parts of the world whereas Panagra had been formed to operate in a particular locality. W. R. Grace & Co. was similarly free to expand and had been doing so. Mr. Trippe added that so far as relative growth was concerned, a much fairer basis of comparison would be between Panagra and Pan American's operations on the East Coast of South America. Mr. Grace said he felt sure that the figures would show that even there Pan American had been doing better than Panagra. He called for the figures. These, however, showed the contrary.

Mr. Trippe stated that he did not consider a Lima-Rio operation a good one for an American-flag carrier from the longrun standpoint. He said that Pan American had not favored this operation by Panair do Brasil. However, it had not proved possible for that company to resist the desires of its own government for the inauguration of service between Brazil and other South American countries. Actually Panair's first extension had been to Buenos Aires where it was directly competitive with Pan American.

Mr. Grace complained of Panagra's loss of Rio business and of the fact that in all probability Panagra was going to be forced out of Brazil altogether. Mr. Friendly countered by the statement that Panagra's participation in Rio business had never been a part of the original plan but had come about in 1940 as a by-product of the Government's desire to have Panagra replace the German-controlled aviation company in Bolivia. It was as a result of this that a connection had been established between Panagra and Panair do Brasil at the Brazilian-Bolivian border.

[fol. 1195] Mr. Trippe stated that the Lima-Rio movement was one which would ultimately be handled predominantly by South American carriers, and that he felt the South American governments would insist on this. Mr. Grace countered that three-fourths of the Lima-Rio movement consisted of stop-over traffic in Lima enroute to or from the United States and said he had figures to prove this. Mr. Friendly said that if this were true, the Panair operation between Rio and Lima should be a substantial assistance to Panagra since it made possible a joint effort by Panair and Panagra to sell this stopover business which should afford very effective competition to Braniff. Mr. Grace demurred to this, stating that Americans would not fly in planes of a South American company. Mr. Shea disagreed with Mr. Grace. He felt that the Panair operation would result in Panair and Panagra taking away substantial business from Braniff, and that the foreign character of Panair was no real obstacle since it was regarded as part of the Pan American Airways System. Mr. Shea stated he had no doubt that Panair's Lima-Rio service would put a substantial "crimp" in Braniff's operations. Indeed, he felt that Panair's service to Lima and the improved PAA service between Rio and New York would reduce Braniff's load factor between Rio and Lima to a figure as low as between Lima and Buenos Aires. There was considerable discussion of this, ending with Mr. Shea making a $50 bet with Mr. Grace that this would occur in the last six months of 1951.

At the conclusion of the meeting, Mr. Grace repeated that he would have to consider the matter with his as-

sociates. It was agreed that the meeting should be resumed at 5:30 P.M. at the Pan American office uptown.

Mr. Grace telephoned Mr. Trippe shortly after 5:30 P.M. He stated that they had been discussing the matter with their lawyers; that their conclusion was that the arrangement with Eastern was designed to delay the operation of Panagra's airplanes into New York; that his lawyers told him that it would take two years to get such an arrangement approved; and that the arrangement upset all of Grace's plans for Panagra. Mr. Trippe replied that all these charges were wholly unjustified and that the arrangement with Eastern was designed to give Panagra access for its airplanes to New York in the most effective possible way. Mr. Grace requested that he be given a set of the [fol. 1196] papers to examine over the weekend and arranged to meet again Monday at 9:15 A.M. at the Chrysler Building. Mr. Trippe immediately sent the papers to Mr. Grace with a note stating that it was his understanding with Captain Rickenbacker that for the time being the papers were to be regarded as confidential.

(Dictated January 23, 1951)

On the morning of Monday, January 22, Mr. Grace and Mr. Shea again met with Mr. Trippe and Mr. Friendly.

Mr. Grace requested Mr. Shea to state their position.

Mr. Shea began by saying that they considered that the agreement which had been negotiated with Eastern was a remarkable achievement. If it had been available two years ago, they would have been for it. Now, however, they were concerned with the length of time which it would take to get such an agreement approved. Their lawyers had advised them that this would take two years. They feared that before that was over Braniff's application for a direct certificate to New York would have been heard and granted. Mr. O'Connell, who was now acting as counsel for Grace, had told them that there was a great sentiment in the Civil Aeronautics Board for granting this application of Braniff. This was because there was fear that Braniff would be starved out if it had only the middle

west business, with the eastern business going to Panagra and Pan American, and the far western business going to Pan American on its Guatemala route and thence via Panagra. Mr. Shea asked whether Pan American was aware of this.

***

Getting back to the main line of the discussion, Mr. Shea concluded by saying that Grace was, therefore, against the proposed agreements with Eastern because of the delay which would be incident to arranging for Panagra's planes to enter New York over Eastern's route.

Mr. Friendly went back to the objection made on the score of Braniff's certificate application and asked whether it was seriously suggested that Braniff, which now had direct access to the central United States, would be given [fol. 1197] a certificate for direct service to the Washington-New York area, which had been historically served by Pan American, but that Pan American would continue to be held off at Miami. He reminded Mr. Shea and Mr. Grace that Pan American also had an application for an international certificate to New York which was filed a few days after Braniff's. Mr. Grace said they were not that pessimistic. On the other hand, it would be a very bad thing for Braniff to get into New York, even if Pan American did also. They felt that once Panagra's aircraft were operating into New York, they could forestall a Braniff certificate application.

Mr. Friendly said that this was exactly what had always troubled him about the National deal, namely, that it was too rough on Braniff. So long as Braniff had the connection with National at Havana, which the Board had intended Braniff to have, there was a good deal of strength in the argument that Braniff should not have anything more. If, on the other hand, this connection was taken away, then he felt the "starvation" argument would be advanced with far more force than it could otherwise be.

Mr. Grace said that he believed in taking one thing at a time, that it was their policy to fight Braniff every inch of the way, and that if this course were followed, a time might come when the Government might reverse its policy with respect to having Braniff in South America.

Mr. Shea and Mr. Grace then launched an attack on Mr. Rickenbacker. They said they did not consider him any easier to deal with than Mr. Baker. They cited particularly his testimony in Docket 3500 in which he accused certain Grace officers and directors of going out and buying National stock in anticipation of a market rise. Mr. Trippe and Mr. Friendly said that there was no doubt that Captain Rickenbacker was a tough fighter who sometimes said and did things which were not liked by his opponents. On the other hand, there was quite a difference between a man who threw his weight against opponents in a fight where he owed them nothing and a man who would not stick to an agreement and made disagreeable remarks about persons with whom he was supposed to be working in close association. Mr. Trippe said that, in his long experience with Captain Rickenbacker, he had never known Captain Rickenbacker to go back on an agreement.

[fol. 1198] Mr. Shea criticized the proposed interchange agreement on the ground that the exclusive clause would not prevent an Eastern-Braniff combination at Havana. Mr. Friendly answered that such a combination was not possible at the present time since Eastern did not operate to Havana and would not be likely to be given that right if it had an interchange with Pan American. However, he did not believe there would be any great difficulty in having this clause amended if Grace so desired.

Mr. Grace repeated that their prime interest was to get Panagra's airplanes into New York. Mr. Friendly said there was no difference of opinion between Grace and Pan American on this; that we wished to accomplish this objective also and wished to do it in the most satisfactory and sound way from a long term standpoint. The advantages of a contract with Eastern appeared to him so great as compared to a similar one with National that it was hard to believe that such an arrangement would not be accepted by Grace if the interests of Panagra were what they really had at heart.

Mr. Grace and Mr. Shea then launched on an attack on Eastern's services. They criticized Eastern's flight attendants, saying that these were rude and that they would not like to have this the last impression of a Panagra

passenger. They also criticized Eastern's food. Mr. Trippe suggested that perhaps Captain Rickenbacker would be willing to let Panagra supply its own food, and he would be glad to take this up. Mr. Friendly pointed out that the agreement gave Panagra the right to supply all attendants except one, and he found it difficult to believe that the difference in quality between one Eastern flight attendant and a National flight attendant, if there be any at all, was really a serious matter.

Mr. Trippe said that the fundamental point was that a deal with Mr. Baker without a substantial stock interest was not a deal at all, as had been proven by the long road of difficulties which both Pan American and Grace had experienced. Mr. Friendly added that Pan American had done everything possible to preserve the arrangements with National and to get them approved. He cited as the latest instance that when it became evident that Mr. Baker was trying to take a walk by refusing to agree on a rate [fol. 1199] of return for the Pan American airplanes, he had gone down to Washington to appear with Mr. Grace and Mr. Shea before Chairman Rentzel.

Both Mr. Grace and Mr. Shea recognized that Pan American had loyally supported the National arrangements. Mr. Grace stated that "no one could have asked for better associates than Pan American had been" and that the Pan American officers had behaved like gentlemen in connection with the whole matter. They also stated that they did not for one moment condone Mr. Baker's welching on his agreements. However, they did not consider Eastern preferable to National and they were concerned about the timetable.

Mr. Friendly said that he thought there should be more discussion on the timetable, since he could not see that the difference in this respect between the two proposals was anything like what had been talked about. The National deal was itself a long way from approval. It had not yet approached the briefwriting stage and would not for some little time. The only added delay in the arrangement with Eastern would be the difference in time required to get the two proceedings to the end of a hearing. After that,

the timetables should be the same, with the Eastern proceeding, if anything, having the edge since it did not involve all of the other questions that were in Docket 3500. While the conference was going on, he had jotted down some figures as to the length of time which he thought it would take to get the two proceedings to the close of a hearing, starting from the date when agreements were signed with Eastern or revised agreements were signed with National. In the former case, he figured 20 days to prehearing conference, 60 days more for exhibits, 20 days more for rebuttal exhibits, 10 days more for the commencement of a hearing and 15 hearing days, for a total of 125 days to the close of the hearing. In the National case, he figured 10 days to a further prehearing conference on the subject of a fair rate of return, 15 days for exhibits, 10 days for the beginning of a hearing, and he had allowed nothing for the length of the hearing, for a total of 35 days. This meant a differential of 90 days between the two. If it were thought his estimates on Eastern were unduly liberal, another month would mean a difference of only 4 months between the two proceedings. He thought this inconsequential in view of the greater value of an arrangement with Eastern and the greater likelihood that it would ultimately be approved. He repeated that, in his [fol. 1200] judgment, the arrangement with National stood an excellent chance of not being approved because of the force of Braniff's arguments. Should this occur, Panagra and PAA would then be in a position, many months hence, not only of having to start over again, but of being in an exceedingly bad bargaining position with Eastern.

Mr. Grace again objected to any delay. He mentioned the fact that Pan American had not immediately accepted the deal that Grace had arranged with National in the winter of 1949. Mr. Friendly said that any delay at that time was due only to W. R. Grace & Co.; that Pan American by the end of January had arrived at a deal with National which Mr. Scott had recommended, but that Mr. Grace had then entered the situation and had given Mr. Baker the idea that he would play Grace against Pan American and get a better deal thereby. In fact, Mr. Friendly continued, Mr. Baker would never have repudiated his agreements

now if he had not felt sure that Grace would go along. Mr. Grace said that they had never indicated to Mr. Baker that they would do this and gave his "word of honor" to that effect. Mr. Friendly said that he had not accused Grace of having said this to Baker and had no basis for doing so, but repeated that in his opinion Mr. Baker would not have repudiated the agreements if he had not felt sure in his own mind that Grace would go along with him anyway. Mr. Baker would have been entirely justified in this belief, as was shown by the attitude presently being expressed. Mr. Friendly said he simply could not understand how an organization of the repute of W. R. Grace & Co. could consider the kind of appeasement that was incident with continuing to deal with Mr. Baker after the latter had broken his promises.

Mr. Grace said he would not delay one week to have an agreement with Eastern rather than National. Mr. Friendly said that he could not believe that this was really Grace's position, particularly since Grace must realize it was not able to decide this by itself, and that he would therefore like to get back to the claim of a two year delay in approval of the Eastern agreement and find out just how Grace's lawyers had worked this figure out. Mr. Shea asked whether Mr. Friendly's timetable had not assumed that the Board would give the Eastern interchange agreement a priority on its calendar. Mr. Friendly said he had assumed this, but felt entirely justified in doing so since the Board had always given priority to interchange agreements and [fol. 1201] there was no reason to suppose it would make an exception of this one. Mr. Shea agreed he would discuss the matter further with Panagra's counsel, Mr. Burns, and find out the basis for Mr. Burns' two-year estimate. Mr. Friendly said he would be glad to join in these discussions. It was left that after Mr. Shea had talked with Mr. Burns, he would report further.

GOVERNMENT'S EXHIBIT 570

PAN AMERICAN-GRACE AIRWAYS, INC.

Office of the President
7 Hanover Square
New York 5, N. Y.

January 25, 1951

Honorable D. W. Rentzel, Chairman
Civil Aeronautics Board
Washington 25, D. C.

My dear Mr. Chairman:

Re: Docket No. 3500

As you well know, Panagra has regarded as of primary importance to the public that it be permitted to have through service between Buenos Aires and Washington and New York via the West Coast of South America.

In attempting to bring about such a development Panagra and W. R. Grace & Co. have utilized every proper means, both judicial and administrative. We always believed that the best solution for Panagra was the direct extension of its route from Balboa through an amendment of its certificate. To date this has been impractical because of the problems of Panagra's divided ownership.

It was for the attainment of this objective of through service that Panagra and W. R. Grace & Co. entered into the interchange and collateral contract now pending before the Board in the above-entitled docket.

[fol. 1203] Under date of May 11, 1949 the following agreements were executed:

1) Interchange Agreement between Panagra and National Airlines Inc. (hereinafter called "National").

2) Interchange Agreement between Pan American Airways (hereinafter called "Pan American") and National.

3) Option Agreement for the acquisition of National stock between Pan American and National.

4) Option Agreement for the acquisition of National stock by W. R. Grace & Co. (hereinafter called "Grace").

5) Agreement between Grace and Pan American for the sale of National stock by Grace to Pan American.

These agreements were filed with the Civil Aeronautics Board and application was made to the Board on May 11, 1949 for approval of the agreements above designated as 1, 2, 3, and 5. All of the agreements are incorporated herein by reference.

By their terms all of said agreements are interdependent; i.e., none of said agreements is to become effective until and unless all of said agreements are approved by the Civil Aeronautics Board.

Public hearings have been held with respect to such applications and have been concluded except with respect to [fol. 1204] the rate of return payable by National to Pan American under the Pan American/National Interchange Agreement as part of the charter hire of Pan American equipment. The Board by Order dated October 23, 1950 directed National and Pan American to submit that issue to the Board for determination pursuant to the terms of the Pan American/National Interchange Agreement.

Subsequent to the issuance of the Order of October 23rd National Airlines delivered to Pan American and to Grace the letters transcribed below:

December 14, 1950.

Mr. Juan T. Trippe, President
Pan American-World Airways System
135 East 42nd Street.
New York 17, N. Y.

Dear Juan:

Not having heard from you in reply to my letter of November 29th, this is to notify you that the stock option agreement between Pan American and National,

dated May 11, 1949, is terminated and of no further force or effect. We do believe that an interchange of equipment between Pan American and National and between Panagra and National would be in the interest of both the public and the companies. Accordingly, we have advised the Civil Aeronautics Board of our willingness to go through with the interchange agreements when approved by the Board.

Very sincerely,

G. T. Baker, President
National Airlines, Inc.

[fol. 1295]

December 14, 1950

Mr. Andrew Shea, Vice President
W. R. Grace & Company,
7 Hanover Square,
New York, N. Y.

Dear Andy:

Herewith is a copy of letter which I am today sending to Juan Trippe in which we notify him, as we are notifying you herewith, that the stock option agreement, dated May 11, 1949, is terminated and of no further force or effect. We do believe that an interchange of equipment will be in the interest of both the public and the companies. Accordingly, we have advised the Civil Aeronautics Board of our willingness to go through with the interchange agreements when approved by the Board.

Very sincerely,

G. T. Baker, President
National Airlines, Inc.

Under date of December 19, 1950 Pan American replied to National's letter as follows:

December 19, 1950

Mr. G. T. Baker, President
National Airlines, Inc.
3240 N. W. 27th Avenue
Miami, Florida

Dear Ted:

I have for acknowledgment your letter of December 14, 1950, and your note of November 29, 1950, the latter of which I have held to present at a meeting of our directors today.

Our directors were astonished to learn of the position which your company has taken. They are quite at a [fol. 1206] loss to understand how you believe that National is in a position by unilateral action to terminate the contracts made by National, Panagra, W. R. Grace & Co. and Pan American in the spring of 1949, which the four companies have united in presenting to the Civil Aeronautics Board for approval and which the Board has recognized as all inter-dependent.

Sincerely,

J. T. Trippe,
President

and under date of December 29, 1950 Grace replied to National's letter as follows:

December 29, 1950

George T. Baker, Esq.
President
National Airlines Incorporated
3240 N. W. 27th Avenue
Miami 37, Florida

Dear Ted:

This will acknowledge receipt of your letter of December 14th with which you enclosed a copy of your letter to Juan Trippe of the same date and in which you also notified us that the stock option agreement

between W. R. Grace & Co. and National dated May 11, 1949 is terminated and of no further force and effect We must advise you that we do not recognize the right of National unilaterally to terminate in whole or in part the agreement referred to.

Sincerely yours,

J. P. Grace, Jr.

At a meeting held on January 22, 1951 between J. P. Grace, Jr., President and a Director of Grace, and myself representing Grace and Panagra respectively, and Juan [fol. 1207] T. Trippe, President and a Director and Henry J. Friendly, Vice President and a Director of Pan American, Mr. Grace and I stated to Messrs. Trippe and Friendly that Grace as owner of 50% of Panagra's stock and I as President of Panagra consider it in the best interests of Panagra that rather than risk the failure of all the interrelated agreements Pan American and Grace should accept the attempted cancellation by National of the National Pan American and National Grace stock option agreements and should so advise the Civil Aeronautics Board at the same time requesting the Board to proceed to a determination as to whether or not the Pan American National and Panagra National Interchange Agreements are in the public interest and should be approved. Messrs. Trippe and Friendly did not accept this proposal. Mr. Grace and I then proposed that Panagra advise the Board that Panagra accepts the attempted cancellation by National of the National Pan American and National Grace stock option agreements and that Panagra is prepared, upon approval by the Board of the Panagra National Interchange Agreement as filed with the Board for approval, to carry out the terms of such agreement regardless of whether or not the collateral agreements or any of them should become effective.
[fol. 1208] Messrs. Trippe and Friendly declined to accept this proposal also.

They proposed as an alternative that Panagra should withdraw from the National agreements and execute an equipment interchange agreement with Eastern Air Lines

on substantially the same terms and conditions as those of the National Interchange. This proposal was rejected by Mr. Grace and myself.

The reasons for our rejection of the proposal were twofold: In the first place, a new proceeding instituted by application for Civil Aeronautics Board's approval of Pan American/Eastern and Panagra/Eastern interchange agreements would probably extend over a period of approximately two years and would, therefore, involve undue delay in the establishment of a through one-plane service with Panagra equipment between Buenos Aires and New York and Washington via the West Coast of South America, a service provided by no carrier today. In the second place, we felt that ultimate approval of the contemplated interchange with Eastern might raise new issues which would be the subject of serious controversy with the outcome in doubt. On the other hand, the Board now has before it the Panagra/National Interchange Agreement. All the preliminary proceedings and public hearings have been completed and final determination of whether or not the [fol. 1209] agreement should become effective might reasonably be expected within a relatively short time. Moreover, upon approval of the interchange, establishment of the through one-plane service could be effected promptly. Then there would be for the first time between the points mentioned a through one-plane service really competitive with the through one-plane service operated by Pan American between New York and Buenos Aires via San Juan and the East Coast of South America since 1946.

The evidence presented at the public hearings with respect to the proposed Panagra/National Interchange, I submit, conclusively establishes that the public interest requires the immediate establishment of through one-plane service between Buenos Aires and New York and Washington via the Canal Zone and the Republics of Ecuador, Peru and Chile. There cannot be, I further submit, any clearer or stronger case made out for the establishment of this service regardless of what evidence might be introduced in a new proceeding. Thus from the viewpoint of the public interest nothing would seem to be gained by postponing

until some indefinite time in the future a result which could be accomplished promptly in Docket 3500.

[fol. 1210] As appears from the text of National's letters dated December 14, 1950 addressed to Pan American and Grace respectively, National has already stated its readiness and willingness to carry out the terms of the Interchange Agreements now before the Board independently of the stock option agreements with Pan American and Grace which in such letters National has attempted to cancel.

Speaking on behalf of Grace, the owner of 50% of Panagra's stock, and on behalf of the Panagra Directors nominated by Grace, and as President of Panagra, I therefore respectfully request that the Board issue an order in this proceeding approving the Panagra National Interchange Agreement dated May 11, 1949 and the Supplements thereto, except such part thereof as purports to make such agreement conditional upon the approval of the collateral agreements.

Respectfully yours,

/s/ ANDREW B. SHEA

Andrew B. Shea

GOVERNMENT'S EXHIBIT 571

PAN AMERICAN WORLD AIRWAYS SYSTEM
CHRYSLER BUILDING, 135 EAST 42nd STREET,
NEW YORK 17, N. Y.

January 29, 1951

Mr. Peter Grace, President,
W. R. Grace & Co.,
7 Hanover Square,
New York 4, N. Y.

Dear Peter:

When you and Andy Shea left Henry Friendly and myself after our meeting of January 22 to discuss the interchange arrangements with Eastern, following National's repudiation of its agreements with Pan American, Panagra and Grace, our understanding was as follows:

Andy was to find out from counsel for our joint company (in discussions in which Henry Friendly offered to join) the detailed support for their belief that proceedings before the C.A.B. for the approval of these arrangements with Eastern would take two years. He would then communicate further with us. We on our side undertook to ascertain whether Eastern would meet your objection that the exclusive clause, as originally drawn, would leave Eastern free to make an interchange arrangement with Braniff if Eastern were ever extended to Havana, and your desire that Panagra should be able to put its own food service on the aircraft chartered to Eastern between Miami and New York.

The next thing we heard from you was the receipt on January 26 of a mimeographed letter written to Chairman Rentzel of the Civil Aeronautics Board by Andy Shea in the name of Pan American-Grace Airways, Inc. This was done without any authority from the Board of Directors of that Company. The letter came to us not as a joint stockholder in Panagra, and not to any of our directors

on the Panagra board, but simply as a party to Docket 3500.

I am enclosing a copy of a motion which Pan American is filing with the C.A.B. to dismiss the proceedings for the approval of the various agreements between National, on the one hand, and Pan American, Panagra and W. R. Grace & Co., on the other, which the Civil Aeronautics Board has recognized to be inter-dependent and important features of which National has recently repudiated. I am also enclosing an application being filed by [fol. 1212] Pan American and Eastern for the approval of an equipment interchange agreement. You will note that Eastern has met your two criticisms of the previous form of the agreement which I have referred to above. We have also modified the agreement so that instead of requiring acceptance by Panagra within 30 days after execution, as was previously provided, this opportunity will remain available to Panagra from now on until 30 days after approval by the Civil Aeronautics Board.

We sincerely trust that on further consideration W. R. Grace & Co. will come to the same conclusion as has Pan American, namely, that the great advantages of this arrangement with Eastern are such as to require acceptance by Panagra, if Panagra's best interests are the guide for Grace's action.

I am sending a copy of this letter to Chairman Rentzel.

Sincerely,

Juan Trippe
J. T. Trippe,
President

[fol. 1213]

GOVERNMENT'S EXHIBIT 572

COPY

February 5, 1951

Mr. A. B. Shea, Vice President
W. R. Grace & Co.
New York, New York

Dear Andy,

Re: Docket #3500

We were surprised to read your letter of January 25th to Chairman Reintzel of the C.A.B. While the letter was signed by you as President of Pan American-Grace Airways, Inc. it was written without discussion with or authority of the Board of Directors of that Company and indeed came to our attention only because it was served on Pan American Airways as a party to Docket #3500 and via the Aviation Daily. Board of Directors' authority, of course, would be required for any such interchange, agreement with National as you propose.

• • •

People do not generally continue doing business with those who have broken contracts with them. Here is peculiarly little reason for doing this since Pan American has succeeded in arranging for itself and Panagra an interchange agreement with Eastern which is far more satisfactory than the one you now propose for Panagra with National. You yourself stated that you consider this agreement with Eastern a remarkable achievement and that you would have favored its acceptance had it been available two years ago when we concluded our agreement with National, since repudiated by that company.

[fol. 1214] We can see no sound reason from Panagra's standpoint (as distinguished from that of W. R. Grace & Co. as owner of 174,000 shares, or 17.4%, of National's stock) why Panagra should not accept the Eastern interchange agreement now.

We know now that any arrangement between our companies and National is open to serious attack on the ground, pressed so vigorously at the hearing in docket 3500, that it ran counter to the position of the C.A.B. laid down in its decision in the *Latin American Air Service Case*, No. 6 C.A.B. at 915, that National should cooperate with Braniff at Havana.

• • •

We believe Panagra's aircraft could be brought into New York sooner and better by an interchange arrangement with Eastern rather than by a new agreement with National which for the reason indicated is so likely to be disapproved by the C.A.B.

We are concerned lest in proposing an arrangement with National, W. R. Grace & Co. may be motivated by its ownership of the 174,000 shares of the stock of National acquired despite Grace's control of the steamship line linking New York with the West Coast of South America without approval of the C.A.B. in March 1949 and now representing an investment of nearly 2½ million dollars. This special interest of W. R. Grace & Co. however should not be a factor when the question is what is in the best interests of Panagra.

[fol. 1215] When you and Mr. Grace left Mr. Trippe and Mr. Friendly on January 22nd it was understood there were to be further discussions of the Eastern agreement after we had had an opportunity to find out whether Eastern would meet the objections which you and Mr. Grace had raised to the provisions of the then draft as to exclusivity and food service. These provisions we are glad to report have been modified to meet your views. Furthermore as you know the agreement with Eastern has been changed so as to be open to acceptance by Panagra at any time up to a date 30 days after approval by the C.A.B. We hope our Grace colleagues on the Panagra Board will join with us in action that will permit such acceptance at any early date and thus expedite the operation of Panagra's planes into New York.

Following your example we as Directors of Panagra are sending copies of this letter to Chairman Rentzel, to Public Counsel and to all airline parties to Docket #3500.

Sincerely yours,

/s/ Erwin Balluder

February 9, 1951

Erwin Balluder, Esq., Vice President
Pan American World Airways, Inc.
135 East 42 Street
New York 17, New York

Dear Erwin:

The letter of February 5th addressed to me by Henry Friendly, John Leslie, Wilbur Morrison and yourself arrived at the office while I was absent in California and I did not receive it until my return yesterday.

I thoroughly dislike the practice of writing letters for the record but I feel impelled to reply to your letter of the 5th in order to keep the record straight.

Your colleagues and yourself state that my letter of January 25th to Chairman Rentzel was written without discussion with or authority of the Board of Directors of Panagra. That statement is, of course, correct. However, discussion with your colleagues and yourself as Directors of Panagra or a request that you authorize the action taken

would have been an empty formality in view of the position taken by Messrs. Trippe and Friendly in the conversation had with them by Mr. Grace and myself on January 22nd. It is hardly necessary to say that it was a foregone conclusion that your colleagues and yourself as Directors of [fol. 1217] Panagra would not have taken a position different from that taken by Messrs. Trippe and Friendly.

You further state in your letter that Board of Directors' authorization would be required for "any such interchange agreement with National as you propose". I am advised by counsel (other than Panagra counsel) that such authorization would not be required under the present circumstances should I have proposed a new agreement with National. However, I have not proposed a new agreement but have merely asked the Civil Aeronautics Board to approve our existing one except such part of the agreement as was included therein for the sole benefit of Pan American.

You state that there is no disagreement between the Pan American Directors of Panagra and the Grace Directors of Panagra as to the desirability of working out arrangements for the through operation of Panagra's planes to New York but that you disagree radically as to how this could best be accomplished under the circumstances that have arisen. With respect to these statements I refer to the long history of the efforts and constant pressure of the Grace Directors of Panagra over the period of the last fifteen years to bring about the operation of through service by Panagra between the U.S. and the South American terminus of Panagra. In the course of this period and indeed until 1946 when the Through Flight Agreement was [fol. 1218] signed the Pan American Directors of Panagra successfully resisted those efforts by refusing to authorize the application by Panagra of an extension of its route for the stated reason that:

> "In the opinion of this Board* an extension of Pan American-Grace Airways, Inc. from Balboa to Miami or New York would not be in the best interests of Pan American-Grace Airways Inc. and likewise would

*Board of Pan American Airways

not be in the best interests of this Corporation or its stockholders and that consequently the Representatives of this Corporation on the Board of Directors of Pan American-Grace Airways Inc. be instructed not to take action authorizing an application for such an extension by that Company."

(See Minutes of Panagra Directors' Meeting dated June 5, 1946).

It was only under the pressure of the implications of the decision by the Second Circuit Court of Appeals and of the statement of the President of the United States and of the Civil Aeronautics Board in the Latin American Route Case that Pan American finally entered into the Through Flight Agreement with Panagra as a substitute for a route extension to Miami. Since 1946, however, Pan American has been operating a through one-plane service between New York and Buenos Aires via San Juan and the East Coast of South America and I think it is fair to say that the same competitive considerations which prompted Pan American's opposition to the extension of the Panagra route to [fol. 1219] the U.S. are still controlling as a guide for the position of the Pan American Directors of Panagra in this whole matter.

You say in your letter that I stated that I considered Pan American's agreement with Eastern a remarkable achievement. I do consider it a remarkable achievement in view of the unsuccessful efforts previously made by Pan American to reach agreement with Eastern. You further credit me with the statement that I would have favored acceptance of an agreement with Eastern had it been available two years ago when we concluded our agreements with National. I made no such statement.

It is very clear that given a choice between going ahead with the National interchange on the one hand, and on the other entering into a new agreement with Eastern Air Lines, the only sound and practical policy to pursue from the viewpoint of Panagra's interest and that of the public is to carry to a conclusion with the utmost despatch the proceedings looking toward the approval of the National in-

terchange. With respect to the National interchange, agreement has been reached on all points, public hearings have been completed (except perhaps on the single point of the agreed rate of return on investment) and the only remaining steps are the filing of the Examiner's Report and consideration and decision by the Board. On the other hand the execution by Panagra of a new agreement with Eastern Air Lines would mean the institution and comple- [fol. 1220] tion of a whole new proceeding with serious doubt as to the outcome. The other carriers concerned would oppose with the utmost vigor the approval of such agreements and in so doing they would unquestionably employ every possible device to make the proceedings as protracted as possible. This is standard procedure as you well know.

As a basis for your disagreement that a great length of time, say two years, would be required for approval of the Eastern interchanges (assuming that such approval would be forthcoming) you cite the periods required for approval of the Panagra Pan American interchange, the American Delta interchange and the Capital National interchange. The Panagra Pan American Through Flight Agreement had practically been invited by the Board and was actively opposed only by Eastern Air Lines; the American Delta agreement received only temporary approval pending the outcome of the Southern Service to the West Case (Docket 1102 et al.). On the other hand the TWA Delta agreement (8 C.A.B. 857) required 18 months for approval. The TWA Continental agreement was filed June 1950 and no date has as yet been set for public hearing. The American Braniff agreement was filed September 1950 and no date has been set for public hearing.

I submit that on the basis of experience an impartial opinion would be that Mr. Friendly's estimate of 15 months for the conclusion of the Eastern interchange proceeding [fol. 1221] is optimistic and that my estimate of two years is not pessimistic but is also on the optimistic side. I submit that there is nothing unreasonable in my estimate of the time factor involved in this discussion.

You state that when Mr Grace and myself left Messrs. Trippe and Friendly on January 22nd it was understood that there were to be further discussions of the Eastern agreement. I must make it clear that as far as Mr. Grace and I were concerned there were to be no such further discussions. The observation with respect to the exclusivity was merely a casual one on my part and the remarks with respect to food service made by us were incidental.

After full consideration of all the circumstances neither the other Grace Directors on the Panagra Board nor myself find any reason to modify the position taken in my letter of January 25th to Chairman Rentzel.

I am sending copies of this letter to Chairman Rentzel to Public Counsel, and to all airline parties to Docket 3500.

Sincerely yours,

/s/ Andrew B. Shea

Civil Aeronautics Board
Washington 25, D. C.

Re: Docket No. 3500

Dear Sirs:

The Answer of National Airlines, Inc. in the above-described proceeding, served February 12, 1951, is founded on the altogether false premise that what has been done and said on behalf of W. R. Grace & Co. and the Panagra directors nominated by Grace constitutes action by Panagra as a company. The Answer refers to Mr. Shea's letter to

the Board, dated January 25, 1951, and states that since both Panagra and National desire that the Board approve the interchange agreement, there is no basis for dismissal of the agreements." Panagra as a company has expressed no such desire. Mr. Shea has collected a letter to me dated February 9, 1951 that his letter of January 25th was written without discussion with or authority of the Board of Directors of Panagra." Hence it can only be considered as having been written on behalf of Grace, also a substantial stockholder in National, and of the Panagra directors nominated by Grace. The Panagra directors nominated by Pan American take an entirely different view.

National, by its Answer, has admitted that the Pan American-National interchange and the stock acquisition agreements cannot now be consummated and that the Board ought to dismiss the proceedings relating thereto. The parties have always clearly understood, and the agreements specifically provide, that the Panagra-National interchange is interdependent with these agreements and with the Through Flight Agreement between Pan American and Panagra. Although the Through Flight Agreement can be severed, the other agreements cannot be separated from it or from each other and they cannot be rewritten without the consent of all parties. No such consent has been given or is likely to be forthcoming. Hence, by admitting that the Board should not go forward with the other agreements, National has admitted as well that the Board cannot go forward with the Panagra-National interchange.

In any event, it is impossible to see how an interchange respecting the widely separated services of National and Panagra would be practical in the absence of an interchange agreement between National and Pan American. The operations between Balboa and Miami are Pan American's, not Panagra's, and the aircraft are under Pan American control. A very large percentage of the traffic moving over that route and carried in Panagra aircraft operated by Pan American pursuant to the Through Flight Agreement consists of traffic originating in or destined to Balboa which is wholly Pan American's and not Panagra's.

[fol. 1225]

We are at a loss to understand what legitimate reason there can be for involving Panagra in all these difficulties when Panagra has available a simple and straightforward interchange arrangement with Eastern which we feel confident will merit speedy approval by the Board.

A copy of this letter has been sent to each person served with a copy of National's Answer.

Very truly yours,

/s/ E. Ballinder

Erwin Ballinder
Vice President and Director
Pan American-Grace Airways, Inc.

[fol. 1226]

GOVERNMENT'S EXHIBIT 576

March 22, 1951

Dear Jim,

DOCKET 3500

Dear Jim,

The Civil Aeronautics Board on March 19th issued an Order the substance of which is set forth in the enclosed summary.

The most important effect of the Order, insofar as Panagra is concerned, is that the Board will determine promptly and without formality of further hearing or submission of an Examiner's Report whether or not the Panagra/National agreement should be approved and become operative. We estimate despite this shortcut in procedure that such approval will not be forthcoming in less than between three and six months.

As you will see from the enclosure such approval if given will be temporary pending the outcome of a new proceeding in which the Board will pass on the following matters:—

(A) Whether or not Pan American and National should be ordered to enter into a compulsory interchange operation between New York and Balboa using only the Panagra aircraft operated under the Panagra Pan American Through Flight Agreement.

(I presume that the reason why it is suggested that this interchange will be made between Pan American and National rather than Panagra and National is to avoid the question of whether on arrival at Miami our aircraft are under the control of Panagra or under that of Pan American).

[fol. 1227] (B) Whether or not Eastern's route should be extended from Miami to Habana or Braniff's route extended to Miami and if either such extension is granted whether or not a compulsory interchange between Eastern and Braniff should be ordered for through service between New York and Balboa.

(C) Application for approval of the Pan American-Eastern interchange.

With respect to (B) it would, of course, have been much more satisfactory if a possible interchange between Eastern and Braniff for through New York Balboa operation had not been injected into the proceeding. However, the question of an extension of the Braniff operation in some form or other to New York has been with us for some time and it is a foregone conclusion that in view of the complicated nature of the new proceeding it will probably be a couple of years before the Board reaches a final decision in this as well as on the other matters involved in the new proceeding.

In the light of this if we get our temporary approval of the Panagra National interchange within, say, three to six months we shall start operating immediately and a lot of things may happen before the new proceeding is concluded.

I feel that on the whole the Board's Order constitutes a great step forward toward the realization of our ambition to start the through operation to New York.

[fol. 1228] With the foregoing before you you will be in a position to post all interested members of our flight and ground personnel as to what this new Order means.

Sincerely yours,

s/s Andrew B. Shea

[fol. 1229]

Government's Exhibit 577

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American World Airways, Inc., 135 East 42nd Street, New York, N. Y. on the 30th day of March, 1951 at 11:00 o'clock in the forenoon.

PRESENT:

Messrs Erwin Balluder
Howard L. Clark
Henry J. Friendly
John C. Leslie
B. H. Oehlert, Jr.
Andrew B. Shea

being a quorum of the Board.

Mr. Shea, President, presided. In the absence of the Secretary, Mr. Clark acted as Secretary of the meeting.

* * * *

At the time of the February 5 meeting, the directors nominated by Pan American had felt that consent by Panagra that its aircraft, which were chartered to Pan American for operation to Miami and return under the

Through Flight Agreement, should be further chartered to Eastern for operation to New York and return as contemplated by the agreement between Eastern and Pan American dated January 27, 1951, would be more in the interests of Panagra than any modified form of the agreement of May 11, 1949 with National, for the following reasons, among others:

(1) National's course of conduct, including particularly its repudiation of its contractual obligations, showed that National was not a desirable company with which to deal.

[fol. 1230] (2) An arrangement with National was inconsistent with the route pattern laid down by the Board at the direction of President Truman in May, 1946, whereby National was to cooperate with Braniff at Havana, and therefore was not likely to be approved.

(3) An arrangement with Eastern, on the contrary, would be directly in line with President Truman's plan and would give Panagra and Pan American greater traffic support, thus counterbalancing in part the advantage which Braniff had from its own network of routes in the United States.

Mr. Friendly stated that in his opinion, which he understood was shared by the other directors of Panagra who had been nominated by Pan American Airways, the case for the adoption of these resolutions had been strengthened by the order of the Civil Aeronautics Board, E-5205, dated March 16, 1951. He called attention particularly to the statements on page 13 of the Board's opinion that institution of a Panagra-National interchange or a compulsory through service between Pan American and National would destroy the "connecting link" between National and Braniff which was an integral part of the plan of Latin American air service adopted by the Board in compliance with President Truman's directive in May, 1946, and that "under such circumstances it might be necessary to extend Braniff to Miami, or Eastern to Havana, so that those carriers will connect with one another". He called attention also to the Board's statement that "this would not only serve [fol. 1231] to compensate for any diversion which Eastern

and Braniff would necessarily suffer from a Pan American-Panagra-National interchange, but would also preserve the competitive balance desired by the President and the Board and required by the Civil Aeronautics Act".

Mr. Friendly said that this made it clear that the insistence of the Grace representatives on dealing with National rather than Eastern was leading to a situation in which Braniff, in addition to the support of its own network of routes from Houston to Denver, on the one hand, and Chicago, on the other, (which now appeared likely to be supplemented by a through service agreement with Continental and American to Los Angeles and San Francisco) might have the support of Eastern's system, whereas Panagra would have the support only of National's East Coast route. By insisting on a course in violation of the plan laid out by the Board and the President in 1946, the Grace directors would thus seriously prejudice Panagra. The gain of a few months' time in establishing through-plane service, even if such a gain were attainable, would not justify action so detrimental to the true interests of Panagra, however it might be to the interests of W. R. Grace & Co as owner of 174,000 shares of National's stock.

Mr. Friendly thereupon moved the following resolutions, which were seconded by Mr. Balluder:

> RESOLVED: That the proper officers of this Company be authorized and directed to give notice, pursuant [fol. 1232] to paragraph 2 of the Agreement between Eastern Air Lines, Inc. and Pan American World Airways, Inc. dated January 27, 1951, of this Company's desire to have aircraft of Panagra which have been chartered to Pan American pursuant to Pan American-Panagra Through Flight Agreement for through operation by Pan American between the Canal Zone and Miami, Florida, leased to Eastern for through operation by Eastern over Eastern's Miami-Washington-New York-Boston route, as provided in said agreement; and
>
> FURTHER RESOLVED: That, in accordance with said paragraph 2 of said Agreement, the proper officers

of this Company be and they are hereby authorized and directed to enter into appropriate contracts with Eastern and Pan American of the nature contemplated by said Agreement (including in the case of Pan American any and all modifications of the Through Flight Agreement which are necessary or appropriate) so that aircraft of Panagra shall be included among the interchange aircraft which Eastern agrees to lease for through operation as provided in said Agreement; and

FURTHER RESOLVED: That is not in the best interests of Panagra to consent to any modification of the Agreement dated May 11, 1949 between Panagra and National Airlines, Inc. so that said Agreement might become effective otherwise than as therein provided, or that said Agreement should be approved by the Civil Aeronautics Board, either temporarily or otherwise.

Vote being had, said resolution failed to pass, Messrs Ballinder, Friendly and Leslie voting in favor and Messrs Clark, Ochlert and Shea voting against.

Mr. Friendly referred to a letter written by Mr. Shea under date of October 18, 1950 to Chief Examiner Francis W Brown of the Civil Aeronautics Board enclosing a copy of Supplement No. 2 (Revised) to the abovementioned interchange agreement with National Airlines, purporting to be signed on behalf of the Corporation by Howard L. Clark, Vice President, referring to a statement of counsel for National Airlines that this agreement was subject to [fol. 1233] approval by the Board of Directors of Panagra, and characterizing that statement as being "in error and due to a misunderstanding so far as our company is concerned as neither that agreement nor the enclosed which supersedes it are subject to the approval of our Board". Mr. Friendly stated that in the view of the Pan American directors the statement by National's counsel that Supplement No. 2 required approval by Panagra's Board of Directors was not in error or due to any misunderstanding, as such approval was required under general principles of corporate law, under the agreement between W R Grace

& Co and Pan American Airways Corporation dated July 30, 1946, and under the resolution of Panagra's Board of Directors dated March 31, 1949, wherein any and all agreements necessary to carry out the objectives of the Memorandum of Understanding dated March 30, 1949 between National Airlines, Inc., W R Grace & Co, Pan American Airways, Inc and Pan American-Grace Airways, Inc required approval by Mr. Roig and Mr. Dean—these gentlemen then being the senior representatives of the two owners on Panagra's Board of Directors. He stated that this agreement had been signed without any prior notice to the Pan American directors, that no representative of Pan American had ever approved it, and that he had vigorously objected to it immediately on the original agreement's being brought to his attention.

Mr. Friendly thereupon moved the following resolution, which was seconded by Mr. Balluder:

> [fol. 234] RESOLVED: That Supplement No. 2 (Revised) to the Interchange Agreement between National Airlines, Inc and Pan American-Grace Airways, Inc, purporting to be signed in the name of Pan American-Grace Airways, Inc by Howard L. Clark, Vice President, was executed by said Howard L. Clark without authority and that said agreement was not and is not the act or deed of this Corporation or in any way binding thereon.

Vote being had, said resolution failed to pass, Messrs Balluder, Friendly and Leslie voting in favor and Messrs Clark, Oehlert and Shea voting against.

Mr. Balluder brought up the question of counsel to represent Panagra in proceedings in respect of or arising out of Civil Aeronautics Board Order E-5205. As appeared from Mr. Burns' letter of August 9, 1949 to the Civil Aeronautics Board, Mr. Burns' retainer had been as trial counsel in Docket No. 3500, which had now been dismissed. Mr. Burns had been retained at a time when the two owners of Panagra were avowedly pursuing a common objective, and this retainer had been agreed on by the Pan American

directors in deference to the request of their Grace colleagues and despite the then expressed preference of the Pan American directors that Panagra should be represented by counsel who was less closely affiliated with either of the two owners. Since that time Mr Burns had become a director of W R Grace & Co and thus was disqualified from representing Panagra in a matter where W R Grace & Co had special interests which it might be pursuing to the prejudice of the true interests of Panagra. Mr. Balluder [fol. 1235] thereupon moved the following resolution, which was seconded by Mr. Leslie:

> RESOLVED: That the retainer of John J Burns, Esq. as trial counsel for this Corporation in Docket 3500 does not include any proceedings to be taken in respect of or arising out of Civil Aeronautics Board Order E-5205, and that Panagra should be represented in any such proceedings by disinterested counsel.

Vote being had, said resolution failed to pass, Messrs Balluder, Friendly and Leslie voting in favor and Messrs Clark, Oehlert and Shea voting against.

Mr Friendly stated that in view of the position taken by the Grace directors, the directors nominated by Pan American felt that they would be compelled to retain counsel to represent the Corporation who would defend what they deemed to be the best interests of the Corporation as distinguished from the special interests of W R Grace & Co. He thereupon moved the following resolution which was seconded by Mr. Balluder:

> RESOLVED: That in view of the position taken by the Grace directors and of the belief of the Pan American directors that W R Grace & Co has special interests which are adverse to those of the Corporation, the directors nominated by Pan American World Airways, Inc be authorized to retain counsel for the Corporation in order to present the true interests of the Corporation in any proceedings to be taken in respect of or arising out of Civil Aeronautics Board Order E-5205.

Vote being had, said resolution failed to pass, Messrs Balluder, Friendly and Leslie voting in favor and Messrs Clark, Oehlert and Shea voting against.

There being no further business, the meeting adjourned.

GOVERNMENT'S EXHIBIT 579

Minutes of Annual Meeting of the Board of Directors of Pan American-Grace Airways, Inc., held at the Office of Pan American World Airways, Inc, 135 East 42nd Street, New York, N Y on the 10th day of May, 1951 at 4:30 o'clock in the afternoon.

PRESENT:

Messrs Erwin Balluder
Howard L Clark
Henry J. Friendly
John C Leslie
B H Oehlert, Jr
Andrew B Shea

being a quorum of the Board.

Mr Shea, President, presided. Mr Cogswell, Secretary, acted as Secretary of the meeting.

The President called for nominations for President. Mr Clark nominated Mr Shea; Mr Oehlert seconded the nomination.

Mr Friendly stated that Mr Shea was not a director of Panagra nominated by Grace and approved by Pan American within the meaning of Section 3 of the Agreement dated July 30, 1946.

Mr Friendly thereupon nominated Mr Wilbur L Morrison for the office of President, which nomination was seconded by Mr Leslie. Mr Friendly stated that Mr Morrison had authorized him to state that, if elected, he would resign all offices that would create interlocking relationships within Section 409 of the Civil Aeronautics Act, pending reelection [fol. 1239] to such offices subject to Civil Aeronautics Board approval and action on an application therefor.

Mr Oehlert stated that Mr Friendly's statement and his nomination of Mr Morrison were out of order under Section 3 of the Agreement dated July 30, 1946 for the following reasons: First, such agreement requires that the Pan American votes be cast for the person nominated by Grace and approved by Pan American, which approval shall not be unreasonably withheld, and, second, Mr Morrison is not within the class described in such agreement.

Vote being had, neither Mr Shea nor Mr Morrison was elected, Messrs Clark, Oehlert and Shea voting for Mr Shea and Messrs Balluder, Friendly and Leslie voting for Mr Morrison.

Mr Shea thereupon stated that inasmuch as neither candidate had received a majority, he continued in office as President under Section 10 of the General Corporation Law of the State of Delaware.

Mr Friendly stated that this point would be decided by another tribunal and that he did not wish to remain silent as it might be construed as an agreement to Mr Shea's statement.

* * *

Mr Friendly thereupon moved the following preambles and resolution which were seconded by Mr Balluder:

> WHEREAS, by Order Serial No. E-5282 the Civil Aeronautics Board has tentatively proposed to grant temporary approval to an agreement between this cor- [fol. 1240] poration and National Airlines, Inc., dated May 11, 1949, on certain conditions set forth in the said Order; and
>
> WHEREAS, by reason of National's repudiation of other agreements made simultaneously with the said agreement of May 11, 1949, all of which agreements were made to carry out a Memorandum of Understanding dated March 30, 1949, between Pan American Airways, Inc., W. R. Grace & Co., National Airlines, Inc., and this Corporation, and of action taken by the Civil Aeronautics Board as a result of such repudiation, the said agreement of May 11, 1949 cannot become effective

in accordance with its terms and would require modification in essential respects both because of the foregoing and because of conditions proposed by the Board if these should be included in any final order; and

WHEREAS, in any event, for reasons indicated in the notice from Pan American World Airways, Inc., dated April 25, 1951, this Corporation is not in a position to charter aircraft to National at Miami for operation over National's Miami-New York route,

NOW, THEREFORE, be it resolved that by reason of the foregoing and of the opportunities afforded to this Corporation by the agreement between Pan American World Airways, Inc. and Eastern Air Lines, Inc., dated January 27, 1951, (1) this Corporation should not hold itself out as being able or desiring to charter the aircraft leased by it under its Through Flight Agreement with Pan American World Airways, Inc. to National Airlines, Inc. for operation over National's Miami-New York route otherwise than on the specific terms and conditions embodied in the agreement dated May 11, 1949, and (2) no officer of the Corporation shall enter into any agreement or understanding, oral or written, with National Airlines, Inc., modifying the said agreement dated May 11, 1949, or take any action to lease aircraft of the Corporation to said National Airlines, Inc. otherwise than on the specific terms and conditions embodied in the agreement dated May 11, 1949.

Vote being had, said resolution failed to pass, Messrs Ballinder, Friendly and Leslie voting in favor and Messrs Clark, Oehlert and Shea voting against.

[fol. 1241] Mr Friendly moved that the minutes of this meeting be promptly prepared and submitted to the directors for approval, and that a copy of such minutes and of the minutes of the meeting of March 30, 1951, when these are prepared and approved, should then be forwarded to the Civil Aeronautics Board. Mr Leslie seconded this motion.

Vote being had, said resolution failed to pass, Messrs Ballinder, Friendly and Leslie voting in favor and Messrs Clark, Ochlert and Shea voting against..

There being no further business, the meeting adjourned.

Andrew B. Shea

New York 17, N. Y.

Dear Sir:

In your letter of April 25, 1951, you purport to terminate pursuant to paragraph 59 thereof certain provisions which relate to the Panagra National Interchange of our "Through Flight Agreement—Supplement No. 5". This paragraph provides in part:

> "59. This Supplement No. 5 shall become effective only in the event that the agreement dated May 11, 1949 between Panagra and National shall become effective, . . ."

May we point out to you that the question whether the agreement of May 11, 1949 between Panagra and National shall become effective is now pending before the Civil Aeronautics Board pursuant to its Order No. E-5282, and your action is, in any event, inappropriate at this time. We cannot accept such withdrawal from Supplement No. 5.

You also filed on April 25, 1951 an "Amendment No. 1 to Application", seeking to amend the application for modification of the Board's Order Serial No. E-570 so as to elimi- [fol. 1243] nate reference to the provisions relating to the Panagra-National Interchange. Inasmuch as the said application now sought to be amended by you was actually a joint application which was filed in your name merely as a matter of convenience, this unilateral action is improper and cannot be recognized.

Very truly yours,

Andrew B. Shea
President
Pan American-Grace Airways, Inc.

GOVERNMENT'S EXHIBIT 581

MEMORANDUM

To: Persons Named Below		From: Vice President and General Counsel	
Dept. or Div.	Various	Dept. or Div.	Legal
Location	Various	Location	New York

Date: May 11, 1951

Subject: PRESIDENCY OF PANAGRA

The annual meeting of the Board of Directors of Pan American-Grace Airways, Inc. was held on May 10, 1951. The Grace nominees to the Board of Directors nominated Mr. Andrew B. Shea, and the Pan American nominees nominated Mr. Wilbur L. Morrison. Each of the candidates received three votes.

Under these circumstances, there is legal doubt whether or not Mr. Shea continues as President of Panagra and, if he continues at all, whether as President *de jure* or *de facto*. It is important that so long as these legal doubts exist Pan American officers and employees should not do anything

which could be argued to be a recognition that Mr. Shea continues to be President.

Executive Offices

May 29, 1951

Civil Aeronautics Board,
Washington 25, D. C.

Dear Sirs:

Pan American World Airways, Inc. has received a letter dated May 11, 1951, signed by Mr. Andrew B. Shea, as President of Pan American-Grace Airways, Inc., in answer to Pan American's letter of April 25, 1951, a copy of which was attached to Amendment No. 1 to Pan American's application in Docket 3787.

At the organization meeting of the Directors of Pan American-Grace Airways, Inc. held on May 10, 1951, Mr. Shea failed of reelection as President. For this and other reasons, Pan American, and the directors of Pan American-Grace who are our nominees, do not consider that Mr. Shea is authorized to take any position on behalf of Pan American-Grace Airways, Inc. on the matter in question.

Mr. Shea's position with respect to Supplement No. 5 to the Pan American-Panagra Through Flight Agreement is completely untenable. Supplement No. 5 was to become effective only if the agreement dated May 11, 1949, between Panagra and National "shall become effective". This cannot occur, since, as a result of National's repudiation of its agreements and of the action of the Board in Order Serial E-5205, certain of the stated conditions to such effec-

tiveness can no longer be met. Pan American's consent in Supplement No. 5 to any charter to National of aircraft leased by Panagra to Pan American under the Through Flight Agreement was limited to a charter containing the "specific terms and conditions" of the agreement between Panagra and National executed on May 11, 1949. Plainly these cannot now be met.

Even, however, if the foregoing were not the case, Mr. Shea's position would not be aided. By virtue of paragraph 58 of Supplement No. 5, Pan American-Grace Airways, Inc. is under obligation, in the circumstances that have now [fol. 1246] arisen, to terminate the agreement dated May 11, 1949, between itself and National on Pan American's written request. Attached hereto is a copy of a letter dated May 29, 1951, in which Pan American makes such written request.

Mr. Shea is also in error when he refers to Pan American's application in Docket No. 3787 for approval of Supplement No. 5 to the Through Flight Agreement as being "actually a joint application which was filed in your [Pan American's] name merely as a matter of convenience". The application was filed as an individual application by Pan American and not as a joint application of Pan American and Pan American-Grace for reasons of substance and not at all "merely as a matter of convenience". These reasons go back to the original application for approval of the Through Flight Agreement in Docket No. 2423. The application under Section 408 in that docket was filed solely by Pan American as lessee and not jointly by Pan American and Pan American-Grace. This was done in an effort to avoid the difficulties arising out of the steamship control of that company. Pan American-Grace is "a person controlled by a carrier other than an air carrier, or affiliated therewith within the meaning of Section 5 (8) of the Interstate Commerce Act, as amended". If it had filed the application, the latter would have had to pass the test of the second proviso of Section 408 of the Civil Aeronautics Act, namely, that the Board could not approve the application "unless it finds that the transaction proposed will promote the public interest by enabling such carrier other than an

air carrier to use aircraft to public advantage in its operation and will not restrain competition". It was recognized that Pan American-Grace could not meet this test. See 8 CAB 50, 55-56. For the same reason Pan American was the sole applicant in Docket No. 3787 seeking approval of Supplement No. 5 to the Through Flight Agreement.

Pan American is, therefore, in a position to amend or withdraw its application in Docket No. 3787 without any need of obtaining the assent of Pan American-Grace. It has withdrawn from its application all provisions of Supplement No. 5 relating to the alleged agreement between Pan American-Grace and National, and there is nothing before the Board on that subject.

PAN AMERICAN WORLD AIRWAYS, INC.

GOVERNMENT'S EXHIBIT 583

PAN AMERICAN WORLD AIRWAYS SYSTEM
Chrysler Building, 135 East 42nd Street, New York 17, N. Y.

Executive Offices

May 29, 1951

President,
Pan American-Grace Airways, Inc.
7 Hanover Square,
New York, N. Y.

Dear Sir:

Under Supplement No. 5 to the Through Flight Agreement between Pan American Airways, Inc. and Pan American-Grace Airways, Inc. dated May 11, 1949, paragraph 5a, Pan American-Grace Airways, Inc. agrees that upon our

company's written request Pan American-Grace Airways, Inc. "will exercise its right of termination under paragraph 19, sub-section (2), clauses (ii), (iii), (iv), (v), and (vi)" of the agreement between Pan American-Grace Airways, Inc. and National Airlines, Inc. dated May 11, 1949.

Paragraph 19, sub-section (2), clause (iv), of the agreement between Pan American-Grace Airways, Inc. and National Airlines, Inc. dated May 11, 1949, provides that said agreement shall terminate or may be terminated prior to the expiration of its stated term at the option of Pan American-Grace Airways, Inc. "if National or W. R. Grace & Co. shall fail to perform any of their respective obligations under the agreements between them" and our company referred to in paragraph 18 (4) of said agreement.

Paragraph 18 (4) of said agreement refers to an option agreement between our company and National Airlines, Inc. and an agreement between our company and W. R. Grace & Co., also executed under date of May 11, 1949.

On December 14, 1950, National Airlines, Inc. gave notice to our company that the said stock option agreement "is terminated and of no further force or effect".

Our nominees on the Board of Directors of Pan American-Grace Airways, Inc., and we, as half owner of Pan American-Grace Airways, Inc., have taken the position that the agreement dated May 11, 1949, between Pan American-Grace Airways, Inc. and National Airlines, Inc. cannot become effective by its terms and that it is not within the [fol. 1248] power of the Grace nominees to the Board of Directors of Pan American-Grace Airways, Inc., or the officers of Pan American-Grace Airways, Inc., to make the said agreement effective. Our company also takes the position that the portions of Supplement No. 5 to the Through Flight Agreement between our company and Pan American-Grace Airways, Inc., which relate to the said agreement dated May 11, 1949, between Pan American-Grace Airways, Inc. and National Airlines, Inc. cannot become effective, for reasons stated in our letter of April 25, 1951. Apparently the Grace nominees to the Board of Directors of Pan

American-Grace Airways, Inc. take an opposite position, although the grounds for this have not yet been stated.

Because of this and without prejudice to our position as previously stated, we therefo make formal written request, pursuant to paragraph 58 of the said Supplement No. 5, that Pan American-Grace Airways, Inc. terminate its agreement dated May 11, 1949, with National Airlines as therein provided.

Notice is being given in the manner provided in the Through Flight Agreement without prejudice to any position which our company may be advised to take with respect to the status of the presidency of Pan American-Grace Airways, Inc.

Very truly yours,

PAN AMERICAN WORLD AIRWAYS, INC.

Dear Sirs:

This is with reference to a letter dated May 29, 1951 from Pan American World Airways, Inc., in which the

right and title of Andrew B. Shea to the office of President of Pan American-Grace Airways, Inc. is challenged.

We are enclosing a copy of an opinion from a distinguished law firm in the state of incorporation of Pan American-Grace Airways, Inc., which unequivocally upholds Mr. Shea's right and title to such office.

Cahill, Gordon, Zachry & Reindel.

GOVERNMENT'S EXHIBIT 585

June 21, 1951

Dear Jay:

You mentioned to me the other day that you felt that the Panagra investment has not been too profitable and I thought you would be interested in a few figures.

Attached is a comparison of the Panagra P/L for the first four months of 1951 as compared with the first four months of 1950.

This statement is summarized as follows:

	1950	*1951*
Net Profit After Taxes	$270,918.09	$545,126.16

As you know, our mail pay rate case is still pending before the C.A.B. We are accruing mail pay at the rate fixed by the Board in a Show Cause Order now under revision. We are receiving mail pay at a temporary rate intended to enable us to break even.

The mail pay accrual exceeded mail pay at the temporary rate by $381,553 in 1950 and by $126,555 in 1951.

On the temporary rate basis net income after taxes would be as follows:

	1950		1951
Loss	($ 19,047	Profit	$459,613

Should earnings continue at the same rate throughout the year net profit after taxes on the present mail pay accrual basis would be about $1,600,000 and on the temporary rate basis would be about $1,400,000. Earnings will [fol. 1251] not continue at that rate because of seasonal fluctuations in revenue passenger mileage. Nevertheless, I don't think it would be far out of line to say that on the temporary rate basis the company will net after taxes in the neighborhood of $1,000,000 of which the Grace share, of course, is $500,000.

I have no hesitation in saying either that if the Panagra/National Interchange becomes operative from say August on Panagra's earnings for the year will increase substantially over the million dollar figure.

It might be worth mentioning on the way by that even our efforts in the National case have not been unproductive of a substantial book profit for W. R. Grace & Co. As you know we purchased in March 1949 174,000 shares of National stock at $5.50 per share. The market price is now around $15.50 so that we have a paper profit of $1,740,000 in the stock. We may be forced to dispose of all or a substantial part of these holdings by C.A.B. order but I am sure that we could dispose of the entire holding in a secondary offer at a very slight discount below the market.

Sincerely yours,

J. S. Phipps, Esq.
465 East 57 Street
New York, New York

WGH
Holloway

P.S. I don't want to bore you with a lot of figures but I might mention also the facts that the initial Grace investment in Panagra was $500,000, the present net worth of the company is approximately $10,000,000 (increase entirely out of earnings) and since its inception the company has distributed $1,232,500 to W. R. Grace & Co. in dividends.

CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Served:

NATIONAL AIRLINES, INC.
PAN AMERICAN-GRACE AIRWAYS, INC.
INTERCHANGE AGREEMENT

Docket No. 3785

PAN AMERICAN WORLD AIRWAYS, INC.
PAN AMERICAN-GRACE AIRWAYS, INC.
THROUGH FLIGHT AGREEMENT

Docket No. 3787

Decided: July 13, 1951

Tentative opinion granting temporary approval of equipment interchange agreement between National Airlines, Inc., and Pan American-Grace Airways, Inc. (Docket No. 3785), rescinded.

Tentative opinion granting temporary approval of Supplement No. 5 to Through Flight Agreement between Pan American World Airways, Inc. and Pan American-Grace Airways, Inc. (Docket No. 3787) rescinded.

Action certifying record to Board for initial decision on temporary aforesaid agreements rescinded.

• • •

BY THE BOARD:

This opinion involves our consideration of exceptions to our opinion and order of April 12, 1951 tentatively approving for a temporary period an interchange agreement (Docket No. 3785) between National Airlines, Inc. (National) and Pan American-Grace Airways, Inc. (Pan-[fol. 1258] agra) and a supplement to a through flight agreement (Docket No. 3787) between Panagra and Pan American World Airways, Inc. (Pan American).[1] The two agreements taken together provide for through one-plane service between the northeastern part of the United States and various points in South America utilizing Panagra aircraft over the routes of the three carriers parties thereto. Also before us are petitions for reconsideration of our action in the opinion and order of March 16, 1951 certifying the two agreements to the Board for initial decision.[2] In Order Serial No. E-5378, dated May 14, 1951, we consolidated the issues raised by these petitions for oral argument with the argument upon the exceptions to the tentative decision.

* * *

. . . . affect other carriers, and would interfere with a proper disposition of the problem of through service to South America in the *New York-Balboa Through Service Proceeding*. It was also argued that the Board could not [fol. 1259] legally approve the National-Panagra interchange without first deciding the issues raised by the stock holdings of W. R. Grace & Co. (Grace) in National, and that the agreements suffered from certain legal disabilities which made approval impossible. This last argument was

---

[1] Order Serial No. E-5282. Pan American, the directors of Panagra who are Pan American nominees, Eastern Air Lines, Inc. (Eastern), Braniff Airways, Inc. (Braniff), Air Line Pilots Association, International (ALPA), the Pan American pilot councils, and the Dade County Port Authority (Greater Miami Traffic Association) filed such exceptions.

[2] Order Serial No. E-5205. Pan American, the directors of Panagra who are Pan American nominees, and Eastern filed such petitions.

predicated on the ground that the effectiveness of the National-Panagra interchange agreement depended on certain conditions precedent which have now failed.

The proponents of the tentative decision opposed each of these contentions. On the affirmative side they urged that the operation of the proposed through service was in the public interest and should be given a chance.

A brief resumé of the factual background of the two agreements before us will give a clear picture of the problems now faced by the Board.

Grace and Pan American are co-owners of Panagra, whose routes extend between Balboa and Buenos Aires, with each owning 50 per cent of the stock of the latter air carrier. The controlling interests were acquired prior to the effective date of the Civil Aeronautics Act and consequently the acquisition never came before the Board for approval. The situation has been productive of a long period of strife between the two co-owners which has principally centered around the future development of Panagra.

The earlier history of this controversy is set forth in our decisions in the Panagra Terminal Investigation[5] and in the [fol. 1260] Latin America Air Service Case.[6] Following the latter decision, which, among other things, awarded Braniff a certificate authorizing it to operate between the United States and South America, Pan American and Panagra (with Grace concurring) agreed upon an arrangement, known as the Through Flight Agreement, under which Panagra's planes with crews could operate between Balboa and Miami over Pan American's route under charter to the latter. This arrangement would enable the two air carriers to provide through one-plane service between Miami and various points on Panagra's routes in South America. There was also a companion management agreement. The whole package was presented to the Board as an effort to settle the long standing difficulties between

---

[5] 4 C.A.B. 670 (1944).

[6] *Supra*, 6 C.A.B. at pp. 913-14.

Grace and Pan American. The arrangements were approved by us in May, 1947,[1] for a period of three years which was later extended pending decision on the agreements now before us.

During the winter of 1948-1949, while there was pending a Board investigation of National's routes and operations, National and Grace carried on negotiations for stock purchases and an interchange agreement. This resulted in the purchase by Grace during March, 1949, of approximately 174,000 shares of the stock of National or about 18 per cent of the latter's outstanding shares. Pan American also entered the negotiations with the result that there [fol. 1261] was presented to us for approval a series of transactions embracing the following:

(1) An option by Pan American to acquire 30 per cent of National's stock;

(2) An interchange agreement between National and Pan American by which planes of the latter would operate over National's New York-Miami route under charter to National;

(3) The interchange agreement between National and Panagra which we are now considering;

(4) Supplement No. 5 to the Through Flight Agreement, which we are here also now considering, to extend the latter to 1960 and to give Panagra the right to operate the Panagra aircraft coming into Miami under that agreement over National's route to New York pursuant to the National-Panagra arrangement.

The agreements were so drafted as to condition the effectiveness of the National-Panagra interchange upon Board approval of both the Pan American option to acquire National stock and the Pan American-National interchange.[2] The Supplement to the Through Flight Agreement also contained a provision giving Pan American the right to

---

[1] Order Serial No. E-570.

[2] Paragraph 18 of the National-Panagra agreement.

require Panagra to termin · the Panagra-National interchange in the event the c ·aditions precedent noted above were not fulfilled.[9]

Public hearings were held on these arrangements under appropriate provisions of the Civil Aeronautics Act as part of the consolidated proceeding in Docket No. 3500 involving our investigation of National's routes. National, Pan American, Panagra, and Grace all supported the arrangements in these hearings. A substantial delay in the processing of the agreements occurred as a result of the inability of National-Panagra-Pan American to agree on a rate of [fol. 1262] return applicable to the investment in leased aircraft which would be a part of the fee for the lease therefor under the interchange agreements. At one time we ordered dismissal of the arrangements because of the inability of the parties to complete their transactions. We finally concluded, however, that, after the time and effort expended, the public interest lay in our considering the transactions on their merits in spite of the lack of agreement on a rate of return. We, therefore, in the fall of 1950 moved toward a completion of this consideration.

At that juncture National advised Pan American that it did not wish to go forward with the option arrangement by which Pan American was to acquire 30 per cent of its stock but that it did desire to put into effect the two interchange agreements to which it was a party. Pan American refused to go ahead with the interchanges without the stock options and advised both National and Grace accordingly. Pan American also moved the Board to dismiss all of the applications for approval of the transactions. It further made an effort to obtain the consent of the Grace interests to the participation of Panagra in an Eastern-Pan American interchange agreement which was then being negotiated. This was refused and the Panagra management advised the Board that it desired to go forward with the Panagra-National interchange.

This was the situation which confronted us at the time we issued our March 16th order and our tentative opinion

[9] Paragraph 58 of Supplement No. 5.

of April 12th. It was clear that there was no purpose to be [fol. 1263] served in considering the Pan American-National stock option arrangement and the Pan American-National interchange since these had been presented as purely voluntary transactions and one of the two parties to each had withdrawn. We therefore dismissed the applications for their approval.

The National-Panagra interchange and Supplement No. 5 to the Through Flight Agreement appeared to present an entirely different problem. Both National and Panagra's management desired to place their agreement into effect.[1] Neither Panagra nor Pan American had requested dismissal of Supplement No. 5. Thus, it appeared to the Board that the actual parties to the two agreements might be willing to proceed. There also appeared to be general agreement that a through service between points in the northeastern part of the United States and South America was in the public interest and this view had in fact been urged by all parties to the agreements. In addition, more than two years of time and public money had been devoted to consideration of the arrangements. We did not believe that this effort should be wasted.

It was clear that a more comprehensive and long range solution of the through service problem must await further proceedings which in the light of legal requirements would [fol. 1264] take a substantial period of time. We felt that if it were at all feasible some through service should be provided during the interim. This could best be accomplished by a temporary approval of the National-Panagra interchange and the Supplement to the Through Flight Agreement. The facts all pointed to the desirability of considering the Panagra-National interchange and Supplement No. 5 as a means of providing an interim solution to the problem of through service between the northeastern part of the United States and Latin America, even though the National-Pan American transactions had failed.

[1] The management of Panagra asserted the authority to speak for Panagra despite an even split of the carrier's Board of Directors and a challenge to the management's authority by that 50 per cent of the Board of Directors who are Pan American nominees.

The briefs and oral argument have failed to alter our conclusion in the tentative opinion that an interim through service between the areas involved is in the public interest. However, the briefs and argument have focussed our attention upon a number of substantial problems which would have to be met before such an interim service could be put into operation. These are, among others:

(1) There have been emphasized the several procedural problems cited above. These raise substantial questions of law on which there is no clear authority.

(2) There has been raised the question of the impact of the proposed service upon air transportation in the areas involved by the Grace stock acquisitions in National regardless of whether these amount to control of National under section 408 of the Civil Aeronautics Act.

[fol. 1265] This is a problem which will be fully explored in Docket No. 4893, the proceeding inquiring into whether there is Grace control of National, and Docket No. 4882, the New York-Balboa Through Service proceeding.

(3) There has been raised the issue of the impact of the proposed interim service on both Eastern and Braniff, particularly the latter.

(4) Pan American has made it clear that it is unalterably opposed to the temporary operation of the National-Panagra interchange. It has contended that there is no valid agreement without its consent because of the conditions precedent to the effectiveness of the agreement (the National-Pan American interchange and the Pan American stock acquisition in National). It has also exercised the option expressly granted it by Supplement No. 5 to the Through Flight Agreement to call upon Panagra to terminate the Panagra-National interchange. In addition, on April 27, 1951, Pan American modified the application previously filed by it for approval of Supplement No. 5, to ask for approval of only such parts thereof as do not relate to the National-Panagra interchange.

The Panagra management and Grace have argued that the National-Panagra interchange and Supplement No. 5

are valid and existing agreements. They contend that Pan American's present opposition to the National-Panagra arrangement is part of an unlawful plan to restrain com- [fol. 1266] petition. They further argue that the various contract provisions cited above on which Pan American relies are restraining clauses forced on Panagra and are void and unenforceable as restraints of competition violative of public policy and the Sherman Act. They conclude that the National-Panagra interchange can be enforced without these clauses.

If we should make final our tentative opinion and order approving the two agreements now before us, it would be necessary to dispose of all of these serious problems. If we were here considering the question of permanent approval of the agreements and the provision of a permanent through service, such an undertaking would, of course, be a part of our normal responsibilities. However, in our opinion the advantages that would flow from an interim service are not sufficient to warrant undertaking the solution of the foregoing problems, particularly in view of the apparent fact that our efforts would end in a futility. Since the National-Panagra interchange was presented to us as a voluntary proposal, all that we can do by our order is to give it permission to operate. Its immediate activation depends upon the affirmative cooperation of three carriers—National, Panagra, and Pan American. The management agreement between Pan American and Grace with respect to the conduct of the affairs of Panagra obviously is not working. There was a short period of cooperation immediately following the entering into the management [fol. 1267] agreement subsequent to the certification of Braniff in the Latin American Case. As is evident, however, that cooperative effort did not last, and the breach between Grace and Pan American, which is made clear by the briefs and argument in this proceeding, has not only foreclosed such cooperation, but gives every prospect of positive opposition. Such opposition is obviously encouraged by the many substantial legal problems presented. National and Panagra might, of course, after prolonged judicial controversy, establish their right to operate the agreement

as it now stands. However, it is clear that whatever the ultimate outcome might be, there is no chance of the interim service by a cooperative effort of the air carriers concerned which we contemplated being established. There would be merely a further expenditure of the time and effort of the Board and its staff to establish the validity of arrangements which would never be activated. This effort we believe can better be expended in processing as expeditiously as possible our consideration of through service in the New York-Balboa through service proceeding where we have the power to direct through service found to be required in the public convenience and necessity.

National and the Panagra management have suggested that we here simply order the two agreements to be activated. We do not believe that in this proceeding we can take such action. The agreements were presented to us as voluntary arrangements and have so been considered all [fol. 1268] the way through the proceeding. At no time have the parties been given notice of possible compulsory action in the premises by the Board. As indicated above, the new through service proceeding in Docket No. 4882 does contemplate compulsory action to accomplish what may there be found to be in the public interest and the participants have so been placed on notice. However, such action is not here possible.

It is indeed regrettable from the standpoint of United States aviation that the situation created by the parties is such that they cannot voluntarily put into operation on an interim basis the voluntary agreements filed with us and supported by all of them during the public hearings thereon. The reasons therefor grow out of the relationship outlined above and our action here will not solve this inherent difficulty. In this situation we conclude that the balance of the public interest lies in getting on with our efforts in Docket No. 4882 in which the Board can take positive action by requiring the establishment of appropriate interchanges or the granting of appropriate route extensions.

We, therefore, find that it would be inconsistent with and adverse to public interest to make final the temporary ap-

proval tentatively granted the National-Panagra interchange and Supplement No. 5 to the Through Flight Agreement in our opinion and order of April 12th. Accordingly, we will rescind the tentative approval of the aforesaid [fol. 1269] agreements contained in our order of April 12, 1951, Serial No. E-5282, and also rescind paragraphs 5 and 6 of our order dated March 16, 1951, Serial No. E-5205, insofar as said paragraphs certified the record to the Board for initial decision on the issue of temporary approval of such agreements.

It is our intention to expedite the New York-Balboa Through Service proceeding as rapidly as possible to determine the issues surrounding through service to Latin America. A prehearing conference in the proceeding is already scheduled. We have further directed that hearings begin not later than October 1, 1951, and that later procedural steps not be delayed.

An appropriate order will be entered.

Nyrop, Chairman, Ryan, Lee, Adams, and Gurney, Members of the Board, concurred in the above opinion.

[fol. 1270]

GOVERNMENT'S EXHIBIT 589

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc held at the office of Pan American World Airways, Inc, 135 East 42nd Street, New York, N Y on the 18th day of July, 1951 at 4:30 o'clock in the afternoon.

PRESENT:

Messrs Erwin Balluder
Howard L Clark
Henry J Friendly
John C Leslie
H J Roig
Andrew B Shea

being a quorum of the Board.

Mr Shea, President, presided. Mr Cogswell, Secretary, acted as Secretary of the meeting.

* * *

Mr. Balluder called attention to the fact that, by virtue of Civil Aeronautics Board Order No. E-5389, dated May 18, 1951, one of the issues to be considered in the *Through Service* proceeding was whether or not it would be in the public interest for Panagra to participate in the Agreement dated January 27, 1951 between Pan American World Airways, Inc and Eastern Air Lines, Inc, and that another issue to be considered in said proceeding was whether the Board should compel Pan American to enter into an interchange with National at Miami utilizing equipment chartered from Panagra for operation over Pan American's Panama-Miami route. Mr. Balluder stated that question might arise at the prehearing conference as to whether Panagra [fol. 1271] as a company would take any position as to the relative merits of these two proposals, and that he felt this was a matter which the director should discuss.

Mr Friendly stated that, when he and Mr Trippe had taken the proposed agreement with Eastern to Messrs Grace and Shea in January, 1951, the chief reason assigned by Messrs Grace and Shea for preferring an interchange with National was their claim that, because of the hearing which had already been had in Docket No. 3500, an interchange with National could be more readily implemented. This also was the reason assigned in Mr Shea's unauthorized letter of January 25, 1951 to Chairman Rentzel. This argument, of course, would not apply to Docket No. 4882, since the Civil Aeronautics Board would be here considering a permanent solution to the through service problem.

Mr Balluder stated that it seemed evident to Mr Leslie, Mr Friendly and himself that an interchange with Eastern would be far more in Panagra's interest than one with National. An interchange with Eastern would be consistent with the outstanding route pattern and would enable Panagra to compete more effectively with Braniff which had its own domestic system. Since the reason previously as-

signed by the Grace representatives for preferring an arrangement with National did not apply in Docket No. 4882, the directors nominated by Pan American wished to know what the views of their Grace colleagues on this question were.

[fol. 1272] Mr. Shea stated that the primary interest of the Grace representatives on the Panagra Board is that Panagra should come through to New York whether by means of an exchange with National or Eastern or on its own certificate, although the latter question is not presently in Docket No. 4882. He said he considers it in the best interest of Panagra to keep open all three possibilities and if Panagra should support an Eastern interchange, an interchange with National might be impractical.

Mr. Friendly stated that the directors nominated by Pan American were also in favor of a proper interchange arrangement that would bring Panagra's aircraft into New York. However, it seemed evident to them that an interchange with Eastern would be preferable from Panagra's standpoint to one with National, with the prospect of a concomitant Braniff-Eastern interchange which the Civil Aeronautics Board's opinion held out.

Mr. Balluder thereupon offered the following motion, which was seconded by Mr. Leslie:

> WHEREAS, participation by Panagra in the interchange agreement between Eastern Air Lines, Inc. and Pan American World Airways, Inc. dated January 27, 1951, would be consistent with the plan of Latin American air service adopted by the Civil Aeronautics Board and the President in 1946, and would be advantageous to Panagra; and
>
> WHEREAS, on the contrary, a compulsory interchange between Pan American and National at Miami, utilizing Panagra equipment chartered to Pan American for operation between the Canal Zone and Miami [fol. 1273] and return, would be destructive of the said plan of Latin American air service and, as indicated in opinions of the Civil Aeronautics Board, would probably lead to extension of Eastern to Havana to

connect with Braniff or of Braniff to Miami to connect with Eastern, either of which would be disadvantageous to Panagra;

NOW, THEREFORE, BE IT RESOLVED: That the officers of Panagra be and they hereby are authorized and directed to advise the Civil Aeronautics Board that Panagra is willing that its aircraft now chartered to Pan American for operation between the Canal Zone and Miami and return should be further chartered to Eastern for operation north of Miami substantially as provided for in the above-mentioned agreement between Pan American and Eastern, and to take all steps in proceedings before the Civil Aeronautics Board that are appropriate to obtaining approval thereof.

Vote being had, said resolution failed to pass, Messrs. Balluder, Friendly and Leslie voting in favor and Messrs. Clark, Roig and Shea voting against.

Mr. Friendly stated he could see why the directors nominated by Grace would not want to burn any bridges and that it had occurred to him that their negative vote on Mr. Balluder's motion might have been occasioned by objections to the preambles. The interest of the directors nominated by Pan American was in obtaining a declaration that Panagra would be willing to participate in an interchange with Eastern if this were approved by the Board, and it seemed to him that Mr. Shea's initial statement made it clear that this was in fact the case. He thereupon moved the following resolution, which was seconded by Mr. Balluder:

RESOLVED: That the officers of Panagra be and they hereby are authorized and directed to advise the [fol. 1274] Civil Aeronautics Board that Panagra would be willing that its aircraft now chartered to Pan American for operation between the Canal Zone and Miami and return should be further chartered to Eastern for operation north of Miami substantially as provided in the agreement dated January 27, 1951 be-

tween Pan American World Airways, Inc and Eastern Air Lines, Inc, in the event that such agreement should be approved by the Civil Aeronautics Board.

Voting being had, said resolution failed to pass, Messrs. Balluder, Friendly and Leslie voting in favor and Messrs Clark, Roig and Shea voting against.

In respect to the foregoing resolution, Mr. Shea pointed out that Panagra's position is a delicate one in view of pending decision of the Civil Aeronautics Board on the National interchange.

Mr. Balluder stated that, in view of the equal division of opinion among the directors, he assumed that Panagra as a company would take no position with respect to the relative merits of the proposals as to the further chartering to National, on the one hand, or to Eastern, on the other, of Panagra's aircraft which are chartered to Pan American for operation between the Canal Zone and Miami, and return. He asked for a confirmation from Mr. Shea on this point.

Mr. Shea stated that as chief executive he could not give this confirmation and that he intended to express the views that he thought would best serve the interests of the company.

* * *

There being no further business, the meeting adjourned.

.....
Chairman

GOVERNMENT'S EXHIBIT 591

CONFIDENTIAL January 17, 1952

MEMORANDUM

At Mr. Peter Grace's request, I met with him at lunch today at the Cload Club. During the luncheon, he stated his objectives were:

(1) To ask whether we would be willing to vote in favor of Mr. Howard Clark as President of Panagra so as to relieve Mr. Shea whom he said was too valuable a man to be occupied to the extent required as President of Panagra. He stated that Grace & Co. had taken a 20% interest in a Baltimore chemical company and had become very active in that industry both here and in Germany—that he personally had made a half a dozen trips to Europe and also to South America during the past year on general Grace business and wanted to use Mr. Shea's full time to take over more of this work.

(2) He wished to inquire whether we were not prepared to drop the pending action before the CAB. He stated that if it went forward, the Department of Justice would probably intervene, and that the ultimate result could well be both Grace and Pan American being separated from Panagra.

He stated the fight, if it went forward, could be a dirty one with no holds barred; that Mr. Cahill had planned on a number of maneuvers which would be most embarrassing to Pan American inferring that the Grace directors, with this objective, would soon make a request on the Panagra Board for authority to apply for new routes.

He stated that the Government had supported Panagra through subsidies as an "independent entity" over the years, and that as such it was entitled to operate entirely independent of Pan American and to achieve its ultimate destiny of operating an airline between Buenos Aires and New York.

He stated Grace & Co. was unhappy with the interchange agreement which contemplated its aircraft being turned over to Pan American at the Canal Zone. He pointed out that some of his friends had complained about the kind of breakfast that Pan American had placed aboard the ship at the Zone stating this adversely affected Panagra although Panagra was not responsible.

I briefly referred to the fact that Pan American also was unhappy; that we had entered a partnership with Grace in [fol. 1277] good faith in 1928 under certain definite provisions contemplating the West Coast extension would operate under our management and as an extension and integral part of the Pan American system. This relationship has been amended with respect to management in an effort to appease Grace in 1939, and further amended in 1946, all in an effort to bring about peace and harmony between the two stockholders. Mr. Grace stated that the 1946 agreement was simply a reaffirmation of the 1939 agreement—no new changes in control were provided for. He went on to say that the situation continued unchanged until the meetings in January between Mr. Shea and himself and Mr. Friendly and myself when he and Mr. Shea refused to acquiesce in our suggestion that an interchange agreement

be made with Eastern. He readily admitted that he and Mr. Shea had made a grave mistake at that time and were now publicly admitting it before the Board. It was for that reason he said that he had taken his pride in his hands and asked for the meeting today.

Mr. Grace stated were we to withdraw our petition before the CAB, the situation would revert to that which obtained a year ago when Mr. Shea and he had refused to join us in having Panagra conclude an interchange agreement with Eastern. Were we to withdraw our petition to oust them from the management, he felt there could be harmony between the two stockholders—there being no other present differences between us that he knew of.

He reaffirmed, however, that under no conditions would Grace willingly relinquish its management of Panagra. He said he considered Grace was turning in a fine management job and he questioned whether this would be the case under Pan American management because of the, as he saw it, serious conflict of interests and competitive nature of the two operations in Latin America.

He reaffirmed his view that the Government had invested much money in subsidizing Panagra, and that the company was therefore entitled to operate as an independent enterprise. His ultimate objective, he stated was to have Panagra operate in its own name between New York and Buenos Aires, and he knew this never would be achieved under Pan American management.

He stated Pan American had done a magnificent job—the best in the industry. He said its management was considered "absolute tops" and he paid me the compliment of saying that he thought I was one of the best executives in the country.

He stated if we went ahead with the petition to oust Grace from the Panagra management, all his directors knew they [fol. 1278] were in for the toughest sort of fight, and that there was a real chance they would ultimately be ousted—but in the fracas he stated he was confident Pan American also would be hurt.

Mr. Grace stated he was leaving for California the end of next week, and he would hope that by Wednesday, January 23, I would let him know whether (a) Pan American would agree to withdraw its petition before the CAB, and (b) Whether, in that event, we would agree to elect Mr. Howard Clark as President of Panagra. I indicated I would let him know our decision at that time or before after conferring with my associates.

[fol. 1284]

Preliminary Statement With Respect to Certain Statistical Sources Used

INS statistics

The Immigration and Naturalization Service of the U.S. Department of Justice has for many years compiled statistics on passenger travel by air and by sea from manifests or lists of passengers entering or leaving the United States. These statistics, referred to herein as "INS statistics," include both revenue and non-revenue passengers traveling on commercial (either scheduled or non-scheduled) and private vessels or planes, but exclude crew personnel, U.S. military personnel on military craft, and sea cruise traffic.

The passengers are recorded by the INS according to the foreign country at which they disembarked from the craft that carried them out of the U.S., or the foreign country at which they embarked on the craft that brought them into the U.S.[1] Thus, the U.S.-South American traffic presented herein from this statistical source includes only those passengers who sailed or flew all the way to South America (or from South America) on the same vessel or plane on which they left the U.S. (or arrived in the U.S.). Passengers traveling between the U.S. and South America who changed vessels or planes at some Central American or Caribbean Island point are not covered by these statistics.

[fol. 1285] The point of departure from the U.S. (or point of arrival in the U.S.) is recorded by the INS according to the place at which the passenger boarded (or disembarked from) the same vessel or plane that sailed or flew him out of the U.S. (or into the U.S.). No information is tabulated by the INS on the origin or destination of the complete journey of the travelers, nor on the names of the operators of the ships or planes involved, but a breakdown is provided which shows the number of passengers who used U.S. flag and foreign flag carriers.

---

[1] No data are tabulated for individual ports within a foreign country.

O-D Survey of CAB

The Civil Aeronautics Board compiles statistics on passengers traveling by air outside the United States in two months of each year—March and September—which are presented in the International Section of a report entitled *Origin-Destination Airline Revenue Passenger Survey*, referred to herein as the "O-D Survey." These statistics are compiled on the basis of tickets lifted from revenue passengers in the two months on scheduled flights in which a certificated U.S. flag air carrier participated. This survey does not cover any non-revenue passengers and any passengers on non-scheduled flights or on private craft (these types of passengers are included in the INS statistics). The O-D Survey data presented herein were derived from a special machine tabulation prepared by the CAB from the same punch cards that were used in preparing the International Section of the report referred to above.

[fol. 1286] The O-D Survey provides the points of origin and destination of the complete air journeys of the passengers (as indicated by their tickets), and the names of the U.S. flag air carriers (including also connections with U.S. domestic air carriers and foreign flag air carriers, if any) who participated on such journeys. Passengers originating air journeys in the U.S. and completing such journeys in South America (or completing journeys in the U.S. which originated in South America) are included in the U.S. South American air traffic figures for U.S. flag carriers in the exhibits herein which were compiled from the O-D Survey. It is to be noted that these data include passengers who changed planes at Central American or Caribbean Island points (such passengers are missed by the INS statistics, as noted above).

It should also be observed that the O-D Survey figures reflect more precisely than the INS statistics the sections of the United States from (or to) which the U.S.-South American traffic is generated (or destined), and the South American countries of final destination (or origin) of such traffic. In addition, the O-D Survey provides information (not available from the INS) which makes it possible to determine how many of the U.S.-South American air pas-

sengers were carried on their journeys with Pan American or Panagra participation, as indicated herein in the exhibits which present data for U.S. flag carriers from that Survey. (Note: No data are presented for 1951 since the O-D Survey was not published for either March or September of that year.)

[fol. 1287] Maritime Administration Records

The Maritime Administration maintains machine tabulation records which include data on the number of passengers and tons of dry cargo carried each year by all U.S. flag and foreign flag vessels on designated sea trade routes connecting certain coastal areas of the United States with specified foreign coastal areas. These records were prepared on the basis of reports filed for individual voyages on Forms MA-7801 and 7802 by the ship operators of dry cargo vessels that entered or cleared United States ports during the year. Statistics compiled from these records are presented herein for liner service operations on three trade routes—two of which are served by the Grace Line and one by a Grace affiliate (Gulf and South American Steamship Co.)—which link the principal U.S. coastal areas with the West Coast of South America. Data for the Grace Line and its affiliate were secured largely from these machine tabulation records, but in certain instances when sufficiently detailed information was not shown (such as data for separate ports) a special hand tabulation was made from information appearing on the forms filed with the Maritime Administration by the Grace Line for individual voyages.

The classification of vessels in liner service is that used by the Maritime Administration. The Grace Line and its affiliate (Gulf and South American Steamship Co.) are liner service operators, which means they are common carriers that conduct scheduled berth-service operations. Liner service does not include industrial service operations (sailings in connection with the industrial operation of a specific firm), tramp vessels, and other types of irregular or unscheduled sailings.

Civil Action No. 99-259

UNITED STATES OF AMERICA, Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC., Defendants.

TESTIMONY OF MR. TRIPPE IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Division of Territory

pp. 1521-22:

By Mr. Friendly:

Q. Is the letter which has been marked P-149, Mr. Trippe, a copy of a letter which you received from Mr. Hoit on or about the 18th of August, 1928?

A. It is.

Q. What did you do after you received Mr Hoit's letter?

A. I told Mr. Hoit that he had misunderstood my memorandum and that my understanding of the arrangement, as well as Colonel Hamilton's; who worked with me on the memorandum, was that the proposed joint company would operate only along the west coast of South America, and Pan American would operate in the interior of Colombia.

p. 1526:

Q. In conducting the affairs of Pan American, have you proceeded on the basis that the letter of August 31, 1928, has imposed on Pan American an obligation not to operate down the west coast of South America?

* * * * * * *

[fol. 1389] A. The answer is: we have.

p. 1544:

Q. After Pan American had acquired stock control of Scadta, did Dr. von Bauer withdraw the company from international operations?

A. He did, after a very short time. There may have been a few special flights later on, but no regular international service such as Dr. von Bauer was operating when we made our arrangement with him.

Q. Those international services which he was operating when you made your arrangements with him included services down the west coast?

A. They did, to Ecuador, and an operating concession in Peru was pending at the time.

pp. 1562-67:

A. After the advertisement on the West Coast Route was issued, we again discussed the matter with the Grace directors and Pan American agreed with them that the joint company should put in a bid which would contemplate possible subsequent operation by it from Santiago to Buenos Aires and Montevideo outside the territory of the joint company as originally agreed to.

By Mr. Friendly:

Q. The Grace directors at that time were Mr. Patchin and Mr. Cogswell; is that correct?

A. That is correct.

Q. I note also that the advertisement is for a route from the Canal Zone to Santiago rather than to Valparaiso. Did you consider that this change required any formal amendment of your agreement with W. R. Grace & Company?

. . . . . .

A. Certainly not. Our agreement had fixed the general territory to be covered by the Joint Company, and it never occurred to us that changing the terminus from Valparaiso to Santiago or for that matter anywhere else in Chile required an exchange of correspondence.

. . . . . .

[fol. 1390] Q. Did Pan American assist in obtaining the rights for Pan American-Grace to operate in the Argentine?

A. Yes. At the time when the advertisement was issued, Pan American already had an official in the Argentine negotiating for a concession for Pan American Airways. We arranged to have this issued in the name of Pan American-Grace Airways, but it included a right on the part of Pan American Airways also to carry the Argentine mail. As a matter of fact, our representative succeeded in getting the concession only on the very day when Pan American-Grace was to inaugurate the mail service from Santiago to Buenos Aires.

Q. Did any issue subsequently arise as to changes in the respective spheres of operation of Pan American of Pan American-Grace in the Argentine?

A. Yes, it did.

Q. When? A. In the fall of 1930.

Q. Will you tell us under what circumstances?

A. In the fall of 1930 Pan American had taken over a company known as Nyrba. A subsidiary of Nyrba known as Tri-motor Safety Airways had inaugurated service between Montevideo, Buenos Aires, and Santiago in August, 1929, and between Buenos Aires and Bolivia through the northern part of the Argentine later in that year. Our acquisition of Nyrba raised the question of the respective scope of our operations again and of Pan American-Grace's operation in the Argentine. We discussed this matter with the Grace people and we agreed that since the scope of operations of Pan American-Grace had been extended to include the Santiago-Mendoza-Buenos Aires route by mutual assent at the time when the advertisement for the mail contract was issued, Pan American was excluded from operations on the route, but was free to operate anywhere else in the Argentine, and that Pan American-Grace's operations were restricted to the route indicated.

[fol. 1391] Q. Did any incidents arise at about this time as to the respective scope of operations of the two companies in the Argentine?

A. Yes. Pan American had previously formed a national subsidiary in the Argentine for operations in that country known as Alas. Through a misunderstanding, our repre-

sentative in Argentina in September, 1930, when we were taking over Nyrba had Alas make certain flights between Mendoza, Argentine, and Santiago to Chile to carry out the commitments of the Tri-motor Safety Airways to the Argentine and Chilean Governments against which substantial bonds were on deposit. This operation was brought to my attention by Pan American-Grace. At Mr. Cogswell's request I immediately sent a cablegram to our office in Buenos Aires instructing them to discontinue this operation, by Alas, between Mendoza, Argentine, and Santiago, Chile.

. . . . . .

Q. When did the question of operations in the Argentine by the two companies come up again?

A. It came up again in the spring of 1931 in connection with the extension of Pan American's east coast route to Buenos Aires.

Q. What questions came up at that time?

A. There were two questions. One was the question of the availability of postal appropriations for the two routes, and the second was that the Grace directors wanted to have it perfectly clear that although we were, of course, free to extend our route to Buenos Aires, Pan American was not at liberty, under the agreement between the two companies, to compete with the jointly owned company between Buenos Aires and Santiago via Mendoza.

Q. By the way, Mr. Roig had jointe Mr. Patchin and Mr. Cogswell on the Pan American-Grace Board at this time, had he not?

A. That is my recollection.

Q. What position did Pan American take?

[fol. 1392] A. We took the position that, of course, we were free to operate down the east coast to Buenos Aires or anywhere else in the Argentine except that under the supplementary understanding between the two companies, had the sole right to operate between Santiago and Buenos Aires and Montevideo via Mendoza, and also that it was to operate on that route only.

Q. What was Pan American's reason for taking this position?

A. The reason for this was that Argentina was not a west coast country and that the only modification of the original agreement had been to permit Pan American-Grace to operate the route called for in the Post Office extension between Santiago and Buenos Aires and Montevideo when ordered by the Post Office Department.

pp. 1601-02:

Q. Were any proposals made about 1936 that Scadta should extend its operations into Ecuador and Venezuela?

A. Yes. About that time Pan American was informed that officials of the Colombian Government were interested in having Scadta extend service to the two neighboring countries.

Q. What was Pan American's position in regard to this?

A. We told Dr. von Bauer that such an operation was contrary to our agreement with him in 1929 and also that if Scadta were to operate a service to Ecuador, it would place us in the position of violating our agreement with Grace & Company.

pp. 1604-05:

Q. What position did Pan American take with the representatives of W. R. Grace & Company in regard to this? Before answering that question, I would like to have you define who were the representatives of Pan American and of W. R. Grace & Company who were in these discussions in 1937.

A. Mr. Rihl, the vice president of Pan American, and myself, and on occasion Mr. Young, and Mr. Roig, and Mr. Garni were representing Grace & Company.

[fol. 1393] Q. Now, will you go on and state what position Pan American took in these discussions with regard to the possible extension of Scadta's operations to Quito?

A. We said to them, among other things, that we felt that for a Colombian company of which we had stock control to operate internationally from Colombia to Ecuador would be a breach of our 1928 agreement with Grace, which we would not commit, that if no other solution could be worked out, we would dispose of our controlling interest in Scadta

but that we wished them to consider whether in lieu of this it would not be better for Pan American-Grace to become an equal owner in Scadta with Pan American.

Q. Did the Grace representatives take the position that if Pan American, as owner of a majority of the stock of Scadta, permitted that company to extend its lines into Ecuador, that would constitute a breach of the agreement between Grace and Pan American?

A. They did and we agreed with them.

p. 1613:

Q. Did Medellin come into the discussions that took place in 1937?

A. Yes, in a certain way.

Q. Would you please state how?

A. The Grace directors were interested in being able to utilize Medellin as a refueling stop.

Q. Was there any discussion of Pan American-Grace stopping at Medellin as a regular port of call for taking on and discharging traffic?

A. I think it was mentioned by the Grace directors, but we took the position that Medellin was not within Pan American-Grace's territory and I understood that they agreed.

pp. 1618-19:

Q. I note that Mr. Whitney's letter of November 19, 1938, which is Exhibit P-165, concludes by suggesting further conferences. Do you know whether such conferences were held?

A. Yes, including committees of directors of the respective companies designated for the purpose.

[fol. 1394] Q. During these discussions did Grace again urge that Pan American-Grace apply for an extension for service north of the Canal?

A. They did.

Q. And did the Pan American representatives report this to the Pan American Board of Directors?

A. They did.

Q. Would you please refer to Exhibit P-37, and more particularly to page 42, and still more particularly to the minute of the Board of Directors held on December—of the meeting of the Board of Directors held on December 28, 1938, at which this matter is discussed. Were the directors unanimous in taking the position which is set forth in those minutes?

A. They were.

Q. Has there ever been any dissent in the Pan American Board on the question of the extension of Pan American-Grace north of the Canal?

A. No. There never has been a single dissenting vote or votes.

pp. 1623-25:

Q. When did Grace next bring up the proposal that Pan American-Grace extend to the United States?

A. In the fall of 1940.

Q. What reason did they give for bringing up the matter at that time?

A. The reason given was the application which had been filed by American Export Airlines for a certificate between New Orleans and the Canal Zone. They said they were afraid that American Export would get this route as against Pan American, and would then find that the New Orleans-Canal Zone route did not offer sufficient traffic in and of itself, and would probably seek to extend its lines down the west coast in competition with Pan American-Grace.

. . . . . .

Q. What happened when the proposal was made?

A. We told the Grace people that we could see no reason for departing from our agreement of 1939 and that we [fol. 1395] were not impressed by the reasons which they had advanced.

Q. Was the proposal dropped?

A. We heard nothing further about it for some months.

Q. When did Grace again bring up this matter of extending Pan American-Grace north from the Canal?

A. They brought it up again in the spring of 1941.

Q. What reason did they give for bringing it up again at that time?

A. It was again the New Orleans issue, which was now about to be heard.

Q. Were there further discussions of the matter during the spring of 1941?

A. Yes, there were, largely with Mr. Rihl.

Q. Was there any change in Pan American's position?

A. No. Not at all.

pp. 1701-03:

Q. Some reference has been made to the question of Pan American's use of the phrase "dedication of capital" with respect to the present controversy. Is it a fact that this contention was first advanced in the answer that was filed by Pan American in this proceeding under date of October 26, 1942?

A. So far as I can recall, this was the first time that those precise words were used, but it certainly was not the first time that the contention was advanced. It has been advanced repeatedly in connection with a number of different matters relating to the scope of Pan American-Grace's operations. The letter of April 8, 1931, which appears on page 35 of Exhibit P-37, contains the following: "The arrangement between Aviation Corporation of the Americas and W. R. Grace & Company as a result of which your company was formed, contemplated that the sphere of operations of your company should be confined to the west coast of South America."

. . . . . .

[fol. 1396] Q. Will you proceed, Mr. Trippe?

A. In the discussions in 1937 in regard to Medellin the same point was emphasized by Pan American. The same position was taken by Pan American in the fall of 1938 when Grace, for the first time, seriously pressed this matter of the extension north of the Canal, and that position has since been constantly adhered to. Mr. Rihl's letter of June 19, 1941, to Mr. Roig, which appears on page 28 of Exhibit P-35, uses the phrase.

pp. 1714-18:

Q. Do you recall the various proposals that were made in regard to Pan American-Grace's operations into Bolivia?

A. Yes. The question of operating through Bolivia was discussed in the very early days when there was difficulty in making arrangements in Chile.

Although Bolivia was not on the route mentioned in the letter of August 31, 1928, it had been mentioned along with the Argentine in my original memorandum, and we agreed that the company's territory might be broadened to include Bolivia, which we considered to be definitely a west coast country, although not actually on the sea coast.

What was under discussion at this time was not a shuttle service but diverting the whole route to Buenos Aires through Bolivia if the Chilean situation could not be handled.

We rather favored this idea and had Mr. Rihl go to Bolivia to explore the situation.

However, the Chilean matter was subsequently worked out and the Bolivian proposal was dropped.

I have no recollection that the question of operating into Bolivia was raised by Pan American-Grace again for some time.

Q. Do you recall being told, around 1934, that an opportunity had presented itself for Pan American-Grace to establish a shuttle service from Tacna to LaPaz?

A. I recall the incident, although not the precise dates.

Q. What was Pan American's position?

[fol. 1397] A. We had some doubt about it, simply on the business side.

LaPaz was a high altitude airport, something over 13,000 feet, and with existing equipment only a small pay load could be available, particularly on westbound flights. Pan American was not sold on the operation as a business proposition with the equipment then available, and without United States mail pay.

Q. Did Pan American later agree to the inauguration of the Tacna-LaPaz service?

A. Yes, we subsequently did, suggesting amendments to the proposed franchise that were included.

Q. Did the question of an extension from Bolivia to the terminal at Buenos Aires subsequently arise?

A. Yes, some two or three years later.

Q. What attitude did Pan American take on this?

A. Pan American was quite agreeable to the operation of the Diagonal.

However, this matter was somewhat involved with the question which has previously arisen with respect to the inclusion of Cordoba on the Pan American-Grace operations in the Argentine.

Q. Would you tell us what that question was?

A. Sometime, I think, around 1936 a proposal was made that certain of the trips then being flown between Santiago and Buenos Aires should deviate to the north so as to serve Cordoba.

We had no objection to Pan American-Grace's serving Cordoba but since this was an alteration of the original agreement with respect to the respective spheres of operation of the two companies in the Argentine, we felt it was only fair that Pan American should be compensated for Nyrba's development work in this area, which we had taken over on our books when we acquired the assets of that company.

The route between Buenos Aires, Cordoba, and Salta, was one which Pan American had expected at some future time [fol. 1398] to operate itself, it being in Pan American's and not in Pan American-Grace's territory.

Q. Did you discuss this matter with representatives of Grace?

A. Yes, we did, and they agreed that if it was found desirable for Pan American-Grace to extend its operations to the Argentine north of Cordoba, payment should be made to Pan American, and the Cordoba stop was instituted on that understanding.

The operation of the Diagonal involved other stops in the northern part of Argentina. This brought up the question of the payment which Pan American-Grace should make.

We discussed the matter with the Grace directors and it was agreed that the amount of payment should be arbitrated by an individual to be mutually agreed upon.

Q. Who were the Grace directors who were active in this matter?

A. Mr. Roig and Mr. Patchin, Mr. Cogswell, and I believe Mr. Garni, although I am not sure whether Mr. Garni was on the Board at that time.

• • • • • • •

Q. What attitude did Pan American take with respect to the extension of the services of Pan American-Grace in Ecuador in 1940 and in Bolivia in 1941?

A. Both these matters related to the hemisphere defense program.

We told Mr. Roig, who by this time had become president of the company, that we wished our jointly owned company to cooperate one hundred percent in this program.

Q. Was there any question that these extensions were in Pan American-Grace's territory?

A. No. They were in Ecuador and Bolivia. The operation across the border into Brazil at Corumba was approved by Pan American because Corumba was the border airport.

pp. 1740-42:

Q. I think we have now reached a point where it is appropriate for me to ask you the question which was suggested be deferred yesterday:

[fol. 1399] To summarize the reasons why Pan American has refused to consent to Grace's request that Pan American-Grace be authorized to apply for an extension of its route north from the Canal.

A. Pan American Airways, as early as 1927, had taken steps to organize an airline from the United States to the Canal Zone, and from the Canal Zone down the West Coast of South America.

A United States airmail contract between the United States and the Canal Zone was awarded the company in July 1928.

Prior to that time the active steps which I have mentioned have been undertaken by Pan American to provide service along the west coast.

This was all sometime before there was any arrangement for any possible participation by Grace and Company.

When Grace and Company finally did come into the picture it was only to take a $25,000 participation in a small company which we were to operate in Peru, with an option

to buy a half interest in our west coast airline if they decided to do so at a later date.

It was understood that, in the event Grace should decide to exercise their option, our through airline down the west coast was to be under our management, and there was also a definite understanding outlining the territory to be served by the jointly owned company in relation to other parts of Latin America which were either already served or for which plans were under way on the part of Pan American.

* * * * * * *

Grace's suggestion that this west coast line of the Pan American system in which they are given the opportunity to acquire 50 percent of the stock be now made a competitor to Pan American Airways is, in our view, a breach of the agreement between the two companies, which was first made in 1928, and which was reaffirmed in 1929.

If this company, in which Grace has had an option to purchase up to 50 per cent were to be extended to Miami the company originally created to serve as our end-on connection for our Miami-Canal Zone service would be-[fol. 1400] come the means of destroying that service, at least so far as through traffic to the West Coast of South America is concerned, and thereafter Pan American-Grace Airways would not be part of the Pan American Airways system as it was set up to be; and which it has been all these years, but would be an airline competing with Pan American.

By Mr. Cahill:

pp. 2036-37:

Q. Now, Mr. Trippe, referring to your testimony at page 1610.

A. I have 1610.

Q. Particularly to the testimony at the top of the page—in fact, I am going to query you about the whole page before we are through, but let me put to you the first question: did you mean to state that at the time when the proposal to serve Cali by an overland route was under

discussion in the latter part of 1937 or the early part of 1938, that you never raised the question of how that service would affect your subsidiary Scadta?

A. Did I raise the question?

Q. No. Did you mean to state that you never did raise the question at that time of how that would affect your subsidiary Scadta?

A. Yes, I think I referred to that in my talk in London with Mr. Roig, that has been referred to.

Q. Do you recall making objections to the institution of the service because it would adversely affect Scadta?

A. No. I believe I referred to the fact, that we might have some problem with Scadta which I had hoped to get straightened out before we actually changed the route.

Q. Is it or is it not the fact that as a condition to permitting Panagra to institute the overland service to Cali, you asked them to agree not to serve Medellin or Turbo?

A. I know there was a general discussion of Medellin and Turbo.

Q. Did you ask Panagra to agree to that?

[fol. 1401] Mr. Friendly: Let the witness finish his answer?

A. I think we did on the basis that Medellin and Turbo were not in the territory to be served by Pan American-Grace as fixed by the agreement between its two owners.

Q. Now, will you just answer my question directly, not how it was done or why it was done, but was it done?

A. Yes, it was done.

pp. 2039-44:

Q. Do you recall still further that at the time you stated that if the Colombian government or the United States Postoffice required Panagra to call at Turbo or Medellin that in such event Panagra should withdraw?

A. Not at that meeting, no, but I recall that conversation came up at meetings outside this meeting at about that time.

Q. In which you so stated?

A. Conferences between Mr. Rihl and Mr. Garni and Mr. Roig and myself.

Q. Conferences in which you so stated?

A. In which I stated what?

Q. That if the Colombian Government or the United States Postoffice required Panagra to call at Turbo or Medellin that in such event Panagra should withdraw from the overland route?

A. No, I don't recall that statement. I recall the question coming up on the basis of whether the Colombian Government or the public at Medellin, directly or through —I think I used the word "synthetic"—pressure, urged that a refueling stop be turned into a regular traffic stop then, and in that event the route either ought to be shifted back to the company's own territory or provision made that would otherwise make it unattractive for Pan American-Grace to conduct commercial service in what we considered was Pan American's territory.

[fol. 1402] Q. Do you recall, still further, that later in the discussion you modified the suggestion to suggest that, in such a case, if Panagra were compelled to carry Medellin or Turbo traffic, it should pay 75 percent of the gross revenue to UMCA and Scadta?

A. I don't recall whom Pan American-Grace was to pay to, no, but I do recall that such a suggestion was made to show that there would not be any of this pressure which I have mentioned before. I might add there, to make the record clear—

Q. Just a moment please.

A. I don't think the record is clear unless I—

Examiner Brown: Go ahead.

A. That all four persons were in agreement that Pan American-Grace shouldn't carry traffic from those points because it was not in their territory, and we were seeking ways and means to take care of an eventuality that no four of us desired to happen—no one of the four desired to happen.

* * * * * * *

Q. You testified on Page 1613 that the question of stopping at Medellin was mentioned by the Grace directors, but Pan American took the position that Medellin was not

within Panagra's territory, and—I quote—"I understand that they agreed".

Will you tell us: What is the basis of your understanding on that matter?

A. My recollection of the discussions.

Q. With whom and where were they held and when?

A. One was held at Mr. Rihl's apartment at dinner, at which the four of us were present—the four directors that I have mentioned.

Q. That is?

A. Mr. Rihl, Mr. Garni, Mr. Roig, and myself. Another discussion, I think, a day or so later, we had breakfast together, if my recollection doesn't fail me, at the University Club in New York, when the matter came up.

[fol. 1403] Q. Anything else?

A. There may have been another meeting at some other place here.

Q. The same people?

A. I do recollect those two.

Q. The same people?

A. I think there were others, but I am not sure.

Q. That is the basis of this understanding you testified to?

A. Yes.

Q. Now, I put you the question: Did you ever hear any of the Grace directors state that Medellin was not within what you have chosen to call "Panagra's territory"?

A. Oh, yes.

Q. Who?

A. Well, I think Mr. Roig and Mr. Garni were both there with Mr. Rihl and myself.

Q. Which of them did you hear make that statement?

A. Well, I would say that both of them agreed that Medellin was not within the territory to be served by—

Q. (interposing) I am not asking you whether both of them agreed; I am asking you whether you heard one or both of them state that Medellin was not within what you have chosen to call "Panagra's territory" at any of these meetings that you have just described: that is my question, Mr. Trippe.

A. Yes. That would be my recollection of the general discussion at those meetings, that there was—

Q. (interposing) I am not interested in the general discussion.

Is it your recollection of what the Grace directors said?

A. I don't recall the exact words they said, naturally.

Q. What I want to know is whether it was the substance of what they said, or either of them.

A. That would be correct as to the substance of the meeting—of the discussions at the meeting.

[fol. 1404] Q. Of what one of them said or both of them said, Mr. Trippe?

A. Well, they were both there. I wouldn't recall whether it was one of them or both of them.

Q. Are you any more clear that it was said than you are as to who said it?

A. Yes, definitely. That was the impression I got, and I know Mr. Rihl got it.

Q. I am not interested in your impressions. I am asking you—

A. (interposing) That is the recollection that I got.

Q. Now, I press the question: Which of them said it, Mr. Trippe?

A. I think I have already answered that I don't recall which of them, or whether it was both of them. It was my recollection that at the meeting there was no question but what Medellin was being discussed as a refueling point and not a point to carry traffic.

p. 2102:

Q. I would like to direct your attention to another special meeting of the Panagra Board called for November 5 to consider the proposal that Panagra extend its route to the United States—November 5, 1941, again.

* * * * * * *

Q. Now, again, none of the Pan American directors attended this meeting. Was this pursuant still to the directions of the Pan American Board that they fail to attend?

A. If this was a meeting called to vote through an extension, which we considered contrary to our agreement, yes. If not, I don't know why they failed to attend.

By Mr. Harlan:

pp. 2130-31:

Q. Well, from what you say now, I can understand why you wouldn't want to sell out to Dr. von Bauer, but I don't see why it would be necessarily desirable, from that fact, that the control of Scadta eventually be placed in a group [fol. 1405] of native Colombians. Why did you consider it desirable to divest Pan American of control of Scadta and put that control in the hands of natives?

A. Well, as you will note by reference to the previous part of the exhibit, there was a possible conflict as between Scadta and Pan American-Grace Airways developing by virtue of the fact that the Colombian Government had indicated that they would like to see the Scadta Company operate both to Venezuela and to Ecuador, and we considered that if the Scadta Company did, in fact, operate to Ecuador, it would place us, for reasons beyond our control, in a position where we would be breaking our agreement with Grace & Company, and we felt that to remove that situation, it would be wise to transfer the ownership either to Pan American-Grace or, if possible, a group of native Colombians, but even in the latter event, there was no assurance, of course, that the stock wouldn't again come back into the hands of Dr. von Bauer.

pp. 2138-39:

Q. Mr. Trippe, on page 41 of Exhibit P-37, under date of April 21, 1937, reference is made to an "intercompany transfer of position on Buenos Aires-Salta route." Can you explain just what is meant by that reference?

A. Yes. It is my understanding that that referred to the transfer by Pan American to Pan American-Grace of the route to Salta in the Argentine with the exception of Santiago, the Mendoza via Montevideo route having been considered as Pan American territory, and this agreement provided for the transfer of the rights on that route as between the two companies, to Pan American-Grace Airways, and there was an arrangement with respect to fixing of a sum of money by arbitration representing certain

development costs that Pan American had on its books arising out of the purchase of the assets of Nyrba and Nyrba's development costs which had operated that route prior to the acquisition of that company by Pan American Airways.

[fol. 1406] Q. Were all of those terms included in the agreement that is referred to here as being ratified?

A. I don't think there was any formal agreement. It was just an understanding between the parties that Pan American-Grace would operate that route by agreement, and that the question of Pan American-Grace reimbursing Pan American for some of these expenses which I have referred to would be settled by arbitration.

Q. That was just an oral understanding, then?

A. That was an oral understanding, as I recall it.

By Mr. Reynolds:

p. 2187:

Q. Mr. Trippe, if your proposal at the time of the Cali issue originally was for the operation of a shuttle service or local service, how does it happen that the territorial arrangement with Scadta or the possible competition with Scadta ever was mentioned in your London conversations with Mr. Roig? I am not quite clear on that.

A. Well, I wasn't clear over there at that time, either, as to whether Dr. von Bauer or the Scadta directors who—with one exception, Colombians—felt that Cali was a west coast city. We felt so after a certain amount of salesmanship by Mr. Roig and his associates, and we felt that Cali was a west coast point within the purview of our agreement. We wanted to be sure that the Scadta people would also agree with that point of view in which they did, and I think agreed in '37 to interpose no objection and, in fact, I think to assist if they were called upon, for Pan American-Grace to serve Cali in lieu of Buenaventura, which was the point specified in the Government treaty, the Kellogg-Olaya Treaty.

pp. 2200-02:

Q. Now, Mr. Trippe, referring to your previous conversations with Mr. Roig in London in regard to this proposed operation to Cali, and ignoring the suggestions you made about equipment and traffic considerations, just for the purpose of summarizing, is it correct to say that you took [fol. 1407] the position, in your discussions with Mr. Roig and thereafter, that Panagra should not operate through Cali because your original agreement with Dr. von Bauer and the Colombian Government, and the purchase of Scadta stock, making possible treaties under which Panagra was enabled to bid on its route and operate in Colombia, imposed the obligation not to operate in the interior of Colombia?

A. Well, your question has to do whether that summarizes the discussion in London.

Q. Yes, except for the equipment and traffic features of it.

A. Well, I don't recall—

• • • • • • •

Mr. Reynolds: I would just as soon refer it to the specific discussions in the fall of '36, but I thought perhaps the question might be easier to answer and the summary more accurate if we did consider the following discussions, too.

• • • • • • •

The Witness: May I have the question read again, please?

(The question was read by the reporter.)

A. Well, I wouldn't think that was a proper summary, no.

By Mr. Reynolds:

Q. Well, what is wrong with it?

A. Well, first of all, I wasn't sure how Dr. von Bauer would feel about whether Cali was considered a west coast port or not. Second, one other problem we had with Dr. von Bauer was the pressure he was under to operate to Venezuela and Ecuador, and I was concerned at the meeting in London whether we shouldn't just get into a more or less unfortunate mess that would work to the disadvantage of Pan American-Grace and Pan American and Scadta, because of inability to discuss the problem with Dr. von

Bauer. I felt we could readily secure his support or at least his agreement not to oppose the Cali stop if an opportunity was had to discuss it with him.

[fol. 1408] Q. You didn't take a definite position that these entire arrangements actually did impose an obligation upon Panagra to keep out of the interior of Colombia?

A. Which obligations were those?

Q. The obligations arising out of your original agreement with von Bauer and the treaties and so on.

A. Oh, no. The arrangements I referred to were the agreements between Pan American and Grace & Company whereby Pan American-Grace would not operate in the interior of Colombia.

Q. What agreement was that?

A. That was the agreement entered into between the parties prior to the letter of August 31, 1928.

Q. That dates back to the organization?

A. Oh, yes, definitely. That had nothing to do with the question of any agreement between Pan American-Grace and Scadta or Pan American and Scadta, other than Dr. von Bauer was to continue in the management of Scadta when we purchased the stock.

pp. 2206-07:

Q. Now, referring to P-37 again page 4, minute of the executive committee of Pan American Airways Corporation for May 13, 1931, first sentence, what, Mr. Trippe was the position taken by the Postmaster General relative to the proposed extension from Santos to Buenos Aires?

A. I think the Postmaster General was very anxious to have the extension made. At that time, both French and German lines were preempting that sector of South America and it would be my recollection that he was anxious to provide for the extension.

Q. And when the matter came up in the Panagra minutes of March 18, 1931, of course, you are familiar with the fact that there was a discussion there as to possible conflict of interests and then there subsequently was some exchange of correspondence. Your original letter on the subject, appearing on page 35 of this same exhibit, dated April [fol. 1409] 8, 1931, which is referred to in the minutes on

the previous page, now, I would like to ask, Mr. Trippe, if this letter on page 35 contained a summary of past understandings and agreements with respect to territories in which your respective companies were to operate, particularly the second paragraph: is that an accurate summary of past agreements?

A. Yes, with the exception that the Colombian arrangement was not included in this particular paragraph.

Q. And these agreements which are referred to are only the August 31, 1928, letter and other original arrangements, there is no other writing, is that it?

A. No other writing that I know, and the arrangements prior to the letter, of course, were worked out by Mr. Hoit, and I believe Mr. Iglehart and perhaps Mr. Patchin. That was referred to in Mr. Hoit's letter that I believe was in the exhibit.

pp. 2210-11:

Q. Now, Mr. Trippe, referring to the operations which ultimately resulted in the diagonal route of Panagra, I believe Mr. Roig gave us the impression that the stop at Cordoba, which diverted the Santiago-Buenos Aires route slightly, was the first point which is now on the diagonal to which Panagra operated. Is that your recollection?

A. Yes. My recollection would be that the route between Mendoza and Buenos Aires was shifted to the north so as to embrace Cordoba.

Q. At that time you opposed that Cordoba service, did you not?

A. I think we took the position that that was a part of Argentine which was Pan American Airways territory as compared to Pan American-Grace under the original agreement, and we through some appropriate reimbursement to Pan American should be made by Pan American-Grace, particularly with respect to the development charges that we had on our books, having purchased Nyrba—or as a result of having purchased Nyrba.

Q. Your position, then was that the Cordoba service not only was east coast or east of the Andes service, but also was former Nyrba territory?

[fol. 1410] A. Well, it was, east coast territory, and we

felt that any change to include Cordoba or other points in the Argentine should be by agreement with Pan American, and we thought that it would be only proper that if we were going to abandon that sector of Argentine that at least certain development costs relating to the acquisition of Nyrba having to do with that territory should be reimbursed.

pp. 2228-30:

Q. Mr. Trippe, I believe that the record indicates so far that under the original 1928 agreement and the discussions that led up to it, the contemplation was that territories would be divided in the terms of east coast and west coast with the exception of Panagra operation to Buenos Aires. That is generally correct, is it not?

A. I don't believe so.

. . . . . .

A. My understanding is that the territory reserved for the joint company was the west coast of South America including in so far as Colombia was concerned the west coast of Colombia and that the interior and north coast of Colombia were reserved for Pan American.

Q. And south of Colombia, the west coast of South America was reserved for the joint company of Panagra?

A. That is correct.

Q. With the exception of the operation across the Andes to Buenos Aires?

A. Which was agreed to at a later date.

Q. At a later date?

A. That is correct. When the mail contract came out.

Q. And at the same time all the operations south of Colombia on the east coast of South America was reserved for Pan American and its future plans?

A. Well, wouldn't you describe it as the north coast of Colombia, you see, Colombia being a west coast country with the exception that it has a north coast and the interior territory.

[fol. 1411] Q. And in addition to Colombia, all of the east coast of South America was set apart for Pan American?

A. That is right. The caribbean and elsewhere in Latin America.

Q. And you are satisfied that there were discussions and negotiations that came to a definite agreement on that proposition?

A. Definitely.

Q. Now, when you sent the cablegram regarding the ALAS operation which has been marked P-157, I note that you referred to the territorial division in terms of east and west of the Andes, and what I am interested in knowing, Mr. Trippe, is whether there was a subsequent agreement or subsequent conversations that put the territorial division on the basis of a line running along the Andes with the exception of Colombia, we will say.

A. No, there was not. May I read the telegram?

Q. Yes, please.

A. I believe that language relates to the specific discussion relating to Argentina and Chile. That would be my interpretation of the cable.

Q. You yourself chose that manner of description in the cablegram, but there had been no previous discussions in terms of east and west of the Andes even in Argentina, and Chile?

A. No. The original arrangement of '28, as I said, related to the west coast of South America with the exception of the Colombian territory.

pp. 2232-35:

Q. Mr. Trippe, when the operation to Cali was authorized in connection with which there again had to be discussions regarding the sphere of influence on operations in Colombia, isn't it a fact that your authorizing to Cali stop by Panagra also included with it the understanding with the Grace directors that Panagra would not operate to Medellin and would not operate in UMCA territory.

[fol. 1412] A. Well, that came up in this way, as I recall it: it was suggested that Cali was on the west coast, it being the city served by the Port of Buenaventura, and the question discussed was what other cities were in the category of west coast cities, and it is my recollection that the Grace directors, and I believe Mr. MacGregor also, who sat in on a number of the conferences, was in agreement that Medel-

lin and Turbo did not consist of west coast cities in terms of our agreement.

Q. There were Grace directors in those conferences?

A. Oh, yes.

Q. And at that time wasn't there some discussion also about Panagra's keeping out of the Caribbean area? Even though you took the position that the original agreement covered that anyway, there was also discussion about that at that time, was there not?

A. Yes, I think there was an attempt made to reaffirm the original agreement, but the main question came up as to whether Grace & Company, having participated in the organization of Pan American-Grace should not operate. I think that was where the argument turned. I don't recall that there was any argument about Pan American-Grace at the time, but there was a definite question about Grace & Company itself.

Q. That is, applying for its own route through a different company?

A. We took the position at the time that they were partners with us in this enterprise and wasn't it fair that they should agree not to operate, and they took the position: No, that it wasn't fair, that they were not in a position to bind their principals. This was Mr. Roig and I think Mr. Garni that the conversations were had with.

Q. Did they come to a solution of any kind?

A. No, we did not get anywhere. The discussions also related to Scadta. In other words, that Scadta would be brought into the arrangement in some definite way to provide for a sphere of operation for Scadta as determined between Scadta and Pan American Grace as well.

Q. And you did come to an understanding on that feature?

[fol. 1413] A. No, I don't believe so. There was no memorandum agreed to at all or executed. The Grace directors took the position that if Scadta extended to Quito, it would conflict with the Pan American agreement with Grace, and we agreed with them. We said that if that actually developed, that we felt that we would have to dispose of a majority of the stock and that led into a discussion again of Pan American-Grace buying a part of our ownership in

Scadta to avoid what we thought was a most unfortunate possible contingency if Scadta were forced to extend, and we, therefore, were forced to divest in consideration of the general position at that time.

Q. And you proceeded upon the assumption or understanding that your obligations toward each other, as between Pan American and Grace or Panagra, affected not only Pan American Airways or Pan American Airways Corporation, but also the subsidiaries over which you had control?

A. Over which we were able to effect control, and while we didn't have direct control for the reasons that I mentioned yesterday over Scadta, we did sit with the actual ownership of the majority stock and we felt that would not be proper in relation to our agreement with Grace if Scadta should extend to Quito, by pressure or otherwise.

Q. You have also proceeded upon that understanding that your original agreement bound your subsidiary companies, with respect to any other subsidiaries of South America, have you not?

A. That is correct.

Q. ALAS, Panair do Brasil?

A. That is all correct.

Q. Is that all correct as of the present time?

A. Yes, so far as I know.

Q. Now, Mr. Trippe, there has been a proposal fairly recently within Pan American, has there not, that Panair do Brasil extend its operations from Corumba to LaPaz?

A. Not that I know of, no.

[fol. 1414] Q. No one in your own Board or executive committee or your own personnel in Pan American was agitating for an extension of Panair do Brasil to LaPaz?

A. If they did, I don't know anything about it.

Q. If they did, you would oppose it, as being contrary to the general policy since Panagra already operates there?

A. Unless we got the assent of Grace & Company.

Q. And you would do that because in your view there is a definite agreement covering that type of situation?

A. Definitely.

By Mr. Friendly:

pp. 2619-23:

Q. Mr. Trippe, you testified on cross examination at pages 2036 and following to a series of meetings between Mr. Rihl, Mr. Garni, Mr. Roig, and yourself, at which there was discussion among other things as to whether Medellin and Turbo were in Pan American-Grace territory.

I ask you now to give us your best recollection as to the date when those conferences occurred.

A. Well, my recollection is that they occurred in the spring of 1937 and not in the winter of '37 and spring of '38. As you say, in reading over my testimony on page 2036, I misunderstood Mr. Cahill's question and I would like to clarify my reply.

. . . . . .

Q. Now, is it your testimony that it was your understanding at this series of meetings that Mr. Garni and Mr. Roig agreed that Medellin and Turbo were not within Pan American-Grace's territory?

Mr. Cahill: I object to the understanding. I think we should be told what they said.

Examiner Brown: What was the question?

(The question was read by the reporter.)

Q. Tell us what was said at those meetings on the subject, Mr. Trippe.

[fol. 1415] A. Yes. It was my recollection of those meetings that while Cali—was that while Cali was agreed to have been within Pan American-Grace's territory, as defined by the original agreement, that Medellin and Turbo were not, and it is my recollection that Mr. MacGregor also at that time—

Mr. Cahill: I object to this. I move to strike out what was already given as not being responsive to the direction of the Examiner. Give us the conversation.

Examiner Brown: Give us as close as you can what was said at the conference with respect to the matter.

The Witness: Well, of course, Mr. Examiner, I can't recall the exact conversation.

Examiner Brown: Certainly, we don't expect you to.

A. It is my recollection that Cali was agreed to as being a west coast city.

Examiner Brown: That is, by all of the parties to the conference?

The Witness: By all who were included in the conference.

A. (Continuing) And that Medellin and Turbo, it was agreed, were not west coast cities. We were discussing this question, of course, from the point of view of our original understanding.

By Mr. Friendly:

Q. Tell us to what extent Mr. MacGregor participated in any of these discussions or as to any expressions that he made on this subject at about this time.

A. It is my recollection that Mr. MacGregor did not sit in the two meetings that I referred to in my direct testimony, namely, the dinner at Mr. Rihl's house or the breakfast at the University Club which I believe occurred either next day or shortly thereafter, but, of course, Mr. MacGregor was familiar with the general conversation, and it is my recollection that he also indicated that he did not feel Medellin and Turbo were west coast countries, within the purview of our agreement.

Q. You said west coast countries.

[fol. 1416] A. West coast cities, I mean.

* * * * * * *

Q. All the testimony you have given this morning, just so the record may be clear, relates to discussions in the spring of 1937 at the time of the institution of service to Cali when the S-43 was under discussion: is that correct?

A. That is correct, and some months, perhaps six months before the question of the operation of the overland route was up for consideration.

Q. Now, I ask you to proceed to this time when the dis- discussions of the overland route did take place, which I take it—which I think are shown by the record to be late in 1937 and early in 1938, and ask you how Medellin and Turbo entered into those discussions.

A. Well, the question of Medellin and also Turbo figured in those discussions as a possible emergency stop or refueling stop. Pan American felt that in view of the fact that these were not west coast points that it was obviously improper, from the point of view of the agreement between the parties that Pan American-Grace at any later time, due to pressure by the people of Medellin, either direct or indirect, were to make these emergency or refueling stops into what might become traffic stops—traffic stops in Pan American territory. In view of the fact that these stops were not in Pan American-Grace territory, we felt it fair that some definite arrangement should be worked out so as to avoid the possibility that Pan American-Grace serve these cities at a later date. Perhaps without the wishes of the Grace directors, and for that reason the two alternate proposals were made by Pan American at the time, namely, that if Pan American-Grace were forced to accept traffic at Medellin in our territory that they should give up Medellin as a stop, and, failing in that, some percentage of the commercial traffic originated at Medellin be turned over to us.

Mr. Cahill: By "us" you mean Pan American?

The Witness: Well, I am not clear at the time whether it was Pan American or UMCA. Of course, we owned a substantial part of UMCA at the time. I am not clear [fol. 1417] whether it was Pan American or UMCA. That, I can't recall.

By Mr. Friendly:

Q. Now, you have referred to this original agreement as to Pan American-Grace's territory, and I would like to have you state just what Pan American's position is with respect to that agreement.

A. Well, our position is that the original territorial agreement was made in the fall of 1928.

* * * * * * *

A. (Continuing) At that time we made the arrangements whereby Grace was to have an option to participate in the airline from the Canal Zone down the west coast. Pan American's position is that this agreement has always re-

mained in effect, that it has been liberalized from time to time to the advantage of our joint company by consent of Pan American Airways and finally that it was reaffirmed under the 1939 agreement with respect to any possible future operation in the Caribbean by Pan American-Grace Airways.

By Mr. Reynolds:

pp. 2741-42:

Q. Mr. Trippe, these early discussions about which you have again referred concerning Divisions of territory or sphere of operations in Colombia, I believe you corrected some dates as to when discussions occurred in the earlier testimony and testified to the effect that it was decided that Cali was a west coast city and that Medellin and Turbo were not. How does it happen that Medellin and Turbo were even mentioned in these earlier discussions, Mr. Trippe? What was their connection at the time?

A. Well, we were discussing the question of what constituted a west coast city or a west coast port, and the matter of Bogota and other places came up too, as I recall. It was just one of those general discussions.

[fol. 1418] Q. The real issue was over whether Panagra would be entitled to operate into Cali, was it not?

A. That is right. Whether Cali was a west coast port.

Q. And you agreed among yourselves that it was?

A. Within the terms of the original agreement between the parties.

II

Pan American-Panagra Competition

By Mr. Friendly:

pp. 1738-39:

Q. If the Board were to order an extension of Pan American-Grace's certificate to include an operation between the Canal Zone and Miami, and this should be placed

in operation, what would be the effect upon Pan American's service between Miami and the Canal?

A. It would be disastrous. In normal times the greater portion of the traffic carried by us on direct flights on our route between Miami and the Canal Zone was traffic destined for or originating at points on the routes of Pan American-Grace.

* * * * * * * *

If Pan American-Grace's own operations were ever to be extended to the United States northbound business from the West Coast to points most conveniently reached through the Miami gateway would be almost wholly diverted from Pan American, since Pan American-Grace, as the originating carried would control this traffic through to the United States.

Southbound the situation would be almost as bad since Pan American-Grace would naturally give preference in making reservations to through passengers originating on its own lines in Miami, rather than hold space at the Canal for Pan American bookings, which would be contrary to its own interest.

In other words, Pan American's route from Miami would be almost completely cut off from participation in the business to and from the west coast of South America, and the west coast operation would not be part of the Pan [fol. 1419] American Airways system service as it was set up to be and still is today, but would become an integral part of a competitive air route.

By Mr. Reynolds:

pp. 2178-79:

Q. Mr. Trippe, is there any question in your mind but what Pan American Airways Inc. and Panagra are in a competitive position—limiting it only to position—in part at least due to the connecting service between such common points as Miami and Buenos Aires?

A. Yes. I would state that with a small part, however, of the Buenos Aires traffic that might be said to be the case.

Our traffic department have reported to me that most passengers who go to Buenos Aires have some definite reason to go by one coast or the other coast, and tourists usually go by one coast and come back by the other coast, so that we have felt, from the point of view of practical operations, that there was very little or a competitive nature with respect to that traffic to Buenos Aires proper, and moreover that was only a very small part of the total traffic originated by or destined to points on Pan American-Grace route.

Q. The position itself is competitive, but there may be other factors which enter into the question of competition; that is your answer; is that right?

A. That is correct.

. . . . . .

Q. What about the service from the United States, particularly from Miami, to Cali? Is there any doubt but what, from the standpoint of position alone, Pan American and another subsidiary are in a competitive position with Pan American-Grace for at least a portion of the revenue, Mr. Trippe?

A. Well, there may be also a minor degree of competition there, but we have felt it very small, and in fact haven't advertised the through connection to Cali by way of Scadta.

[fol. 1420] III

Grace Line-Panagra Competition

By Mr. Friendly:

pp. 1496-97:

Q. Will you state what this map represents and conclusions that you draw from it.

A. Well, the International Trunk Line routes of the Pan American System in Latin America, together with the Grace Steamship routes as they existed in 1940 are shown.

This map illustrates the competitive position of the Grace steamship services and the Pan American Airways System including Pan American-Grace Airways. It shows

that while Pan American-Grace complements the other operations of the Pan American Airways System as an end-on carrier to Pan American, both it and the extension across the Caribbean are directly competitive with the Grace Line, the traffic between the United States and the West Coast of South America.

p. 1499:

Q. In your opinion, Mr. Trippe, has there been a conflict of interest between the Grace Line and Pan American-Grace Airways and the other routes of the Pan American Airways System with respect to passenger business?

A. There has.

Q. Is it your opinion that that will recur after steamships are restored to the West Coast trade?

A. It will, and will become even more acute, in my opinion, when cargo movement by air becomes more important than it now is.

pp. 1588-89:

Q. Has your connecting service between Miami and the Canal Zone been affected by the service operated by Pan American-Grace south of the Canal?

A. Definitely, from the very beginning.

[fol. 1421] Q. Has that sector of Pan American-Grace's route immediately south of the Canal been what is called a bottleneck?

A. Yes, it has.

* * * * * * * *

Q. In your opinion did the conditions that existed on this sector adversely affect the through business of Pan American-Grace Airways as against its steamship competitors?

A. They certainly did.

pp. 1612-13:

Q. Is it true, Mr. Trippe, that prior to the present proceeding Pan American had made no complaint that the Grace Line or W. R. Grace & Company was taking any

action prejudicial to the best interests of Pan American-Grace?

A. No, I don't think that is a correct statement.

Q. Had Pan American made such complaints to the Grace directors prior to the present controversy?

A. Yes, on many occasions. In the early days when the question of providing adequate facilities along the west coast as certain overnight stops came up, the Grace directors stalled on providing what we considered reasonable hotel facilities. Even prior to the letter which Pan American directors were forced to submit, complaining of the general equipment and facilities situation, a number of acrimonious discussions had taken place. We compared the accommodations and facilities Grace was holding out to the public as being offered on its steamship services, with the very rudimentary facilities available to passengers at some stops on the competing airline. In this connection we referred to the Grace Steamship advertisements featuring luxury, speed and gaiety to back up our position. This matter came up again in a large way in 1937 when the overland service via Cali was under discussion. We felt and said that the insistence on hauling the through international passengers by this circuitous route, which almost guaranteed the continuance of the bottleneck, was moti- [fol. 1422] vated by their more important competing steamship investments.

pp. 1739-40:

Q. Will you please explain what you mean by that?

A. The company would be placed in the position where there was a conflict of interest, not only between it and Grace, as has been true in the past, but with both of its two owners.

From the very onset the Grace Company as owner of the Grace Line has had an interest adverse to the through passenger business of Pan American-Grace.

While this adverse interest, of course, has been dormant since 1940, I think it will be revived when the Grace Line resumes passenger operations, and that it will be felt to the same extent in the field of air cargo when that part of the air transportation business develops.

By Mr. Reynolds:

pp. 2177-78:

Q. Now, Mr. Trippe, we have some testimony in the record about a map which the board probably will not see, but your statements to the effect that the Grace line was in a competitive position with Pan American-Grace Airways—by "position" there, Mr. Trippe, you referred to points of service, line of routes; is that correct?

A. Yes. We had reference to the fact that a competitive position existed between Grace and Company as steamship operators, and Pan American-Grace Airways.

Q. Well, the position has to do only with the position of the service—the territory served—is that correct?

A. And the ability to move traffic by either ship or by air.

In other words there was a competitive form of transporation between the Grace steamships and the airlines.

Q. Passengers and shippers had an option of using either type in reaching a certain destination point, did they not? [fol. 1423] A. For instance, between points in the United States and points on the west coast of South America.

IV

Price Fixing

pp. 2236-37:

Q. Now, referring to another matter: you came to an understanding early in Panagra's history, did you not, Mr. Trippe, that Panagra would clear with Pan American all mail, passenger, and express rates, so that there would be as few discrepancies as possible between the rate structure of the entire Pan American system, and you had definite correspondence on that, did you not, Mr. Trippe?

A. I don't recall any incident to which you refer. It is a fact that Pan American, I think, is the nominee of Pan American-Grace that actually files rate tariffs with the Civil Aeronautics Board. I understood that that arrangement is in effect, yes.

Q. You don't recall having written Mr. MacGregor under date of March 10, 1930, or thereabouts, definitely setting forth such an arrangement, and Mr. MacGregor's reply stating that you correctly set forth the understanding?

A. No, I don't recall it. I remember during those years there was a problem of—well, let me put it this way: that there was a certain amount of confusion from time to time, that Pan American's office in Washington handles nearly everything for Pan American-Grace as well as other units of the system. Pan American-Grace doesn't have any Washington office. And I think there was some discussion as to the machinery that would be set up so that the Washington office would be properly apprised of the steps being taken from time to time by both companies and would be kept informed of anything being done, so that it could properly act.

pp. 2239-41:

Q. You do have uniform passenger and freight fares also between Miami and Buenos Aires via either coast, Mr. Trippe?

[fol. 1424] A. Yes, sir. I believe that has been the practice of the companies.

Q. And is that by definite agreement, Mr. Trippe, or by what?

A. No agreement that I know of. It is just a kind of arrangement that is usually entered into by different carriers serving a common point.

. . . . . .

Q. Since your rates are uniform between the common points Miami and Buenos Aires, and further since the distance actually traveled by Panagra is shorter, Mr. Trippe, just why is it that Panagra can not operate at a lower rate for that through traffic than Pan American can on the east coast?

. . . . . .

Examiner Brown: I don't understand the question, Mr. Reynolds.

Mr. Friendly: I wonder if Mr. Reynolds could rephrase that.

. . . . . .

Q. As a matter of business operation, Mr. Trippe, couldn't Panagra operate more reasonably from Miami to Buenos Aires in conjunction with the connecting service that Pan American could from Miami to Buenos Aires down the east coast, and thereby afford a saving to the public in lower fares?

A. Well, I think that is a question difficult to answer, Mr. Reynolds. First of all, the difference in mileage is not very substantial, you appreciate, over the cut-off on the east coast. Second, even though there was a fairly substantial amount, isn't that the sort of thing that is often done by carriers working between common terminals?

TESTIMONY OF MR. ROIG IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Division of Territory

By Mr. Cahill:

pp. 766-68:

A. • • •

While the matter has been discussed here as a difference of opinion regarding equipment, it was really nothing of the sort. I personally took part in the discussions with Mr. Trippe in New York and in London. Mr. Garni was also in the discussions. There was no nonesense about what the issue was at that time. It wasn't a question of a land operation or boat operation. It was a question of keeping Panagra out of Colombia because Pan American had acquired a large stock interest in Scadta from a German interest which had formed it and which continued to dominate its management, and they just didn't want Panagra to come into the interior of Colombia and they weren't at all bashful about saying so.

As a matter of fact, it was suggested—Mr. Trippe suggested to me in London, and the minutes of Pan American's Board of Directors show, that they offered to settle the

matter by having Grace [illegible] Panagra buy part of the Scadta stock and if we had accepted that offer, there wouldn't have been any discussion about equipment in connection with that operation.

. . . . . .

[fol. 1426] Pan American opposed it on the grounds that it would be competitive with their investment in Scadta and their investment in UMCA which was operating from the Canal Zone up to Medellin at that time, to the best of my knowledge.

p. 771:

Q. Now, is it your testimony that Pan American did not want Panagra to enter Colombia?

A. That is what we were told at the time.

Q. And by whom?

A. By Mr. Trippe and others.

p. 810:

Brazil: While, of course, we touch Brazil, that is essentially in the sphere of Pan American's activity, and I need not go into the local companies there. So that we have local national companies.

By Mr. Friendly:

pp. 843-45:

Q. There have been discussions, have there not, as to the respective scope of operations of Pan American and Pan American-Grace in South America?

A. Yes, sir.

Q. And has not W. R. Grace and Company taken the position that Pan American is obligated not to operate in west coast countries?

A. We haven't always. We didn't take that position when Pan American brought Scadta which operated in the western part of Colombia.

We didn't take it when they bought of organized UMCA which went to Medellin.

We haven't taken it yet in connection with the service that I understand they have started in the last few days in Peru, as far as Iquitos by Panair do Brasil. Of course, we would take it in that instance. We probably would take it in that instance; I don't know. It is a matter that is under discussion. No doubt it will be arranged.

Q. Do you construe the agreement as imposing any obli- [fol. 1427] gation on Pan American not to engage in operation, say, down the west coast to a point such as Lima?

Mr. Cahill: What agreement?

Mr. Friendly: Letter of 1928.

Mr. Cahill: Which letter?

Mr. Friendly: August 1931.

A. That letter contains nothing on the subject at all. It isn't even an agreement.

By Mr. Friendly:

Q. Is it your position, then, that Pan American is entirely free, so far as any agreement with W. R. Grace and Company is concerned, to start an airline down the west coast of South America?

. . . . . .

A. I know of no agreement in any enforcible sense covering that subject matter. Answering your question, Grace certainly would be as much surprised if Pan American should undertake to run a line down the west coast paralleling Panagra as I am sure they would be if Panagra contemplated similar action down the east coast.

pp. 886-87:

Q. Does the statement that "Mr. Trippe thinks it would be economically better for Panagra to charter a clipper for the service between Cristobal and Guayaquil than to invest a minimum of $250,000 in building two planes" correctly set forth Mr. Trippe's position, as you recall it?

A. Not as I understood it, and as I recall it, no. My recollection is that Mr. Trippe's reason for suggesting that we charter an S-42 was in order to put Pan American in control of the Northern Division o our line and to prevent us from going into Colombia. I was very much more fa-

miliar with Mr. Trippe's mental processes at that time than was Mr. MacGregor.

[fol. 1428] By Mr. Reynolds:

pp. 1085-88:

Q. As a matter of fact your extension to Buenos Aires came about at the instance of the Postoffice Department, did it not?

A. As I recall it we had the option under our mail contract to extend, and we exercised the option shortly after the execution of the contract.

Mr. Friendly: I think it was the other way.

The Witness: Was it the other way?

Mr. Friendly: Yes.

. . . . . .

Q. At the time that was done was it pointed out to you by any representatives of the Pan American interests that Buenos Aires was beyond the scope of the original purposes for which Panagra was formed?

A. Oh, no.

Q. Was there any discussion of that nature?

A. Oh, no. The entire board was in favor of it. All voted for it.

Q. That included Buenos Aires and Montevideo both, didn't it, at that same time?

A. Yes.

Q. Now, when the issue was presented regarding inclusion of Cordoba as a stop on the across-the-Andes operation, where there was some diversion, in the discussions that surrounded that question, was mention ever made of the fact then that you were operating at a point outside the territory mentioned in the original agreement?

A. I stated yesterday what the particular discussion did relate to.

Q. That had to do with the acquisition of Nyrba?

A. Yes.

Q. And the payment—

A. (interposing) Yes. I do not recall that the matter was brought up at that time. I am certain that no such argument

[fol. 1429] as is being made in this case was made at that time.

Q. And how about the extension to LaPaz?

A. No. There was no point made.

Q. No such point ever made?

A. No such point made in the extension of LaPaz.

• • • • • • •

Q. When the February 14, 1939, agreement was executed, during the negotiations for that agreement was the point ever raised that Panagra's extension to the United States was beyond the scope of the original purposes?

A. Yes. In those discussions this letter was produced, so far as I can recall, for the first time, and was argued to be an agreement that we would not extend beyond the limits referred to in that letter.

Of course, we took vigorous exception to that interpretation of the letter.

Q. Did you ever hear of the phrase "dedication of capital" in connection with those discussions?

A. I don't recall hearing of that phrase until these proceedings began.

pp. 1146-48:

Q. Now, Mr. Roig, if you will turn, please, to PG-2 on page 5, which is minutes of Pan American-Grace Airways meetings. The pages are not numbered, but it is the last page for the minutes of the meeting of March 18, 1931.

(Discussion had off the record.)

By Mr. Reynolds:

Q. Referring to the statement which you made, which begins the long paragraph on that page—if you want to read it while we wait—

The Witness: I would like to. Yes, I have read it.

By Mr. Reynolds:

Q. What is the proposed extension to which these remarks referred?

[fol. 1430] A. As I recall it, it was a Pan American extension from Rio or Santos to Buenos Aires on the East Coast.

Q. And you stated that Pan American have an undoubted right to extend their service to Buenos Aires and to operate in the Argentine except between Buenos Aires and Mendoza, if they desire. What was the restriction on their right to operate between Buenos Aires and Mendoza?

A. Well, Buenos Aires and Mendoza—Mendoza is the last point in the Argentine before we take off across the Andes to Santiago, and the point there was that Panagra was already operating in that area, and we didn't expect Pan American to parallel us.

Q. There had been an understanding at that time, had there, that there was to be no paralleling of either route by the other?

A. I think that is a fair statement, yes.

Q. And what was it that occasioned your remarks—

A. (Interposing) I would like to say—understanding about paralleling each other—

Q. (Interposing) I mean duplicating.

A. No. It was always more or less taken for granted and understood that Panagra was operating the route on the West Coast and Pan American the route on the East Coast, and that we weren't going to run up to Rio and they weren't going to run up to Lima, but that didn't extend beyond that rather particular area.

Q. Well, as a general proposition you marked your dividing line as east or west of the Andes, did you not?

A. No, it was not east or west of the Andes when it came to that particular sector. We ran on to Buenos Aires at that point, but north of Santiago, even there it would only be true where it so happened that the countries in which we were operating were mostly west of the Andes. In practice, since we have extended into the interior of Bolivia, for example, we just sort of automatically made a juncture at the Bolivian-Brazilian border with Panair do Brasil, but, of course, in going into the interior of Bolivia, we were [fol. 1431] getting east of the Andes, but that was never any dividing line.

Q. I am referring only to early days at this point, and except for your east-west route over to Buenos Aires, dis-

cussions during the early days did assume the division of spheres as east and west of the Andes, did they not?

A. East and west coast, let's say.

pp. 1156-57:

Q. Referring to the time at which the controversy over operation to the interior of Colombia was settled: you testified that the real issue there—and no one made any attempt to conceal it—was the matter of competition with Scadta, I believe.

A. I did.

Q. Mr. Trippe so told you in London, as I recall?

A. Well, that matter had been discussed long before that. My testimony regarding the meeting in London was that I took up with him again there the question of this overland route and it was on that occasion that he suggested for the first time that one solution of the matter might be for Panagra or Grace to purchase a portion of their investment in Scadta.

• • • • • • •

Q. Just what was it that Mr. Trippe told you with respect to the competitive angle with Scadta, to the best of your recollection?

• • • • • • •

A. At various discussions which I had with Mr. Trippe in connection with the overland operation with Douglass, the point was made that an overland operation serving Cali, calling at Turbo and passing by Medellin, because our route, as we fly it now, passes by Medellin, and at that time we had suggested that we also include Medellin in the route, and he took the position that anything of that kind would be competitive with Scadta, which was serving Medellin and Cali.

[fol. 1432] pp. 1160-62:

A. Well, they certainly took that position with reference to our doing business in Medellin, or even in Turbo, although that is an insignificant spot, because of their investment in Scadta.

Q. And the idea was that that had been agreed upon when they went into Scadta; is that it?

A. No, I wouldn't say that. There had been no agreement between us, between Panagra, Grace, or Pan American, at the time Pan American made their investment in Scadta. We didn't know they had made it for some time, and the extent of the investment was a mystery for a great many years, nor was it ever said, that I recall, that they had made any agreement with Scadta. Whether they had or not, I don't know. That matter was not discussed. It was simply a question that they had this investment in Scadta and that they had acquired it under the circumstances I referred to, and for those reasons we should not go into Scadta's territory. There was also a very long and metaphysical discussion as to whether Medellin or even Cali were East Coast or West Coast.

Q. Then, when it was finally decided that Panagra should be permitted to go into Cali, it was also decided that Panagra should not go into Medellin?

A. Oh, yes.

* * * * * *

A. There was another point that entered into the matter as a factor and that was the UMCA service that has been referred to.

Q. In what manner was that a factor?

A. The UMCA Line ran between the Canal Zone and Medellin providing direct service between those two points. UMCA was owned, I have always understood, in large part by Pan American and, of course, for Panagra to go into Medellin would have been competitive with UMCA.

Q. And was that point specifically raised and mentioned as such in any of these discussions?

[fol. 1433] A. Oh, yes, at or about the time of the '39 agreement, there was active discussion as to whether or not Panagra might not purchase UMCA. We were rather anxious to do it. That matter was left for discussion later on without any commitment on anyone's part, and the possibility of our purchasing it was brought up on a number of occasions afterward. I personally brought it up with Mr. Whitney and Mr. Rihl, but nothing ever came of it.

By Mr. Friendly:

pp. 1375-76:

Q. It is your testimony that there was no agreement between Pan American Airways and W. R. Grace and Company as to where Pan American-Grace was to operate and where Pan American Airways was to operate?

A. I think I have said before that there was no written or enforcible agreement that I recall, but that there was a general understanding that Pan American's operations were on the East Coast of South America, and that Panagra, so far as they related to South America, were on the West Coast.

There is no agreement that they were not to be extended, however, if that is the inference from the question.

By Mr. Cahill:

pp. 3264-65:

Q. Let's turn to another subject. Mr. Trippe has testified in this case that when the question of Pan American's extension to Buenos Aires arose in the spring of 1931, the Grace directors wanted to make it clear that Pan American was not at liberty under the agreement between the two companies to compete with Panagra between Buenos Aires and Santiago via Mendoza. Now, I want to ask you whether or not this agreement to which Mr. Trippe has made reference was in the nature of a general understanding entered into after the formation of Panagra and prior to Pan American's acquisition of Nyrba in 1931?

A. Well, it was certainly after the formation of Panagra. [fol. 1434] The point from which it dates in my recollection is partly in connection with the points you have mentioned about Panair competing with Panagra's line through Mendoza, developed further at the time that Pan American acquired Nyrba, and to the best of my recollection given definite expression for the first time in the cable that Mr. Trippe sent at Mr. Cogswell's request at the time that ALAS had made a flight to Santiago.

Q. Between what two companies was this general understanding?

A. That understanding was between Pan American and Panagra.

By Mr. Friendly:

pp. 3293-97:

Q. Now, would you turn, please, to G-154?

A. I have it.

Q. Particularly page 2 of your memorandum to Mr. Iglehart.

A. Yes.

Q. And still more particularly to the sentence reading "Except for Panagra's undertaking not to operate on the east coast of South America in exchange for Pan American Airways similar undertaking with respect to the west coast." When were those undertakings exchanged?

A. As I explained this morning, it is my understanding that they came into existence commencing with Panagra's operation to Buenos Aires, continuing through Pan American's acquisition of Nyrba, and stated, I believe, the first time that I think of in writing in Mr. Trippe's telegram which is in evidence—cable.

Q. Now, Mr. Roig, let's go back to the first date—Panagra's extension to Buenos Aires. Who requested whom for an undertaking at that time?

A. I do not recall. It might well have been mutual.

Q. Were you a party to any of these discussions?

A. I don't recall when I first became a party to any discussions on this east coast-west coast matter.

Q. When Panagra extended from Santiago to Buenos [fol. 1435] Aires, did you ask Pan American for any undertaking not to operate on the west coast?

A. I don't recall doing so myself, but I think the matter was discussed at that time.

Q. And at that time Pan American Airways was asked to enter into a general undertaking not to operate on the west coast?

A. I don't think it took any such formal shape as that at that time.

. . . . . .

Q. Wasn't it your testimony, Mr. Roig, that at the time of the extension by Pan American-Grace from Santiago to Buenos Aires, Pan American was asked to undertake not to operate on the west coast?

A. I don't recall to testifying—to so testifying.

Q. When was Pan American asked to undertake not to operate on the west coast?

Mr. Cahill: I object.

A. When?

By Mr. Friendly:

Q. When, if at all?

A. That question definitely came up in connection with the trip by ALAS. That was some later.

Q. Operation between Buenos Aires and Mendoza would not be operation on the west coast, would it?

A. No.

Q. Would you explain, please, what Pan American was asked to undertake at that time?

A. They were asked to make it clear that they were not to parallel Panagra's route between those points which was a part of its route to the west coast.

Q. Was Pan American ever asked to undertake not to operate, say, from the Canal Zone to Quito?

A. Was Pan American ever asked?

Q. Yes.

[fol. 1436] A. Through Pan American, Scadta was asked not to operate to Quito from points in Colombia. I don't recall the question of the Canal Zone being involved.

Q. Was that request made on the basis of the undertaking that you refer to here?

A. I think so, yes.

Q. What is your statement as to when that undertaking not to operate down the west coast from Colombia to Ecuador was given?

A. Well, it is difficult for me to be too dogmatic as to the time when that understanding, which later became so well-known started, but to the best of my recollection, for whatever it may be worth, at the time that Panagra

began operations to Buenos Aires, which was late in 1929. Pan American was expecting to operate down the east coast—may, I think, have been operating some portion of the east coast or north coast at that time—and I have a pretty vague recollection, but I state it, such as it is, for what it is worth, subject to correction if I am wrong, that at that time there was some general conversation to the effect that Panagra was not to operate on the east coast with the exception of this route to Buenos Aires, and that Pan American was not to operate on the west coast. Now, as I say, my recollection is not very clear and it was nothing at that point which was more than general conversation. I do think that the matter became the subject of further conversation when Pan American actually got, through their purchase of Nyrba, as far south as Buenos Aires, and when that ALAS flight was made.

By Mr. Reynolds:

pp. 3394-95:

Q. Referring to the discussions as a result of which the Cali stop was permitted, you testified yesterday that the subject of Medellin, Turbo, and Bogota—that the discussions included consideration of those points, the possibility as to Panagra's serving them, and then added that the matter was not disposed of, however, on the basis of territorial delineation, as I recall; is that correct?

[fol. 1437] A. Yes.

Q. What was the basis upon which the disposition was made?

A. The basis was that, in order to secure Pan American's acquiescence in our going ahead with the overland route, and giving us a quorum, although not voting, to pass the necessary authorization, Panagra agreed that regardless of in whose territory these places might be we would not carry on commercial business to these points, and that we would use them only as emergency, or, in the case of Turbo, fuel stops.

That did not include Bogota. There was no serious discussion of going to Bogota. That related to Medellin and Turbo.

By Mr. Friendly:

pp. 3416-17:

Q. Mr. Roig, on this question of Medellin and Turbo, don't you recall that those matters were—Let me put it this way:

Do you recall a series of meetings in March and April 1937 at which various matters in connection with Colombia and Ecuador were discussed?

A. Yes, I do.

Q. Those included the meetings at Mr. Rihl's apartment and breakfast at the University Club, as to which there has been testimony, and some others; isn't that right?

A. Yes.

Q. Wasn't one of the subject that was discussed at those meetings the question of Medellin and Turbo—not as a matter for immediate operation but as a matter of arriving at an understanding on the spheres of operation?

A. Well, the idea I tried to convey was that they may well have been discussed at an earlier date, in sort of an academic way, but they were not vital matters of discussion until we were actually operating overland. I think they were referred to in those discussions, and I didn't intend to give a contrary impression. I am sorry if I did.

Q. No. I think that that was fairly clear. I just wanted to have it entirely clear.

[fol. 143°] A. I was relating myself primarily to the time it became a real issue and questions of specific method of handling it were discussed.

Q. Do you recall, in those discussions in the spring of 1937, the Grace directors expressed concern about the proposed Scadta operation in Ecuador?

A. Yes.

Q. Were you told that the president of Colombia was pressing to have that service established?

A. Yes.

Q. And you expressed concern over even a so-called survey flight being made?

A. Yes.

II

Through Flight

By Mr. Gambrell:

p. 1073:

Q. Mr. Campbell yesterday or the day before testified as to the possibility of an interchange of equipment between Pan American and Panagra at certain times. In your opinion, would an arrangement, under Board Authority, whereby Panagra would operate its equipment on Pan American's route between Canal Zone and Florida, solve the difficulties you have spoken of?

A. It would not solve it.

III

Pan American-Panagra Competition

By Mr. Cahill:

pp. 1343-44:

Q. * * * Now, turning, Mr. Roig, to some questions that were put to you on cross examination as to whether Pan American had opposed increases in Panagra frequency. Do you recall answering such a question in the negative on the express condition that the question related solely to frequency?

[fol. 1439] A. That is correct. I amplified that in part on cross examination by Mr. Reynolds. I would like to mention further the fact that it is also true that, as I felt from my observations and contact with the business, the initiative for these increased frequencies and shortening of schedule time throughout all this period came from Panagra, and it almost always happened that simultaneiously, Pan American would step up the frequency on its East Coast service, and to what extent that may have retarded our progress I don't know.

There was also very little encouragement to Panagra's cutting down its elapsed time, which would continue or

even increase the discrepancy between the East Coast and the West Coast service.

Q. Discrepancy in what respect?

A. In elapsed time.

Q. How about the publicity on that?

A. Well, the publicity on that always suppressed the fact that Panagra was quicker, and in a great many instances was so artfully worded as to convey the impression that the schedules that Panagra was operating were being operated on the East Coast.

IV

Panagra-Grace Line Competition

By Mr. Gambrell:

pp. 1044-46:

Examiner Brown: Mr. Gambrell, your question is then —Why not ask Mr. Roig:

Do you believe, Mr. Roig, that air rates should be made on a competitive basis with steamer rates?

Mr. Gambrell: Well, that what I want to ask him, Mr. Examiner.

Examiner Brown: I am asking that.

The Witness: Certainly.

Examiner Brown: Should they be lower or higher than steamer rates?

The Witness: Well, they should be competitive. There [fol. 1440] are many things to be considered besides whether they are actually lower or higher on the basis of a ticket from point to point.

The domestic air lines make a great point of the fact that they are cheaper than the railroads, even though the actual fare may be higher than the railroad fare because of other considerations.

Examiner Brown: But your rates are fixed on a competitive basis with steamers?

The Witness: Oh, certainly.

. . . . . .

Q. Well, let me ask this question—

A. (interposing) Let me say: Grace Line, not W. R. Grace and Company.

Q. (continuing) In September 1937, when this letter was written, was a consideration in raising the rates the fact that the steamship rate at the time was very close to the airline rate?

A. The letter says so.

V

Grace Control

By Mr. Friendly:

p. 989:

Q. There has been testimony as to the transfer of employees from the payroll of the Grace agencies to that of Pan American-Grace Airways in 1943. It is a fact, is it not, that the individuals so transferred remain under the general direction and supervision of the Grace managers in the respective locations?

A. That is correct in most cases.

pp. 999-1003:

Q. In cases where the offices of Pan American-Grace in Lima desire to initiate a capital expenditure, has it been necessary in the past that they obtain the approval of the local Grace manager?

A. Part of the functions of the Grace offices under our management arrangement consist of financial control and our form of R.C.A., which we referred to the other day provides for the approval of the local agency of capital expenditures, and that is regular practice.

[fol. 1441] Q. That practice extends even to equipment of a technical character, does it not?

A. Yes, but the Grace agent doesn't attempt to pass on the technical character or the technical side of it. There is a financial aspect to even a technical purchase. In addition to the Grace agent, the thing is signed by the local

officials of Panagra, by Mr. Campbell in New York, and by Mr. Vidal in New York, and by me. It carries a long list of signatures of people approaching it from a variety of different angles.

Q. Haven't there been complaints by the management of Pan American-Grace as to this practice of requiring the approval of the local Grace manager on R.C.A.'s?

A. There have been no complaints from the top management. In fact, it was instituted as part of the arrangements and was one of the desirable features of the arrangement. I know there have been objections from people concerned of refusal to sign by me or Mr. Vidal or Mr. Campbell. There may have been by the Grace agent. That is the reason we let people sign. That is the reason we don't let them decide things for themselves. That is what management is. Of course, when management asserts itself, if he doesn't agree with somebody, he complaints.

Q. Colonel Harris was part of the top management, was he not?

A. Yes, but he was not the top management.

. . . . . .

Q. Actually, if the vice president in South America, which Colonel Harris then was, wished to make a capital improvement which affected more than on country, he had to get the R.C.A. cleared with the Grace manager in each country, did he not?

. . . . . .

A. I don't recall the practice in 1936.

Examiner Brown: What is it today?

The Witness: Well, today, if the R.C.A. originates in Lima, which is the head local office of Panagra in South America, I think the local Grace management would check it, but I am sorry to say I can't swear to it.

[fol. 1442]

. . . . . .

Q. Hasn't a recommendation been made during your presidency for the modification of this practice of requiring that R.C.A.'s be cleared with the Grace agency? Isn't that true?

A. I don't recall it, but it may have been.

. . . . . .

Q. Does this new procedure which you have described have some top limit as to the amount that can be expended in this way?

A. Of course, there has always been a small limit, I don't recall whether it was $500 or $1000, which never required an R.C.A. There is no fixed limit on this setup, but it was understood—I think I discussed it myself with Mr. Kirkland on one of his trips here, that, of course, it didn't mean absolutely wide open situation, and that there would be capable consultation at least with New York, and it has extended, however, to sums running, I think into five figures.

Q. Do those smaller expenditures have to be cleared with the agencies or not?

A. You mean $500 or $1000?

Q. Yes.

A. No, I don't think so.

By Mr. Reynolds:

p. 1145:

Q. When you came to the 1939 agreement wherein you were to be elected president, did that mark the determination of the Pan American claims for right to operate?

A. Oh, by that time the matter had been dropped and the agreement, by its very language, shows that the president to be elected was to be in responsible charge of the company's business.

VI

Joint Offices and Publicity

By Mr. Reynolds:

[fol. 1443] p. 1187-90:

Q. Now, referring to the Buenos Aires office, you gave considerable attention to that in connection with the 1939 discussions, as I recall?

A. Yes.

Q. You were of the opinion at that time that the office was not properly organized; is that correct?

A. That is correct; and I was further of the opinion then and at all times since that Panagra should control the office since we pay the major part of the expense.

Q. Well, doesn't Panagra control the office?

A. No, we do not.

Q. Who does?

A. Pan American Airways. They own all of the stock of the subsidiary which owns the office, and although we contribute 60 percent and have been as high as 66 percent of the expense, employees of that office are employees of a subsidiary of Pan American and they respond technically and substantially to Pan American and not to Panagra. They do make certain reports to Panagra, but even that hasn't always worked satisfactorily, and they do not consider that they are under our orders, and they are not. We can indicate what we would like to have done, and generally speaking, they carry it out, but there is quite a difference between being the boss and not being the boss, and we are definitely not.

. . . . . .

Q. And, as a matter of fact, as the office is now organized, it is definitely understood that neither the route of Pan American nor the route of Panagra will have—will be favored over the other, is it not?

A. That is understood and will be, I think, carried out in good faith.

pp. 1193-96:

Q. Now, Mr. Roig, returning to the matter which we have all carefully avoided with you for some time, of publicity, may I ask if you endorse Mr. deGroot's views that Panagra [fol. 1444] should have a separate publicity department in the United States?

A. I certainly do, and I have so requested on a number of occasions, orally and in writing.

Q. Extending over what period?

A. Quite a good many years.

. . . . . .

Occasions have arisen time after time where Panagra's interests have not only been subordinated and obscured but have been, in my opinion, even actively prejudiced by the publicity department whom we were paying to provide us with publicity. I have made complaints on the subject to higher officials in the Pan American organization, including Mr. Trippe on more than one occasion when particular instances have occurred. I have always been assured or I have generally been assured that it was too bad or it was a mistake and it wouldn't happen again, and in no time at all something else just like it would happen. There has never been any evidence that I have been able to see of any disposition on the part of the head officers of Pan American Airways to correct the publicity situation at all.

VII

Price Fixing

By Mr. Reynolds:

pp. 1170-71:

Q. Now, Mr. Roig, I would like to refer to Exhibit P-37 on Page 33, the meeting of the executive committee of Pan American Airways, Inc., dated February 4, 1931, where the meeting is purported to have involved the discussion of two or three different items, including uniform postal service between Buenos Aires and the United States on both the east and west coast, the effectuating of uniform tariffs and schedules by Pan American Airways, Inc., and Panagra, and the coordination of operations by the two companies at Buenos Aires, and so forth.

(Off ..e record.)

[fol. 1445] By Mr. Reynolds:

Q. Referring first to the discussion that uniform tariffs and schedules between Pan American Airways and Panagra be effectuated, was that ever done subsequent to that meeting, if you know?

A. Well, to the best of my recollection we have always had uniform tariffs, east and west coast, by way of Miami.

This date must have been about the time that Pan American were inaugurating their service extension from Rio to Santos to Buenos Aires, and I imagine that contemplated inaugurating their schedules on that basis.

TESTIMONY OF MR. DOBBS IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Grace Control

By Mr. Friendly:

pp. 2334-37:

Q. On your trip in 1941, you observed the passenger handling facilities at each of the airports where the airplanes stopped, did you not?

A. Yes.

Q. And in Buenos Aires, Santiago, Valparaiso, Lima, Guayaquil, Cali, and the Canal Zone, you also observed the downtown offices and talked with the traffic men there; is that correct?

A. That is correct.

Q. Now, did you learn of any resistance that had been offered to the traffic promotion of Pan American-Grace by the Grace agents or by W. R. Grace & Company?

A. Mr. Van Law and Mr. Muhlfeld had both told me in the past that they had met difficulties and opposition in promotions of airline business.

Q. Will you tell us in what way?

Mr. Cahill: Just a minute. Both told you in the past. You mean they told you at this time or at an earlier time?

[fol. 1447] The Witness: At an earlier time by Van Law and on this trip by Muhlfeld.

Mr. Cahill: Beg pardon?

The Witness: And on this trip at this time by Muhlfeld. Prior to that by Van Law when he was there.

Mr. Cahill: I move to strike out Van Law as not being responsive to the question.

The Witness: I will be glad to answer the question. Will you read the question again?

(The question was read by the reporter.)

Examiner Brown: I take it the question is directed to this particular trip, Mr. Dobbs, so please so restrict your answer.

The Witness: All right.

Mr. Cahill: I take it the motion is granted, then: the motion to strike?

Examiner Brown: Yes.

A. As an instance, Mr. Muhlfeld told me in Lima that at the time that Aerovias Peruanas was discontinued or merged with Faucett, they had a very attractive downtown office, which I had been in on my previous trip, and which he had tried to have retained for the exclusive use of Pan American-Grace Airways promotion of traffic business, but his efforts had met with failure, as he told me they were flatly turned down by Grace in New York.

In Valparaiso, when I was there on this trip in 1941, I noticed on the counter used by Pan American-Grace Airways for passenger transactions that there was a poster of Pan American-Grace Airways which was partially covered by another advertisement or poster which I don't remember exactly what the top poster referred to, but since the airline poster was mostly covered, I asked the traffic representative behind the counter about uncovering it, and he said that it had been so covered by instructions of the senior agent. I was accompanied on this trip—

[fol. 1448] Mr. Cahill: Who was this you asked this question of?

The Witness: The traffic representative back of the counter.

Mr. Cahill: Give us his name so we can identify him.

By Mr. Friendly:

Q. Do you know his name?

A. I think with considerable thought I could give you his name. I don't have it offhand in my mind.

Mr. Cahill: Of course, it is hearsay even when you know the man, but I submit when it is hearsay with an unknown, there is some question about it.

The Witness: I know the man, so he can easily be looked up and I think we can get the name all right. He is an English-speaking young Chilean who told me at lunch that he was leaving for the Royal Air Force as soon as he could. It wouldn't be difficult to get his name, and I will see if I can get it for you.

A. (continuing) Mr. Salsilli, who was with me; having come down from Santiago, as he is the senior employee of the agency charged with the duty of Pan American-Grace Airways passenger affairs, told me that that was just one of the things he couldn't do anything about.

p. 2342:

Q. Did any traffic official of Pan American-Grace ever tell you that the Grace agents had followed a practice of selling air transportation only as far as the Canal and thence by boat to the United States?

A. Mr. Van Law made such a statement to me in 1936 when he was traffic manager.

Mr. Knauer: Traffic manager where?

The Witness: In Lima in 1936.

[fol. 1449]

TESTIMONY OF MR. SINCLAIR IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Grace Line—Panagra Competition

By Mr. Friendly:

pp. 2557-65:

Q. Did Pan American-Grace have any traffic representatives of its own in Ecuador during this period?

A. No. We didn't have any traffic representatives that were on the payroll of Pan American-Grace. For a short while we did have one agency man that devoted his full time to the services of Pan American-Grace.

Q. That is a Grace agency man?

A. Yes, a Grace agency man, a Guayaquil agencies man.

Q. Did the Grace agencies in the other countries in the Northern Division, to wit Colombia and Panama—have any employees at this period who devoted their full time to the affairs of Pan American-Grace?

A. No. At all other points our business was handled by regular agency personnel who devoted their time to the regular business of their particular agency.

Q. Can you tell us why this special arrangement was made in Ecuador?

A. Well, in January, 1936, I went down to Guayaquil on special instructions from Mr. George P. Smith to survey the market for possibilities in connection with air transportation, and specifically to study the possibilities of promoting air express. On my arrival at Guayaquil I contacted the Guayaquil Agencies Co., who were our agents and our representatives in that country. The manager at that time, as I have already stated, was Mr. Manuel Holquin and his two assistants, Mr. Ararte and Mr. McLean. I conferred with these gentlemen and asked them what the business possibilities for air express were in that particular territory. I found them a little vague about what I was talking about, in the first place—

Mr. Cahill: I move to strike out that he found them a [fol. 1450] little vague. Let him continue to tell us what was said.

Mr. Friendly: What is the Examiner's ruling on it?

Examiner Brown: Go ahead.

A. I asked Mr. Holquin what, if anything, had been done to develop air express, and he told me that an employee by the name of Cordovez had investigated the possibility of handling some lobster shipments. That was the extent of the work that had been done in that connection, according to the information given to me by Mr. Holquin. We continued discussion and I asked him if he did not have a man on contact work visiting shippers, studying their shipping problems, and studying the possibility of handling some of their imports or exports over our air express service. He told me that he did not have such a man.

By Mr. Friendly:

Q. Did you suggest anything?

A. Well, I recommended to him the very important desirability of appointing an agency man to devote his time to that type of work, and Mr. Holquin then told me that he did not see why it was necessary that Pan American-Grace should have such a man since the Grace Line did not have a man doing that type of work. I explained to Mr. Holquin that the Grace Line was the established form of transportation in that particular area, and had been so for several years past, that Pan American-Grace was offering a brand new service, and that it was necessary that that service be made known to the public of Ecuador, and the shippers and importers in that area.

Q. What did he say to that?

A. We continued the discussion, it was quite a lengthy discussion, and Mr. Holquin finally ended up agreeing that he would make an effort to locate a man for my purpose, but that he believed that it would be quite difficult to find just the right type of man.

Q. Did you try to help him out with a suggestion?

A. Yes. Before I had departed from Cristobal, Mr. [fol. 1451] George P. Smith had mentioned to me the fact that a young employee of the Guayaquil Agencies Co., by the name of Gustavo Jiminez had been showing a great deal of interest in the business of Pan American-Grace. He had been sending us up small notes with the pilots and making minor recommendations and reporting complaints to us that he had received from passengers, and Mr. Smith consequently recommended that I consider Gustavo Jiminez as a possible candidate for what we had in mind.

Q. Did you pass that on?

A. Yes. I recommended that Mr. Gustavo Jiminez be appointed for that work.

Q. What did Mr. Holquin say?

A. Mr. Holquin told me that Mr. Jiminez could not devote his full time to that work, as he had other duties to perform within the agency. These duties were to a great extent related to Pan American-Grace. He was in charge of receiving and dispatching aircraft, handling the mail, handling different things for us down there, and in addition to that, of course, he apparently did some other duties for the Diagonal Agencies Co., with which I was not familiar.

However, Mr. Holquin did agree that in view of my insisting and recommendations, Mr. Jiminez could and should devote whatever time he had left over from his other duties to this type of work, and he asked me to undertake the instruction of Gustavo Jiminez along the lines of the type of work that I wished to have done down there.

Q. Did you do that?

A. Yes, I did. At the first opportunity that I found when Jiminez has some free time, I had quite a lengthy discussion with him. I explained to him the type of business that I believed could and should be secured in Ecuador. I explained to him the details of the way to go about getting this type of business. I found that he, Mr. Jiminez, himself had some extraordinarily good ideas that we rounded off and developed as the conversation went on.

[fol. 1452] Eventually, some day or so later, when Jiminez had additional free time, I made some actual visits to various prospective shippers and importers in Guayaquil in

order to give him a practical demonstration, as far as I could, of the sales technique that we had been discussing.

Q. Did you have any further discussions with Mr. Holquin at this time?

A. Well, the only discussion that I can recall at this time is again recommending that a man be appointed on a full time basis.

Q. Do you know whether that was ever done during the period with which you are familiar?

A. No. The appointment was never made on a full time basis.

Q. Did you request any assistance from Lima in securing the appointment of this Mr. Jiminez on a full time basis?

A. Yes. I took the matter up with Captain Harris, but nothing resulted.

* * * * * * *

Q. What did you find out about what was being done by the Guayaquil Agencies with respect to Mr. Jiminez' express solicitation?

A. I made several trips to Guayaquil in 1936 and 1937, and on almost all of these trips he, Jiminez, complained to me that both Mr. Holquin and Mr. Ararte had been talking to him regarding his very new activities in the promotion of air express. He told me Mr. Ararte had recommended him—I believe there was some relationship between the two—that if he wished to progress within the agency, he had better pay more attention to the general interests of that agency instead of dedicating his time only to Pan American-Grace affairs.

Q. Did you take that matter up with the manager of the agency? Tell us who he was, please.

A. The manager was Mr. Holquin at one time and Mr. Kolditz at another. I discussed minor—some things with one and some things with the other.

Q. I am referring to the matter to which you just referred.

[fol. 1453] A. Yes, I took that up with Mr. Kolditz.

Q. What happened?

A. And he told me that I must understand—well, in the first place, he called in Mr. Ararte and asked him if the conversation that I had reported to him was accurate, and Mr. Ararte agreed that it was, and that the indications made to Jiminez had been made on Mr. Kolditz' own instructions. Mr. Kolditz then told me that I must understand that he was responsible for the over-all interests of the Grace agency in Guayaquil, and that it was his duty to protect the major interests in that agency. He told me then what Mr. Holquin had said to be more or less in the same words on a previous occasion, that whereas the Grace Line was 100 percent owned, Pan American-Grace was only a 50 percent interest.

He went on to tell me that, with regard to the two interests of Pan American-Grace and Grace Line, even if you consider that matter purely from the standpoint of the local agency rather than from any possible reaction in his headquarters, he has to give preference to the Grace Line, as that turned in a very heavy volume of business for his particular agency.

Q. What did you say?

A. Well, I told Mr. Kolditz that I was going to take the matter up with my superiors. The discussion was quite heated—that particular discussion was quite heated, and Mr. Kolditz replied that he also was going to take the matter up with his superiors, and that he felt that he could have the full support of his head office since all he was doing was looking out for the major interests of W. R. Grace and Company.

Q. Did you report the conversation to your superiors?

A. Yes, I did. Either to Mr. Van Law or Mr. G. P. Smith.

Q. Can you recall which?

A. No, I can't. I had more contact with Mr. George Smith on matters relating to Northern Division, so my recollection would be it would be Mr. Smith.

[fol. 1454] Q. What happened with respect to this air express solicitation after the incident that you have just described?

A. Well, it continued on the same basis it had previously, that is to say, he—that is Jiminez—devoted part of his

time, whatever time he could spare, to air express solicitation.

Q. Under the practice that was prevailing at that time, could you correspond directly with Mr. Jiminez on air express solicitation?

A. No, I could not. All correspondence had to be addressed to the Guayaquil Agencies Co.

Q. Do you know whether or not Mr. Jiminez' employment was subsequently terminated?

A. Yes, it was.

pp. 2569-74:

Q. In January of 1936 were you involved in an incident with respect to the securing of gold shipments from Guayaquil for Pan American-Grace?

A. Yes, I was.

Q. Did you secure that business?

A. I did.

Q. And from whom, please?

A. The Central Bank of Ecuador.

Q. Do you know who had transported that type of cargo previously?

A. The Grace Line.

Q. Tell us, please, how you went about securing the business.

A. In the fall of 1935, George P. Smith and I had become interested in the movement of treasury shipments out of Colombia and Ecuador. Platinum shipments, gold shipments were moving out of Colombia and we had indications that some of these shipments were also moving out of Ecuador. We discussed the matter and decided that due to the manner in which our rate structure was set up, we could not compete with the Grace Line on certain types —the more important types of shipments. The Grace Line freight rates were based on the value of the shipment and went down as the value of the shipment increased.

[fol. 1455]

. . . . . .

Q. Just to clarify this, Mr. Sinclair, is it your understanding that the rates on gold at that time were a certain

percentage of the dollar value of the shipment—or of the value, perhaps not dollar value?

A. Yes, that was the basis.

Q. And the percentage decreased as the value of the shipment increased?

A. That is right.

Q. You didn't mean to imply that gold did not move on a higher rate than nitrates or something of that sort?

A. Oh, no.

Q. Now, will you get back and tell us what you and Mr. Smith discussed?

A. The Pan American-Grace rate was a composite rate made up of a weight charge, a valuation charge, and an insurance charge. The net rates resulting from the two different types of transportation meant that we could compete—that is to say, Pan American-Grace—on shipments of relatively small value for that type of shipment, but we could not compete with the higher valued shipments which were the ones that were being moved by these big organizations. After discussing the matter further, Mr. Smith and I decided that we would have to have a sliding scale ourselves, and we suggested—we decided, rather,—that this should be more or less on the basis of our CDC passenger contract. We made recommendations along those lines to Mr. Van Law who was our general traffic manager, and he passed on those recommendations with a copy to us—he passed on those recommendations in New York with a copy to us in Cristobal.

* * * * * * *

Q. Now, at about this time, did you learn of this gold traffic from the Central Bank of Ecuador?

A. Yes. Mr. George P. Smith had received a letter to the effect that the Central Bank of Ecuador was contemplating the movement of heavy bullion shipments, and he [fol. 1456] instructed me to go down to Guayaquil and see what I could do about it.

Q. What did you find out when you got—did you go to Guayaquil?

A. Yes, I went to Guayaquil.

Q. What did you find out when you got there?

A. When I got to Guayaquil I found that the decision on the matter rested with the director general of the bank whose headquarters was at Quito, not at Guayaquil.

Q. What did you do then?

A. I proceeded immediately to Quito.

Q. Did you receive any communication from Mr. Smith while you were there?

A. Yes. Before I left Cristobal it had not been decided yet whether our recommendations in regard to a sliding scale would be adopted, and while I was up in Quito, I received wires from Mr. George P. Smith telling me that I was authorized to close a contract with the Central Bank of Ecuador providing for certain discounts, depending upon the volume of business that the bank might give us within a year. In addition to that, he informed me that I was also authorized, if I found it necessary, to offer the bank a 30-cent per hundred dollars insurance premium rate instead of the 35-cent rate that was in effect at that time.

Q. Did you close the deal with the bank?

A. Yes. Early in February I closed the deal with the bank, and for the purpose of closing the deal I only used the 5-cent differential in insurance premiums. I made no use of any other sliding scale discount. Shortly thereafter, of course, the first shipment of gold on Pan American-Grace left from Guayaquil to the United States.

Q. Did you have any discussions thereafter with the manager of Guayaquil Agencies?

A. Yes.

Q. Tell us what they were.

[fol. 1457] A. Well, it was almost immediately after I had closed this deal. I went in to see Mr. Holquin to inform him of the deal in question and discuss other things in general, and then he told me that he believed that I should abstain from soliciting this type of business and in fact all types of business that was potential cargo for the Grace Line and that I should restrict my efforts to the soliciting of such types of merchandise as were susceptible of transportation on parcel post service or some other similar service.

Q. Did you, after this episode, execute any other contracts giving shippers either in Ecuador or elsewhere in the Northern Division the benefit of this 30 cent insurance rate?

A. No. Shortly after that deal was closed with the Central Bank our authorization to grant any discounts was cancelled.

• • • • • • •

Q. Do you know whether the Grace Line reduced its rates on treasury shipments after you had secured this gold business from the Central Bank of Ecuador?

A. Yes. I learned of that.

TESTIMONY OF MR. PATCHIN IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Division of Territory

By Mr. Friendly:

pp. 3118-20:

Q. I would like to have you look at Exhibit PG-2, Page 3.

(Off the record.)

Q. I am referring to the paragraph which starts, "Mr. Roig made a statement".

A. Yes.

Q. You were present at that meeting?

A. I believe so, according to the minutes.

[fol. 1458] Q. And you heard Mr. Roig make a statement substantially as outlined there?

A. I assume I did. It is here recorded. I have no very close recollection of it.

Q. You don't recall expressing any dissent from it, Mr. Patchin?

A. No, I do not.

Q. I would like to address your attention to the portion of the statement reading:

"Pan American Airways, Inc., have an undoubted right to extend their service to Buenos Aires and to operate in the Argentine except between Buenos Aires and Mendoza," the "except" clause being in parenthesis, "if they desire."

What was the reason why Pan American did not have a right to operate between Buenos Aires and Mendoza?

A. Well, I think that arose out of a sort of general understanding developed when Pan American came down the east coast. They were interested in the east coast and we were not.

Q. What about Pan American's operating to Santiago? Why couldn't they do that?

A. Well, their mail contract didn't go to Santiago.

Q. Mr. Roig here was not talking about mail contracts: he was talking about the company's right to extend its services to Buenos Aires and to operate in the Argentine except between Buenos Aires and Mendoza.

You assented to that, and I wonder why Pan American didn't have a right to operate between Buenos Aires and Mendoza.

A. I think it was derived from a gradual acceptance of the idea of the east coast and west coast.

Q. How did that work out?

A. How did it what?

Q. How did it bear on this controversy? Buenos Aires and Mendoza were certainly east coast—

[fol. 1459] A. (interposing). I don't recollect, Mr. Friendly, just what was the reason for that language being in there.

Q. You are sure, however, that it doesn't indicate there was any agreement as to what territory Pan American Grace should operate in and what Pan American should operate in?

A. Well, I think there was a sort of general understanding with regard to this operation in Argentina: that Panagra would go to Buenos Aires and that the Pan American would not operate on the same route.

Q. When was that understanding reached?

A. I don't know of any specific understanding on that, or whether it became a general acceptance.

II

Pan American-Panagra Competition

By Mr. Cahill:

pp. 3086-91:

Q. I want to turn to a different subject, Mr. Patchin.

I want to ask you whether Mr. Trippe assured Panagra that he would not ask the Post Office Department to reduce the number of trips to Buenos Aires made by Panagra.

A. There was correspondence which I think is in the minutes of the Panagra—

Mr. Reynolds: Can we have more definitely the time to which you refer?

Mr. Cahill: Yes, I am going to ask him to fix the time, Mr. Reynolds.

A. I don't recall the date of the meeting, but in 1931, when Pan American, having extended operations on the east coast to Santos, wanted to go to Buenos Aires, there was apparently an insufficiency of funds—

By Mr. Cahill:

Q. (Interposing) In the Post Office Department?

A. In the Post Office Department.

[fol. 1460] (Continuing) —and Mr. Trippe had given us assurance in letters that I believe are in the minutes that Pan American would not seek to have those taken away from the west coast route by reason of suspending a trip or requiring a trip to be run without pay, and we accepted that assurance.

By Mr. Cahill:

Q. Do you know what Mr. Trippe did after giving you that assurance?

Mr. Friendly: I am going to ask the witness to confine himself to matters that he knows of his own personal knowledge on that.

Examiner Brown: I think that would be proper.

Mr. Friendly: No questions were asked of Mr. Trippe on this subject.

By Mr. Cahill:

Q. Did you have conversations with anybody about how Mr. Trippe or what Mr. Trippe did after he gave this assurance?

Mr. Friendly: I am going to object to that.

Mr. Reynolds: Let's find who it was with. Maybe it was with Mr. Trippe.

Mr. Friendly: Oh, yes, of course.

By Mr. Cahill:

Q. Did you have conversations with anybody?

A. Yes.

Q. With whom?

A. Well, after this time—

Mr. Friendly: The question was: with whom? I think that can be answered directly.

A. I had a conversation on the subject with the Second Assistant Postmaster General, Mr. Glover. I called on him one day—

Mr. Friendly: That is an answer, I think.

A. (Continuing) —and we were—

Mr. Friendly: Just a moment.

[fol. 1461] By Mr. Cahill:

Q. Tell us what the conversation was that you had with the Second Assistant Postmaster General, Mr. Glover, on the subject?

Mr. Friendly: I object to that.

Examiner Brown: I will permit the answer.

A. I called on him, the insufficiency of appropriations to go all the way around was a very important problem, and I called on him and asked him what was developing in that situation, and he said Mr. Trippe and Mr. McCracken, who had been, I believe, a lawyer for Nyrba, and was retained by Pan American, had been in to see him and had sug-

gested that one trip—that pay for one trip a week from Santiago to Buenos Aires be discontinued, so that it would help out the Pan American operation south of Santos on the east coast.

By Mr. Cahill:

Q. That is, the pay for one of the Panagra trips?

A. Yes.

Q. Be eliminated?

A. Be applied there—yes, be eliminated on the Santiago-Buenos Aires.

Q. For the purpose that you mentioned?

A. And I asked him what attitude he had taken, and he said he had asked them what the attitude of the Grace directors was on this matter, and he said, well, this was a matter for the Post Office Department to determine.

Q. Who said that?

A. Mr. Glover said—no, Mr. Trippe said, in reply to Mr Glover's question, that this was a matter for the Post Office Department to determine for itself, and Mr. Glover told me that he stated to them that he didn't think he should do this unless the Grace directors should concur in it, and if they did and came down to talk to him about it, he would see what could be done.

[fol. 1462] Q. Did you have conversation with Mr. Trippe about his attitude?

A. Well, subsequently at a directors meeting I mentioned to him this fact and reproached him with it, and he denied it in a mild way.

* * * * * * *

Q. Did Mr. Trippe at any time refer to hundred percent interests in companies versus 50 percent interests in companies?

* * * * * * *

A. Early in 1930 the Post Office Appropriation Bill was taking its usual course through the Appropriations Committees and the House of Congress, and there was great pressure to get additional appropriations so service could be enlarged at different points, including particularly the east coast of South America. I followed the thing with close

interest and found that there was an idea in the minds of some of the people in the Appropriations Committee that, in order to get to Buenos Aires you had to have a service down the east coast, although we were already reaching Buenos Aires via the west coast. It was a natural assumption that Argentina being on the east coast was naturally reached via the east coast, although the air route via the west coast was substantially shorter in mileage, and I made it my business to correct this mistaken idea and to bring to the attention of those dealing with the appropriations the fact that the route coming from Miami through Cuba, the Canal, down the west coast, and then over the mountains to Buenos Aires served a very large number of countries constituting a very large proportion of the total commerce between Latin America and the United States, and this was the route that ought to get an increase of service to at least two trips a week, and at one stage of that effort, I had a conversation with Mr. Trippe in Washington in which I sought more effort to the same extent—to the same end on his part, and in the course of this conversation he remarked, "Well, you don't expect that I would be as much interested where I have only a 50 percent as where I may have a hundred percent interest in the operating company."

[fol. 1463]

TESTIMONY OF MR. GARNÍ IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Division of Territory

By Mr. Cahill:

pp. 3162-64:

Q. Did you have discussions with Mr. Trippe about the proposed diversion to Cali in which Mr. Trippe stated the basis for his opposition to Panagra operating into Colombia?

A. I did.

Q. Will you fix the date of those conversations, Mr. Garni?

A. I can't give the date, but it unquestionably preceded the inauguration of the trip via Cali.

Q. Will you tell us what the conversation was? What did Mr. Trippe say?

Mr. Friendly: Do I understand these were conversations before the inauguration of any service into Cali?

The Witness: That is my recollection, yes.

By Mr. Cahill:

Q. What did Mr. Trippe say was the basis of his opposition?

A. As I recall it, Mr. Trippe's principal objection was based on the loss of revenue to the subsidiary companies in Colombia in which Panair was interested—Scadta and I believe also UMCA—by taking passengers to Cali, and he was fearful at that time that by-passing Medellin might not please the Colombian Government, and we would eventually be forced to take passengers to Medellin and possibly Turbo.

Q. Now, did you have conversations with Mr. Trippe about operations to Medellin and Turbo?

A. Yes. We told him, "Now, of course, if the Colombian Government should force us to stop in Medellin, discharging and taking on passengers, we couldn't very well go against their wishes, but we would try not to stop in Medellin for the purpose of carrying passengers as long as possible."

[fol. 1464] Q. Was anything said by Mr. Trippe as to what he wanted to do if the Government of Colombia did require stops at Medellin and Turbo by Panagra?

A. Yes. I remember a discussion we had in the presence of Mr. Roig—in fact, in most of these discussions Mr. Roig was present—and I think Mr. Trippe suggested that in the event of our being forced to take passengers to either of those two points, 75 percent of the gross revenue should be turned over to the Colombian subsidiaries who lose that revenue.

Q. And they were?
A. 75 percent.
Q. And those subsidiaries were by name—?
A. Scadta, and I think UMCA was involved in some way.
In those days UMCA I think operated from Panama as far as Medellin.
Q. Did you ever agree that Medellin and Turbo were east coast cities or were in Pan American's territory, so-called?
A. I never did, no.

By Mr. Friendly:

pp. 3196-98:

Q. I would now like you to look at this exchange of cablegrams which is Exhibit PC-37, more particularly to your cablegram of November 17, 1936, to Mr. Roig, and still more particularly to the words commencing with word 61 and continuing through word 75.

Mr. Cahill: Let the witness read the whole thing.
Examiner Brown: Surely, if he wishes.
Mr. Friendly: No objection.
Mr. Cahill: Are you on the same point that you were on, Mr. Friendly?
Mr. Friendly: I am not stating what point I am on.
Mr. Cahill: I am just trying to identify these 10 words that have been picked out of the telegram, that is all.

[fol. 1465] By Mr. Friendly:

Q. Have you read all you wished to, Mr. Garni?
A. I think the words you pointed out were 61 to 75.
Q. Yes, but feel free to read anything else that you want.
A. Yes, I have read it.
Q. Now, what do you mean by the words "Distinctly well within Panagra territory"? That is your words 65 to 69.
A. Just as it says. I never considered that Cali was on the east coast of South America or not in Panagra's territory on the west coast.
Q. What did you consider Panagra's territory was?
A. At that time?
Q. Yes.

A. Part of their territory certainly was from Pan American south.

Q. You say that was part of their territory?

A. Yes.

Mr. Cahill: That was the answer.

By Mr. Friendly:

Q. What was the rest of their territory?

A. Wherever else they might go subsequently, for instance, Panama to Miami.

Q. But not Panama to the east coast?

A. Panama to where?

Q. To the east coast?

A. No. I shouldn't think so.

II

Grace Line-Panagra Competition

By Mr. Friendly:

p. 3189:

Q. Grace Line and Pan American-Grace, in normal times, are both interested in getting passenger business to the west coast, are they not?

A. Yes.

[fol. 1466]

TESTIMONY OF MR. COGSWELL IN CAB DOCKET 779 WHICH THE GOVERNMENT INTENDS TO OFFER INTO EVIDENCE

I

Division of Territory

By Mr. Reynolds:

pp. 3306-07:

Q. Mr. Cogswell, if you will turn to Page 46 of P-34 the letter of August 31, 1928.

A. Yes, I have it.

Q. You will note, as this letter is reproduced in exhibit form, it does not indicate who signed it, other than the title of assistant secretary. This letter was signed by you, was it?

A. That is right.

Q. And were you a party to the discussions which led up to the propositions set forth in this letter, Mr. Cogswell?

A. Not most of them. I was in on some of the discussions but not most of the discussions, no.

Q. How did you happen to be selected to write the letter?

A. Well, just as a lawyer, I guess.

Q. At the request of whom?

A. I don't remember. Someone in our office. Perhaps Mr. Roig, perhaps Mr. Garni.

Q. Mr. Iglehart?

A. I rather doubt it.

Q. At the time when you drafted this letter had you had discussions with anyone in which you learned it was the intention of either Grace or Pan American to restrict the operations of the proposed new venture in such a manner that they would never go elsewhere than between the Panama Canal and Valparaiso, Chile?

A. No.

Q. Were there any discussions, regarding the subject of confining the company's operations, of any nature, Mr. Cogswell?

A. Not to my recollection.

p. 3313:

[fol. 1467] Q. At the time when that charter was drafted were there any discussions as to whether the scope of the operations of Panagra were to be other than those actually set forth in the charter?

A. Not that I can recall, no.

Q. When is the first time that you ever heard of Pan American's theory that the original agreement, a part of which is founded upon the letter of August 31, 1928, restricted the operations of Pan American-Grace in so far as territory is concerned?

A. Mr. Reynolds, I think that was sometime in 1938, but I couldn't place it exactly.

Q. You have no recollection of ever having heard it before?

A. No.

Q. Not in connection with any other extensions, Mr. Cogswell?

A. No.

II

Grace Control

By Mr. Friendly:

pp. 3334-36:

Q. Do you recall being interrogated at the time of the hearing of Mr. Garni for approval—

A. (interposing) Yes, I—

Mr. Friendly (interposing): Just a minute. Let me finish my question.

By Mr. Friendly:

Q. (continuing) —for approval of his application to become a director of Eastern Airlines?

A. Yes. I was interrogated by Mr. Sam Gates.

Q. I want to read you a few questions from that:

"Question: Is it customary for the directors of Panagra who are the representatives of Pan American Airways to take no stand upon any issue which is brought to the attention of that particular group except with the approval of Pan American Airways Corporation? [fol. 1468] "Answer: I wouldn't know, but I should judge on a matter of policy they would want the approval of their board; on other matters maybe not large they probably would not take any action they thought was contrary to the wishes of their board.

"Answer: I do not think the directors of Panagra who represent W. R. Grace and Company would take a position they thought was contrary to the wishes of the board of directors of W. R. Grace and Company. There are many matters, however, which come up

which would not be first taken up with the board of directors."

You remember being asked those questions and giving those answers, do you not?

Mr. Cahill: I submit that is circumventing your ruling as to the questions being highly speculative, Mr. Examiner.

Examiner Brown: Answer the question, please, Mr. Cogswell.

A. Yes, I remember giving that testimony.

[fol. 1471]

GOVERNMENT'S EXHIBIT 1122

Civil Action No. 90-259

UNITED STATES OF AMERICA, Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC., Defendants.

Before The Honorable Thomas F. Murphy, District Judge

EXCERPTS FROM TESTIMONY OF JUAN TRIPPE IN C.A.B. DOCKET 3589

[fol. 1472]

IN THE UNITED STATES DISTRICT COURT

FOR THE SOUTHERN DISTRICT OF NEW YORK

Civil Action No. 90-259

UNITED STATES OF AMERICA, Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC., Defendants.

TESTIMONY OF MR. TRIPPE IN CAB DOCKET 3589

By Mr. Harlan:

pp. 1270-88:

Q. Now, as a part of your agreement with W. R. Grace & Company, wasn't it agreed that the territory in South America would be divided between Pan American and Panagra?

A. Not that I know of. There was a contract executed with W. R. Grace in which Grace was given an opportunity to purchase not to exceed 50 per cent in the airline that we had under way to extend from the Canal Zone down the West Coast of South America. They did have the opportunity, over a period of time, to increase their interest in that airline up to 50 per cent, and the area which that airline was to operate in was outlined. But there was no other agreement that I know of.

Q. Wasn't it agreed that Panagra would operate on the Coast of South America and that Pan American would not?

A. Not that I know of. There was a specific agreement which could easily be made a part of this record if you wish to have it.

Q. Let me ask you if you didn't, on April 8, 1931, write a letter to Pan American-Grace Airways, Attention Mr. John D. McGregor, Vice President and General Manager, in which you stated the following:

[fol. 1473] "The arrangement between Aviation Corporation of America and W. R. Grace & Company, as a result of which your company was formed, contemplated that the sphere of operation of your company should be confined to the West Coast of South America."

Examiner Wrenn: What exhibit number was that in the Panagra Terminal Case?

Mr. Harlan: P-37, page 35.

Examiner Wrenn: If you want the contract in here, that was agreed to between them, Mr. Harlan, why don't you offer it?

Mr. Harlan: I don't believe, Mr. Examiner, that the contract itself shows that agreement, but in the record in that case it is quite clear that there was such an agreement and Mr. Trippe himself so testified at that time.

Examiner Wrenn: Was that your testimony, Mr. Trippe?

The Witness: Not that I recall. I refer again to the agreement between the two companies, and that is the only agreement that I know of. The letter to which you have just referred is a letter addressed to the executive head of Pan American-Grace Airways, of which we are 50 per cent stockholders.

. . . . . .

Q. Mr. Trippe, I want to ask you if you did not testify in the proceeding under Docket 779 that there was an agreement that Pan American should not operate down the West Coast of South America, and that Panagra should confine its activities to the West Coast of South America?

A. Mr. Harlan, to the best of my recollection, there was no agreement or understanding or anything else, other than the one I have referred to with W. R. Grace & Company.

Q. Mr. Trippe, I call your attention to this testimony of yours which appeared at page 1526 of the transcript in Docket 779, under questioning by Mr. Friendly:

The question by Mr. Friendly was: "In conducting the [fol. 1474] affairs of Pan American, have you proceeded on the basis that the letter of August 31, 1928, has imposed on Pan American an obligation not to operate down the West Coast of South America?"

I might say there that there was considerable objection to that question at that time, but it finally was answered. The first answer was:

"We have felt so, yes."

Then the second answer to the same question, which appears at page 1528, is:

"We have."

Did you so testify in that case?

A. I did if you are reading from the record. I haven't a copy of the record before me. The letter to which you refer is the same letter, I gather, that I have mentioned just a few minutes ago, the letter between Pan American and W. R. Grace & Company.

Q. You don't dispute that that was your testimony in that case, Mr. Trippe?

A. Not at all if you are reading from the record of the hearing.

Q. Now, I would like to ask you if you didn't testify, in the same case, at pages 2228 and following, as follows, under questioning by Public Counsel:

"Question: Mr. Trippe, I believe that the record indicates so far that under the original 1928 agreement and the discussions that led up to it, the contemplation was that territories would be divided in terms of East Coast and West Coast, with the exception of Panagra operation to Buenos Aires. That is generally correct, is it not?"

Your answer was: "I don't believe so."

"Mr. Friendly: I don't believe the question was what the record indicates or what Mr. Trippe thinks.

"Mr. Reynolds: The question is what Mr. Trippe thinks, in any event.

"Answer: My understanding is that the territory reserved for the joint company was the West Coast of South America, including, in so far as Colombia was concerned, [fol. 1475] the West Coast of Colombia, and that the interior and North Coast of Colombia were reserved for Pan American.

"Question by Mr. Reynolds: And south of Colombia, the West Coast of South America was reserved for the joint company of Panagra?

"Answer: That is correct.

"Question: With the exception of the operation across the Andes to Buenos Aires?

"Answer: Which was agreed to at a later date."

Did you so testify in that case?

A. If you are reading from the record, I did. Perhaps, Mr. Harlan, I could clarify the point you have in mind by pointing out that Pan American had operated between the United States and the Canal Zone and was seeking to extend its service down the West Coast. We had limited capital we had no ability to secure the rights in Peru, and, we felt, Chile, that would be required to extend the American flag service down the West Coast and ultimately across the Andes to Buenos Aires. We had organized a company to effect this operation, and we had offered W. R. Grace & Company an option to buy into that particular company, which was set up to operate a specific route, if they felt, and they had an opportunity to look at the air business, that it would perhaps be a good investment for them.

The background to which I believe you are referring has to do with the agreement between Pan American and W. R. Grace & Company, setting up that company and giving them an opportunity to participate in it if they elected to do so. The route which was to be operated by that company was delineated, and, as I recall—it was many years ago—but my recollection would be that it was from the Canal Zone to Valparaiso, Chile, and the agreement to which you refer permitted that company, of which later on Grace became a stockholder, to extend across the Andes to Buenos Aires. But this so called territorial division that you speak of was simply the route to which that company would [fol. 1476] operate, whether Grace & Company became a 50 per cent stockholder or not. Perhaps that background may be of some help to you.

Q. As a part of your division of territory with Panagra, Mr. Trippe, wasn't it true that there was at least one other company that was involved, and that is SCADTA?

Q. In other words, wasn't there an agreement that SCADTA's operations would be limited to Colombia, and that SCADTA would not be extended into Panagra territory.

Examiner Wrenn: An agreement with whom?

Mr. Harlan: Agreement between Pan American and SCADTA, and I will ask Mr. Trippe also if there was not also an agreement to that effect as to which Panagra was a party.

The Witness: Well, you have asked a number of questions, there, Mr. Harlan. I will answer the latter first. I know of no agreement between Panagra and SCADTA.

* * * * * * *

Q. That is the company that is now known as Avianca, is that correct?

A. That is correct.

Q. Over what period of time did Pan American control that company?

A. Over what period of time?

Q. Yes.

A. From the time of this contract that I refer to, which I believe was dated 1929 until some date just prior to the war, we were majority stockholders, but the contract per se left the complete management of the company in the hands of its directors and management. I believe the period the contract stipulated was ten years. Of course, I have not read this contract for some 15 years, and you will have to excuse me if I do not have all the details in mind.

Q. I would like to direct your attention, Mr. Trippe, to further testimony of yours in Docket 779, beginning at the bottom of page 1604 of the transcript.

[fol. 1477] Examiner Wrenn: Is that still on the subject of this agreement?

Mr. Harlan: Yes.

Examiner Wrenn: Well, do you not have that established? Is it necessary to drag it out any further?

Mr. Harlan: I wanted to get a little of clarification on what I thought was a three-way arrangement, between Pan American, Panagra and SCADTA. I understood Mr.

Trippe to say that he did not think there was such a three-way arrangement and I wanted to clarify this, and if he will explain his testimony, I think that will clear it up.

"Question: Now will you go on and state what position Pan American took in these discussion with regard to the possible extension of SCADTA's operations to Quito. Answer:—"

Mr. Friendly: Can we have it clear what the discussions were? The question as read does not mean anything.

Examiner Wrenn: Suppose you clear it up, Mr. Harlan.

Mr. Harlan: This appears to be a proposal of SCADTA to extend to Quito, somewhere—

Mr. Friendly: Why can't the witness be shown the transcript so he will know what it is all about, instead of having an isolated question, the meaning of which cannot possible be understood?

Examiner Wrenn: I think that is a good idea. Put the transcript in front of him, Mr. Harlan, and let him see it.

Mr. Harlan: I will be glad to.

Examiner Wrenn: No go ahead with your question.

By Mr. Harlan:

Q. After looking at that, Mr. Trippe, would you care to state what the understanding was as between Pan American, Grace and SCADTA?

A. Well, I believe, Mr. Harlan, I have already answered that question. I have tried to. The agreement with Grace was this contract relating to the organization of Pan American-Grace, to which I have referred. It outlined the area and route over which that company would operate, whether [fol. 1478] Grace became a stockholder, or a large stockholder, or not.

The agreement with SCADTA, now Avianca, was made a great many years ago. I have attempted already to outline the general provisions of that agreement, and as I say, I know of no agreement between Pan American-Grace and SCADTA, or any agreement between Grace and Pan American other than the one I have referred to.

Q. Wasn't your understanding of the agreement between Pan American and Grace that SCADTA should not be extended into Panagra's territory?

A. No, our agreement with Grace is definitive. We outlined the route on which we were going to extend the Pan American system down the West Coast of South America and we gave them an option, if they saw fit, to participate, for a period of time, not to exceed over fifty percent of that company. That is the agreement with Grace. I have already referred to the agreement with SCADTA which contemplated that the Ex-German Nationals that were pilots of that company would not operate beyond the borders of Colombia. We felt that the management of SCADTA should adhere to the commitments they had made, and which our government approved before they were made.

Q. But you did feel, and you so stated in this testimony which you have just looked at, that an extension of SCADTA, a Pan American controlled company, to Quito, would be a violation of the agreement between Pan American and Pan American-Grace and Company, is that correct?

A. No, it is not correct, because I do not believe during that period SCADTA was a Pan American controlled company. Under the agreement the management of the company was to be left to its overseers, and the agreement contemplated that the service would operate within Colombia. We did say that if that agreement was broken, that we had no other recourse but to sell our stock, which we were prepared to do.

Q. Will you explain this testimony, then? This is from page 1605 of the transcript in Docket 779: "Question: Did [fol. 1479] the Grace representatives take the position that if Pan American, as owner of a majority of the stock of SCADTA, permitted that company to extend its lines into Ecuador, that would constitute a breach of the agreement between Grace and Pan American? Answer: They did, and we agreed with them." Will you explain that?

A. Well, I have tried to do that, Mr. Harlan. As I say, the agreement that was had with SCADTA contemplated that SCADTA would operate within the territorial limits of Colombia for a period, I think, of ten years, and that was the agreement that we felt, and high policy officials of our government felt was in the interests of this country that it be consummated.

If SCADTA was to go to a neighbor and operate internationally, we felt that that was not in line with the agreement that they had made, and yet we had no recourse. They were a Colombian company, they had a Colombian board of directors, they told us at that time, as I recall it, that the Colombian government was insisting that they extend abroad, and obviously we had no other recourse but to dispose of our stock, which we were prepared to do.

• • • • • • •

Q. Mr. Trippe, as I recall, the question I asked was this: You stated that you felt that an extension by SCADTA into Ecuador would be a violation of its agreement with Pan American.

A. The agreement we had with the SCADTA organization to which I have referred, sometime ago, yes, that is correct, Mr. Harlan.

Q. Didn't you also take the position that such an extension would be a violation of the agreement between Pan American and Grace?

A. The only agreement that I know of is the one that relates to the setting up of Pan American-Grace Airways. The route to be operated by that company as an extension of the Pan American services between the United States and the zone was defined, Mr. Harlan, and we felt that after Grace had exercised its option and became a large stock-[fol. 1480] holder in that enterprise that obviously we wouldn't want to run directly into that territory. And that I gather is the point you were referring to.

Q. And that that understanding or wish that Pan American would not run into Panagra's territory would apply also to SCADTA which was controlled by Pan American.

A. Well SCADTA wasn't controlled by Pan American, as I have mentioned. The Columbian Government, we were so advised at the time, wanted that company to extend to Ecuador, and we told Mr. Grace that all we could do about it was to dispose of our stock, which we were prepared to do, but we couldn't control what that company did.

• • • • • • •

Q. Now with respect to Argentina, wasn't there an agreement between Pan American with Grace and Company as to

division of territory for purposes of operation to and from Argentina and through Argentina?

A. No, Mr. Harlan. I think perhaps what you are referring to is the original agreement between Pan American and Grace and Company, and secondly, the agreement whereby Pan American and Grace agreed to extend Pan American-Grace across the Andes to Buenos Aires. The route to be followed by Pan American-Grace was outlined in that arrangement.

Q. Perhaps the best way to get at that would be to show you Exhibit P-157 in Docket 779, which appears to be a cablegram signed by you, addressed to Pan American Airways in Buenos Aires.

Mr. Westwood: What is the date of that cablegram?

Mr. Harlan: September 13, 1930.

The Witness: I have read that, yes, sir.

By Mr. Harlan:

Q. Did you send that cablegram?

A. I don't recall sending it, but if my name is on it, I probably did. The date of it is September 13, 1930. That is some 19 years ago and I frankly don't remember the cablegram at all.

. . . . . .

[fol. 1481] Examiner Wrenn: Read it into the record.

Mr. Harlan: All right. This is headed Cablegram to Buenos Aires, Argentina, and then in parentheses, under that (in confidential code) dated September 13, 1930, addressed to Pan Air, Buenos Aires, Argentina "208: It is reported Alas has made several trips Santiago stop assume flights made in connection cancellation Nyrba Uruguay Argentine mail contracts to Chile stop confirming previous advices agreement between Pan American Airways and Pan American-Grace Airways prohibits Pan American Airways or Alas operating Buenos Aires, Mendoza, Santiago line although permitted operate any other routes east of Andes including Buenos Aires, Montevideo stop agreement likewise restricts Pan American-Grace Airways operations east of Andes to Santiago, Mendoza, Buenos Aires, Monte-

video line, confirm receipt" signed "Trippe" and the note is "This wire sent at telephonic request of Mr. Cogswell and cleared through him before sending." Carbon copies are noted to Messrs. Trippe, Wyman, Rihle, Thach, Young, McGreggor, Woodridge.

By Mr. Harlan:

Q. Just for purposes of clarification, Mr. Trippe, who was Mr. Cogswell?

A. He was an official of W. R. Grace and Company, I believe.

Q. And what is referred to here, in the expression, "Alas"?

A. I haven't any idea. It might be the name of an air line, or some other company. I haven't any idea what that refers to.

Q. Isn't it true that that was Pan American's subsidiary in Argentina?

A. Not that I recall, no. From reading that telegram it might have been some associated company of the New York, Rio and Buenos Aires Airline. I don't know.

• • • • • • •

Q. Mr. Trippe, about 1937, didn't you enter into an agreement with Grace to the effect that Panagra would not serve Medellin?

[fol. 1482] A. Not that I recall. We may have. Medellin is a city in Colombia. Is that Medellin you have reference to?

Q. Yes.

A. Served by an American Flag subsidiary of Pan American, between the Canal Zone and Medellin.

Q. Do you recall a discussion with W. R. Grace and Company as to whether Panagra could serve Medellin or not?

A. I don't recall any now.

pp. 1293-94:

Q. Mr. Trippe, does Pan American have an agreement with W. R. Grace and Panagra to the effect that Pan American has the right to fix Panagra's rates and fares?

A. Not that I know of.

Mr. Harlan: Now, Mr. Examiner, there is a letter, which is Public Counsel's Exhibit 56 in Docket 779, in which Mr. Trippe—

Mr. Friendly: What is the date of that letter?

Mr. Harlan: The date of the letter is March 10, 1930. And there is also a reply letter dated March 14, 1930, from Mr. McGregor to Mr. Trippe. The first letter, if I didn't state it, was signed by Mr. Trippe. The second letter is Public Counsel's Exhibit 57 in Docket 779.

These letters, as I interpret them, constitute an agreement—

Examiner Wrenn: Well, submit them along with the other material you are going to reproduce as exhibits.

Mr. Harlan: Is that agreeable, Mr. Friendly?

Mr. Friendly: May I see them?

Mr. Harlan: Surely.

Mr. Friendly: I have no objection. They do not remotely support the inference that is supposed to made for them, and they are 19 years old. But I have no objection to having them in.

Examiner Wrenn: Submit them along with your other exhibits. Let's go to your next incident.

[fol. 1483] Mr. Harlan: I believe, Mr. Examiner, I had better show these to Mr. Trippe and ask him if he knows if they have ever been cancelled, or whether the agreement reflected in those letters has ever been cancelled.

The Witness: Yes, I have read this letter of March 10, 1930. Now, what is your question, please?

By Mr. Harlan:

Q. Do you know whether the agreement reflected in that letter and in the reply letter of Mr. McGregor has ever been cancelled?

A. Well, the management of Pan American-Grace Airways is vested in the nominee of W. R. Grace & Company under an arrangement approved by the Board, I believe, some years ago. Obviously, that new arrangement would cancel out any previous matters of that type. I don't recall this letter. All I can say is that at the present time the management of Pan American-Grace Airways is in the

hands of Mr. Roig, president of that company, and he initiates and submits to the board of directors all matters having to do with the items that are outlined in that letter.

p. 1296:

Q. Mr. Trippe, isn't it still true that Panagra's rates and fares are filed by a Pan American employee—the Panagra tariffs?

A. They may be. We are general agents in the United States of Pan American-World Airways, but the management of that company has entirely to do with the initiation and planning of their fare structure, just as all other policy questions.

GOVERNMENT'S EXHIBIT 1124

IN THE UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF NEW YORK
Civil Action No. 90-259

UNITED STATES OF AMERICA, Plaintiff,

v.

PAN AMERICAN WORLD AIRWAYS, INC., W. R. GRACE AND COMPANY, and PAN AMERICAN-GRACE AIRWAYS, INC., Defendants.

STIPULATION

It is hereby stipulated and agreed by and between the United States of America, plaintiff in the above-entitled cause, and Pan American World Airways, Inc. (Pan American), a defendant in the above-entitled cause, that the following facts relating to acquisitions by Pan American of stock, assets or other interests in Panair do Brasil,

New York, Rio and Buenos Aires Line, Inc. (NYRBA), Tri-Motor Safety Airways, NYRBA do Brasil, Sociedad Colombo-Alemana de Transportes Aeras (SCADTA), Aerovias Nacionales de Colombia, S.A. (AVIANCA) and Uraba, Medellin and Central Airways, Inc. (UMCA) are admitted to be true for the purpose of this action, provided however that nothing contained in this stipulation shall prevent either party from introducing evidence relating to such acquisition.

(1) Panair do Brasil, New York, Rio and Buenos Aires Line, Inc., Tri-Motor Safety Airways and NYRBA do Brasil.

The New York, Rio and Buenos Aires Line, Inc. (NYRBA), incorporated on March 17, 1929, acquired all of the stock of Tri-Motor Safety Airways. On March 1, 1930, NYRBA had a route from Miami through the Caribbean to Port of Spain, down the north and east coasts of [fol. 1491] South America to British Guiana, Dutch Guiana, Brazil, Montevideo, Buenos Aires, and across the Andes to Santiago. Brazil had been unwilling to grant operating rights to foreign companies, even for through operations, and NYRBA therefore operated in Brazil through a wholly-owned local company, NYRBA do Brasil, organized on October 22, 1929.

On September 15, 1930, Pan American acquired all of the assets and business of NYRBA, Tri-Motor Safety Airways and NYRBA do Brasil, except the contracts which those companies held with foreign governments for the transportation of mail.

After Pan American purchased the assets of NYRBA, it took over NYRBA do Brasil and, on October 17, 1930, changed the name to Panair do Brasil, S.A.

A recapitalization of Panair do Brasil, effective December 7, 1943, resulted in 42 percent of that company's stock being acquired by Brazilians and the remaining 58 percent still being held by Pan American. On December 19, 1947 Pan American sold an additional 10 percent of its stock to Brazilian citizens, thus reducing its holdings to 48 percent.

(2) Sociedad Colombo-Alemana de Transportes Aereas (SCADTA), Aerovias Nacionales de Colombia, S.A. (AVIANCA)

SCADTA was organized on December 5, 1919 and began operating in 1920.

By 1927 SCADTA was flying between the Colombian cities of Bogota, Neiva, Girardot, Baranca Bermeida, Magangue, Santa Marta, Barranquilla, Cartagena, Monteria, Turbo, Quibdo and Buenaventura.

In 1929 negotiations began between Pan American and SCADTA. An agreement was signed in 1930 and consummated in 1931. Under the terms of the agreement, Pan American purchased an 84.42 percent interest in SCADTA.

In 1940 SCADTA was merged with a Colombian national company known as Servicio Aereo Colombiana (SACO). [fol. 1492] This merger resulted on June 8, 1940 in a new company called AVIANCA. As a result of its interest in SCADTA, Pan American received 64.224 percent of the shares of AVIANCA. At about the same time that the merger of SCADTA and SACO took place, legislation was enacted in Colombia requiring that the majority interest in domestic air transport companies in that country must be held by nationals of Colombia. On October 31, 1945 Pan American's interest in AVIANCA was reduced to 48.2 percent. By the end of 1954 Pan American owned approximately 38 percent of the shares of AVIANCA.

(3) Uraba, Medellin & Central Airways, Inc. (UMCA)

This company was organized by Pan American under the laws of the State of Delaware on August 24, 1931. A Colombian citizen named Mejia owned 1500 shares of the common stock and Pan American owned the remaining 1500 shares of stock in this company.

In February 1934 Pan American acquired 500 shares of stock which had been previously owned by Mejia. In December 1947 Pan American purchased the remaining shares of common stock owned by Mejia and became the sole

stockholder of UMCA. Pan American still owns 100 percent of the UMCA stock.

[fol. 1493a] OPINION

BY THE BOARD:

This proceeding involves issues relating to the provision of through services by interchange of equipment between various Latin American points and points on the east coast of the United States. Included herein are Board instituted proceedings relating to provision of one-plane service between New York and Balboa (a) by interchange of equipment at Miami, Fla., or Havana, Cuba, between Eastern Air Lines, Inc. (Eastern), and Braniff Airways, Inc. (Braniff);[1] (b) by interchange of equipment at Miami or Havana between National Airlines, Inc. (National), and Braniff;[2] or (c) by interchange of equipment at Miami be-

[1] This involves the question of extending either Eastern's route No. 6 beyond Miami to Havana, or amending Braniff's certificate to authorize service to Miami as an intermediate point on its South American route.

[2] See footnote 1 with reference to Braniff's certificate.

tween National and Pan American World Airways, Inc. (Pan American), using aircraft delivered to the latter by Pan American-Grace Airways, Inc. (Panagra), at Balboa, C. Z. There is also before us an application for approval of an agreement between Eastern and Pan American which provides for one-plane service between New York and Balboa by interchange of equipment at Miami, as well as for other through services between the northeastern part of the United States and Latin America.[3] Other related issues to be considered include (1) the question of participation by Panagra in the Eastern-Pan American agreement previously referred to; (2) the effectiveness of, and possible approval of an agreement between National and Panagra relating to the provision of through service be- [fol. 1494] tween points on the west coast of South America and New York; and (3) the modification and extension of the Through Flight Agreement between Pan American and Panagra which provides one-plane service by interchange of equipment at Balboa between points in South America served by Panagra and Miami, Fla.

The issues in this proceeding were previously before the Board, and a decision thereon was submitted for Presidential consideration. On May 14, 1953, President Eisenhower returned the Board's decision without approval or disapproval with the request that the record should be brought up to date. Pursuant to the President's request, the Board reopened the record in the proceeding in order to provide the parties with an opportunity to submit evidence, *inter alia*, as to facts and circumstances arising subsequent to the close of the hearing.[4]

After further hearing, Examiner Thomas L. Wrenn, who also heard the original proceeding, issued a Report substantially reaffirming his earlier recommendations.[5] Ex-

[3] The specific interchanges proposed are set forth on page 5 of the Examiner's recommended decision served November 13, 1953. It is to be noted that the agreement provides for participation of Panagra in a through service connecting points served by that carrier in Latin America with Washington and New York.

[4] Order No. E-7391, dated May 18, 1953.

[5] See Examiner Wrenn's Recommended Decision as issued January 23, 1952.

aminer Wrenn recommended, *inter alia*, that the Board approve the interchange agreement between Eastern and Pan American and that the record herein be held open for 60 days after decision to permit National and Braniff to negotiate and file with the Board an agreement for through service by interchange of equipment at Miami between New York and Balboa and points beyond. He also recommended that the Through Flight Agreement be approved and extended to July 1, 1960, that the application for approval of an interchange agreement between National [fol. 1494a] and Panagra, and the portion of the proceeding relating to the various Board proposed interchanges be dismissed. Bureau Counsel and each of the principal carrier parties filed exceptions to the Report and briefs in support thereof. Oral argument was heard by the Board and the case now stands submitted for decision.

At the outset, it should be made clear that basic to our consideration of the questions presented to us in this proceeding is our determination to take such action as will further the national policy directed toward reducing the burden of air mail subsidy payments. The Board is especially determined to take every practicable step, consistent with the mandate of our statute, to eliminate uneconomic aspects of our air route pattern, and to prevent the establishment of any new situations of that character. This does not mean that the Board will abruptly call a halt to the authorization of new services. That would not be in keeping with the developmental aspects of the statute or the dynamic character of air transportation. However, it does mean that special scrutiny will be applied to new route proposals to insure that the risks of additional mail pay support are minimized, and that any new subsidy requirements are heavily counter-balanced by important public benefits. Similarly, we will continue to encourage such developments as are designed to improve the air route pattern and relieve the subsidy burden on the taxpayers. These policies will of course be followed within the framework of our continued adherence to a policy of regulated and economic competition.

Since the oral argument in this case, certain events have occurred which have had a substantial impact on our na-

tional transportation policy in Latin America and on the issues before us. First, there was the institution of a suit [fol. 1495] by the Attorney General in the Federal District Court for the Southern District of New York against Pan American, W. R. Grace and Company, and Panagra, alleging, *inter alia*, that Pan American and Grace have unlawfully combined and conspired to monopolize air transportation between the United States and South America, and asking the court to direct Pan American and Grace to divest themselves of all interest in the control of Panagra. The outcome of this suit, if the Government is successful, will be the emergence of a Panagra which is independent of both Pan American and Grace interests and which constitutes a third competitive carrier for South American traffic.

The second recent development was a notice from the Brazilian government that would have had the effect in the near future of requiring Braniff to cease operations between Lima, Peru, LaPaz, Bolivia and Asuncion, Paraguay, on the one hand, and Rio de Janeiro and/or Sao Paulo on the other.[6] This notice was subsequently withdrawn, but the future plans of the Brazilian government in this regard are not known at this time. However, the uncertainty as to possible future developments in this situation remains as a significant factor in our consideration of the issues in this proceeding. Should the Lima-Rio de Janeiro segment be eliminated from Braniff's route pattern, the carrier will have lost one of its strongest segments in South America.

---

[6] Under the terms of the Bilateral Air Transport Agreement between the United States and Brazil, as amended, effective December 30, 1950, Braniff is enabled to operate between the United States on the one hand, and Rio de Janeiro and/or Sao Paulo on the other via Peru and/or Bolivia, only until the route Manaus, Goiania, Rio de Janeiro/Sao Paulo is ready for international operation. The Brazilian government notified the United States that the Manaus route would be operable shortly. Braniff is not the United States designee for the Manaus route. There is currently being heard before a Board Examiner a proceeding, Docket No. 2622, et al., in which such designee will be determined. Braniff is one of the applicants whose cases are being heard.

[fol. 1495a] The third event was the recent action of the Supreme Court overruling the Board's determination not to offset profits on the domestic routes of a carrier also having extensive international operations against its losses on its international routes in determining the amount of need or subsidy to be included in its international mail pay rate.[7] While the ultimate impact of this decision is as yet uncertain, it may affect the position of the domestic operators now providing international services.

These events, of which we take official notice, have had a considerable impact on our views as to the proper disposition of this proceeding. It is not unlikely that they have had a similar effect on the plans and aspirations of the carriers and other parties here involved. We believe that it is in the public interest temporarily to defer final disposition of this proceeding until an appropriate opportunity has been afforded the parties to reconsider their positions both in the light of these events and the views occasioned thereby which we present herein.

It was decided in the *Latin American Case*[8] that the national policy required competitive services in South America, and that such competition for the only United States flag carrier then providing international air service in that area, Pan American,[9] could be best provided by a carrier already operating domestic services. Thus, Braniff was selected to provide services between the United States, [fol. 1496] Balboa and major points in South America. However, for reasons which we need not now review, Braniff has had only limited success as a participant in the South American traffic market. It was the recognition of this fact which in part led to the institution of this pro-

---

[7] Delta Air Lines, Inc. (successor to Chicago and Southern) et al. v. Postmaster General et al., Docket Nos. 222 and 223, October Term 1953, decided February 1, 1954.

[8] 6 C.A.B. 857 (1946).

[9] We have generally considered Panagra, which is 50 percent owned by Pan American, as part of the Pan American system. See Northeast Air. et al., North Atlantic Routes, 6 C.A.B. 319, 324 (1945); Cf. Latin American Service Case, supra.

ceeding and to an interim grant of exemption authority to Braniff to serve Miami in order that Braniff be accorded better access to the bulk of South American traffic which moves to and from northeastern United States points.[10]

However, as the evidence in this case indicates, Braniff continues to be a somewhat ineffective competitor in this market. Moreover, there is persuasive evidence that approval of the Eastern-Pan American-Panagra interchange would lead to even further domination by the Pan American system of traffic between the eastern part of the United States and the West Coast of South America,[11] where the Pan American system is already carrying the great bulk of the total traffic, both United States and foreign flag. While we are not insensitive to the need for single plane service between the populous northeast area of the United States and Balboa and South America, there are other means of satisfying this requirement without abandoning an important national objective—the continuation of competitive United States flag services to South America on an economically sound basis.

We also believe that effective competition between United States Flag carriers to South America can be obtained, as will hereinafter be suggested, consistent with the important and correlative national policy—the reduction of the annual obligation of the United States for air mail subsidies. In the *Latin American* decision we said that "it was not our [fol. 1496a] intention to encourage a waste of public money or private investment through the establishment of a multiplicity of air transportation services when the potential traffic and the public interest do not require such services." The views thus expressed are particularly pertinent here. The successful conclusion of the Attorney General's suit against Pan American and W. R. Grace would lead to a wholly independent Panagra and, thus, to three competitive United States flag systems. Yet we are convinced that the available traffic potential in South America will not

[10] Order No. E-5542, adopted July 13, 1951.

[11] This includes Balboa and Argentina, as well as Bolivia, Chile, Ecuador and Peru.

warrant the subsidy support of three such services, and that their existence would lead to "a waste of public money or private investment." On the other hand, the public interest of the United States would be well served by the establishment of a single independent carrier (free from the control of either Pan American or W. R. Grace) operating between Houston and Miami, on the one hand, and the points served on the combined routes of Panagra and Braniff, on the other hand. Such a carrier would offer effective, although to a considerable extent non-duplicative, competition for Pan American, and would at the same time lead to a reduction of subsidy requirements through the consolidation of the operations to South America and the facilities of Panagra and Braniff in that area.

If we were presented with an agreement which envisaged the creation of such an independent carrier, we would also be prepared to consider promptly equipment interchange proposals which would provide access to the northeastern part of the United States for the new carrier, and thus through services to and from Balboa and South America.

This approach to the problem of South American service would not only be most consistent with the national interest objectives previously referred to, but would also benefit [fol. 1497] the private interests of Braniff and Panagra. Braniff's shareholders may obtain the opportunity of disengagement from what has not been a particularly successful undertaking from their standpoint, as well as to remove the present doubt as to their ability to retain the full measure of future profit earned on their domestic system; or they may be participants in a new enterprise which will have a more favorable competitive opportunity.

The possible advantage to Panagra is no less significant. The northern terminus of Panagra's route is presently at Balboa. It is only through the Through Flight Agreement, which is currently before us for approval, that Panagra's passengers are afforded one-plane service to Miami. If Panagra were to be deprived of its present access to Miami, especially if Braniff were to continue to have such access, either under the present terms or by approval of some

interchange agreement, Panagra's economic position would rapidly deteriorate. However reluctant we would be to terminate an arrangement which has provided an improved service for South American passengers, we cannot overlook the fact that the Through Flight Agreement may be significant with respect to the arrangement between Pan American and W. R. Grace which the Attorney General of the United States has charged to be an unlawful conspiracy in violation of the laws and statutes of the United States. Whether or not in the light of this suit we could approve such agreement, we need not now decide. However, it is apparent that a question is raised as to such approval which was not heretofore considered significant. It may also be noted that Pan American and W. R. Grace, the principal shareholders in Panagra, may be enabled to save the expense and hazards of the Attorney General's suit by the disposition of their control of Panagra.

[fol. 1497a] The solution of the problem of South American service in our view also affects decision on the other interchange services which Pan American and Eastern propose. Until we resolve appropriately the basic question as to the future of United States flag competitive services in South America, we cannot dispose of these related proposals. Obviously, unless it appears that the solution we have suggested can be worked out, we would find it most difficult under the circumstances to approve any arrangement which would result in fostering the dominance of any one system in Latin America. We are therefore deferring action on the entire proposal of Eastern and Pan American, as well as on the Through Flight Agreement, the National-Panagra Agreement and the Board instituted investigations.

We believe that a 60 day period will allow sufficient time for the parties to reconsider their positions, and to work out and file any agreements which they may believe will satisfy the basic objectives which we have here spelled out.

An appropriate order will be entered.

Gurney, Chairman, Denny, Vice Chairman, Lee and Adams, Members of the Board, concurred in the above opinion. Ryan, Member, filed the attached concurring opinion.

[fol. 1498] RYAN, Member, Concurring:

I concur in the present action which seeks to accomplish, through the voluntary action of the interested air carriers, a desirable modification of the U. S. air carrier route pattern in South America; and I concur in the 60-day deferment of final decision on the present interchange proposals until the parties have been afforded an apportunity to present to the Board an appropriate plan for remedying the deficiencies of that pattern. My concurrence, however, is based upon somewhat different reasoning than that used by my colleagues.

The deficiencies which characterize our South American air pattern and give rise to our present problem stem from the duplication of routes and services authorized by the Latin American decision of 1946. In that decision, a third U. S. trunkline carrier was authorized to serve Buenos Aires and a South American area in which every major city and many cities of minor importance were then receiving trunkline service by one or both of the U. S. flag aircarriers then serving South America. The average travel density on the routes of Ran American and Panagra in the area at the time of the decision was approximately ten per cent of the domestic route average and was closely comparable to the travel density of the routes of Continental Air Lines and Inland Air Lines, the two domestic carriers then serving the least populated areas of the United States.

This decision entered eight years ago reflected the almost universally prevailing optimism of the postwar period. The decision disregarded the then historic traffic experience, which showed a limited traffic potential in the areas involved and relied upon the assumption that popular aware-
[fol. 1498a] ness of the advantages of air transportation would recruit an infinitely large traffic volume for the support of the additional services authorized.

In an opinion opposing the authorization of a third carrier (in which I was joined by Member Branch) I pointed out that in estimating the traffic potential the Board in the 1946 decision should also have considered that the cabotage rights then enjoyed by our two carriers in South America

and which meant a substantial contribution to their revenues would, in all likelihood, be terminated by the governments that had granted them as soon as their own national airlines were organized; and that there was certain to appear a large volume of foreign carrier competition which could be counted upon to capture a large part of the available traffic; and that by reason of these factors the large traffic potential anticipated would not materialize.

In the light of these facts it was my view that the authorization of a third carrier to serve South America would not be consistent with the guiding principles which the Congress gave us in the Civil Aeronautics Act. Those principles were stated as follows in my opinion in the Latin American Case already referred to:

> "The Civil Aeronautics Act does not contemplate expansion through wasteful and destructive competition; it does not require this Board to authorize competition on every route irrespective of the economic consequences which may flow from such action. On the contrary, Section 2 of the Act expressly calls for 'competition *to the extent necessary* to assure the *sound development* of an air transportation system' properly adapted to the three-fold national needs of commerce, the Postal Service and the national defense; and the same section significantly requires this Board in its decisions to accomplish that development 'in such manner as to • • • foster *sound economic conditions* in such transportation.' (Emphasis supplied.) The com- [fol. 1499] petition intended by the Congress, therefore, was a competition of the kind and quality necessary to assure sound development and sound economic conditions in this industry.
>
> • • • • • • •
>
> "In the exercise of the informed judgment which the law requires of us, *we cannot escape history and take refuge in speculation.* We should be able to catch from the present record at least the shadowy outlines of a sufficient traffic potential before taking action which would threaten the sound economic structure of our existing South American airline network which re-

quired years of effort and millions of dollars in Federal aid from the Treasury of the United States to bring to its present state of development."

The events which have occurred in the eight years since the Latin American decision testify to the validity of the views I expressed in my opinion in that case. The cabotage rights which had contributed to our carriers' revenues have been withdrawn by most of the governments that granted them.[1] The anticipated foreign competition has become a reality and our carriers in South America are today faced with the formidable competition of such foreign air carriers as BOAC, KLM, LAV, AREA of Ecuador, Avianca, Aerolineas Argentinas and Aerovias Brasil. The Examiner in the present proceeding has found that Pan American and Panagra alone are losing more than $3,000,000 in passenger revenue annually as a result of foreign flag carrier operations between the northeastern United States and Latin America. The vast traffic potential, which was the basis of the Latin American decision, has failed to materialize.

[fol. 1499a] The net result of the situation thus created has been a rising tide of subsidy which properly gives us concern today. Thus, Pan American, which eight years ago realized an annual operating profit of over $2,000,000 on its then self-sufficient operation in South America, has recently been found by this Board to require an annual subsidy of over $11,000,000.[2] Panagra, which eight years ago required $963,000 of subsidy from the government, now requires over $2,000,000. And the cost of the Braniff operation has risen from $563,000 in 1948 to a break-even need of over $3,000,000. The total mail pay for Pan American's Latin American Division, Panagra and Braniff for 1953 is estimated at $18,000,000, of which $15,000,000 will constitute subsidy.[3]

---

[1] Argentina, Brazil, Peru and Venezuela have cancelled cabotage rights previously granted to U. S. carriers.

[2] Order No. E-7650, adopted August 19, 1953.

[3] Unless otherwise indicated, all figures on mail pay and break-even need are based on applicable mail rate orders and the carriers' reports submitted to the Board.

In an effort to improve the economic and competitive position of Braniff, the Board by exemption extended that carrier to Miami on a temporary basis in order that it might obtain access to the traffic to and from the eastern part of the United States. The result was an increase rather than a decrease in Braniff's subsidy need. Thus, Braniff's break-even need for the year ending August 1951, the last full year prior to its entry into Miami, was approximately $1,670,000. During the first full year after the carrier's access to Miami its break-even need arose to $3,382,000. The uncontroverted evidence in the present case showed an estimated cost to the government of more than one thousand dollars for each of the additional passengers which Braniff gained from its entry into Miami.

[fol. 1500] It is my opinion that the uneconomic consequences that have overtaken the Braniff operation cannot be justly attributed to any shortcomings of management. On the contrary, this air carrier has earnestly and intelligently employed its trained and experienced personnel to meet the statutory standard of honest, economic and efficient management. But management in a public utility enterprise must operate within the framework of public regulatory policies, and if, in any instance, unsound economic conditions result from regulatory policy, the ablest of managements cannot be expected to achieve the economic results which it might otherwise be able to accomplish.

The Board's interim opinion cites the Attorney General's pending suit against Pan American, W. R. Grace & Company and Panagra for unlawful conspiracy to violate the anti-trust laws and designed to require Pan American and Grace to divest themselves of all interests in and control of Panagra. This event is said to have had "a considerable impact on our views as to the proper disposition of this proceeding" and the suggestion is made that Pan American and W. R. Grace might "save the expense and hazards of the Attorney General's suit by the disposition of their control of Panagra."

I cannot agree with the propriety of relying upon the pending anti-trust suit as a basis for the Board's thinking

in the present case. It is one of the most cherished traditions of our American jurisprudence that an accusation does not establish the fact. Furthermore, the suggestion that Pan American and Grace might "save the expense and hazards of the Attorney General's suit by the disposition of their control of Panagra" is likely to be misunderstood as an indirect pressure to force changes in the route pattern which the Board deems desirable, and which has noth-[fol.1500a] ing to do with the merits of the question involved in the Attorney General's suit.

Reliance on the anti-trust suit would seem to be particularly inappropriate in the case of the Through Flight Agreement. At a time when the Board was fully aware of the difficulties arising from the joint ownership of Panagra and was conferring with the Department of Justice regarding this matter, it nevertheless approved the Through Flight Agreement as not being either adverse to or inconsistent with the public interest. In approving this agreement the Board stated that it considered the arrangement to be an "improvement over the past situation * * * and as such beneficial to the public," and that "such transaction does not result in creating a monopoly." [1] To consider that the filing of the pending suit, therefore, has a prejudicial significance for the through flight arrangement seems hardly consistent with the Board's previous statements. I trust it is obvious that my references to the Attorney General's suit are not intended to imply any views as to the merits of that suit.

In the foregoing pages I have sought to present my own views as to the appropriate justification for the unprecedented action which the Board here takes to accomplish a major change in the South American route pattern. The problem confronting us is one of great complexity and is probably not susceptible of satisfactory solution without the voluntary and willing assistance of the carriers involved. While the course here taken is somewhat unique, we have the right to hope that the interested carriers may be able to work out, by voluntary action, a plan compatible

[1] *Pan American-Panagra Agreement*, 8 CAB 50, 57, 63 (1947).

with the Civil Aeronautics Act for correcting the deficiencies in our existing South American route pattern and thereby make possible a substantial reduction in the federal subsidy.

/s/ OSWALD RYAN

[fol. 1501]

Order No. E-8189

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.,
on the 26th day of March, 1954

Docket No. 4882 *et al.*

In the Matter of the

REOPENED NEW YORK-BALBOA
THROUGH SERVICE PROCEEDING

ORDER

A full public hearing having been held in the above-entitled proceeding, and the Board, upon consideration of the record, having issued its opinion containing its findings and conclusions, which is attached hereto and made a part hereof;

IT IS ORDERED, That decision herein be and it hereby is deferred temporarily.

By the Civil Aeronautics Board:

/s/ M. C. MULLIGAN

M. C. Mulligan
Secretary

(SEAL)

[fol. 1502]

GOVERNMENT'S EXHIBIT 1129

E-9109
E-9110

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Served:

DOCKET NO. 4882 ET AL.

REOPENED NEW YORK-BALBOA THROUGH SERVICE PROCEEDING

Decided: November 23, 1954

Eastern-Pan American Interchange Agreement disapproved as contrary to the public interest.

Eastern-Braniff interchange between New York-Washington-Miami on Eastern's route No. 6 and Balboa and points south thereof on Braniff's South American route found to be in the public interest; record held open for 60 days to allow parties to enter into an agreement for such an interchange, and decision deferred with respect to ordering a compulsory interchange between Eastern and Braniff.

Braniff's Latin American route amended to authorize service to Miami, Florida, on interchange flights. Braniff's exemption authority to serve Miami, Florida, continued in effect until Board approval of an interchange agreement between Eastern and Braniff or until Board action upon a compulsory interchange between Eastern and Braniff.

Pan American-Panagra Through Flight Agreement approved subject to the condition that flights pursuant thereto shall be operated through to Washington and New York under the terms of an interchange agree-

ment to be filed between National, Pan American and Panagra; record held open for 60 days to allow entry into and filing for Board approval of an agreement between National, Pan American and Panagra for interchange service between New York, Washington, Miami and South America.

All other proceedings, applications, petitions and motions dismissed or denied.

Appearances:

E. Smythe Gambrell, Harold L. Russell, Robert E. Hicks and Oscar M. Smith for Eastern Air Lines, Inc.

Henry J. Friendly and J. Howard Haustra for Pan American World Airways, Inc.

John W. Cross and Richard A. Fitzgerald for National Airlines, Inc.

[fol. 1502a] John J. Burns and Albert E. Rice, for Pan American-Grace Airways, Inc.

Paul A. Porter and William L. McGovern for Pan American-Grace Airways, Inc. and its directors nominated by Pan American World Airways, Inc.

Hubert A. Schneider and B. Howell Hill for Braniff Airways, Inc.,

R. S. Maurer and L. E. Black, Jr., for Chicago and Southern Air Lines, Inc.

D. Franklin Kell, George C. Neal and James Bell for Delta Air Lines, Inc.

John E. Kirk and Joel C. Wilcox for Greater Miami Traffic Association.

Francis A. Mulhern, S. H. Moerman and W. B. Robinson for Port of New York Authority.

George C. Neal for Councils 38 and 83 of Air Line Pilots Association.

Leslie G. Donahue and Francis H. McAdams for Bureau of Air Operations, Civil Aeronautics Board.

OPINION

By the Board:

This proceeding involves issues relating to the provisions of through services by interchange of equipment be-

tween various Latin American points and points on the east coast of the United States. Included herein are the Board instituted proceedings relating to provision of one-plane service between New York and Balboa (a) by interchange of equipment at Miami, Fla., or Havana, Cuba, between Eastern Air Lines, Inc. (Eastern), and Braniff Airways, Inc. (Braniff);[1] (b) by interchange of equipment at Miami or Havana between National Airlines, Inc. (National), and Braniff;[2] or (c) by interchange of equipment at Miami between National and Pan American World Airways, Inc. (Pan American); using aircraft delivered to the latter by Pan American-Grace Airways, Inc. (Panagra), at Balboa, C. Z. There is also before us an application for approval of an agreement between Eastern and Pan American which provides for one-plane service between [fol. 1503] New York and Balboa by interchange of equipment at Miami, as well as for other through services between the Northeastern part of the United States and Latin America.[3] Other related issues to be considered include (1) the question of participation by Panagra in the Eastern-Pan American agreement previously referred to; (2) the effectiveness of, and possible approval of an agreement between National and Panagra relating to the provision of through service between points on the west coast of South America and New York; and (3) the modification and extension of the Through Flight Agreement between Pan American and Panagra which provides one-plane service by interchange of equipment at Balboa between points in South America served by Panagra and Miami, Florida.

---

[1] This involves the question of extending either Eastern's route No. 6 beyond Miami to Havana, or amending Braniff's certificate to authorize service to Miami as an intermediate point on its South American route.

[2] See Footnote 1 with reference to Braniff's certificate.

[3] The specific interchanges proposed are set forth in the Examiner's Recommended Decision, issued November 13, 1953. Portions of that recommended decision appear, infra, as Appendix II. See pages 1-2 of Appendix II for a more detailed statement of the issues.

The issues in this proceeding were previously before the Board, and a decision thereon dated June 23, 1952, was submitted for Presidential consideration. On May 14, 1953, President Eisenhower returned the Board decision without approval or disapproval but with the request that the record be brought up to date. Pursuant to the President's request, the Board reopened the record in the proceeding in order to provide the parties with an opportunity to submit evidence, *inter alia*, as to facts and circumstances arising subsequent to the close of the hearing.[4]

After further hearing, Examiner Thomas L. Wrenn, who also heard the original proceeding, issued a recommended decision substantially reaffirming his earlier findings and conclusions.[5] Examiner Wrenn recommended, *inter alia*, that the Board approve the interchange agreement between Eastern and Pan American and that the record herein be [fol. 1503a] held open for 60 days after decision to permit National and Braniff to negotiate and file with the Board an agreement for through service by interchange of equipment at Miami between New York and Balboa and points beyond. He also recommended that the Through Flight Agreement be approved and extended to July 1, 1960, that the application for approval of an interchange agreement between National and Panagra and the portion of the proceeding relating to the various Board proposed interchanges be dismissed. Bureau Counsel and each of the principal carrier parties filed exceptions to the recommended decision and briefs in support thereof. Oral argument was heard by the Board and a decision was issued on March 26, 1954 deferring, temporarily, final action in this case.[6]

As stated in that decision the Board was convinced that "the public interest of the United States would be well served by the establishment of a single independent car-

[4] Order Serial No. E-7391, dated May 18, 1953.

[5] See Examiner Wrenn's earlier Recommended Decision as issued January 23, 1952.

[6] Order Serial No. E-8189.

rier (free from the control of either Pan American or W. R. Grace) operating between Houston and Miami, on the one hand, and the points served on the combined routes of Panagra and Braniff, on the other hand. Such a carrier would offer effective, although to a considerable extent non-duplicative, competition for Pan American, and would at the same time lead to a reduction of subsidiary requirements through the consolidation of the operations to South America and the facilities of Panagra and Braniff in that area." We requested in our March decision that the carriers reconsider their positions as to the solution of the problem of South American service and gave them a 60-day period in which to work out and file any agreements which they might feel would satisfy the basic objectives set forth in that decision. That period of time for carrier action has now passed and no such agreement has been filed with the Board. The case, therefore, now stands submitted for decision.

[fol. 1504] After reviewing the additional evidence adduced pursuant to President Eisenhower's request in further hearing, briefs and oral argument, we now reaffirm our earlier decision of June 23, 1952, and adopt it as a part of this decision. We are therefore resubmitting to the President our earlier findings as originally written, since with minor exceptions the new evidence now before us supports and strengthens our decision of June 23, 1952.[7] That decision as originally submitted comprises the next 20 pages, while the succeeding pages of this decision contain our further findings based upon the new evidence adduced upon rehearing. Appendices I and II consist of those portions of the Examiner's two reports, dated January 23, 1952, and November 13, 1953, which we adopt as part of our opinion herein.

---

[7] In several instances, changes in circumstances since 1952 have altered or nullified the need for certain references and other supporting data originally shown in our June 23, 1952 decision. In such cases, the references have either been omitted from this decision or have been supplemented by other references, enclosed in brackets [ ].

In this case, the Board recognizes that it has before it a matter of considerable importance to the development and promotion of air transportation. The Latin American area is today the largest foreign air transportation market to which American flag carriers have access. Moreover, it is a market which has expanded tremendously in the past, and which may be expected to continue to grow in the immediate as well as more distant future. The importance of this market and the rapidity of its growth is illustrated [fol. 1504a] in the table set forth below.[8] These figures indicate that whereas travel between Europe and the United States has increased less than 15 percent in the period between 1931-1951, travel between the United States and Latin America has almost trebled. And of even greater significance is the fact that whereas by 1951, air transportation had only captured approximately 35 percent of the European travel market, it had obtained about 80 percent of the Latin American market.

We are here concerned with proposals for the provision of improved service between Latin America and the northeastern part of the United States, the area providing the largest Latin American traffic potential in the country.[9] In view of the importance of this traffic to the individual destinies of the carriers party to this proceeding, as well as to our social, cultural, and economic relationships with the Latin American countries, we have here focused not only upon the immediate advantages to the traveling pub-

Latin America	395,278	1,148,816	15,621	928,157
Europe	873,310	981,819	—	318,198

[a] Figures obtained from United States Department of Justice Immigration and Naturalization Service. Figures for 1951 are for the year ended June 30, 1951.

[9] While current Origination and Destination statistics would show a larger number of passengers for the Miami area, it is obvious that the larger part of this is gateway traffic bound to or from other areas.

lic to be obtained through the provision of through one-plane service in place of existing two-plane connecting ser-[fol. 1505] vice[10] but also on the long range effect of the various proposals on our air transportation system.[11]

It is to be noted that in the endeavor to obtain an air transportation system commensurate with the needs of the commerce of the United States and the national defense, the Board, as well as the President, have relied principally on carrier competition to achieve those economies and improvements in service which are necessary for these purposes. This reliance on competition is responsive to the declaration of policy in section 2 of the Act which states in pertinent part that the Board shall consider " • • • as being in the public interest • • • competition to the extent necessary to assure the sound development of an air transportation system properly adapted to the needs of the foreign and domestic commerce of the United States, of the postal service, and of the national defense • • • ." We have, therefore, carefully examined the proposals before us, particularly in the light of their effect on carrier competition in the areas involved.[12]

---

[10] See Order Serial No. E-5282 dated April 12, 1954, p. 5-6, for a description of the improvements over a connecting service offered by an interchange.

[11] This policy is consistent with that followed in the *Latin American Air Service Case*, 6 C.A.B. 857, where we stated: "The basic criterion is the creation of an air transportation system which will be adequate to the present and the future needs of the foreign and domestic commerce of the United States, the postal service and the national defense. This objective is important in the determination of the route pattern selected for service, and in the selection of the particular carrier to provide service over the approved route. The future requirements of the foreign and domestic commerce are as important as those of the immediate present, for we are building an air transportation system for the future. It may sometimes happen that the carrier which can contribute the most in the short run may not be the carrier that can contribute the most in the long run, and where that choice is presented, long-run considerations should rule." 6 CAB 857, 899.

[12] We have no doubt as to the relevance of such an inquiry under the circumstances of this case. *Southern Service to the West Case, Supplemental Opinion*, Order Serial No. E-6105, adopted February 11, 1952, pp. 4-7. [See also supplemental opinion, Order Serial No. E-8466, adopted June 25, 1954, pp. 18-21.]

[fol. 1505a] The interchange schedules which are proposed for operation under the Pan American-Eastern Interchange Agreement as well as the pertinent traffic figures with relation to the schedules are set forth in Appendix I attached hereto. Eastern estimates that these interchanges would offer first one-plane United States flag carrier service to a total of 33,922 passengers yearly of which 10,111 would be between Eastern and Panagra interchange points, 12,415 would be between Eastern and Pan American interchange points[13] and 11,396 would be New York-Bahamas traffic now carried by British Overseas Airways Corporation. The further contention is made that the number given first one-plane service exceeds that of any other interchange proposal approved by the Board.[14]

We do not take issue with these contentions as to the extent of initial direct benefits to be derived from these interchanges. However, after carefully weighing these benefits, we have come to the conclusion that the agreement is not in the public interest, and should not be approved. We have reached this conclusion because we believe that approval of this agreement would preclude the attainment in certain areas of the competitive balance we deem necessary for the long-term promotion and development of air transportation therein, and with respect to other areas would adversely affect such competitive balance as has already been reached.

First, let us consider the probable effect of the proposed Eastern Pan American-Panagra interchange on the division of traffic moving between the northeastern United States, Balboa, and points on the west coast of South [fol. 1506] America.[15] It is clear that the Eastern-Pan

[13] A substantial part of this traffic currently receives one-plane foreign flag service.

[14] See Appendix I, p. 11 for the comparison.

[15] We find substantial agreement on the question of public interest in at least one interchange service between New York and Balboa. There is disagreement, however, as to the economic feasibility of two such interchanges.

References herein to "points on the west coast of South America" include Argentina, as well as Bolivia, Chile, Ecuador, and Peru. See note to Appendix IA attached hereto.

American-Panagra combination would have an overwhelming competitive advantage over other American flag service both in South America and in the United States. This advantage flows from a variety of factors including the vast discrepancies, in the combine's favor, in the size of the competing carriers, their entrenched position in the market, and the much larger sales organization and budgets available for the promotion of their service.

For example, the gross capital assets of Pan American exceeded 144 million dollars as of December 31, 1950, of which 45 million were assigned to the Latin American Division; the gross capital assets of Eastern exceeded 38 million dollars and Panagra 12 million. Thus, the total gross capital assets of this combination exceeded 194 million dollars. The same figures for National and Braniff are 14 million and 12 million, or a total of 26 million. In total route mileage, number of points served, average daily route miles in operation and gross revenues, the disparity in size is equally evident. In traffic and sales expense, the Eastern-Pan American (Latin American Division only)-Panagra combination spent over 15 million dollars in the year ended December 31, 1950, whereas the total for National and Braniff (International Division only) was less than 3 million. Pan American and Panagra and Eastern dominate the sale of tickets sold in the United States for Latin American passage on United States certificated carriers. For example, in the survey month September 1950, Pan American sold 2,705 passenger tickets, Panagra sold 606, and [fol. 1506a] Eastern sold 767. By way of contrast Braniff sold only 325 and National 107 (exclusive of Havana). The significance of these factors cannot be over emphasized when the question of relative competitive strength is being weighed. To these obvious advantages must also be added the intangible but nevertheless important factor of Pan American's favorable and long standing close relationship with the travel agents who sell a considerable portion of the tickets for this travel. In this connection the size and variety of transportation services offered by the Pan American system are important to securing the primary loyalty of such agents.

It is thus not too surprising to note that Pan American's own exhibits show that during the first six months of 1951 that carrier participated in the carriage of almost 92 percent of the total traffic carried by both United States and foreign flag carriers between the northeastern part of the United States and the west coast of South America,[16] and an even higher percentage of the remainder of the east coast traffic to these South American countries.

The proponents of the Eastern-Pan American-Panagra interchange recognize the competitive superiority of the service they propose to offer between the northeast and the west coast of South America over the alternate service of National and Braniff connecting at Havana, and the probable effect of that superiority on the division of South American-northeastern United States traffic between the carriers. While they argue that smaller carriers have furnished effective competition with larger carriers on particular route segments, they have not supported such contention with facts demonstrating that disparities of the magnitude of these here involved have been successfully [fol. 1507] overcome by a vigorous smaller competitor. However, it seems that they place greater emphasis on other arguments. Thus, insofar as the effect of the interchange would be to deny Braniff any substantial participation in traffic from the northeast, it is claimed that this is consistent with the decision in the *Latin American Service Case*, 6 C.A.B. 857, on the ground that Braniff was only certificated to tap the traffic potential between the mid-west area of the United States and South American points. Insofar as the proposed interchange would deliver to Eastern all South American passengers moving over Panagra and Pan American routes beyond Miami to and from the northeast, and thus adversely affect National's traffic between Miami and New York, it is contended that Eastern as the historical carrier of the connecting traffic would only be recovering traffic previously diverted from it by National.

---

[16] [This includes Balboa and Argentina, as well as Bolivia, Chile, Ecuador and Peru.]

These contentions rest on unsound premises. One of the reasons for certificating Braniff to serve South America was to provide competition for the Pan American system in that area. It was expected that in addition to tapping the midwest potential Braniff would be enabled to compete effectively for northeastern United States traffic to South America. However, for various reasons the relative importance of which need not be here determined, the Havana connection with National has never become effective, and until our recent decision extending Braniff to Miami,[17] Braniff had not participated substantially in this traffic.[18] We deem it necessary in accordance with the basic policy decision in the *Latin American Case* to provide Braniff with [fol. 1507a] effective access to this market so that its service in South America may compete vigorously with Pan American's services. By the same token we certificated National between New York and Miami in order that this route, one of the most important in our domestic system, could obtain the advantages which flow from competitive services.[19] National has only in the recent past attained effective competitive status on this route. We are convinced that it is not in the public interest to jeopardize the measure of competitive balance already attained on this route by excluding National from any real share of the substantial traffic to and from Balboa and South America controlled by Pan American and Panagra.[20]

---

[17] Exemption Order Serial No. E-5542, adopted July 13, 1951.

[18] See Pan American's brief to the Board, p. 24, "With Eastern being required by the established route structure to work with Pan American at Miami, and with National having chosen to do so likewise, it is not surprising that Braniff has obtained only 6% * * * of the business between the northeast and points served competitively through the Miami gateway."

[19] *Colonial Air, et al., Atlantic Seaboard Operation*, 4 C.A.B. 552, 553-560 (1944).

[20] National estimates that the Eastern-Pan American-Panagra interchange would subject to diversion 9,512,540 revenue passenger miles now generated by National or an amount in excess of one-half million dollars in revenue. It is true that these figures are based upon traffic generated during a period when W. R. Grace & Co. was a large stockholder in National, which is not now the

Thus, independent of any comparison with the other interchange possibilities before us, we would reject the proposed Eastern-Pan American-Panagra interchange service to Balboa and the west coast of South America in view of the extremely adverse impact[21] on competitive carriers, and on the long range development and promotion of air transportation, even though there would be an immediate benefit to the public in the form of an improved one-plane [fol. 1508] service between the United States and the west coast of South America.[22] However, our rejection of the proposed interchange does not necessarily preclude the establishment of an improved service. There are other interchange possibilities before us that can provide a one-plane service without distorting the competitive balance we have sought to establish.

Thus, instead of permitting the three strongest carriers to enter into an interchange relationship, it would be more desirable if Braniff, the weaker carrier in South America, were paired with Eastern, the stronger carrier in the United States. Braniff submitted proposed schedules indicating that a daily service would be operated between New York, Washington, and Miami on Eastern's route on the one hand, and Balboa on the other hand. Four of these flights would also serve Lima, Sao Paulo, and Rio de Janeiro. Service to Guayaquil and Lima would be offered by connection at

---

case. Regardless of the reasons by which National obtained this traffic, its loss would seriously affect the carrier's competitive position. It is to be noted that we are not here concerned with a proposal for a return to free competition for this traffic, in which National's loss would not be so great, but with a projected interchange which would exclude National from obtaining any real share of this traffic.

[21] For example, if an Eastern-Pan American-Panagra interchange were inaugurated, and Braniff was relegated to a connecting service at Havana with National, Braniff estimates, not unreasonably, that it would lose substantially all its international traffic to the eastern United States. This now amounts to 16.8% of its international passenger revenues and 59.9% of its international cargo revenues.

[22] Compare *Chicago and Southern-Pan American Interchange Agreement Case*, Order Serial No. E-6452, adopted May 23, 1952.

Balboa on two of the other three days of the week. Braniff notes that these schedules were based upon the hypothesis that Braniff equipment exclusively would be used in the interchange, in which case it would require acquisition of an additional DC-6 aircraft. Given cooperation by Eastern and use of some of its equipment, which the latter's own economic interest would dictate if an interchange relationship were established, Braniff notes that more through service beyond Balboa would be offered. Thus, it is clear that an Eastern-Braniff interchange would offer the public substantially the same through one-plane service advantages as under the proposal previously considered as well as new single-plane service to Sao Paulo, Rio de Janeiro, and [fol. 1508a] Buenos Aires[23] which would permit effective competition with Pan American's current single-plane service between these points and New York. On the other hand, Braniff would be receiving the support of the second largest sales organization in the United States for Latin American air travel (Pan American is the largest) and coupled with the improved service it would offer to the more important traffic-generating sources, would thus undoubtedly become a more effective competitor in the South American market. On the other hand, Eastern's competitive position on the Miami-New York route would not be seriously affected,[24] nor would the carrier be subjected to

[23] The Eastern-Pan American-Panagra interchange would also serve Buenos Aires, but the effectiveness of competition between this service and Pan American's own single-plane service to New York is obviously suspect.

[24] Eastern, for example, carried 135,936 passengers between New York and Miami in the first six months of 1951. In the same period, National carried only 79,676 such passengers. Eastern's greater traffic generation extended to other northeastern points served in competition with National. It is to be noted that during this period National carried about 65 percent of the South American connecting traffic originating or terminating on Panagra's routes bound to or from northeastern United States. In this period there were approximately 68 such passengers in both directions per day. Thus, at worst, Eastern would suffer a net loss of about 25 passengers a day in both directions on its east coast route. In comparison with the traffic now carried by Eastern, this is not a serious loss of traffic. However, even this estimate is unduly pessimistic considering the traffic generating potentiality of the Braniff-Eastern interchange.

debilitating loss of revenue, especially in view of its opportunity to work with Braniff in the development and promotion of Balboa and South American traffic.

Financially, it appears that the relatively small increase of slightly more than 12 one-way passengers a month would be enough to meet the additional costs to Braniff of the interchange service proposed.[25] The improved service to be offered would appear to be more than adequate to attract this amount of traffic. To the extent that additional traffic is developed, the cost to the Government in terms of mail [fol. 1509] pay support for Braniff should be decreased. On the other hand, it is true that to the extent that traffic is diverted from Pan American and Panagra, the subsidy paid to those carriers may have to be increased. However, it is our opinion that the stimulus derived from more effective competition should in this instance have a promotional effect on total traffic carried by these carriers so that the overall effect of our action will not be merely to transfer traffic from one carrier to another, but to increase the total traffic of both and thus to decrease total mail pay support for the three carriers.

We prefer a Braniff-Eastern interchange to an interchange aligning either Braniff or Pan American with National because, by establishing Eastern as Braniff's interchange partner, we give Braniff the most effective access to the northeast available in this proceeding. Thus we enable that carrier to compete in South America on more favorable terms than in the past with the much larger and well-entrenched Pan American system. In this way, we effectively implement the decision in the *Latin American Service Case* with respect to establishment of a service competitive with Pan American.[26]

It has been contended that approval of an Eastern-Braniff interchange would cause Braniff to "abandon the middle west", in favor of the northeastern United States

---

[25] Braniff's Exhibits, Vol. 1, p. 145.

[26] Cf. *Pan American World Airways, Inc.—Guatemala City/Los Angeles/San Francisco Operations*, Order Serial No. E-5360, decided April 12, 1950, p. 4.

market. This argument is unsound. It was our intention that Braniff would serve the northeast through connection at Havana, just as Pan American serves it through connection at Miami. The fact that Braniff was pushed into exerting practically all its efforts into development of the mid-west market by a denial of real access to the northeast, in which denial Pan American played its part, should not [fol. 1509a] forever preclude that carrier from striving to provide competitive service in both mid-west and northeastern markets. And, since the latter is the largest source of traffic, and is given more frequent service by competitive carriers, we cannot find neglect of the mid-west when Braniff at the outset elects to provide the northeast with more service than the mid-west. As a matter of fact, the schedules proposed by Braniff call for four flights weekly into South America from Houston, which is the same amount of service that Braniff provided prior to obtaining temporary authority to serve Miami to tap the traffic potential of the northeast.[27] Moreover, we are convinced that, if the traffic warrants it, as equipment becomes available, Braniff will substantially increase service to the mid-west.

It is also to be noted that a Braniff-Eastern interchange will bring together carriers which have no conflicting interest in the Latin American area, and which are already interchange partners for traffic moving into the Miami terminal.[28] Having already worked out many operational problems associated with the interchange, they should not only be familiar with each other's operational characteristics, but should be able to negotiate successfully another interchange arrangement.

---

[27] Since inauguration of service to Miami, Braniff has been serving the mid-west with a daily schedule. The traffic support for the additional service has been derived from the northeast.

[28] Braniff and Eastern are now providing interchange service between Denver and Miami. Moreover, the Board has just approved an application for approval of a merger between Braniff and Mid-Continent Airlines, Inc., which when finally consummated will make Braniff a partner in a second interchange with Eastern between Kansas City and Miami. Order Serial No. E-6459, adopted May 26, 1952.

By way of contrast, Pan American and Eastern have important conflicting interests in the very Latin American areas in which they propose to run interchange services. Thus, both Pan American and Eastern have competitive routes between San Juan, Puerto Rico, on the one hand, and New York and Miami, on the other. And, Pan Ameri- [fol. 1510] can's own routes to South America through the San Juan cut-off would definitely be competitive with the proposed Eastern-Pan American interchange services through the Miami gateway. The conflict of interest is obvious. For example, one of the interchange proposals calls for service to Maracaibo by Eastern and Pan American through Miami. However, Pan American's own one-carrier service through San Juan would be competitive with this interchange. As a matter of fact, in September 1950, Pan American carried more passengers between New York and Maracaibo over its own route than it did by connection at Miami with other[29] carriers. The conflict of interest in promoting the interchange service at the expense of its own one-carrier service is obvious. It is clearly preferable to have an interchange service where the carriers' loyalty to such service is not in conflict with their independent economic interests.

We recognize, of course, that Braniff and Eastern are not end-on carriers and that to accomplish the interchange either Braniff's routes must be extended from Havana to Miami, or Eastern's from Miami to Havana. The same considerations which compel our favoring a Braniff-Eastern interchange support a finding that the public convenience and necessity require such a route extension. In weighing the relative merits of a Braniff or Eastern extension, we deem the former preferable in view of the greater ease with which operating and customs clearance problems involved in the interchange flights can be handled at Miami rather than Havana. Therefore, we shall dismiss the Board-instituted proceeding insofar as it relates to extension of

[29] Of a total of 56 passengers moving between these points during September 1950, Pan American carried 26 all the way and 21 to or from Miami, 13 of which traveled over Eastern's route and 8 over National's.

Eastern's route to Havana and deny Eastern's application for similar authority.[30]

[fol. 1510a] In accordance with our previous order limiting the issue of route extension between Miami and Havana to flights for interchange purposes solely,[31] we shall so limit Braniff's authority, and shall also provide that Braniff shall not have the right to operate shuttle schedules between Miami and Havana, or to operate schedules or carry traffic between points on its domestic route and Miami. However, we shall permit Braniff to carry fill-up traffic between Miami and Havana if interchange flights are routed through the latter point.[32] This will, of course, subject National and Pan American to diversion of Miami-Havana traffic, and National from traffic between Havana and the cities on its New York-Miami route. However, since the number of schedules which could be operated daily would be limited, at least initially, to slightly more than one a day,[33] and since at least the northbound schedule would lack departure reliability due to the distances involved from probable point of origin (whether Balboa, or a point south thereof) the extent of such diversion should not be so substantial as to outweigh the other benefits resulting from the extension and the interchange it will accommodate.[34]

---

[30] Eastern did not prosecute such application, introducing no evidence in support thereof.

[31] Order Serial No. E-5642, dated August 23, 1951.

[32] We are not unaware of the necessity for obtaining appropriate operating rights from the Cuban government in order to permit the inauguration of Braniff-Eastern interchange services between Miami and Havana. However, even though the possibility exists of some delay in the inauguration of such service, this would not be fatal to the interchange, since the flights could nonstop Havana between Miami and Balboa without debilitating loss of traffic or sacrifice of payload for operational reasons.

[33] In comparison, Pan American, for example, in May 1952, according to the Official Traffic Guide, operated 6 round-trips daily between Miami and Havana, while National operated 3 schedules in each direction between such points and two a day between New York and Havana.

[34] The major possible diversion would be from National's New York-Havana traffic. However, the amount of such diversion should be less than one-half that resulting from the proposed Eastern-Pan

[fol. 1511] It has been contended that it is not in the public interest for the Board to seek inauguration of a Braniff-Eastern interchange in preference to an Eastern-Pan American-Panagra interchange because of the delays which may be encountered in initiating the former over the legal objections of the proponents of the latter. As we have already indicated, we would disapprove the Eastern-Pan American agreement even if we had no alternate choice immediately before us. Thus, the matter of delay in initiating the interchange is not pertinent. Moreover, we seriously doubt whether the air carriers here involved will continue to press for an agreement which the Board, after careful consideration, deems adverse to the public interest.

It has been argued that we are without power to order Eastern to interchange equipment with Braniff at Miami as set forth in the order instituting this proceeding.[35] The argument is based, in part, upon the contention that the proposed interchange will primarily benefit foreign air transportation for which, it is conceded, we have no power to compel an interchange. However, it is clear that an interchange at Miami offering one-plane service between Balboa, C.Z., and Washington, D. C., and New York City will convenience the passengers who would be moving only in overseas air transportation.[36] We deem our authority

---

American-Havana interchange since the latter would provide two daily schedules tailored for Havana traffic rather than the South American traffic which would have to be served by an Eastern-Braniff interchange. For similar reasons, especially the much greater number of schedules furnished by the competitive carriers, the Braniff-Eastern interchange would not divert substantial amounts of National's or Pan American's Miami-Havana traffic.

[35] Order Serial No. E-5205, dated March 16, 1951.

[36] It has been contended that even the Balboa passengers are in foreign air transportation because the airport through which Balboa is served, Tocumen Airport, is located in the Republic of Panama rather than the Canal Zone. However, Balboa is the place to which service has been authorized. It is the place which is certificated for service rather than the airport at which the aircraft lands which determines the point being served and therefore the category of transportation involved. The Board has acted consistently with this interpretation for many years.

to compel an interchange for such transportation to be clear.[37]

[fol. 1511a] However, as we have stated on a previous occasion[38] and as supported by our recent experience, we prefer to have the cooperation of the carriers in presenting a voluntary interchange agreement for our approval.[39] Accordingly, we shall keep the record open for 60 days from the effective date of our order to give Braniff and Eastern an opportunity to file with the Board an agreement providing for interchange service at Miami.

We turn now to a consideration of the other interchanges contemplated by the Eastern-Pan American Agreement. These include (1) a New York-Washington-Miami, and Balboa operation, the "Balboa interchange", (2) a Boston, New York, Washington, Miami and Havana one, the "Havana interchange", (3) another between New York, Miami and Nassau, the "Nassau interchange", and (4) one between New York, Washington, Miami, Kingston, Barranquilla, and Maracaibo, the "North Coast interchange". It is argued that these services would afford the benefits of a through one-plane service to the daily traffic of more than 135 southbound passengers, of whom approximately one-half do not now have available such service via American flag carriers. While we consider the improved service which would thereby be offered to the traveling public as a factor to be given considerable weight in determining the question of public interest by which the approval of the agreement is to be tested, there are other considerations which command our support and lead us to disapprove the remainder of the agreement.

Most important of these considerations is the ultimate effect of inauguration of the proposed interchanges on the

[37] See *Southern Service to the West Case*, Order Serial No. E-5090, adopted January 30, 1951, pp. 26-32.

[38] See *Southern Service to the West Case*, Order Serial No. E-5090, p. 32.

[39] See *Southern Service to the West Case*, Order Serial No. E-5090, p. 48.

competitive status of National in relation to Eastern, especially on the vital New York-Miami route. At present [fol. 1512] National has equal competitive opportunity to participate in the transportation of passengers between the northeast and Nassau, Kingston, Barranquilla, Maracaibo and Balboa. Approximately 40 passengers a day are using American flag service through the Miami gateway between these points. If we assume that National, under normal circumstances, would participate in this traffic to the same extent that it participates in the total traffic between Miami and New York, National would obtain approximately 37%[40] of these passengers or a daily total of about 15 passengers. Consummation of the Pan American-Eastern interchange, providing a daily through service between the points involved, would foreclose National from obtaining any material part of these 15 passengers. Thus, National would be shut off from a market having a realizable value to the carrier of better than $300,000 a year.[41]

And the impact of the Havana interchange would be even heavier. National, operating three through flights a day is carrying approximately 42% of the total northeast-Havana through traffic, or approximately 58 passengers a day in

---

[40] We recognize that National has not as yet obtained this large a share of the particular traffic here involved. However, the record demonstrates that National is actively promoting its services in this field, and there is no reason to believe that the carrier would not participate in this traffic to the same extent that it participates in the competitive New York-Miami market as a whole. As a matter of fact, Pan American's exhibits show that National's overall share of Pan American traffic to and from Miami in the first six months of 1951 equalled 39%. This compares with a 36% participation in the survey months September-March 1950. While it is true that Grace's stock interest in National may have helped the latter in obtaining Panagra traffic, Pan American's incentive in the later period would be to deliver traffic to Eastern, its newly proposed interchange partner, rather than National, thus tending to balance out the Panagra interest.

[41] If we assume that the average passenger between the northeastern part of the United States and the points involved travels 1,000 miles over National's route (Miami-New York distance is 1,093 miles) and that National's average revenue from such passengers would be 5.5 cents per passenger mile, National would be precluded from a potential market of $301,125.

[fol. 1512a] both directions, Eastern-Pan American propose to operate two daily through services between New York, Miami, and Havana, with one schedule serving Boston, and the other Washington. Inauguration of this interchange would divert approximately 30% of National's present traffic, at a loss to the carrier of better than $400,000 in passenger revenues annually.[42]

Obviously, the diversion of such a large amount of revenues currently being carried by the carrier added to the denial of the normal competitive opportunity to obtain revenues of almost the same size from a comparable market would adversely affect National's competitive relationship with Eastern, particularly in the New York-Miami market. As a matter of fact, the cumulative effect of these interchanges would probably enable Eastern to increase its current schedule superiority over National.[43] This would further weaken National's competitive position and lead to additional diversion of National's revenues.[44]

We do not believe that approving an agreement having such consequences is consistent with our statutory obligation to consider as being in the public interest "competition to the extent necessary to assure the sound development of an air transportation system."

* * * * * *

---

[42] Assuming that the average passenger between the northeastern part of the United States and Havana travels 1,200 miles over National's routes (New York to Miami is 1,093 miles and Miami to Havana equals 235 miles) and that National's revenue yield is 5.5 cents per passenger mile, National would suffer diversion of $433,620.

[43] Eastern is already operating more than twice as many New York-Miami schedules as National. See Official Traffic Guide, May 1952.

[44] Chicago and Southern also asserts that the diversion of its revenues by a Pan American-Eastern interchange would be substantially greater than an Eastern-Braniff interchange at Miami. Though we do not fully accept the carrier's estimate of diversion, we think that its conclusion is sound, since the Eastern-Braniff interchange would not provide service to these areas where Chicago and Southern is competitive with Pan American.

[fol. 1513] Pan American also argues that unless the Board approves its interchange agreement with Eastern that additional traffic will be lost to foreign flag operators authorized to render single-plane service to New York.[45] While it is true that where foreign flag operators are offering single-plane service, in competition with American flag connecting services, the American services may be at a competitive disadvantage, we do not believe that the desirability of equalizing competitive opportunity for American flag carriers is, in this instance, of sufficient weight to overcome the other disadvantages of this Agreement. There are other avenues available for attaining such competitive equality.

We are also advised by the proponents of the Eastern-Pan American Interchange Agreement that an additional public interest factor to be considered is the relationship between the interchange and the Ferry Flight Agreement under which Eastern operates Pan American equipment between New York and Miami, thus giving Eastern the benefits of increased capacity at low cost, and saving Pan American (and the Government since that carrier is on subsidy) the cost of ferrying aircraft between its New York terminal and its Miami overhaul base.[46] The contention is that if either Eastern or Pan American interchanged with a competitive carrier, this agreement would have to fall, with the loss of the benefits above described. However, [fol. 1513a] National has indicated its willingness to participate with Pan American in this arrangement so that, insofar as the public interest is concerned, no substantial injury need result from a change in the Ferry Flight Agreement. Nor are we persuaded by Pan American's as-

[45] It is also to be noted that certain of the foreign flag operations relied on are those of Pan American affiliates such as Avianca and Cubana.

[46] See Order Serial No. E-4447, adopted July 21, 1950, in which we approved ferry flight agreements between Pan American and both National and Eastern. The present agreement under which Eastern is the exclusive lessee of Pan American equipment, C.A.B. No. 5066, has been submitted for Board approval, but has not as yet received our consideration.

sertion that National is not a responsible contractor and that they cannot rely upon an agreement with National for these purposes. Even were we to accept fully Pan American's position on National's management's disregard for contractual obligations, the mutual benefits of this arrangement are so apparent and desirable that we are convinced that National would participate cooperatively in it.[47]

* * * * * *

Chicago and Southern has again raised the question of whether its application for amendment of its foreign air transportation certificate to include Miami as an intermediate point between New Orleans, La., and Havana, for purpose of providing through service between the Caribbean points served by the carrier and the east coast of the United States by interchange with either National or Eastern at Miami, should be set down for comparative hearing with the Eastern-Pan American Interchange Agreement.[48] Our decision not to consolidate the application in this proceeding was grounded on the fact that since Chicago and Southern had not filed any agreement for such interchange for our approval, we were faced with a prospect of determining difficult issues of fact and policy without the power [fol. 1514] of enforcing our determinations once made.[49] In the circumstances of this case, we do not think it "conducive to the proper dispatch of business and to the ends of justice"[50] to conduct a proceeding involving such substantial

---

[47] Having reached the conclusion that the Eastern-Pan American interchange agreement is not consistent with the public interest, we do not find it necessary to consider whether the agreement meets the test of the first proviso of section 408(b) of the Act which enjoins us from approving any lease or operating contract "* * * which would result in creating a monopoly or monopolies and thereby restrain competition or jeopardize another carrier not a party thereto."

[48] See Orders Serial No. E-5635, adopted August 22, 1951; E-5683, adopted September 7, 1951; and E-5906, adopted December 3, 1951.

[49] The Board has authority under sections 404(a) and 1002 (i) of the Act to order interchange in domestic and overseas air transportation but not in foreign air transportation.

[50] Section 1001 of the Act.

burdens on the parties and the Board's staff where we cannot effectuate our decision if the parties do not choose to submit appropriate agreements. In any case, in view of our disapproval of the Eastern-Pan American Interchange Agreement, Chicago and Southern has not been injured by our denial of a comparative hearing on its applications.

For similar reasons, we denied National's request for consolidation of its application for extension of its route to Balboa to make possible an interchange with Panagra at Balboa. We did not have before us an agreement calling for such an interchange, nor did we have power to compel one. It is also to be noted that National may not be affected by our refusal to consolidate such application, if the differences between that carrier and Pan American can be reconciled, and an appropriate agreement on interchange service submitted for our approval.

As already noted (page 5) the foregoing findings were adopted on June 23, 1952, and transmitted to the President. After rehearing pursuant to the President's request, we attempted to bring about, in our decision of March 26, 1954, the establishment of a new, single U. S. Flag carrier in South America, independent of either Pan American or [fol. 1514a] W. R. Grace & Co. and combining the route systems of Panagra and Braniff. Our attempt to create such a competitively effective carrier, as we stated, was predicated upon the demonstrated ineffectiveness of Braniff as a competitor in South America and the dominance by the Pan American system of United States South American air travel. As we stated, our proposal, if effectuated, would bring about a needed one-plane service between the northeastern United States and Balboa and South America and would do so consistent with an important national objective—"the continuation of competitive United States Flag services to South America on an economically sound basis".[51] Although we elicited the cooperation of the carriers toward this end, the effort was unsuccessful.

---

[51] See reopened *New York-Balboa Through Service Proceeding*, Docket No. 4882, et al., Order Serial No. E-8189, page 7.

Failing in that effort, we are still charged with the responsibility of establishing by alternative means a sound competitive United States air transportation system to South America. In evaluating the various alternatives available to us, we wish to reaffirm our conviction that the attainment of such a sound system requires our disapproval of the proposed Pan American-Eastern interchange. We reiterate our finding that that interchange is not in the public interest and should be disapproved. We recognize that approval of the interchange would result in an immediate benefit to the public from improved one-plane service to the substantial volume of air passenger travel between the United States and the West Coast of South America. However, of much greater importance is the need [fol. 1515] for us to encourage an effective competitor for Pan American in the very important and rapidly growing United States-South American travel market. The need for such competitive service was clearly stated in the *Latin American Service Case* decision which originally established routes for United States Flag carriers to South America.[52] Our action here disapproving the Pan American-Eastern interchange agreement is required if an effective competitor is to be developed in South America.

As shown in the new record developed by request of the President, Pan American's domination of air passenger traffic to and from South America has been steadily increasing. Pan American's traffic from the northeastern United States moving through or over Florida gateways to Latin America increased 53.2 percent from 1951 to 1953.[53] This

---

[52] *Latin American Service Case*, 6 CAB 857.

[53] See Appendix II, page 4. Carriage of daily southbound air passengers between the northeastern United States and Latin America increased as follows:

Carrier	*Daily Southbound Passengers* 1951	1953	*Percent Increase*
Pan American	48.56	74.40	53.2%
Other U. S. Flag	30.79	44.42	44.3
Foreign Flag	74.08	111.31	50.2
Total	153.43	230.13	50.0

was an increase almost 10 percent greater than that of other United States Flag carriers and about three percent greater than increases for foreign flag carriers.

The continued dominance by Pan American is particularly pertinent when viewed in conjunction with the size of Pan American's South American system. That system—including both Panagra and the Latin American Division of [fol. 1515a] Pan American—generated 33 percent more traffic in 1953 than the next largest U. S. Flag international operation.

Revenue Ton Miles Generated in 1953 by The Four Largest U. S. Flag International Systems

	PAA Pacific	TWA Internat'l	PAA Atlantic	PAA South Amer. System
Rev. Ton Miles (000)	61,274	68,494	93,889	125,023
Percent by which PAA South American System *exceeds* others	104%	82.5%	33.2%	

Linking by interchange a system of this size to Eastern Air Lines—our largest north-south carrier in the eastern United States—would obviously be inimical to the attainment of effective competition between air carriers serving South America.

Within the United States a somewhat similar picture is presented by the facts adduced in the reopened record. Approval of the Eastern-Pan American interchange agreement would inevitably further increase the competitive disparity between National Airlines and Eastern, the two principal air carrier competitors for north-south air traffic in the Eastern United States. As shown by the following comparison, Eastern's domestic system is approximately four times the size of National's:

Comparative Size of Domestic Systems

Twelve Months ended: Revenue Ton Miles (000)	NAL	EAL	Ratio EAL to NAL
March 31, 1951	34,781	157,539	4.53
March 31, 1952	49,428	176,420	3.57
March 31, 1953	58,378	228,165	3.91
March 31, 1954	69,180	266,118	3.85
Total Transportation Revenues (000)			
March 31, 1951	$19,830	$ 83,554	4.21
March 31, 1952	26,038	94,823	3.64
March 31, 1953	28,520	120,340	4.22
March 31, 1954	$33,052	$138,178	4.18

[fol. 1516] While we recognize that National's profit position has improved substantially in the last few years, the foregoing table establishes the fact that National's improvement, earnings-wise, has thus far had no appreciable effect on the disparity between that carrier and its principal competitor, Eastern Air Lines.

Of perhaps even greater significance than this overall size comparison is the fact that in the most lucrative market for both National and Eastern Air Lines—New York-Miami—Eastern's participation in traffic has jumped from 46 percent in March 1952 to 59 percent in the first quarter of 1953.[34] From the standpoint of sound competitive development of our air transportation system both within the United States and to and from South America, therefore, we find nothing in the reopened record to cause us to depart from our earlier conclusion that the proposed Eastern-Pan American interchange agreement is contrary to the public interest and must be disapproved.

---

[34] See Appendix II, page 9, for the New York-Miami traffic figures during the first three months of 1953. The figures on which we relied in our earlier decision in this proceeding showed Eastern with a 46 percent participation in this market. For a short time thereafter, National was enabled to attain the larger share of New York-Miami traffic since Eastern, faced with an equipment shortage problem, scheduled considerably less coach service than did National.

The reasons for our disapproval of that interchange agreement do not, of course, preclude us from satisfying the need, demonstrated on both the old and the new record, for through plane service between the northeastern United States, Balboa and the west coast of South America. We again find that an Eastern-Braniff interchange would in large part satisfy this need, would bring a new single plane service to Sao Paulo, Rio de Janeiro and Buenos Aires and would bring about more effective competition with Pan [fol. 1516a] American's service between these points and New York. As we found over two years ago, such an interchange would be of real benefit to Braniff in linking that carrier at Miami with Eastern Air Lines' great traffic generating system in the eastern United States.[55]

Most of the significant arguments advanced on the reopened record opposing a Braniff-Eastern interchange were repetitious of those made on the old record, and have already been dealt with.[56] The principal argument directed against such an interchange is that diversion of traffic and revenues from Pan American's South American system will inevitably result. We recognize this possibility, but we here reaffirm our belief that any adverse effects upon the Pan American system will be minimized by the greater overall volume of traffic which should be generated by a more effective competitive through plane service to South America.

Opponents of a possible Braniff Eastern interchange have made a major point on the new record of the unfavorable aspects of Braniff Airways' operating results on its South American route. They have emphasized the Board's responsibility to limit airline subsidy mail payments, claiming that a proper discharge by the Board of this responsibility requires that we limit rather than expand the competitive opportunity of Braniff Airways. The claim is made that the operating results of that carrier for the past three years, following its extension under exemption authority to Miami, and its resulting increased need for federal subsidy support, establish the wisdom of con-

[55] See pages 13 to 19, *supra*, for more detailed discussion of the benefits of an Eastern-Braniff interchange.

[56] See pages 17 to 20, *supra*.

fining Braniff Airways' international system to its former [fol. 1517] Houston-New Orleans-Havana route to South America (excluding Miami) and of disapproving any interchange agreement, voluntary or otherwise, between Eastern and Braniff. It is claimed that such a course of action, which would leave the bulk of United States-South America air travel to the Pan American system, would lead to further reductions in federal mail pay subsidy support.

We recognize that since Braniff has been attempting to develop United States-South American air travel through its connections with National and Eastern at Miami, the mail pay need of Braniff has substantially increased. The record demonstrates that since Braniff has been operating to and from Miami, the South American air travelers over its system have been developed primarily through its own efforts rather than through the cooperative efforts of either National or Eastern.[57] This is entirely understandable since those carriers have had every reason to utilize Pan American as their connecting carrier at Miami. The Pan American system's extensive coverage of South American markets, the existence of the Pan American-Panagra Through Flight Agreement and the flights operating under that agreement, their use of DC-6 aircraft as compared to Braniff's DC-4 equipment—have all made the connecting services of Pan American and Panagra at Miami more attractive to both National and Eastern than those of Braniff [fol. 1517a] Airways. Aside from these matters, there is the additional fact that at various times during the past several years both Eastern and National have made it plain that they would prefer Pan American rather than Braniff as an interchange partner for South American air travel.

---

[57] As the Examiner found in his second Recommended Decision served November 13, 1953, at page 38: "... However, what Braniff did not realize was that National and Eastern would continue to deliver substantially all of their traffic to Pan American and Panagra as reflected by data of record which show that in March 1953, 87 percent of the traffic carried by Eastern between New York and Washington, on the one hand, and points in South America served by Panagra and Braniff was carried on Panagra south of Miami and 13 percent traveled on Braniff; in the same month, 83 percent of the similar traffic carried by National was turned over to Panagra and 17 percent over to Braniff."

We do not cite these factors with a view to relieving Braniff Airways' management from responsibility for the amount of its subsidy need. To do so would prejudge the mail rate proceedings presently under way which involve determination of mail pay for past periods for Braniff. We cite the foregoing matters, however, simply to indicate that Braniff's lack of success in its present connecting service to and from Miami does not necessarily have any long-run significance as to the much greater success it would enjoy if its flights to and from Miami were to be operated under an interchange agreement with Eastern. With each party to that agreement actively soliciting air travel from various points on its own system, through Miami, to points on the other carrier's system, we have no doubt that entirely different operating results than those experienced by Braniff to date would be obtained, with substantially less dependence for that carrier upon subsidy support.

Aside from these factors, there is no merit in Pan American's contention that strengthening Braniff will ultimately result in increasing the overall subsidy for U. S. Flag South [fol. 1518] American carriers.[58] It is our belief that, by strengthening Braniff as an effective competitor, the overall air travel volume will increase. We expressed this belief two years ago in our original decision in this case (*supra* p. 15) and we take this opportunity to reaffirm it. If a substantial increase in air traffic and revenues *does* result, then

---

[58] The trend of subsidy support for these carriers has continued to increase, and as we have stressed on numerous occasions that unfortunate trend is of serious concern to us.

Dollars of Subsidy Mail Pay Support (000)

Carrier	*Fiscal Years Ended June 30:*				
	1951	1952	1953	1954	1955
(1) Braniff Airways (Int'l.)	$1,999	$2,173	$2,010	$2,557	$2,179
(2) PAA-LAD	4,910	8,599	11,110	11,344	11,485

Source: Report on Service Mail Pay and Subsidy for U.S. Certificated Air Carriers, CAB, Sept. 1954.

it is reasonable to conclude that economical load factors can be maintained by *all* of our carriers serving South America.

However, even if overall traffic volumes do not increase substantially, air service capacity can and should be reduced so that an economic load factor will be obtained. We hereby stress the need for a careful monitoring, by all carriers, of schedules and services to be flown to South America, for we have been forced several times in the past to refuse to underwrite with subsidy support large amounts of excessive capacity operated by the South American system of Pan American.[59] The substantial amounts—more than $4,000,000—of needed mail pay claimed which we have disallowed from the mail rates of both Pan American and Panagra because of overscheduling indicate the seriousness of the capacity problem. Because this is such a serious prob- [fol. 1518a] lem, we take this opportunity to caution the carriers against a repetition in the future of such overscheduling—ostensibly to meet the more effective competitive role which we have herein indicated for Braniff.[60]

---

[59] *Pan American World Airways, Inc., Latin American Division*, Statement of Provisional Findings and Conclusions, Docket No. 3308, adopted June 5, 1953, Order Serial No. E-7441; *Pan American World Airways, Inc., Latin American Division, Mail Rates*, Docket No. 3308, Order Serial No. E-4052, April 11, 1950 (Order to Show Cause, page 2), finalized by Order Serial No. E-4110, April 28, 1950; reaffirming policy in Order Serial No. E-2753, April 29, 1949, finalized by Order Serial No. E-2854, May 24, 1949. *Pan American-Grace Airways, Inc.*, Statement of Provisional Findings and Conclusions, Docket No. 2755, adopted June 27, 1952, page 6.

[60] Only recently we have had occasion to reiterate our policy against overscheduling because of its obvious effect in increasing federal subsidy. As we stated just a few months ago:

> "There is a large area in which management may take action which will check the increasing dependency on subsidy. Among the more readily controllable factors reflected in a carrier's operating results is the number of flight schedules. Accordingly, the Board expects management to examine, with the utmost care, the productivity of each and every schedule in order not to place an unreasonable burden on the Government." *Piedmont Aviation, Inc., Mail Rates*, Docket No. 6363, Supplemental Order to Show Case, Order Serial No. E-8587, adopted August 27, 1954, page 3.

In order to accomplish the Braniff-Eastern interchange which we have found required by the public convenience and necessity on both the old and new record, we recognize again (as already pointed out, *supra*, p. 47) that since these two carriers do not have end-on systems, one system must be extended to join the other. We hereby reconfirm, therefore, our earlier finding that the public convenience and necessity require the extension of Braniff from Havana to Miami. In support of this finding we cite, among other facts of record, the Examiner's conclusion, made upon the reopened record, (see Appendix II page 11) that the "difficulties experienced by through passengers demonstrates that, if Braniff is to participate in any interchange to provide through-plane service, the interchange point should be Miami instead of Havana". We also hereby reconfirm our earlier finding (*supra*, page 18) that Braniff's flights between Miami and Havana shall be confined to flights for [fol. 1519] interchange purposes only, thereby reducing their diversionary effect from National and Pan American to a minimum.[61]

As to the other interchanges contemplated by the Eastern-Pan American agreement, we note that the new record contains minor amendments affecting the financial supplement to the agreement, the plan of operation and the proposed schedules under the interchange. After examining these changes, we conclude that they are minor in nature and do not alter our previous conclusions (set forth on pages 22-24 *supra*) that these proposed interchanges are not in the public interest and must therefore be disapproved. However, we recognize that there is a substantial air travel volume which would be benefited by through-plane service between the northeastern United States, on the one hand, and those points sought to be served in the Caribbean area on the other—by the "Nassau", "North Coast" and other

[61] The Examiner found on the reopened record that no new contentions had been advanced as to the Board's power to compel interchanges to Balboa. We have already set forth our conclusions on this issue (*supra*, pages 19, 20) and we again decide that the record will be kept open for 60 days from the date of our order to give Braniff and Eastern an opportunity to file with the Board an agreement providing for interchange services at Miami.

interchanges included in the Eastern-Pan American agreement. It may be that National and Pan American will be interested in providing such a service in view of the other findings which we had made in this decision. Since we are impressed with the volume of traffic to be served, we would look with favor upon proposals, designed to meet this demonstrated need, which National and Pan American may wish to present to us.

There is still before us the Pan American-Panagra Through Flight Agreement and the Panagra-National inter- [fol. 1519a] change agreement. As we stated in our tenative decision of March 26, 1954, the decision on these two agreements is closely related to other important matters affecting the future course of air transportation development between the United States and South America.[62] Consistent with other conclusions already reached in this decision, we find that the predominance of Pan American's South American system would require us to disapprove the Pan American-Panagra Through Flight Agreement unless that agreement were so conditioned as to preserve effective competition among our carriers in the United States-South American market. We therefore find that the Pan American-Panagra Through Flight Agreement should be approved upon the condition that all flights operating between Miami and Balboa pursuant thereto shall be through flights to and from New York operated between Miami and New York over the route of National Airlines. Such a condition, we feel, will provide improved air service for United States-South American air travelers, and will also foster a more balanced air transportation system between New York and Miami. In order to give the carriers time to agree upon such an arrangement, we shall keep the record open for 60 days from the effective date of our order to provide an opportunity for the submission of the necessary revised through flight agreement between Pan American and Pan-

[62] *New York-Balboa Through Service Proceeding*, Docket No. 4882, *et al.* Decided March 26, 1954, Order Serial No. E-8189.

agra including an interchange agreement between these carriers and National Airlines.[73]

With respect to the period for which we would approve the Through Flight Agreement, we would ordinarily be inclined to grant such approval until 1960, as requested by the applicants. However, we cannot overlook the presence of the antitrust proceedings recently instituted by the Attorney General at our request against Pan American, Pan-[fol. 1520] agra and W. R. Grace & Co. The final outcome of this litigation cannot now be determined, but the ultimate result of the litigation may have a bearing upon the advisability of continuing our approval of the Through Flight Agreement. Accordingly, if the Through Flight Agreement is appropriately supplemented for operations to and from New York, we will approve such agreement until 1960, with the proviso that if the antitrust litigation is finally concluded prior to 1960, such approval shall terminate 90 days after the effective date of a final order (other than an order of dismissal) disposing of the antitrust litigation. We will also provide that upon the effective date of such order in the antitrust litigation the proceedings herein shall be automatically reopened for the purpose of determining whether such approval of the Through Flight Agreement shall be extended, modified or terminated.

Upon consideration of the foregoing matters and all the facts of record, we find:

1. That the agreement dated January 27, 1951, between Eastern and Pan American to provide through-plane service between points on Eastern's route No. 6, on the one hand, and points on Pan American's Latin American routes and on Panagra's, on the other, is not consistent with the public interest, and should be disapproved;

2. That the provision of through service by interchange between Eastern from New York via Washington to Miami and Braniff from Miami to Balboa and points on Braniff's route in South America is in the public interest, and that

[73] In the light of this decision, it is not necessary for us to pass at this time on the application for approval of the Panagra-National interchange agreement.

Eastern and Braniff should be given an opportunity to enter into and submit for approval of the Board within sixty days of the effective date of our decision herein, an agreement providing for such through service by interchange;

[fol. 1520a] 3. That decision on the Board-instituted proceeding in Order Serial No. E-5205, adopted March 16, 1951, with respect to a compulsory interchange between Eastern and Braniff should be deferred.

4. That the public convenience and necessity require the amendment of Braniff's South American certificate to authorize service between the terminal point Miami, Florida, the intermediate point Havana, Cuba, and the terminal point Balboa, C. Z., subject to the conditions set forth in paragraph 5 below.

5. That Braniff should render service pursuant to the authorization specified in paragraphs 2 and 4 above, only on through plane flights (a) which are operated by interchange of equipment between Braniff and Eastern, (b) which originate at New York, N.Y./Newark, N. J., and terminate at Balboa, C. Z., or points south thereof or originate at Balboa or a point south thereof and terminate at New York, N.Y./Newark, N. J., and (c) which do not serve points north of Miami, Florida, on Eastern's route No. 6 other than points on the Miami-New York/Newark segment of said route.

6. That decision on the application for approval of the Through Flight Agreement between Panagra and Pan American in Docket No. 3787, and the National-Panagra Interchange Agreement in Docket No. 3785 should be deferred for the reasons hereinabove noted; and that National, Pan American and Panagra should be given an opportunity to enter into and submit for approval of the Board within sixty days of the effective date of our decision herein, an agreement providing for through service between New York on National's route No. 31, and Balboa and points on Panagra's route in South America using Panagra's equipment north of Balboa.

[fol. 1521] 7. That the proceeding herein should be held open insofar as necessary to effectuate the conclusions herein reached.

8. That to the extent that the proceedings instituted in Order Serial Nos. E-5205, adopted March 16, 1951, and E-5389, adopted May 18, 1951, are inconsistent or are in conflict with the actions taken herein, such proceedings should be dismissed.

9. That, except to the extent granted, dismissed or deferred herein, all applications, petitions and motions consolidated in this proceeding should be denied.

Appropriate orders will be entered.[61]

Gurney, Chairman, Lee and Adams, Members of the Board, concurred in the above opinion. Denny, Vice Chairman, and Ryan, Member, filed the attached concurring and dissenting opinions.

[fol. 1522] DENNY, Vice Chairman, Concurring and Dissenting:

I concur with the opinion and decision of the majority herein with respect to the disposition of the application of Pan American and Eastern for approval of a New York-Miami-Balboa interchange, and also with the findings that New York-Balboa interchanges by the combinations (1) Eastern and Braniff, and (2) National and Pan American (Panagra) would be in the public interest. I also agree with the conclusion that the approval of the Eastern-Pan American interchange proposal for New York-Miami-Havana service cannot be found to be required at this time.

With respect to the remaining two interchanges proposed by Eastern and Pan American (1) New York-Miami-Nassau, and (2) New York-Port-au-Prince-Jamaica-Maracaibo-

[61] For the purposes of Order Serial No. E-5542, adopted July 13, 1951, which in effect authorized Braniff to serve Miami, Florida, as the northern terminal of its South American route, the orders attached hereto do not constitute the final order in this proceeding. Accordingly, Braniff's exemption authority to serve Miami, Florida, will continue in effect following issuance of the order accompanying this opinion.

Barranquilla, I agree with the conclusions and reasons set forth in the opinion of Member Ryan which would favor the present approval of such operations.

/s/ HARMAR D. DENNY

[fol. 1523] RYAN, Member, Concurring and Dissenting:

I agree with the majority that the interchange agreement of Pan American and Eastern for the provision of through service between New York and Havana should be disapproved because the facts of this record establish that additional American flag competition for National Airlines in this market would be uneconomic and wasteful. I disagree with the present decision to dispose of the New York-Balboa interchange proposals at this time, and I would favor deferment of any action on these proposals until the uncertainties that now enshroud our South American route pattern can be resolved.

I am also in disagreement with the decision to disapprove the voluntary argeement of Pan American and Eastern to provide single plane through service in the Nassau and North Coast markets,[1] a decision which, in my judgment, abandons the United States traffic in these markets to foreign air carriers. It seems to me that the fundamental mistake made by the majority in its treatment of these two interchanges results from its assumption that all four proposals of Pan American and Eastern must be dealt with as a single package. Each of the four interchange services should be considered on its own merits. Even a cursory examination of the facts reveals that they are not interdependent facets of one structure, but are separate and independent proposals. The only points of similarity are the identity of the parties and the fact that each of the four would utilize aircraft routed over the New York-Miami segment of Eastern's domestic system. There the similarity ends.

---

[1] Nassau Interchange: New York-Nassau. North Coast Interchange: New York-Port-au-Prince-Jamaica (Kingston and Montego Bay)-Maracaibo-Barranquilla.

Considering first the New York-Havana interchange proposal of Eastern and Pan American, we find that, although United States flag carriers are carrying better than 80 [fol. 1523a] percent of the New York-Havana traffic through the nonstop operations of National or by connecting service at Miami, the direct traffic between New York and Havana to date has been able to support only one round trip flight daily by National. National's nonstop operations have been conducted with a revenue passenger load factor of only about 48 percent. In addition, National must compete in this market with LAV, the Venezuelan carrier, and Aerolineas Argentinas, and it can be anticipated that Cubana will be added as a third foreign nonstop operator within the near future. In view of the marginal character of National's present services and the competition provided by the foreign carriers, it is very clear that the authorization of an additional single plane service would mean uneconomic and wasteful competition. I concur, therefore, in the decision to protect National's certificated service against diversion by an Eastern-Pan American interchange.

Let us now turn to the proposed interchange service between New York and Balboa and points south. Here the Board is confronted with a most difficult and complex problem, for it is in this area of the west coast of South America that the unnecessary and wasteful duplication of facilities and services of U. S. flag carriers is most acute. To evaluate the majority's present decision, reference must be made to the facts constituting the background for our present problem.

I have previously pointed out[2] that the deficiencies which characterize our South American air pattern stem from the *Latin American* decision of 1946, through which the operations of a third U. S. trunkline carrier were established into the South American market. That duplication has proved to be a costly and uneconomic one, as the Board's recent interim opinion in the present case, issued [fol. 1524] on March 26, 1954, makes clear. The vast traffic

[2] Concurring Opinion, Opinion and Order No. E-8189, dated March 26, 1954.

potential foreseen by the 1946 decision simply has not materialized; cabotage rights, which constituted an important source of traffic for U. S. flag carriers in 1946, have been terminated; and the competition offered by foreign air carriers, which was negligible in 1946, has grown in strength and volume to the point where foreign air carriers now transport approximately 48 percent of all the traffic between the United States and Latin America.

The net result of the situation thus created has been a rising tide of subsidy which gives the Board deep concern today. Thus Pan American, which eight years ago realized an annual operating profit of over $2,000,000 on its then self-sufficient operation in South America, requires an annual subsidy of over $11,000,000 for its Latin American division. Panagra, which eight years ago required $963,000 of subsidy from the government, now requires over $2,000,000. And the cost of the Braniff operation has risen from $563,000 in 1948 to a present subsidy need of over $2,000,000. The total mail pay subsidy requirement for Pan American's Latin American Division, Panagra and Braniff was approximately $15,000,000.

The Board recognized the seriousness of the problem when, by its March 1954 opinion,[3] it deferred decision on the present interchange proposals in order to allow the interested U. S. flag carriers to formulate a voluntary plan compatible with the Civil Aeronautics Act for the accomplishment of desirable route realignments. It is apparent that the Board contemplated the emergence of a new and independent carrier from the present routes and facilities of Braniff and Panagra—a carrier that would be completely divorced from any interests or control by Pan American and W. R. Grace and Company. The Board took note of the paralleling routes of Braniff and Panagra, and in its [fol. 1524a] opinion emphasized the Board's "determination to take such action as will further the national policy directed toward reducing the burden of airmail subsidy payments."[4] *The Board declined to take action on the instant*

[3] Opinion and Order No. E-8189, *supra*.

[4] Opinion and Order No. E-8189, *supra*.

Pan American-Eastern proposals because it felt that it would be inappropriate to do so "until we (the Board) resolve appropriately the basic question as to the future of U. S. flag competitive services in South America."[5]

In its opinion, the Board also alluded to the recent institution by the Attorney General of an anti-trust suit against Pan American, Grace, and Panagra, which is designed to compel by court decree an involuntary divestiture by Pan American and Grace of all of their interests in Panagra and thereby to recreate Panagra as a totally independent competitive force in South America. It was apparent from this opinion that the Board entertained the hope and intended to encourage action by Pan American and W. R. Grace which would constitute Panagra an independent carrier and pave the way for the consolidation of Braniff and Panagra, thus reducing our U. S. carriers serving South America from three to two. It was also clear from the opinion that the Board was resolved to hold up action on the Balboa interchange proposals until the future status of U. S. flag carriers in South America would be determined.

The expectation of the Board was frustrated when the parties failed to accept the Board's suggestion for a reduction in the duplication of U. S. carrier facilities in South America which would make possible a substantial reduction in the federal subsidy. Meanwhile the Attorney General's suit is still pending.

[fol. 1525] Confronted with these facts, what action does the Board now propose? The short and direct answer is that, instead of maintaining the *status quo* until the decision in the Attorney General's suit is given an opportunity to clarify the situation, the Board now embarks on a course of action which undertakes to compound the duplication of services that plague our American flag network in South America.

The west coast of South America, which is the area of concern involved in the proposed interchange services be-

---

[5] Opinion and Order No. E-8189, at p. 10. All emphasis appearing herein has been supplied unless otherwise indicated.

tween New York-Balboa and points beyond, is provided with paralleling service by Braniff and Panagra. It is the weakest traffic generating area being considered in this proceeding, for it produces only 40 passengers per day in each direction to and from the Northeastern United States, or 13 percent of the traffic for which the Board could provide single plane service in this case. The majority now proposes to disapprove the only voluntary agreement before it for service to Balboa and beyond, that of Pan American and Eastern, in favor of an invitation to Braniff and Eastern to provide the service. It would also condition approval of the Pan American-Panagra Through-Flight Agreement upon the admission of National into an interchange arrangement with those carriers—an interchange which would serve the same general area as that served by Eastern and Braniff.

If, then, the majority's decision is accepted and is carried out, it will result in the creation of two interchange services to serve that total of 80 passengers daily. This the majority would now do notwithstanding the fact that the Board has recently reaffirmed its determination not to permit more than one interchange service for Miami-West Coast traffic, a market producing 30 percent more traffic than that with which we are here concerned.[6] I find it impossible to reconcile such a decision with the majority's concern for the future of Braniff or with the intention expressed by a [fol. 1525a] unanimous Board in this proceeding just eight months ago "to take every practicable step, consistent with the mandate of our statute, to eliminate uneconomic aspects of our air route pattern and *to prevent the establishment of any new situations of that character.*"[7]

It also seems to me that approval of an Eastern-Braniff interchange is inconsistent with the Board's decision concerning the proposed Pan American-Eastern interchange operation between New York and Havana. Since Havana is a point on Braniff's South American route an Eastern-

---

[6] *Reopened Southern Service to the West Case*, Opinion and Order No. E-8466, June 25, 1954, p. 13.

[7] Opinion and Order No. E-8189 *supra*, at p. 4.

Braniff alignment would make possible New York-Miami-Havana interchange service, the same type of operation which the Board is denying to Pan American and Eastern. Although the majority undertakes to limit somewhat the competitive effect of such an operation by requiring any service to be conducted as a part of a through flight to Balboa and beyond, and by limiting Braniff's authority to the carriage of fill-up traffic between Miami and Havana, the Board would, nevertheless, be providing competitive service in an area where the available traffic will not support limited competition.

The treatment given to the Through-Flight Agreement under which Panagra operates over the tracks of Pan American between Balboa and Miami is, in my judgment, particularly inappropriate and unjustified. The majority apparently is not satisfied with merely dictating an Eastern-Braniff interchange and maintaining the existing Panagra-Pan American service between Miami and Balboa. *It goes further and threatens Panagra with expulsion from the United States unless Pan American and Panagra become full-fledged members of National's team.* Thus does the majority summarily dispose of an agreement the Board approved seven years ago and specifically found to be "beneficial to the public."[1]

[fol. 1526] There can be no doubt that the Through-Flight Agreement has been of substantial benefit both to the carriers concerned and to the traveling public. By reason of its existence, Panagra has been able to solve some of its overhaul, maintenance and personnel morale problems and has achieved a substantial increase in traffic. At the same time, Miami and the connecting traffic which it serves have been able to obtain the advantages of through single plane service with substantial time savings. Over the years the air traveller has come to rely on the present arrangement as an accepted feature of South American service through the Miami gateway.

Such conditioning of further approval of the Through-Flight Agreement places the Board, it seems to me, in an

---

[1] *Pan American-Panagra Agreement*, 8 CAB 50, 61 (1947).

indefensible position. If Panagra and Pan American elect to acquiesce in the Board's wishes and enter into an interchange agreement with National, the Board will have created two interchanges where one, at most, is justified by the available traffic. If Panagra refuses, it will be expelled from the United States and it will be subjected to an economic strangulation which could only result in a substantial increase in that carrier's dependence upon the federal treasury for financial support. This latter consequence would come as no surprise to the majority, for in the March opinion, the Board said that "if Panagra were to be deprived of its present access to Miami, especially if Braniff were to have such continued access, either under the present terms or by approval of some interchange agreement, Panagra's economic condition would rapidly deteriorate."[9] The alternatives posed by the majority decision, therefore, constitute an uneconomic and wasteful duplication of service, on the one hand, and an unjustifiable threat to the federal treasury on the other.

[fol. 1526a] What has been said so far presupposes, of course, that there will be some disposition on the part of one or both of the interchange teams which the majority contemplates to follow the dictates of the present decision. Being realistic, however, it is more probable that the net result of the majority's decision will be to deny the public the benefits of any new single plane through service to South America, at least insofar as its provision is dependent upon the voluntary cooperation of the parties. This record makes it clear that both Eastern and Pan American have been emphatic in expressing their unwillingness to enter into any voluntary arrangement with Braniff and National, respectively. Should this attitude on the part of the parties prevail, as we have every reason to believe it will, the Board, at the conclusion of the sixty-day period allowed by this decision for voluntary submissions, will be faced with the question of whether it should by order undertake to compel the operation of through service by Eastern and Braniff.

---

[9] Opinion and Order No. E-8189, *supra*, at p. 9.

Any such course of compulsion would be fraught with difficulty.[10] The Board would be required to reconcile its decision with the express finding of the examiner that "the record does now show that the need for such service is sufficiently great to warrant ordering performance of through plane service between New York and Balboa by a reluctant party."[11] But if the Board brushed aside this hurdle, and chose to order a compulsory interchange, it would, at best, be providing new single plane service for a maximum of eighty passengers per day while denying such service to over three times that amount of traffic traveling between the northeastern United States and the Caribbean [fol. 1527] and the north coast of South America which today has single plane service only by foreign carriers. A combination of Eastern and Braniff could not possibly accommodate these latter passengers since only Pan American serves these areas. Sealing the control of foreign operators in these markets and surrendering the United States traffic to foreign airlines does not seem to me to be a sound solution of the problem.

Thus, it seems clear that the majority's plan offers no panacea for the ills of our South American route pattern, but rather it holds out the very real probability of aggravating the situation. The difficulties inherent in the plan convince me that the public interest would best be served by deferring further action on the New York-Balboa interchange problems until the South American picture has been clarified. A determination of the proper pattern of service to Balboa and beyond is inextricably entwined with the deficiencies of the present uneconomic route structure, and the Board cannot answer one intelligently without providing the solution for the other. It is unlikely now that the problem is susceptible of satisfactory solution until the pending legal action has run its course. From the standpoint of the existing flag carriers deferment now would have the distinct advantage of maintaining the *status quo*

[10] See *National-Eastern Interchange Agreement*, Opinion and Order No. E-6106, February 11, 1952. *Twin Cities-Los Angeles Case*, Opinion and Order No. E-6831, September 25, 1952.

[11] Examiner's Recommended Decision, November 13, 1953, p. 77.

without further entanglement of their competitive relationships until areas of uncertainty as to their future can be removed.

Turning now to the remaining two interchanges proposed by Pan American and Eastern, namely, the Nassau interchange and the North Coast interchange, we are confronted with a vastly different factual situation on the present record. In the case of both of these interchanges, the Board has no alternative available to it in the present case; [fol. 1527a] it can provide through service in this proceeding only by approving the voluntary interchanges submitted by Pan American and Eastern. No other interchanges for these routes were in issue in this case and the Board would be without statutory power to compel a different interchange for these two routes since foreign and not overseas air transportation is involved. Therefore, if the facts of record establish that new single plane service is needed in either of these markets, the Board cannot now provide them except by approving the existing voluntary interchanges proposed by Pan American and Eastern. The combination of National and Pan American as an alternative to the presently proposed interchanges is not only hypothetical and speculative; it is, for reasons already stated, wishful thinking. And it is not an issue in this case.

In appraising the effect of an approval of the two remaining interchanges, we are not confronted with any question of duplicating U. S. flag carrier services. Nor are we faced with any problem of granting additional protection to Braniff, as we are in the New York-Balboa situation. Despite the clear factual differences here from the circumstances presented by the Havana and Balboa interchange proposals of Pan American and Eastern, and in spite of the sizeable United States traffic in the Nassau and North Coast travel markets now provided with direct service exclusively by foreign carriers, the present decision disapproves the voluntary agreement of Pan American and Eastern to serve these areas. Thus, the majority, although possessing no lawful power to order an interchange between Pan American and National which would provide single plane service between New York and Nassau and

between New York and Port-au-Prince, Jamaica, Maracaibo and Barranquilla, herein effect decrees that neither Eastern nor National shall participate in these markets rather than permit Eastern to join with Pan American in competing [fol. 1528] with foreign air carriers for the traffic.

The decision of disapproval rests in large measure upon the assumption that National Airlines needs additional protection in its competition with Eastern on its New York-Miami route, which route would constitute the northern segment of the two proposed Eastern-Pan American interchange services. The majority's solicitude for National might be justified if the facts established that National was in any danger of being eliminated as an effective competitor of Eastern. Quite the opposite is true, however. The record makes it abundantly clear that National does not need any such protection in its competition with Eastern and that the majority's assumption to the contrary is totally lacking in substance.

The majority seeks to establish that National is under some great disadvantage in its competition with Eastern. But let us examine the facts. Set forth in Appendix A are data which depict the competitive trend in National's position beginning with September 1949, the first survey month following National's recovery from two financially devastating strikes, and concluding with September 1953. These data indicate that even in the fall of 1949, National was an effective competitor. More recently it has battled on even terms with Eastern, and during some periods has actually outcarried Eastern on the New York-Miami route. Certainly the foregoing facts preclude the conclusion that National is in any grave danger of being eliminated as an effective competitor of Eastern.

Not only is National presently providing effective competition for Eastern in this New York-Miami market but the through traffic to all points involved in the two interchanges in question represents but a minute portion of the traffic for which National and Eastern are competing. For example, during March 1953, the total traffic between New

York and the points involved in the Nassau interchange [fol. 1528a] and the North Coast interchange was 1737 passengers. During the same month, National and Eastern carried 71,993 passengers between New York and Miami alone, so that the total traffic involved in the Nassau and North Coast markets was the equivalent of only 2.4 percent of the New York-Miami passengers for which the two carriers compete. It is also significant that there are presently about 117 passengers daily in these foreign markets but only about 32 travel by U. S. flag carriers because foreign carriers are now providing single plane service to these areas. The better than two-thirds monopoly which the foreign carriers already enjoy will soon be almost 100 percent if our American carriers continue to be unable to provide single plane service.

Since the alleged potential represents less than 2.4 percent of the competitive traffic of National and Eastern, it would be far better to have Eastern obtain the revenue than to abandon it to foreign carriers. Surely this small amount of traffic will not affect National's survival in its competition with Eastern. The present disapproval of the Eastern-Pan American through service in this market does not insure this traffic for National; it merely abandons the traffic to a foreign air carrier.

Furthermore, we have a duty to consider the need of the traveling public for such through service, not just the needs of the competing carriers. The existing traffic between New York and Nassau is approximately one and one-half times as large as the traffic to Balboa and points south and clearly needs American-flag single plane service to compete with foreign competition.[12] Pan American is the only

[12] National's entry into Washington, D. C., was granted by the Board to enable National to compete with a foreign carrier providing service from Havana to New York via Washington. The Board's decision stated "we believe that it is of considerable importance that a U. S. air carrier should be in a position to compete on an equal basis with foreign companies for the Washington-Havana traffic, the greater part of which is generated in the U. S." *Middle Atlantic Case*, 9 C.A.B. 131 (1948).

American-flag carrier between Nassau and Miami and, [fol. 1529] therefore, ~~can harm~~ no other American-flag carrier if it is granted the right to offer single plane service in conjunction with Eastern. *It is a strange American doctrine which dictates the disapproval of the only single plane service offered and thereby transfers the American flag traffic of our own international air carrier to a foreign air carrier solely to prevent one domestic air carrier from obtaining a small and insignificant traffic flow advantage over another domestic air carrier.*

Everything that has been said about the New York-Nassau market can equally well be applied to the New York-Port-au-Prince-Jamaica-Maracaibo-Barranquilla markets: The available traffic is more than double that involved in the New York-Balboa interchange and the only existing single plane services are by foreign carriers. Authorization of an American-flag single plane service would provide better service to the public, would increase the American flag participation in the markets, and would have no significant effect on the Eastern-National competitive situation. It would also permit our American carriers to recoup at least a part of the $3,000,000 in revenues being lost to foreign carriers annually in Latin America.

The only other point advanced against approval of these two Pan American-Eastern proposals is the so-called divided allegiance argument.[13] It is said that Eastern will not cooperate fully with Braniff on the New York-Balboa service if it is cooperating with Pan American elsewhere. The Board has never before given this argument weight where the interests were not in the same markets. Thus, for example, Braniff and Continental, who are vigorous

[13] The majority points to the service now operated by Pan American between New York and Maracaibo as substantial conflict. Exhibits PA-1106 and PA-1107 show this traffic to amount to 4.61 southbound passengers per day and show that foreign carriers obtain about 80 percent of the traffic to Jamaica, Colombia, and Venezuela, including Maracaibo. Since the Miami routing would be shorter than Pan American's present service it is unlikely to present any serious problem.

competitors in the southwestern United States, cooperate in [fol. 1529a] providing interchange service between Denver and St. Louis; TWA and Braniff compete between Kansas City and Chicago and yet a majority of the Board has approved an interchange arrangement for service by these carriers between Houston and the west coast;[14] and two of the very carriers involved here, National and Eastern, who are the staunchest of competitors on the New York-Miami route, would be permitted by the Board to provide interchange service between Miami and Houston.[15] In view of the past actions of the Board an adverse decision upon the two Eastern-Pan American interchange proposals presently before us based upon such an assumed conflict can hardly be considered impressive.

SUMMARY

In this case we are required by law to approve each interchange unless, upon substantial evidence of record, we can find that the approval would be "adverse to the public interest."[16] The record clearly shows that the Board's conclusion to disapprove the interchange proposed by Pan American and Eastern in the New York-Havana market is supported by substantial evidence in view of the marginal character of National's present operations and the degree of foreign competition to which it is subjected. In my opinion the evidence is equally convincing that the broader considerations inherent in determining the public interest require deferment of any action on the New York-Balboa proposals at the present time.

[fol. 1530] On the other hand, this record shows that the effect of the approval of the Nassau and North Coast interchanges upon National Airlines in its competition with Eastern on the New York-Miami route would not be

[16] Sec. 412.

substantial and, therefore, cannot be the basis for a conclusion that approval of these two interchanges would be adverse to the public interest. These two interchanges would offer through single plane service to traffic flows significantly larger than those involved in the New York-Balboa interchange and these benefits cannot otherwise be obtained since the Board would be without statutory power to compel other and different interchange combinations to accomplish the same benefits. The inevitable result, therefore, of the Board's denying Pan American the opportunity to participate in single plane service between these points in the Caribbean and the northeastern United States will be to benefit its foreign air competitors at the expense of American-flag carriers.[17]

/s/ OSWALD RYAN

[17] Both domestic and international carriers will bear this expense. Every passenger between New York and Nassau, Port-au-Prince, Jamaica, Maracaibo and Barranquilla that is diverted from Pan American's connecting service via Miami to a foreign carrier single plane service will reduce the revenue not only of Pan American but of either Eastern or National over the domestic portion of the trip.

[fol. 1531] APPENDIX A

Comparison of Competitive Relationship between Eastern and National as indicated by New York-Miami traffic.

New York-Miami Traffic	Total	% of Combined
Sept. 1949 (O&D)		
EAL	7,101	64.0
NAL	4,023	36.0
March 1950 (O&D)

[1] Board surveys were not published for 1951. However, the tickets sold by each carrier itself are shown (not including tickets sold by other carriers over these lines).

[2] These are not reported Origin and Destination figures as the previous three survey months but are ticket lift by the carriers. For Eastern at least these include off-line connecting traffic.

[3] September 17-30 and March 1-14, inclusive. Earlier data were for full Months.

[fol. 1532]

Appendix I

Excerpts from the Report of Examiner Thomas L. Wrenn, served January 23, 1952, in the *New York-Balboa Through Service Proceeding*, Docket No. 4882, *et al.*

• • • • • •

However, the record contains data on the increase of community of interest between the United States and South America. These data show that the population of Latin American countries (excluding Mexico) has risen from a pre-war level of 113,500,000 to 134,360,000, or an increase of 18 percent; the Caribbean increased from 13,000,000 to 16,730,000 or more than 28 percent; Central America from 8,137,000 to 8,937,000 or 9.7 percent; and South America from 92,394,000 to 108,692,000 or 17.6 percent.

Among the larger cities which will be affected by any interchange, Buenos Aires has increased from 2,364,263 in 1939 to 4,500,000 in 1949; Caracas from 203,342 in 1936 to 600,000 in 1949; Lima from 284,839 in 1935 to 767,054 in 1948; Rio de Janeiro from 1,896,998 in 1939 to 2,400,000 in 1950; Santiago, Chile, from 696,000 in 1930 to 1,130,000 in 1949; and Sao Paulo from 1,322,000 in 1939 to 2,060,000 in 1950.

The evidence shows that the total travel between the United States and Latin America (excluding Mexico, Puerto Rico, and the Virgin Islands) has expanded by 185 percent since 1938; that in the fiscal year 1950, 838,335 passengers traveled by sea and air between the United States and Latin America compared with a total of 293,251 in 1938. Within the Latin American area, the Caribbean increased from 226,373 to 613,202; Central America from 39,452 to 89,232; and South America from 27,426 to 135,901. Air travel between the United States and Latin America increased from 47,103 in the fiscal year 1938 to 663,000 in the fiscal year 1950, an increase of 1,307 percent. Air travel raised its share of total United States-Latin American travel from 16.1 percent in the fiscal year 1938 to 79.1 percent in the fiscal year 1950.

• • • • • •

The record also shows that during the fiscal year 1950, 1,878,000 pounds of mail moved by air from the United States to Latin American countries (excluding Mexico, Puerto Rico, Virgin Islands, and Bermuda) divided between the three major geographical areas as follows: Caribbean, 535,893 pounds; Central America, 383,695 pounds; and South America, 958,419 pounds. In the calendar year 1950, Pan American transported 711,000 pounds of foreign air mail from Latin America to the United States (excluding Mexico, Puerto Rico, Virgin Islands, and Bermuda) which represented a 34 percent increase over the twelve months ended August 31, 1949.

Other exhibits show the importance of the northeastern part of the United States with respect to trade and travel with Latin America. Exhibits show that the Northeast has 44 percent of the United States' population, 48 percent of the effective buying income and has 54 percent of the [fol. 1532a] manufacturing establishments accounting for 60 percent of the value of manufactured products. These data show that the metropolitan area of New York has a population of over 12,000,000 and produces over $7,500,000,000 in manufactured products. The record shows that in 1947, 65 percent of the total United States exports to Latin American countries served by Braniff moved through the Port of New York. The evidence shows that 58 percent of all the Foreign Freight Forwarders registered with the Maritime Commission's main offices in New York City. It also shows that 29 percent of the major United States concerns doing business in the Latin American countries served by Braniff are located in New York City.

The declared residence in the United States of northbound traffic arriving at Miami on Panagra-Pan American through flights for the period January-June 1951 shows that the residence of 68.3 percent indicated routing to or through New York City or Washington with the former accounting for 48.3 percent of the total. Similar material for the period June-October 1949 shows that 66.4 percent of the traffic arriving at Miami on the Panagra-Pan American through flight had declared residences indicating routing to or through Washington or New York City.

The evidence shows that there are presently 26 steamship companies including five United States flag lines providing service between the East Coast of the United States and South America as compared with nine in 1938. It is pointed out that steamship companies have kept pace with the increased amount of travel but air transportation facilities have not substantially changed during recent years to accommodate the greater volume of traffic, that there are only a limited number of through air routes between the Northeast and South America and that all but one—Pan American—are operated by foreign flag airlines. Moreover, Pan American only provides through service to the East Coast of South America while no United States flag carrier is authorized to provide through service between the northeastern part of the United States and the West Coast of South America including the Canal Zone and Bolivia.

Pan American and Eastern point out that there are 14 competitive air services operated in the areas which would be benefited by the Eastern-Pan American-Panagra interchanges. Of these, all but three, National, Braniff, and Chicago & Southern operating to Havana—are foreign flag carriers. It is also pointed out that the Mid-West area receives service to Latin America by two carriers but that the East Coast area has no one-carrier or one-plane service to the areas of Latin America, most directly served through the Miami gateway.

Traffic Flow via Miami Gateway: Miami is the principal gateway for air travel between United States ports and Latin American countries as shown by the following table of United States-Latin American air travel during the year ended June 30, 1950:

[fol. 1533]

Table 1

Area	Total	Via Miami	Percent
Caribbean	535,063	372,469	69.6
Central America	46,138	17,786	38.5
South America	89,315	44,027	49.3
Total Latin America	670,516	434,282	64.8

NOTE: Excludes Puerto Rico, Virgin Islands, and travel across the land border of Mexico.

Pan American showed the number of passengers it carried to and from Miami for the years 1948, 1949, 1950 and January-June 1951, as follows:

Table 2

Year	Outbound	Inbound
1948	152,434	154,086
1949	148,271	151,904
1950	138,624	141,205
1951 (6 months)	79,579	85,126

A summary, compiled by Pan American from exhibits of record of southbound air passengers moving through or over Florida gateways, January-June 1951, is shown in Appendix 1A. It will be seen from Appendix 1A that a total of 147,074 passengers or 812.58 per day moved through or over Florida gateways to the seven groups of Latin American countries and that New England, New York, New Jersey, Pennsylvania, Maryland, District of Columbia, and Delaware, designated as Area A which would be most directly served under the interchange here involved, furnished 28,192 passengers or 155.78 per day.

A breakdown showing which carriers performed the service for the 28,192 passengers from Area A to the seven groups of Latin American countries is as follows:

Table 3

Carrier	Total Passengers		Percent of Total
	Amount	Per Day	
Pan American	8,968	49.57	31.81
Other U. S. Flag Carriers	5,578	30.81	19.79
Foreign Flag Carriers	13,646	75.40	48.40
Total, Groups 1-7	28,192	155.78	100.00

[fol. 1533a] A summary of air passengers moving through or over Florida gateways to and from selected Latin American countries, March and September 1950, is shown in Appendix 1B.

Another exhibit shows the proportion of total air passengers carried by foreign air carriers between New York-Newark, Baltimore-Washington and Miami and Latin America for the years ended June 30, 1947, 1948, 1949, 1950 and 1951. For the year ended June 30, 1951, these data follow:

Table 4

Area	Total Traffic		
	Total	Foreign Carrier	Percent of Total
Caribbean	436,212	102,618	23.5
Central America	26,486	7,854	29.7
South America	95,306	31,865	33.4
Total Latin America	558,004	142,337	25.5

Cuba accounted for 294,546 of the above total, with foreign carriers getting 58,788 or 20 percent of the passengers.

The record shows that for the period September 1950 through August 1951, Avianca carried a total of 11,602 passengers in and out of New York and Miami; in the seven-month period January-July 1951, L.A.V. carried 2,426 passengers north from Havana to New York and 2,320 from New York to Havana; that in the same seven months, K.L.M. had a total of 2,906 passengers in and out of Miami. Other data show that in the period January-August 1951, British Overseas Air Corporation and Bahamas Airways carried 26,112 passengers between New York, Miami or West Palm Beach, and Bahamas and Trans Canada Airlines carried 1,733. Another exhibit shows passengers carried by foreign flag carriers between the United States and Cuba for the period February-July 1951 as follows:

Table 5

Carrier	Deplaned From	Origin	Enplaned For	Destination
L.A.V.	1,613	New York	1,534	New York
Aerovias "Q" S. A.	15,268	Tampa or Key West	15,622	Tampa
K.L.M.	332	Miami	323	Miami
Cubana	10,164	Miami	13,995	Miami

Pan American submitted data on passengers delivered to or received from Eastern and National by Pan American according to interline billings for the period November 1947-June 1951:

[fol. 1534]

Table 6

Year	Passengers Exchanged Between PAA-EAL			Passengers Exchanged Between PAA-NAL		
	Total	Sale by PAA	Sale by EAL	Total	Sale by PAA	Sale by NAL
1947 (Nov. & Dec.)	7,022	5,828	1,194	1,103	754	349
1948	46,192	38,856	7,336	8,059	4,476	3,583
1949 (Apr. thru Sept.)	26,699	19,304	7,395	11,436	7,945	3,491
1950	46,419	32,652	13,767	17,918[1]	14,883[1]	3,035

* National Airlines not available.

[1] Data for Panagra tickets not available.

The foregoing traffic data includes traffic moving via Miami to Latin America. It should be remembered that South America is one area within the group termed, "Latin America". The New York-Balboa interchange investigation instituted by the Board involves traffic between New York and Balboa and points in South America served by Panagra and Braniff. The following data is on the movement of traffic between the Northeast, primarily New York and Washington, via Miami to Balboa and points south:

Table 7

Panagra's United States-South America Traffic

	1946	1947	1948	1949	1950	1951*

Table 8

RESIDENCE IN U. S. OF PANAGRA'S EL INTER AMERICANO THROUGH FLIGHT PASSENGERS ARRIVING AT MIAMI
(Including Passengers Boarding at Balboa)

JANUARY-JUNE 1951

	Breakdown by State of Destination	Total	Percent of Total
I	New York	2,704	41.5
	New Jersey	184	2.8
	New England States	213	3.3
	Eastern Canada	9	.1
	Europe (via New York)	39	.6
	Total indicating travel to or via New York City	3,149	48.3%
II	Washington, D. C.	459	7.1
	West Virginia	4	.1
	Pennsylvania	722	11.1
	Maryland	97	1.5
	Delaware	14	.2
	Total indicating travel to or via Washington, D. C.	1,296	20.0%
III	Total to other states not indicating travel to or via New York City and Washington, D. C.	2,068	31.7%
	GRAND TOTAL	6,513	100.0%
	Percentage of passengers whose declared residence in U. S. indicates routing to or through New York City or Washington, D. C.		68.3%

A Panagra exhibit shows the origin or destination in the United States of passengers carried on Panagra-Pan American through flights, January-June 1951, as follows:

Table 9

Total Passengers		Washington	New York
16,006		3,201	7,731
Number of passengers per day	88		
Number of passengers per day en route to or from Washington and New York	60		

[fol. 1535] Braniff carried the following traffic between East Coast points of the United States and Latin American points during the first six months of 1951:

	East Coast			
	New York City	Other	Total	No. per day
Six Month Total	793	613	1,406	8

Panagra points out that the foregoing data show that the through traffic between New York and the Northeast and Balboa and points south, which would be given an improved through plane service if interchanges are authorized, was 68 daily passengers or 34 in each direction during the first six months of 1951.

Braniff estimates that the total through traffic between New York, Washington and Miami, on the one hand, and points in South America served by it, is at least 178 per day based upon the September 1950 survey instead of 68 passengers per day estimated by Panagra. Braniff's analysis of the September 1950 survey from which it obtained the 178 figure follows:

Table 10

Points	Passengers
New York-Balboa	270
New York-Guayaquil	110
New York-Lima	210
New York-Sao Paulo	513
New York-Rio de Janeiro	1,571
New York-Buenos Aires	1,028
Washington-Balboa	71
Washington-Guayaquil	15
Washington-Lima	34
Washington-Sao Paulo	2

Miami-Guayaquil	146
Miami-Lima	268
Miami-Sao Paulo	12
Miami-Rio de Janeiro	20
Miami-Buenos Aires	161
TOTAL	5,332
PER DAY	178

It will be noted that 1,448 passengers or 48 per day traveled between Miami and Balboa or points south, most of which now have one-plane service. The record shows that during the first six months of 1951, Pan American carried a total of 4,254 passengers directly out of the New York gateway to Rio de Janeiro, Sao Paulo, Montevideo, and Buenos Aires.

[fol. 1535a] National presented an analysis of its southbound connecting traffic, during the six-month period ending June 30, 1951, via Miami and via Havana:

Table 11

City	Number Passengers via Miami	Number Passengers via Havana
New York	3,417	515
Philadelphia	30	—
Washington	583	177
Miami	—	99
Jacksonville	36	2
Tampa	96	—
St. Petersburg	25	78
Sarasota	27	—
West Palm Beach	30	3
New Orleans	1,057	33
Pensacola	35	—
Mobile	19	—
Other points	6	—
TOTAL	5,361	907

Out of a total of 4,345 passengers between the principal Eastern cities and South America in March 1949, New York accounted for 2,284 or 52.6 percent; Miami, 1,634 or 37.6 percent; and Washington, 219 or 5 percent of the total.

A summary of international traffic carried by Braniff between the United States points and points in Latin America during the first six months in 1951 follows:

Table 12

	East Coast	Mid-West and West	Total	Havana Traffic	Grand Total
SIX MONTHS TOTAL	1,406	2,691	4,097	1,357	5,454
Percent of Total, Excluding Havana	34.3%	65.7%	100.0%		
Percent of Total	25.8%	49.3%	75.1%	24.9%	100.0%

Travel on Braniff via the Miami and Havana gateways for the months of July, August and September 1951 follows:

The Eastern-Pan American Interchange: On January 27, 1951, Eastern and Pan American executed an interchange agreement, for which approval is requested in Docket No. 4846, under which through-plane service will be operated between points on Eastern's Boston-New York-

Washington-Miami route, on the one hand, and Latin American points south of Miami, on the routes of Pan American and Panagra, on the other hand, by interchange of equipment at Miami. Specifically, this interchange agreement embraces points on Eastern's Boston-New York-Washington-Miami route and the following points served by Pan American out of Miami: Nassau, Havana, Merida, Guatemala City, Tegucigalpa, Managua, San Jose, Camaguey, Montego Bay, Kingston, Barranquilla, Maracaibo, Port-au-Prince, Panama City and beyond Panama City all points served by Panagra.

[fol. 1536a] Schedules proposed for immediate operation are:

1. One round trip daily New York-Maracaibo via Washington, Miami, Kingston, and Barranquilla with Pan American Constellation aircraft.
2. (a) Two round trips weekly New York-Balboa tourist flights via Washington, Miami, Camaguey and Kingston with Pan American DC-4 aircraft.

   (b) Two round trips weekly New York-Balboa tourist flights via Washington and Miami with Pan American DC-4 equipment.
3. (a) One round trip daily Boston-Havana via New York and Miami with Eastern Constellation aircraft.

   (b) One round trip daily New York-Havana via Washington and Miami with Eastern Constellation aircraft.
4. One round trip daily New York-Nassau via Miami with Eastern Constellation aircraft during the summer and Pan American Constellation or Boeing 377 aircraft during the winter season.
5. One round trip daily New York-Buenos Aires via Washington, Miami, Balboa, and Lima and also serving Guayaquil, Antofasgasta or Santiago with Panagra DC-6 aircraft. This service will be an extension

of the present Panagra *El Interamericano* flights to New York.

6. Three round trips weekly New York-Buenos Aires tourist flights via Miami, Balboa, Guayaquil, Talara (flagstop), Lima and Santiago with Panagra DC-4 aircraft.

The proposed initial schedules will be adjusted as needs develop or change. Initially, Eastern aircraft will be leased to Pan American for use on the Havana schedules only. All other interchange flights will be operated with Pan American and Panagra aircraft. Eastern will operate the interchange flights as substitutions for otherwise existing schedules on Eastern's Boston-New York-Miami route. Eastern and Pan American will establish training programs to qualify their flight crews and other personnel. Under the proposed initial interchange schedules, Constellations and DC-4 aircraft will be used exclusively except for the daily *El Interamericano* flights to Buenos Aires which will employ Panagra DC-6 equipment. Eastern and Pan American have agreed that, in general, Eastern flight crews will operate Pan American aircraft while such aircraft are being flown over Eastern's routes and Pan American flight crews will operate Eastern's aircraft flown over Pan American's routes. Eastern and Pan American regard the interchange as a permanent arrangement and are requesting the Board to approve it for an indefinite period.

[fol. 1537] Detailed financial provisions for the determination of costs have been agreed upon and are embodied in a financial supplement to the agreement. Eastern estimated that in leasing aircraft from Pan American and Panagra rather than operating its own aircraft it would incur additional exepense of only $52,606 annually. Eastern will not be required to purchase additional equipment except for a small amount of aircraft radio equipment estimated to cost $60 per Eastern aircraft used in the interchange. The only other expense will be that of qualifying Eastern crews in the operation of DC-6 equipment. Pan American estimates that its costs per seat mile will be less using Eastern aircraft between Miami and Havana pursuant to the inter-

change agreement rather than using its own Convair 240 equipment. Panagra will not incur any additional expense under the proposed schedules. * * *

[fol. 1540] APPENDIX II

EXCERPTS FROM THE RECOMMENDED DECISION OF EXAMINER THOMAS L. WRENN, REOPENED NEW YORK-BALBOA THROUGH SERVICE PROCEEDING, DOCKET 4882, ET AL. SERVED NOVEMBER 13, 1953

*** ***

For the convenience of the Board and parties, a description of the investigation and applications which constitute this proceeding is hereafter set forth. Board Order No. E-5205 and Order No. E-5389 which set up this proceeding specifically directed consideration of the following: (1) A Board-instituted proceeding directing Pan American, Panagra, and National to show cause why the Board should not order a compulsory interchange operation between Pan American and National for through service between New York and Balboa to be provided by using such aircraft of Panagra as is used in the Panagra-Pan American through flight operation; (2) A Board-instituted proceeding to determine whether the certificate of Eastern for route No. 6 or the certificate of Braniff authorizing service between Houston and Buenos Aires should be amended to provide for an extension of Eastern's route from Miami to Havana or Braniff's route from Havana to Miami; (3) A Board-instituted proceeding to show cause why, in the event of an amendment of Braniff's or Eastern's certificate to provide a Havana-Miami connection for Eastern's route and Braniff's route, a compulsory interchange between Eastern and Braniff providing through service between New York and Balboa should not be ordered by the Board; (4) A Board-instituted proceeding directing Braniff and National to show cause why the Board should not order a compulsory interchange operation between Braniff and National for through service between New York and Balboa; (5) Docket No. 4846, an application for approval of an agreement between Pan American and Eastern providing for an interchange of equipment at Miami; (6) Whether it is in the public interest for Panagra to participate in the interchange between Pan American and Eastern proposed in Docket

No. 4846; (7) Docket No. 3785, an application for approval of an interchange agreement between National and Panagra; (8) Docket No. 3787, an application for approval of a modification and extension of the through flight agreement between Pan American and Panagra and a companion agreement between Pan American and W. R. Grace & Co.

Board Order No. E-5642, dated August 23, 1951, modified paragraph 7 of Order No. E-5205 relating to the Eastern and Braniff Miami-Havana extension proceeding and consolidated herein Docket No. 5030, the application of Braniff for amendment of its Houston-Buenos Aires certificate to include Miami and Docket No. 5086, the application of Eastern to operate from Miami to Havana. The order further provided that the proceeding not include the issue of whether either Grace or Pan American has acquired additional control of Panagra, which is the subject of a separate proceeding.

[fol. 1540a] *The Eastern-Pan American Interchange*: The interchange agreement between Eastern and Pan American, Docket No. 4846, was described as to provisions and details at pages 27-29 of the January 23, 1952 Examiner's Report. The record herein contains an amendment of the financial supplement of the agreement, plan of operation, and proposed schedules under the interchange. The evidence herein shows that 13 or more Boeing B-377, 38 Douglas DC-6B, 16 Douglas DC-4 aircraft owned by Pan American, 6 Douglas DC-6, 4 DC-6B, and 3 DC-4 aircraft owned by Panagra will be available for use over Eastern's New York-Miami route and 20 Lockheed L-749A, 36 L-1049, and 11 Douglas DC-4 aircraft owned by Eastern will be available for use over Pan American's Miami-Havana and Nassau routes.

Schedules proposed under the interchange are: for Panama and the West Coast of South America, seven first-class and three tourist-class services weekly using DC-6 and DC-6B aircraft; in addition, Panama would also receive four DC-4 tourist services weekly, affording it daily first-class and daily tourist-class service. Jamaica, Haiti, and the North Coast of South America will be served with two daily round trips during the winter season and one during the summer season. The basic year-round schedule, operated with DC-6B aircraft, would serve Kingston, Barranquilla,

and Maracaibo. On four days a week, this would operate as a tourist service and on three days as a first-class service. The second daily schedule would be operated from December 15 through April 15, and on four days of the week would serve Montego Bay and on three days Port-au-Prince. This schedule was not included in the 1951 proposal. Nassau would be served daily with Pan American DC-6B aircraft or Eastern Constellation, depending on the availability of equipment. Tourist service would be offered on two days of each week. Havana would be served by two round trips daily using Eastern Constellation for daily first-class service and Eastern DC-4 equipment for daily tourist service. Eastern has 22 daily flights into Miami which will connect with the several southbound interchange flights operated from Miami and 23 daily flights north out of Miami which provide connections with interchange flights operated into Miami. New features of the revised proposal are service to the new areas Montego Bay and Port-au-Prince, an increase in frequencies from 44 to 49 round trips per week, newer aircraft used, and expansion of tourist service.

*** ***

Miami Gateway Traffic Data: The traffic data previously submitted in this case were summarized at pages 19-27 and Appendixes A and B of the Examiner's Report served January 23, 1952. These data generally related to traffic for the period January-June 1951, the Board's origin and destination surveys, and other studies prior to 1951. The traffic data submitted at the hearing in this reopened case supplement the data previously submitted and are based for the most part upon special studies by all carriers for the period January-March 1953, the most recent origin and destination surveys, and other special studies made by the [fol. 1541] parties. The evidence submitted herein for the most part consists of traffic data, information on the growth and operating results of the carriers, and changes in the competitive situations together with certain changes in equipment and schedules involved in the proposed Eastern-Pan American interchange.

A comparison of the number of *southbound* passengers per day from Areas A and B moving through or over the Florida gateways based on January-June 1951 (shown in

Appendix A of the January 23, 1952 Examiner's Report) and January-March 1953, submitted in the reopened record, follow:

Table No. 1:

	Area A[1]		Area B[2]	
	1951 January-June	1953 January-March	1951 January-June	1953 January-March
Group 1				
Argentina	4.10	6.82	2.97	1.84
Bolivia	.98	1.11	.27	.38
Chile	4.81	3.21	1.32	.87
Ecuador	1.96	3.08	1.29	2.02
Peru	5.41	5.61	2.19	5.30
Total	17.26	19.83	8.04	10.41
Group 2				
Panama and Canal Zone	5.56	10.10	11.20	11.22
Group 3				
Colombia	14.89	23.32	10.26	10.61
Jamaica	10.98	42.70	26.64	33.32
Venezuela (Maracaibo)	3.13	4.61	1.12	1.16
Total	29.00	70.63	38.02	45.09
Group 4				
Cuba	68.83	79.29	450.24	447.99
Group 5				
Haiti	2.12	4.04	4.10	5.99
Group 7				
Bahamas	30.66	46.24	107.40	118.38
GRAND TOTAL	153.43	230.13	619.00	639.08

[1] Includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, District of Columbia and Delaware.

[2] Includes Virginia, North and South Carolina, Georgia and Florida. Costa Rica traffic in Group 2 and all traffic in Group 6 shown in Appendix A of the Examiner's Report served January 23, 1952 have not been shown above because the information for 1953 was not available. In 1951 Costa Rica accounted for 2.88 passengers per day and Group 6 (Guatemala, Honduras, Nicaragua, etc.) accounted for a total of 5.65 passengers per day.

Source: Ex. PA-1106.

[fol. 1541a] The foregoing data show southbound passengers from Areas A and B only; for the rest of the United States, the figure was 31.62 passengers in 1951 and 67.81 in 1953. Total southbound passengers per day in 1953 were 937.02 as compared with 812.5 in 1951, an increase of 15 percent. It will be noted that traffic from Area A and those areas of Latin America best served through the Miami Gateway increased from 153 per day to 230 per day, an increase of 50 percent, and that this increase was far greater than the increase from Area B or the total United States southbound traffic. It will also be noted that passengers from Area A to Panama, the Canal Zone and the South American countries in Group 1, which would be affected by a New York-Balboa through service, were 29.93 per day or 13 percent of the total Area A passengers and from Area B, 21.63 passengers or 3.3 percent of the total Area B passengers. It will also be seen that Cuba, with 79.29 passengers per day, accounted for the greatest number of passengers from Area A followed by Group 3 (Colombia, Jamaica, Venezuela) with 70.63 passengers per day.

A breakdown showing which carriers carried the southbound passengers shown in Table No. 1 follows:

Table No. 2:

Carrier	Area A		Area B	
	1951	1953	1951	1953
Pan American	48.56	74.40	306.34	307.46
Other U. S. Flag	30.79	44.42	118.64	85.59
Foreign Flag	74.08	111.31	194.02	246.03
Grand Total	153.43	230.13	619.00	639.08

Source: Ex. PA-1107

Origin and destination traffic data for September 1952 and March 1953 between th ten United States cities and 19 Latin American cities, ich account for 90 percent of the traffic moving betwee Areas A and B of the United States and Latin America, indicate that in March 195 there were about 49,000 air passengers in both directions

of which 19,500 were United States to Latin America and 29,500 in the opposite direction. The September 1952 figures show the same predominance of traffic flow from Latin America to the United States. In March 1953, New York City accounted for 23,700 passengers to and from Latin America while Miami accounted for 18,300 such passengers. These figures indicate that New York is the point of primary importance in Area A and Miami in Area B.

About 85 percent of the New York/Washington market traffic moved to the Caribbean Island area while the North Coast of South America had 3.5 percent, the East Coast of South America 5 percent, and the West Coast of South America had 6 percent of the total. However, about 19,400 of the 23,600 passengers for September 1952 and March [fol. 1542] 1953 moving between the New York/Washington market and the Caribbean Island area moved to and from San Juan which is not affected by any of the interchange proposals in this case.

Traffic for September 1952 and March 1953 between the Miami-Tampa area (Area B) and the Latin American market (Areas 1-4) was distributed as follows: Caribbean Island area, 89 percent; West Coast of South America, 6 percent; North Coast of South America, 3 percent; and the East Coast of South America, 1.5 percent. In terms of passengers moving between Miami-Tampa and the Caribbean Island group, there was a total of 33,800 for the two months of which 31,700 moved between Miami-Tampa and Havana and Miami-Tampa and San Juan. The interchange proposals here in issue do not benefit Miami-Havana or Miami-San Juan traffic.

Panagra's exhibit on origin and destination in the United States of passengers carried on Panagra-Pan American's through flights, January-March 1953, shows 100 passengers per day of which 68 were en route to or from Washington and New York as compared with 60 in 1951, an increase of 13 percent. Braniff's passengers to and from New York and Washington, January-March 1953, were 12.6 per day as compared with eight in 1951. In other words, the total passengers per day en route to or from Washington and

New York in 1953 were 80, or 40 in each direction, as compared with 68, or 34 in each direction, in 1951. This is the through traffic between the Northeast and Balboa and points south thereof served by Panagra and Braniff which would be given through-plane service under New York-Balboa interchange proposals.

A breakdown of the residence in the United States of the 4,435 through flight passengers on Panagra ariving at Miami, including those boarding at Balboa, January-March 1953, shows that 2,142 or 48.3 percent indicated travel to or via New York City and 887 or 20 percent indicated travel to or via Washington. In other words, 68.3 percent of the total indicated routing to or through New York City or Washington. Exclusive of passengers boarding at Balboa, there was a total of 3,120 passengers of which 71.1 percent indicated a routing to or through New York City or Washington.

Other Panagra traffic data show that in 1952 it had a total of 28,208 passengers to and from the United States as compared with 24,357 in 1951 and that passengers traveling to or from Miami were 24,880 as compared to 21,740 in 1951.

Eastern submitted the following summary of passengers between northeastern United States points and Latin American points to be benefited by the Eastern-Pan American-Panagra interchange proposed:

[fol. 1542a] Table No. 3:

Excluding Traffic Destined to or Originating Havana

CAB Survey Month	Total Passengers	Number of Passengers Carried By EAL	NAL	BNF	C&S
March 1953	5,378	2,511	2,048	125	39
Annual 1953[1]	67,232				
September 1952	4,629	2,076	1,654	151	7
March 1952	4,272	1,933	1,272	173	12
Annual 1952[2]	53,406				

Including Traffic Destined to or Originating Havana

March 1953	8,915	3,109	4,920	126	49
Annual 1953[1]	111,976				
September 1952	7,349	2,872	2,906	152	18
March 1952	6,712	2,356	3,234	175	21
Annual 1952[2]	84,366				

[1] Computed on the basis of the increase from March 1952 to March 1953.

[2] March and September multiplied by six.

Source: Ex. EAL-121.

Of the March 1953 traffic shown by the Board's survey between northeastern United States points and Latin American points involved in the Eastern-Pan American-Panagra interchange proposal, 364 were to or from Boston while there were 160 to or from Boston in September 1952; other New England points served by Eastern accounted for 45 passengers in March 1953 and 38 in September 1952.

Eastern also submitted the following summary of passengers exchanged between Eastern/Pan American and National and Pan American at Miami of traffic shown in the previous table:

Table No. 4:

CAB Survey Month	Number of Passengers Exchanged Between EAL—PAA	NAL—PAA
March 1953	2,728	1,817
September 1952	2,348	1,664
March 1952	2,218	1,284

Source: Ex. EAL-122

[fol. 1543] A comparison of Eastern's and National's participation in traffic between New York and Washington, on the one hand, and Latin American points currently served by Braniff, excluding Havana, shows that of the total of 2,482 passengers in March 1952 Eastern carried 400 and National 736, and of the total of 2,556 passengers in September 1952 Eastern carried 694 and National 916.

Pan American's through traffic exchanged at Miami and Braniff's through traffic exchanged at Miami/Havana, January-March 1953, follows:

Table No. 5:

	Pan American[1]		Braniff[2]	
	EAL	NAL	EAL	NAL
Area A	6,821	4,910	360	616
Area B	1,492	247	24	66
Total	8,313	5,157	384	682
Percent	61.7%	38.3%	36.0%	64.0%

[1] Exchanges at Miami, January-March 31, 1953.

[2] Exchanges at Miami/Havana, January-March 31, 1953.

Source: Ex. PA-1301.

In January-June 1951, the percent of participation in through passengers to and from Areas A and B, exchanged at Miami with Pan American, was Eastern 63.6 percent and National 36.4 percent. Interline ticket lifts at Miami for the period June 1952 through May 1953 show a total of 79,614 passengers exchanged between Pan American and Eastern and National; 50,552 or 63.5 percent of the total was between Pan American and Eastern; and 29,062

or 36.5 percent of the total was between Pan American and National. Gross billings for interline traffic for the period January 1952 through May 1953 between Eastern and Pan American were $8,845,020 and those between Pan American and National were $3,654,134.

National submitted the following origin and destination data of traffic carried by National in January-March 1953 between Areas A and B in the United States and Areas 1-4 in Latin America (the Caribbean and all of South America north of Buenos Aires and Santiago):

Table No. 6:

BETWEEN		Revenue Passengers			
Area and	Area	Jan. 1953	Feb. 1953	Mar. 1953	Total
I-IV	A	2,927	3,074	3,185	9,186

		3,218	3,373	3,548	10,139

[fol. 1543a] This exhibit does not reflect passengers who originated or terminated at Havana and who traveled exclusively on National. A total of 253 Canadian passengers and 327 trans-Atlantic passengers are included in the foregoing tabulation.

Revenue passengers carried by National, January-March 1953, with Latin American origin and National destination were 4,592; revenue passengers with Latin American origins, National routings, and off-line destinations were 623; revenue passengers with National origin and Latin America destinations were 4,310; and revenue passengers with Latin America destinations, National routing, and off-line origins were 614.

An analysis of National's nonstop New York-Havana operation during the first six months of service (January-June 1953) shows that National operated 180 trips southbound with a total of 10,520 available seats carrying 5,594 passengers and 180 trips northbound with 10,522 seats available carrying 4,583 passengers or a total of 10,177 passengers for both directions.

Travel on Braniff via the East Coast gateway for the period January-March 1951 is shown below:

Table No. 7:

Year	South	North	Total
July-December 1951	1,334	1,842	3,176
1952	4,162	5,371	9,533
January-March 1953	958	1,113	2,071

Carrier Participation—No. Passengers Delivered

Connecting carrier— southbound:	July-Dec. 1951	1952	Jan.-March 1953
National (at Miami)	493	1,431	254

[fol. 1544] A Braniff tabulation of March 1952 and September 1950, "Air Traffic Between the United States and Braniff's Latin American Traffic Generating Areas," shows that 75 percent of March and 83 percent of the September traffic was to and from the eastern part of the United States. An analysis of the March 1952 traffic data shows

that, of the principal eastern cities involved, New York accounted for 2,583 or 50.8 percent of the total.

Revenue passengers carried by Eastern on through flights between Miami, on the one hand, and New York, Philadelphia, and Washington, on the other hand, for the period January-March 1953 follows:

Table No. 8:

Month 1953	New York-Miami	Philadelphia-Miami	Washington-Miami	Total
January	37,680	1,547	4,657	43,884
February	38,603	1,624	4,357	44,584
March	41,610	1,685	4,666	47,961
Total 3 Months	117,893	4,856	13,680	136,429

Source: Ex. EAL-119

Revenue passengers carried by National between the same points for the same period were:

January	23,693	1,409	4,402	29,504
February	27,952	1,670	4,938	34,560
March	30,383	1,610	5,472	37,465
Total 3 Months	82,028	4,689	14,812	101,529

Foreign Air Carrier Traffic: The record contains data on foreign air carrier traffic supplemental to that summarized at pages 21 and 22 of the January 23, 1952 Examiner's Report. The proportion of total air passengers carried by foreign air carriers between the "U. S. Ports" of Miami, Key West, Tampa, West Palm Beach, New York, Baltimore, and Washington and Latin America for the year ended June 30, 1952 and for January-March 1953 follows:

Table No 9:

Area	Year Ended June 30, 1952 Total	Foreign Air Carriers	% of Total	January-March 1953 Total	Foreign Air Carriers	% of Total
Caribbean	566,512	180,679	31.9	179,169	61,564	34.4
Central America	45,386	17,868	39.4	11,531	5,317	46.1
South America	113,949	41,645	36.5	25,145	10,428	41.5
Total Latin Amer.	725,847	240,192	33.1	215,845	77,309	35.8

Source: Ex. PA-1502

[fol. 1544a] For the year ended June 30, 1951, there was a total of 558,004 passengers between the same points with 142,337 or 25.5 percent of the total using foreign air carriers. Cuba accounted for 385,468 of the 1952 total with foreign air carriers having 120,795 passengers or 31.3 percent as compared with 58,788 or 20 percent in 1951.

For the period August 1951-March 1953, Linea Aeropostal Venezolana carried 15,498 passengers between Havana and New York. For the period September 1951-March 1953, British Overseas Airways Corporation carried a total of 42,879 passengers between New York, Miami, and the Bahamas. During September 1951 through March 1953, K.L.M. carried 22,379 passengers in and out of Miami on flights operated via Havana. For the period August 1951-March 1953, Cubana carried 105,533 passengers between Miami and Cuba. For the period August 1951-March 1953, Aerovias "Q" carried 99,291 between Key West, Tampa, and Cuba.

*** ***

Delta-C&S—The Brief filed by this carrier was primarily devoted to arguing the increased necessity for a contemporaneous consideration of the Delta-C&S Havana-Miami applications with this proceeding now that Delta and Chicago & Southern are merged. The question of this carrier's applications is not present in this case, for the Board in Order Nos. E-5642 and E-5683 denied motions for consolidation of the applications of then Delta and Chicago & Southern with this case. The brief incorporates by reference a motion filed by Delta-C&S on October 8, 1953,

for immediate hearing of its Havana-Miami proposals. Under the Board's Rules of Practice, motions for consolidation of applications or for hearing of applications should be addressed to the Board unless made orally at the prehearing conference (which was not done here) in which case the presiding examiner shall present such motions to the Board for decision. Therefore, the question of hearing the Delta-C&S applications, either as a part of this proceeding or as a separate case considered contemporaneously, is not in issue in this case and is not incumbent upon the examiner to consider the argument of the carrier on this point and make findings on it.

*** ***

FINDINGS AND RECOMMENDATIONS

The evidence in the reopened record demonstrates that the volume of traffic between the East Coast of the United States and Latin America has increased since the previous hearing. The number of southbound passengers between these areas moving through the Miami Gateway averaged 869 per day during the first three months of 1953 as compared with 772 for the first six months of 1951. The greatest increase was from Area A (northeastern states) which increased 50 percent, from 153 per day in 1951 to 230 per day in 1953. It is the traffic between Area A and Latin [fol. 1545] America that would be affected by the interchanges in issue since most of Area B traffic moves from Miami and Tampa and has through-plane service to Latin America.

Panagra passengers en route to or from Washington and New York during the first three months of 1953 were 68 per day as compared with 60 per day in the first six months of 1951 and Braniff passengers en route to and from Washington were 12.6 per day in the first three months of 1953 compared with eight per day for 1951. Thus the total passengers carried were 80 per day or 40 in each direction compared to 68 per day or 34 in each direction in 1951. This is the through traffic between the Northeast and Balboa and points south served by Panagra and Braniff

which would be given through-plane service by a New York-Balboa interchange.

* * * * * *

The issue of whether the compulsory interchanges to Balboa involve overseas or foreign air transportation and the Board's power to compel such interchanges under Section 1002(i) was discussed at pages 142-145 of the Examiner's Report served January 23, 1952, and by the carriers on brief and in oral argument. Since there were no new contentions on that point set forth in the reopened hearing, no further attention will be devoted to that question herein.

* * * * * *

The evidence in the reopened hearing discloses that many difficulties experienced by Braniff at Havana in 1951 relating to adequacy of airport and terminal facilities and clearance of passengers and baggage have been or are in the process of being removed. However, the evidence discloses passengers transiting Cuba on the same aircraft are required to get out of the airplane at Havana and comply with certain health and immigration procedures at a cost of $2.50 and that efforts to eliminate this procedure have been unsuccessful. The evidence also shows that Braniff cancelled all northbound DC-6 service into Havana July 1, 1953, and operated them nonstop between Balboa and Miami since on flights operated into Havana Braniff was unable to match the competitive service of Panagra whose passengers are not subjected to these difficulties. This evidence of difficulties experienced by through passengers demonstrates that, if Braniff is to participate in any interchange to provide through-plane service, the interchange point should be Miami instead of Havana. * * *

[fol. 1546] Order No. E-9109

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.
on the 23rd day of November, 1954

Docket No. 4882 *et al.*

In the matter of the

REOPENED NEW YORK-BALBOA THROUGH SERVICE PROCEEDING

ORDER

A full public hearing having been held in the above-entitled proceeding, and the Board, upon consideration of the record, having issued its opinion containing its findings, conclusions, and decision;

IT IS ORDERED:

1. That the certificate of public convenience and necessity issued to Braniff Airways, Inc., pursuant to Order Serial No. 4793 dated May 17, 1946, be amended and issued in the form attached hereto;

2. That said amended certificate of public convenience and necessity shall be signed on behalf of the Board by its Chairman, shall have affixed thereto the seal of the Board attested by the Secretary, and shall be effective sixty days after the date of its approval by the President of the United States;

3. That the application of Eastern Air Lines, Inc., in Docket No. 5086, for authority to serve Havana, Cuba, be and it hereby is denied;

[fol. 1546a] 4. That except as otherwise granted herein, all applications consolidated herein for authority to engage in overseas or foreign air transportation be and they hereby are denied.

By the Civil Aeronautics Board:

/s/ M. C. MULLIGAN

M. C. Mulligan
Secretary

(SEAL)

THE WHITE HOUSE

APPROVED:

/s/ DWIGHT D. EISENHOWER

April 18, 1955

[fol. 1547]

Issued pursuant to
Order No. E-9109

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

CERTIFICATE OF PUBLIC CONVENIENCE
AND NECESSITY
(as amended)

BRANIFF AIRWAYS, INC.

is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, and the orders, rules, and regulations issued thereunder, to engage in air transportation with respect to persons, property and mail, as follows:

1. Between the terminal point Houston, Texas, the intermediate points Havana, Cuba, Balboa, Canal

Zone, Bogota, Colombia, Quito and Guayaquil, Ecuador, Lima, Peru, La Paz, Bolivia, and Asuncion, Paraguay, and (a) beyond Asuncion, Paraguay, the intermediate point Sao Paulo, Brazil, and the terminal point Rio de Janeiro, Brazil, and (b) beyond Asuncion, Paraguay, the terminal point Buenos Aires, Argentina;

2. Between the terminal point Miami, Fla., the intermediate point Havana, Cuba, and the terminal point Balboa, C. Z.

The service herein authorized is subject to the following terms, conditions, and limitations:

(1) Notwithstanding any other provision of this certificate, as amended, the holder shall at all times conduct its operations in accordance with all treaties and agreements between the United States and other countries, and the exercise of the privileges granted by this certificate, as amended, shall be subject to compliance with such treaties and agreements and to any orders of the Board issued pursuant to, or for the purpose of requiring compliance with, such treaties and agreements.

(2) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

[fol. 1547a] (3) The holder may continue to serve regularly any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate, as amended; and may continue to maintain regularly scheduled nonstop service between any two points not consecutively named herein if nonstop service was regularly scheduled by the holder between such points prior to the effective date of this certificate, as amended. Upon compliance with such procedure relating thereto

as may be prescribed by the Board, the holder may, in addition to the service hereinabove expressly prescribed, regularly serve a point named herein through any airport convenient thereto, and render scheduled nonstop service between any two points not consecutively named herein, between which service is authorized hereby.

(4) The exercise of the authority granted herein shall be subject to there being first obtained from the appropriate foreign government such operating rights as may be necessary.

(5) In operations conducted pursuant to the authorization set forth and described in route segment "1" above flights serving the intermediate point Havana, Cuba, shall originate at Houston or a point in the United States and terminate at a point in South America, or originate at a point in South America, and terminate at Houston or a point in the United States.

(6) The holder shall render service pursuant to the authorization set forth and described in route segment "2" above only on through-plane flights (a) which are operated by interchange of equipment between the holder and Eastern Air Lines, Inc., (b) which originate at New York, N. Y./Newark, N. J., and terminate at Balboa or points south thereof or originate at Balboa or a point south thereof and terminate at New York, N. Y./Newark, N. J., and (c) which do not serve points north of Miami, Fla., on Eastern Air Lines' route No. 6 other than points on the Miami-New York/Newark segment of said route.

The exercise of the privileges granted by this certificate, as amended, shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This certificate, as amended, shall be effective sixty days after the date of its approval by the President of the United States: *Provided, however,* That prior to the date on which

the certificate, as amended, would otherwise become effective the Board, either on its own initiative or upon the filing of a petition or petitions seeking reconsideration of the Board's order of November 23, 1954 (Order No. E-9109), insofar as such order authorizes the issuance of this certificate, as amended, may by order or orders extend such effective date from time to time.

[fol. 1548] IN WITNESS WHEREOF, the Civil Aeronautics Board has caused this certificate, as amended, to be executed by its Chairman and the seal of the Board to be affixed hereto, attested by the Secretary of the Board, on the 23rd day of November, 1954.

Docket No. 4882 *et al.*

In the matter of the

REOPENED NEW YORK-BALBOA THROUGH SERVICE PROCEEDING

ORDER

A full public hearing having been held in the above-entitled proceeding, and the Board, upon consideration of the record, having issued its opinion containing its findings, conclusions, and decision, which is attached hereto and made a part hereof;

IT IS ORDERED:

1. That the application in Docket No. 4846, as amended, for approval of the Interchange Agreement between Eastern Air Lines, Inc. (Eastern) and Pan American World Airways, Inc., be and hereby is denied;

2. That the record in this proceeding be and hereby is held open for 60 days from the effective date of this order to the extent necessary to permit Eastern Air Lines, Inc., and Braniff Airways, Inc., to enter into and file with the Board for approval an interchange agreement providing for through service between New York on Eastern's route No. 6, and Balboa, Canal Zone, and points south thereof on Braniff's South American route;

3. That the record in this proceeding be and hereby is held open for 60 days from the effective date of this order

to the extent necessary to permit National Airlines, Inc. (National), and Pan American-Grace Airways, Inc. (Panagra), to enter into and file with the Board for approval an interchange agreement providing for through service between New York, on National's route No. 31, and Balboa and points on Panagra's route in South America using Panagra equipment north of Balboa;

4. That decision on the application for approval of the Through Flight Agreement in Docket No. 3787, and the National-Panagra Interchange Agreement in Docket No. 3785 be and it hereby is deferred;

[fol. 1549a] 5. That decision on the Board-instituted proceeding in paragraph "8" of Order Serial No. E-5205, adopted March 16, 1951, with respect to a compulsory interchange operation between Eastern and Braniff, be and hereby is deferred.

6. That the proceeding instituted in paragraph "4" of Order Serial No. E-5205, that instituted in paragraph "7" thereof, insofar as it relates to the extension of Eastern's route No. 6, and that instituted in paragraph "1" of Order Serial No. E-5389, dated May 18, 1951, be and they hereby are dismissed;

7. That, except to the extent otherwise granted in this order or in Order No. E-9109, issued contemporaneously herewith, or deferred or dismissed herein, all applications, petitions and proceedings consolidated herein should be denied.

Cable Address
"PANAGRA"

PAN AMERICAN-GRACE AIRWAYS, INC.

OFFICE OF THE PRESIDENT
7 HANOVER SQUARE
NEW YORK 5, N. Y.

November 26, 1956

Board of Directors
Pan American-Grace Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

Gentlemen:

Attached are the results of a detailed planning study conducted by the Management as part of its responsibility to apprise the Directors of various conditions, both economic and operating, which are influencing the company's growth.

The attached report is an attempt to examine the financial and operating aspects of Panagra objectively and in the light of the changing air transportation picture in the Western Hemisphere.

It is abundantly clear to the Management that if Panagra is to provide for the travelling public a thoroughly satisfactory type of service between the United States and Latin America, in the face of steadily increasing foreign flag competition, it must without further delay petition the Civil Aeronautics Board for extension of its certificated routes to the United States Atlantic and Pacific seaboards which furnish the bulk of international traffic to the West Coast of South America and Buenos Aires.

[fol. 1551] Panagra's situation is a desperate one. It is unique as the only U. S. international carrier without a terminal in the United States and, moreover, the only air-

line that has been forced into an attempt to meet the public demand for its service by leasing its aircraft to not one but two other carriers.

Between 1946 and 1955, U. S. international carriers increased the total route miles operated by 112%; Panagra holds the dubious distinction of having had its route miles *decreased* by 12% in the same period.

Because Panagra's route structure, with its terminal points at Buenos Aires and the Canal Zone, is long and lean, it is hampered both by inflexibility and overhead/operating costs which are disproportionate for the industry. The fixed operating expenses which accrue irrespective of the mileage flown are inordinately high, on the basis of available ton miles, because of the route limitations. Nor would an increase of available ton miles on the present routes furnish a solution to this imbalance.

The only logical solution is the extension of Panagra's routes to markets which will share the fixed overhead expenses and permit profitable load factors.

Concomitant with these fixed expenses is the condition of inflexibility which contributes to them and at the same time fetters the operations when local political/economic reversals adversely influence traffic. Illustrative of this is [fol. 1552] the difficulty in the Argentine—an area which generated as a point of origin or destination 54% of Panagra's passenger revenue miles in 1955 and which in the first quarter of 1956 was off 17.7%. Because Buenos Aires is a crucial terminal for long haul passenger revenue, because there was no other area in Panagra's route structure which could absorb this reduction, and because it was necessary to maintain service to Buenos Aires, Panagra's overall transportation revenues barely offset the operating expenses. At the same time, Pan American's LAD, which also serves Buenos Aires as a terminal on its East Coast route and thereby suffered a traffic loss, was able to spread its fixed costs over a broad base and to absorb these reverses in other sectors of its LAD network which showed a significant increase in revenue passenger miles in the first quarter 1956/1955 of 14%.

Closely allied to the problems of inflexibility and high operating costs is the low utilization of equipment permitted by Panagra's long thin route. The maintenance of schedule regularity demanded of a first-class international carrier serving this long haul traffic requires not only a high level of aircraft, instrument, and engine maintenance but standby equipment as well. Unfortunately, there are no areas on Panagra's route which standby equipment can economically serve. Moreover, valuable flight time prior to scheduled overhaul of aircraft is frequently lost because there are fewer flying hours remaining than are required to complete the round trip to South America from the [fol. 1553] United States. Much of this loss would be eradicated by the extension of Panagra's route not only as recommended in the attached report but also by other route extensions which additional studies may prove desirable and in the public interest.

That through service between New York and Buenos Aires via the West Coast of South America is in the public interest has been manifested not only by the Panagra/Pan American Through Flight Agreement of 1946 but by the award of extensive routes to Braniff in the same year, the Braniff unsolicited Miami exemption, and approval of the Panagra and Braniff interchanges providing service to New York. The report illustrates fully the traffic pattern that has been developed in the past decade between South America and Miami via Balboa. Since 1946, the Balboa-Miami operation has grown from that of the DC-4 (5½ hours) to the DC-7B (4 hours) and is now on the threshhold of the DC-8 (2½ hours). Operations Miami-Lima nonstop will undoubtedly be required as will the traffic demand to fly New York-Lima nonstop. Such long range jet operations are patently impracticable under through flight or interchange agreements.

When Panagra and Pan American entered the Through Flight Agreement in 1946 DC-6's were on order at a purchase price of approximately $700,000 per aircraft. In January 1956, Pan American gave formal notice to Panagra that it wished, pursuant to the Agreement, to renegoti-

ate, among other matters, the investment base upon which [fol. 1554] Panagra's return was predicated. The advent of the DC-7B at a unit cost of $2,100,000 thus allegedly distorted Pan American's position with respect to the Agreement. If one were to assume such distortion to be, in fact, true; it is manifest that DC-8's at a unit cost of $5,000,000 will create even greater concern. Moreover, Pan American suggests that the basis for the calculation of charter hire and return on investment under the Through Flight Agreement should be similar to that negotiated with National by Panagra and Pan American under circumstances which virtually constituted duress. Panagra was forced into the Interchange Agreement by an ultimatum issued by the Civil Aeronautics Board and thus negotiated at an unconscionable disadvantage. Furthermore, the Panagra/National operation is financially detrimental to Panagra because its reimbursement is predicated on the lower expense levels of the domestic carrier and these are entirely unrealistic for an international carrier.

The attached report establishes that it is reasonable to expect Panagra to earn in 1957, without subsidy and before taxes, $1,062,000 operating the Balboa-Miami sector on its own certificate. These earnings are $666,000 *more* than the $396,000 it could expect as a return under the Through Flight—a return which Pan American now alleges to be excessive. With extension of the route to New York, the 1957 earnings for that sector are estimated at $365,000 versus a $358,000 loss under the National interchange. Ex- [fol. 1555] tension of the route from Balboa to California will provide additional operating earnings of $442,000.

Similarly, the interchange operation with National Airlines is inimical to Panagra's interests. The difficulties inherent in attempting to operate an international service under an interchange agreement with a domestic carrier have manifested themselves in numerous ways. They have proved conclusively that such interchanges are most undesirable not only from the international carrier's viewpoint but from that of the public interest as well. In terms of prestige, the United States has suffered and will continue to suffer unless the foreign traveller is provided the same

high quality of service during his entire flight to destination as is offered by numerous foreign flag carriers and by the U. S. flag international carrier to and from the U. S. port of entry.

Panagra's reputation and good will are suffering from the National operation of the interchange. Passenger complaints on the interchange have been numerous with respect to the poor standards of passenger service particularly aloft but at the Miami and Idlewild terminals as well. Delays on the domestic portion have been inexcusably excessive and the disruption of Panagra's schedules to South America are of vital concern. Attempts by Panagra's Management to correct these domestic deficiencies have been met not only with apathy but resistance by National.

Another illustration is the labor difficulties National has experienced with its pilots. Should a strike materialize, [fol. 1556] Panagra would suffer the interruption of through service to New York—even though it is not a party to the dispute.

Mixing international and domestic services is like mixing oil and water. When this loss of good will to Panagra is calculated along with the financial deficit resulting from the interchange operation, it is obviously imperative that the company make every effort to secure its own route and provide adequate service between the northeastern United States and Buenos Aires via the West Coast of South America.

In addition to the strictly economic factors which dictate the necessity of Panagra's application for extension of its own route from Balboa to New York and to California, another consideration must be recognized—the further obligation which a corporation has to the people who work for its success, the employees. Some of Panagra's 1400 employees have devoted twenty-odd years to the company's success and have exerted their best efforts in the belief that the company was providing a valuable service and one that would expand in scope throughout the years.

With regard to subsidy, which has been necessary to augment Panagra's meager revenues from its thin routes,

the history of the airline industry offers numerous examples of the elimination of subsidy need by the extension of routes which permit an increase in passenger and cargo [fol. 1557] revenues. It is the earnest endeavor of the Panagra Management to operate the airline independently and without the need for Federal subsidy. It is quite clear on the other hand that with the rising operating costs, and particularly extensive re-equipment costs, Panagra will need substantially greater subsidy payments to realize a 9% return after taxes than it would if granted route extensions and permitted thereby to reduce expenses per available ton mile and increase overall revenues.

I appreciate, of course, that the Directors will require time for consideration of the report herewith submitted. I most earnestly urge that the matter be approached by the Directors in the spirit in which it is submitted—that is, that the proposed route extensions are urgently required in the interest of the travelling public, which is paramount, and in the interest of the stockholders.

I plan to include this matter on the agenda of the regular Directors Meeting to be held on January 7, 1957. Thus, the Directors will be afforded ample time for deliberation.

At the meeting I shall request the Board's authority to file promptly with the Civil Aeronautics Board the application for the route extension to Miami, Washington, and [fol. 1558] New York and also to Mexico City, Los Angeles and San Francisco.

Please do not hesitate to call on me for any assistance I may be able to render.

EXECUTIVE OFFICES

November 30, 1956

Mr. Andrew B. Shea
Executive Vice President
W. R. Grace and Company
7 Hanover Square
New York 5, New York

Dear Andy:

This will acknowledge, on behalf of Messrs. Balluder, Friendly, Morrison and myself, the nine-page letter which we received from you on November 27, enclosing a so-called "Management" Panagra Route Extension Study, consisting of 132 pages plus 26 annexed tables.

If this had been a true "management study", the Board of Directors would naturally have been informed about it while the large amounts of the time and effort of company employees required for its preparation were being expended. Even a quick reading is enough to show that the "study" is not a balanced and objective presentation of Panagra's situation but simply reflects the views of the Grace ownership.

Despite the foregoing, we shall give careful study to this document and will do our best to be ready to discuss it on January 7, 1957, as you request.

We are, indeed, pleased to find that the Grace ownership now agrees as to the need for through service between the Pacific Coast of the United States and points on Panagra's route. This makes it all the more regrettable that when Pan American proposed this some years ago, the Grace

interests declined to permit Panagra to enter into an interchange agreement that would have provided this needed service. We hope this through service can soon be implemented.

Sincerely yours,

/s/ Roger Lewis

GOVERNMENT'S EXHIBIT 1134

(Emblem)

PAN AMERICAN WORLD AIRWAYS SYSTEM
CHRYSLER BUILDING, 135 EAST 42ND STREET,
NEW YORK 17, N. Y.

EXECUTIVE OFFICES

January 10, 1957

Mr. Andrew B. Shea
Executive Vice-President
W. R. Grace and Company
7 Hanover Square
New York 5, New York

Dear Mr. Shea:

The Directors of Pan American-Grace Airways, Inc. representing the half ownership of Pan American World Airways, Inc. have examined the proposal, made in your letter of November 26, 1956, that Pan American-Grace should now apply to the Government for certificates for 5700 miles of new routes. These routes would be between the Canal and Miami, over which Panagra's aircraft now fly under a 99-year Through Flight Agreement with Pan American approved by the Civil Aeronautics Board in 1947 and again in 1955; between Miami and New York, over which Panagra's aircraft now fly under an interchange agreement with National approved by the Board in 1955; and between

the Canal and California, as to which the Grace management of Panagra refused in 1954 to permit Panagra to enter into an interchange agreement with Pan American.

It is, of course, obvious, despite the effort to disguise this, that you are making this proposal for wholesale repudiation of agreements concluded with Pan American both by Grace and by Panagra with Grace's full assent, not as [fol. 1563] hold-over President of Panagra but as a senior officer of the Grace empire, whose ships parallel Panagra's route down the West Coast of South America. Although nearly 30 years of experience should have taught us how Grace regards contracts between us, we must confess our sense of shock at the utterly casual attitude taken toward agreements concluded under the circumstances of those here involved.

The Through Flight Agreement of 1946 between Pan American and Panagra and the companion agreement between Pan American and Grace were 99-year agreements, intended, as your own then senior officer swore to before the Civil Aeronautics Board, as a complete and final solution, so far as the parties were concerned, of the question of through air service north of the Canal to Miami and beyond. The agreements contain detailed provision for notice to Pan American in the event of any claim that it was failing to perform its obligations, and for arbitration if Pan American then failed to cure any such alleged defaults. We have never been, and are not now, advised of any such alleged failure on Pan American's part. Indeed, Pan American has gone beyond the 1946 agreements and proposed to you some years ago a second through flight agreement to provide the through American-flag service between California and points on Panagra's route, which is so important both to the national interest and to Pan American's interest as half owner of Panagra and as operator of the California-Canal route under a certificate approved by the President. Grace blocked this proposal, as it had previously blocked Pan American's proposals of 1938 and 1941 for through service between the [fol. 1564] West Coast of South America and Miami.

During the nearly ten years since the Through Flight Agreement has been effective, Grace has reaped its benefits,—benefits which, as your then senior officer testified, would not have been realized if Panagra had its own certificate north of the Canal. These benefits included having the through flights operated exclusively with Panagra's equipment and crews, in contrast to the industry practice of reciprocity; favorable financial terms; the maintenance of Panagra's aircraft in Pan American's shops; and the training of Panagra flight personnel by Pan American. Pan American has loyally discharged all its obligations under the Agreement,—even to the extent of making double payment to the Pan American pilots displaced by Panagra pilots on the Canal Zone-Miami route.

When we read the present Grace proposal to treat these agreements of 1946 also as mere scraps of paper, we cannot help but recall both the assurances to the Government by your senior officer ten years ago that this was intended to be a virtually perpetual contract, and your own sworn testimony, given on two separate occasions before the Civil Aeronautics Board and true today as it was then, that performance under the Agreement had been of great benefit to the traveling public and entirely satisfactory to both parties.

The concluding portion of your proposal recognizes the urgent need of improved service between the West Coast of the United States and points on Panagra's route. This is something which we have urged for some years. Grace blocked Panagra from doing this except on a basis whereby [fol. 1565] Panagra, while retaining 100% of all profit, would be guaranteed by Pan American against any loss. When Pan American agreed to accept this unheard of demand in an effort to get this needed public service started, Grace insisted that the interchange serve no point south of Lima. Finally, when a formula to meet this roadblock was developed, Grace took the position that nothing could be done to provide through American-flag service from California until all matters then at issue between the Panagra pilots and the Pan American pilots were settled. Al-

though such a settlement was reached in 1955, on a basis calling for operation of the California interchange flights exactly as Pan American had suggested, we did not receive any indication until your recent letter that you would be willing to acquiesce in through service from California.

Since Grace now recognizes the need of through service between California and points on Panagra's route, we are again submitting an equipment interchange agreement for through plane operation between San Francisco and Los Angeles and Lima and Buenos Aires via the Canal. This agreement is in line with normal industry practice, taking account of the existing agreement with respect to the Miami flights, and conforms fully with the contract made between our respective pilots. We urge the Grace directors of Panagra to join with us in authorizing Panagra to execute such an agreement, so that this long delayed public [fol. 1566] service to California may be speedily commenced.

Very truly yours,

/s/ E. Balluder

Directors of Pan American-Grace Airways, Inc.,
nominated by Pan American World Airways, Inc.

[fol. 1568]

GOVERNMENT'S EXHIBIT 1135

Minutes of Adjourned Regular Meeting of the Board of Directors of Pan American-Grace Airways, Inc held at the office of Pan American World Airways, Inc, 135 East 42nd Street, New York, N Y on the 10th day of January, 1957 at 4:00 o'clock in the afternoon.

PRESENT:

Messrs Erwin Balluder
Edward L Farrell, Jr
Henry J Friendly
Felix E Larkin
Roger Lewis
Franklin Moon
Wilbur L Morrison
Andrew B Shea

being all the members of the Board.

Mr Shea, President, presided. Mr Cogswell, Secretary, acted as such.

Minutes of Regular Meeting of December 3, 1956 were read and approved.

The following financial data were submitted and discussed:

Comparative Statement of Profit and Loss for the month of November, 1956 and eleven months ended November 30, 1956 and 1955.

Comparative Operating Statistics for month of November, 1956 and eleven months ended November 30, 1956 and 1955

Statement of Cash Position as at December 31, 1956 and Comparison with September 30, 1956 and December 31, 1955

Cash Position Forecast for Year Ending December 31, 1955

The President reported:

(1) Estimated Profit and Loss for 1957

(2) Negotiations had been completed for the sale to Faucett of DC-4 airplane, License No. N8816, with engines, [fol. 1569] for $550,000, as authorized by the Board at meeting of October 1, 1956.

(3) The death of William Harley, passenger service representative at Idlewild Airport and the payment to his mother of the equivalent of his salary to March 31, 1957.

The President presented for attachment to the minutes of the meeting letter of November 26, 1956 and Route Extension Study accompanying same, containing recommendations of the management as to route extensions, which had been delivered to each Director on November 27, 1956.

Mr Larkin thereupon offered the following resolutions which were seconded by Mr Farrell:

RESOLVED, that the officers of this Corporation be, and they hereby are, authorized and directed to take all steps including the filing of the necessary application to the Civil Aeronautics Board to the end of obtaining an amendment to the Corporation's certificate of public convenience and necessity authorizing it to engage in air transportation over the route between Balboa and New York and intermediate points described and recommended in the letter of the President to all Directors dated November 26, 1956 and in the Route Extension Study dated November 1956 attached thereto, copies of which were presented to each director on November 27, 1956.

RESOLVED, that the officers of this Corporation be, and they hereby are, authorized and directed to take all steps including the filing of the necesary application to the Civil Aeronautics Board to the end of obtaining an amendment to the Corporation's certificate of public convenience and necessity authorizing it to engage in air transportation over the route between Balboa, Mexico City and Los Angeles and San

Francisco as co-terminals described and recommended in the letter of the President to all Directors dated November 26, 1956 and in the Route Extension Study dated November 1956 attached thereto, copies of which were presented to each director on November 27, 1956.

[fol. 1570] Mr. Friendly presented for attachment to the minutes of the meeting letter to Mr. Shea dated January 10, 1957, signed by Messrs. Balluder, Friendly, Lewis and Morrison.

Mr. Shea stated that he would reply to the foregoing letter with the understanding that his reply letter would be attached to the minutes of the meeting

Mr. Friendly stated that the right was reserved to reply to Mr. Shea's letter and, if such reply were made, to have it attached to the minutes of the meeting.

Vote being had, Mr. Larkin's resolutions failed to pass, Messrs. Farrell, Larkin, Moon and Shea voting in favor, and Messrs. Balluder, Friendly, Lewis and Morrison voting against.

Mr. Lewis referred to the proposals made by Pan American some years ago for the establishment of through plane service from California by Panagra's chartering Pan American aircraft now flying over Pan American's route between California and Panama for operation over Panagra's route beyond, and to the failure of these proposals because of their being blocked by W. R. Grace & Co. He also referred to the present recognition by W. R. Grace & Co. of the importance of through American-flag air service from California to points on Panagra's route. He stated that, in the light of this, Pan American had revised the draft interchange agreement prepared some years ago, presented copies of a draft agreement as so revised, and asked that one of these be filed with the minutes of the meeting.

Mr. Lewis thereupon made the following motion, which [fol. 1571] was seconded by Mr Balluder:

RESOLVED, that Pan American-Grace Airways, Inc. conclude with Pan American World Airways, Inc., a suitable equipment interchange agreement for the institution of through plane service over Pan American's route from San Francisco and Los Angeles to Panama and Panagra's route beyond, such service to be provided with Pan American aircraft and flight crews, in line with the agreement reached between the pilots of the two companies, until a basis of reciprocity between the two companies had been achieved, and apply to the Civil Aeronautics Board for approval of such agreement, to the end that through American-flag air service between California and points in South America served by Panagra may be made available to the public at the earliest possible date; and

RESOLVED, that the President report to the next meeting of the Board of Directors the progress made by him in carrying out the foregoing resolution.

Vote being had, Mr. Lewis's resolution failed to pass, Messrs Balluder, Friendly, Lewis and Morrison voting in favor, and Messrs Farrell, Larkin, Moon and Shea voting against.

There being no further business, the meeting adjourned.

/s/ Andrew B Shea
Chairman

/s/ W F Cogswell
Secretary

PAN AMERICAN-GRACE AIRWAYS, INC.
ROUTE EXTENSION STUDY

November 1956

[fol. 1574]

PANAGRA: PROPOSED ROUTE EXTENSIONS

GENERAL STATEMENT

Panagra's basic route structure has remained static since the passage of the Civil Aeronautics Act of 1938. In fact, since the first postwar year, 1946, Panagra's route mileage has actually shrunk by 11%. This shrinkage has resulted from loss of cabotage rights in certain countries, and from abandonment of operations made obsolete by introduction of modern four-engine equipment. There has been no offsetting expansion to new markets made possible by the new equipment despite:

(1) Remarkable growth in the population, wealth, production and trade of Latin American countries. See Annex A.

(2) A doubling, between 1949 and 1955, in the number of air travelers between the United States and South and Central America, with the prospect of undiminished growth in the future. See Annex B.

(3) A highly successful common carrier operation and quality of service achieved by Panagra on its present routes. See Annex C.

[fol. 1575] (4) A forward thinking equipment program, consistently maintained since the inception of the airline, and which now provides for the early introduction of long-range jet aircraft. See Annex D.

(5) Entry of a competitive United States flag carrier possessing an extensive domestic system (Braniff Airways) into every major market served by Panagra with the exception of Chile, plus several major South American cities not on Panagra's routes. See Annex E.

(6) Route expansion of Pan American World Airways Latin American Division by 10%, and of Pan American's numerous foreign affiliate air carriers throughout Central and South America by 160%, since 1946. See Annex F.

(7) Creation or expansion of at least 25 foreign air carriers, not affiliated with Pan American, in this area of the world. Many of these carriers as well as new ones are contemplating or have actually applied for route extensions. Foreign carriers accounted for 35% of U.S.-South American air traffic in 1954-5. See Annex G.

(8) A constant and impressive route growth by U. S. certificated air carriers, other than Panagra, both [fol. 1576] domestically and throughout the world. See Annex H.

If Panagra is to be permitted to participate fully in the economic growth of the part of the world it now serves so well, it is imperative that Panagra file promptly and prosecute vigorously new route applications before the Civil Aeronautics Board. The new routes proposed in this memorandum represent a natural and logical development of Panagra's existing route structure and service pattern.

The major deficiency of Panagra's present route structure is the lack of direct access to the continental United States. The United States is the richest air travel market in the world and the principal source of Panagra's passengers and cargo. Panagra, which has been engaged in Latin American air operations since 1928, is a logical and deserving carrier to connect South America with the United States on its own certificate. Panagra is the *only* certificated United States air carrier (except for small territorial carriers) which does not have a point of entry into the United States.

The addition of the routes proposed below would create for Panagra a well integrated route structure with both a broader and a higher-density mileage base. An important [fol. 1577] effect of this is to bring Panagra's ground and indirect expense ratios into closer relation with the rest of the airline industry. They have been disproportionately

high because Panagra has not been able to enlarge and integrate its route structure to encompass stronger traffic points. To illustrate the need, Panagra carries only 10.29 revenue ton miles per route mile per day, compared to 23.29 for Pan American's competitive Latin American Division. (See Annex J).

The time for submitting the applications is ripe. Many proceedings are already on the C.A.B. docket at various procedural stages which affect Panagra's growth prospects. (See Annex K). In the past year or so the C.A.B. has made or proposed route awards to every medium-size United States air carrier except Panagra. (See Annex H). In these cases the Board has made a deliberate and far-reaching effort to expand the systems of the middle and small size trunk carriers. The same new policies which have led to the substantial domestic expansion of carriers such as Braniff, Delta, Continental and Capital apply with equal force to Panagra in the international sphere. It would be a major loss of opportunity for Panagra not to capitalize on this new and fundamental policy turn.

[fol. 1578] There is a further reason for pressing the route applications at this time. That is, if Panagra is to be more than temporarily self-sufficient, it must grow! In fact, an airline today must expand to broader markets simply to keep even with the burgeoning airline industry. The real prospect that Government subsidy support for international airlines may be eliminated means that Panagra must increase its efforts to explore and exploit every new source of revenue possible. The only major route applications which Panagra now has on file with the C.A.B. is to add the intermediate point of Bogota on Panagra's present main route and to obtain authority to operate an inland route in South America Balboa-Bogota-Iquitos-La Paz-Buenos Aires. However, these proposals to improve Panagra's service within South America, important as they are, do not meet Panagra's central need—to gain the full revenues from U.S.-South America West Coast air traffic.

The proposed route applications presented here are Balboa-Miami, Miami-Washington/New York, and Balboa-Mexico City-Los Angeles/San Francisco. Other possible route extensions have been and are being studied.

[fol. 1579]

[fol. 1580] —6—

PART ONE

BALBOA-MIAMI

A. Nature of Application

The application is to extend Panagra's route 1,159 miles north from Balboa to Miami, an increase of 21% in unduplicated route mileage operated. The unrestricted certificate would permit Panagra, on a scheduled basis, to overfly Balboa on flights between Lima and Miami, to carry Balboa-Miami local passengers on those through flights landing at Balboa, and to operate local turnaround service between Balboa and Miami.

It is contemplated that operations initially would be limited to through flights and that Balboa would not be overflown.

Direct entry into Miami, of course, would eliminate the need for the existing through flight arrangement with Pan American over its Balboa-Miami segment.

B. Reasons for Application

As will be developed more fully below, this extension commends itself for the following reasons:

(1) It is the most natural extension traffiewise. Almost one-half of the total number of passengers carried by U. S. air carriers over this segment originate at or are destined to points on Panagra's present routes south of Balboa. One-half of Panagra's long haul traffic goes through Miami. In the first year of operation Panagra would carry in excess of 36,000 through passengers between Miami and points south of Balboa.

(2) It is the most profitable extension possible to Panagra producing an estimated $1,062,000 operating

—7—

[fol. 1581] profit in the first year of operation. The sector requires no additional flight equipment. It

would not require any new capital investment or developmental expense, except for the possible establishment of sales offices in Miami and New York.

(3) Panagra would need no subsidy to operate the route. In fact, commercial revenues from Panagra operation of the Miami-Balboa segment would materially help in offsetting the possible loss of Government subsidy support to the rest of Panagra's system.

(4) Panagra aircraft and Panagra pilots already fly over this segment, while the presently certificated carrier —Pan American—offers only minimal service of its own.

(5) It would provide the most direct and important entry into the continental United States for Panagra, the only major U. S. certificated carrier without a terminal in the United States.

(6) It would cure latent difficulties in continuing to operate under the oppressive but still prevailing Pan American Through Flight Agreement. Independent operation would net Panagra an estimated $666,000 more per year before taxes than Pan American would pay Panagra under the existing Through Flight Agreement.

C. Background of Application

Only one previous application has been made formally to the Civil Aeronautics Board to extend Panagra north from Balboa to a terminal within the United States. That application was not dealt with on the merits.

—8—

[fol. 1582] In December 1941 W. R. Grace & Co. petitioned on behalf of Panagra to have Panagra's certificate amended so as to make the northern terminal of its route a point or points in the eastern United States, specifying Miami, Tampa or New Orleans (Docket 707). No formal action was taken on this application. In September 1942 the Civil Aeronautics Board instituted on its own motion the Panagra Terminal Investigation to determine whether Panagra should be extended into the United States (Docket 779).

Pan American intervened to oppose such extension. After a long hearing, the Board issued an order in May 1944 disclaiming jurisdiction to extend Panagra into the United States on W. R. Grace & Co.'s petition (4 C.A.B. 670). The Board's order was reversed by the Second Circuit Court of Appeals in February 1946. The case was remanded to the Board for determination of whether Panagra should be treated as applying for the extension and if so, for action on the merits of the application (154 F.2d 271). Pan American promptly sought review of the court's decision before the United States Supreme Court.

Shortly thereafter, in May 1946, Braniff Airways was awarded extensive routes in South America competitive with those of Panagra. (In awarding these routes to Braniff the Board indicated its receptiveness to a Miami-Balboa application *by Panagra*. Latin American Air Service Case, 6 C.A.B. 857, 914.) The following month, June 1946, Peruvian International Airways filed an application for a foreign air carrier permit to operate between Lima and New York City. (The permit was granted in July 1947, 8 C.A.B. 229.)

—9—

[fol. 1583] Panagra was thus faced with the immediate threat of extensive U.S. and foreign competition over its routes, and with further protracted and expensive litigation before the C.A.B. and in the courts before its corporate right to apply for entry into the United States could be conclusively determined. Panagra therefore entered into a Through Flight Agreement with Pan American in July 1946. The Agreement provides, inter alia, that at Panagra's request its aircraft originated or destined south of Balboa will be flown by Panagra pilots over Pan American's route between Balboa and Miami. Pan American receives the passenger, freight and mail revenues allocable to this segment and pays Panagra direct expenses of the operation, including pilots' wages, plus depreciation on the aircraft for time over the segment and a return on Panagra's investment in the aircraft. The parties to the Agreement, and later the C.A.B., thus recognized that one-plane through service by Panagra into Miami is a public necessity.

The Through Flight Agreement was approved by the C.A.B. in May 1947 for a three year period (8 C.A.B. 50), and operations were commenced almost immediately. Upon application of the parties, the Supreme Court dismissed as moot Pan American's petition for review of the Second Circuit decision (332 U.S. 827). The C.A.B. has subsequently extended its approval of the Through Flight Agreement. This was done most recently in connection with approval of the National Interchange Agreement (Docket 4882), when approval of the Through Flight Agreement was extended to December 31, 1960 or termination of the

[fol. 1584] Pan American-Grace-Panagra antitrust suit, whichever is the earlier (Order No. E-9481, August 10, 1955).

D. Change of Situation

Although conditionally approved until 1960, the Pan American Through Flight Agreement remains subject to the Civil Aeronautics Board's continuing authority to modify, suspend or terminate its approval of the Agreement. As will be developed below, the different set of facts existing in 1956—ten years after the execution of the Agreement in 1946—warrants a reconsideration of the Agreement's value to the sound development of air transportation.*

This issue was not raised in the recently concluded proceedings concerning the National Interchange Agreement. That proceeding stemmed from a case begun in 1949 and in which hearings were held in 1951. Introduction of the through flight issue in the latter stages of that proceeding, in 1954 and 1955, would only have obscured the primary interchange issue to be decided by the Board—the need for Panagra aircraft to fly through to New York from South America. Now that the need has been recognized and Panagra aircraft are flying through to New York, attention can be given to the separate problem of the Miami-Balboa Through Flight Agreement.

* In this connection, it should be noted that the Attorney General of the United States has charged that the Agreement is unlawful.

The changed situation is due to five major developments which will be discussed separately below:

[fol. 1585] —11—

(1) Growth of Through Traffic and Service

a. *Balboa-Miami is an Integral Part of Panagra's Traffic Pattern.*

The substantially increased volume of traffic carried between Miami and points south of Balboa since 1946 has made the Balboa terminal point for Panagra's route more of an anachronism than a logical point to split traffic rights. The growth in the annual number of Panagra through passengers carried over the Miami-Balboa segment is shown below:

TABLE I

Growth of Panagra through Traffic Between Balboa and Miami

Year	No. of Thru Passengers	Increase Index (1948 = 100)[1]
1946	10,401	75
1947	13,411	97
1948	13,858[2]	100
1949	17,461	126
1950	17,571[3]	127
1951	20,827[3]	150
1952	24,648	178
1953	25,566	184
1954	27,469	198
1955	29,878	216

SOURCE: Company records.

[1] 1948 was first full year of operation of through-flights.

[2] Because of a temporary change in the procedure for reporting interline traffic, the records of Panagra through passengers are incomplete for 1948. The above represents an estimate based on ticket analysis for a four-month period.

[3] Because the accounting department was moved from Lima to New York during 1950, the records of Panagra through passengers are not complete for 1950 and 1951. The above represents an estimate based on figures for seven months in 1950 and nine months in 1951.

[fol. 1586] —12—

The relative importance to Panagra's operations of the Balboa-Miami through passengers who are now carried by Pan American can be further shown as follows:

TABLE II

Revenue Passenger Miles on Through Flights as Percent of Panagra System

Year	Balboa-Miami Thru Flights (000)	Panagra System Total (000)	Balboa-Miami as Percent of System
1948	16,061	103,741	15.5%
1949	20,237	105,968	19.1%
1950	20,365	104,220	19.5%
1951	24,138	127,784	18.9%
1952	28,567	133,288	21.4%
1953	29,631	137,395	21.6%
1954	31,837	150,614	21.1%
1955	34,629	164,329	21.1%

The major portion of Panagra's traffic flow centers on Miami; its long haul routes depend upon planes landing at Miami. This is indicated by the fact that in 1954, 50% of Panagra's long haul passengers enplaned or deplaned at Miami. This is to say that of the 42,308 passengers who traveled 1,000 miles or more on Panagra's routes aboard the same plane, 21,175 went through Miami. This clearly indicates the substantial, indeed, crucial traffic relation Miami has with Panagra's authorized operations south of Balboa. It is fair to say that no other U. S. air carrier has been denied access to a market so vitally tied to its existing system.

[fol. 1587] —13—

b. *Panagra's Through Passengers Constitute the Principal Traffic Between Balboa and Miami.*

Although Panagra does not have a certificate, Panagra through passengers provide a major part of the total traffic volume moving over the segment. As shown below, Pan-

agra through passengers have increased until they now represent almost one-half of all air passengers traveling between Miami and Balboa via United States flag carriers:

TABLE III

Number of Balboa-Miami Revenue Passengers on U.S. Flag Carriers

(Totals for March and September Only for Each Year Indicated)

Year	Panagra Thru	Pan Am Local	Braniff Thru	Braniff Local	Total	Panagra Thru as % of Total
1952	3,666	3,077	1,691	710	9,144	40.1%
1953	4,178	2,715	1,760	736	9,389	44.5%
1954	4,911	2,972	1,625	653	10,161	48.3%

SOURCE: Official C.A.B. Air Line Traffic Surveys.

In 1954, Panagra through passengers comprised an estimated 62% of the passenger movement, including both local and through, carried by Pan American on the through flights and its own local flights:

TABLE IV

Number of Pan American Local and Panagra Through Passengers between Balboa and Miami

1954	P A A Local	Panagra Thru	Total	Thru as % of Total
March	1,483	2,019	3,502	57.7%
Sept.	1,489	2,892	4,381	66.0%
Total	2,972	4,911	7,883	62.3%

SOURCE: Official C.A.B. Air Line Traffic Surveys.

[fol. 1588] —14—

c. *Panagra's Through Flights Have Carried Most of Pan American's Local Passengers.*

Panagra through flight aircraft have handled almost all of the Pan American local passengers. In 1954 an estimated 80% of Pan American local passengers were carried on the Panagra through flights:

TABLE V

Number of Balboa-Miami Revenue Passengers Carried on Panagra Through Flight Aircraft

Month in year 1954	March	Sept.	Total
Total PAA local (CAB Surveys)	1,483	1,489	2,972
Panagra Thru via PAA (CAB Surveys)	2,019	2,892	4,911
Total Local and Thru	3,502	4,381	7,883
Total Local and Thru carried on thru planes (Balboa logs)	3,275	4,051	7,326
PAA local carried on PAA local planes	227	330	557
% of total PAA local	15.3%	22.2%	18.7%
PAA local carried on Panagra thru planes	1,256	1,159	2,415
% of total PAA local	84.7%	77.8%	81.3%

Because Pan American cut its local flight schedules in 1955, the through flights carried an even higher percentage of the Pan American local passengers than in 1954. By 1956, Pan American eliminated all Balboa-Miami nonstop local flights.

The following schedule changes show that since inauguration of the through flights in 1947 Pan American has been able to reduce its own local service to a minimal level and to rely almost entirely upon available space on the through flights for its local passengers:

[fol. 1589] —15—

TABLE VI

Average Weekly Nonstop Balboa-Miami Round Trip Frequencies

Year	Panagra Through Flights	Pan Amerian Local Flights	Total
1946	0	10	10
1947	4	10	14
1948	7	7	14
1949	8	4	12
1950	9	2	11
1951	10	3	13
1952	10	3	13
1953	10	2	12
1954	11	2	13
1955	13	1	14
1956	14	0	14

SOURCE: Official Airline Guide.

Since the beginning of 1956, Panagra DC-7B first class and DC-6B tourist through flight aircraft have offered a weekly nonstop capacity of 1,736 seats between Miami and Balboa. Pan American aircraft on the other hand have offered no nonstop Miami-Balboa service. Pan American did schedule three DC-4 tourist Miami-Kingston-Balboa-Medellin frequencies per week, or a total potential of 372 seats which could be used by Miami-Balboa passengers. However, these planes are not competitive with the Panagra through flights because they are markedly slower, nonpressurized and use a less direct routing.

The volume of through traffic has made the through flights a necessity. The above tables show that the through flights have been able to handle not only the primary through traffic but also the local passengers between Miami and Balboa without a duplication of effort.

[fol. 1590] —16—

(2) Reduction or Elimination of Subsidy

The additional earnings to be gained from Panagra certification over the Balboa-Miami segment would partially

offset the effect of a substantial reduction or elimination of Government subsidy. Such a reduction or elimination appears likely in view of the Board's decisions in recent international mail rate cases and the Staff's position in the pending Panagra mail rate proceeding.

It is abundantly clear that the days of substantial airline subsidization are past. It is fair to say that the prevailing attitude of the Congress, the Bureau of the Budget, the Post Office Department and the Civil Aeronautics Board is to insist that airlines pay their own way as soon as possible. The Government has in recent months indicated its readiness to take drastic steps to spur this development.

This new Governmental subsidy policy represents a fundamental change from the situation existing in 1946 and 1947 when the Through Flight Agreement was negotiated and approved. Panagra must and wants to face this new development by seeking to procure every additional source of commercial income that is reasonably related to its operations and capacity. As will be pointed out in Section E, the estimated profits from an independent Balboa-Miami operation by Panagra would aid measurably in assuring its self-sufficient status.

(3) Difficulties under the Through Flight Agreement.

There are latent difficulties in continuing to operate under the Through Flight Agreement.

[fol. 1591] —17—

A difficulty (which is somewhat beyond the latent stage) concerns one of the basic objectives of the Agreement. This is the provision that Panagra crews operate Panagra aircraft over the Through Flight sector certificated to Pan American in order to enable Panagra pilots and aircraft to be based within the United States.

It was recognized that Panagra is the only major U.S. flag air carrier that does not have a certificated terminus in the continental United States. Such a terminus is virtually imperative for a U.S. carrier, not only for aircraft maintenance reasons but also for personnel reasons. Otherwise, insoluble problems are created both in obtaining and

in retaining qualified American pilots, mechanics and other U.S. citizen personnel. Few such persons are willing to join or stay with an airline when there is no chance of their eventually being based in the United States. They naturally do not wish to preclude themselves or their families entirely from American community life, especially American schools for their children. It was thus a necessity that Panagra arrange for its pilots to operate the through flights into Miami.

However, it must also be recognized that the Pan American-Panagra Through Flight Agreement is the only agreement of an interchange nature in the industry which does not provide for equal flying time by pilots of one interchange partner over the route of the other interchange partner. Since 1946 such a provision has become an ALPA policy in all interchange type arrangements. ALPA has taken a critical attitude towards this aspect of the Through Flight Agreement, as have the Pan American

—18—

[fol. 1592] pilots. Since 1952 Pan American has been required as a result of collective bargaining to pay its pilots trackage overflight pay. However, in a recent C.A.B. mail rate order affecting Pan American's Latin American Division, the C.A.B. disallowed for subsidy purposes in 1955 a PAA expense of $76,000 for trackage pilot pay on Panagra through flights (Order No. E-9869, finalized by Order No. E-9889).

This relatively new union policy, which might have an equitable application in the normal interchange situation, thus conflicts with a major and valid objective of the Through Flight Agreement. A revision of the Agreement cannot cure the problem of overflight pay to Pan American's pilots without destroying a basic objective of the Agreement. As pointed out, it is imperative that Panagra pilots be able to operate the flights over this segment so as to permit Panagra, economically, to base them in Miami. Nor can Panagra afford to reimburse Pan American for its overflight payments. Panagra will be required to utilize every possible cost saving to attain a self-sufficient status and cannot indulge in uneconomic expenditures which are

certain to be disallowed in mail rate proceedings. The overflight pay problem can be eliminated on a sound economic basis only by authorizing Panagra to operate into Miami on its own certificate.

That there are other latent difficulties in the operation of the Through Flight Agreement is indicated by the fact that on January 31, 1956 Pan American requested negotiation under certain major provisions of the Agreement. Pan American has indicated that it wishes to adjust basic aspects of the existing Through Flight arrangement such as

—19—

[fol. 1593] the definition of the investment base on which a return will be paid and the rate of return on investment.

(4) Effect of Operations into New York.

The recent National Interchange Agreement dated August 4, 1955, permits Panagra aircraft to fly directly into New York from Miami, thus firmly establishing a one-plane service pattern over the 5,680 air route miles between New York and Buenos Aires via Miami and Lima. The transportation economics of this long haul service has reduced Pan American's operation of the relatively short Balboa-Miami segment to little more than a burdensome and non-functional legalism.

Rather than an extension into new and heretofore unserved areas, as the C.A.B. in 1944 regarded the application, award of the Miami-Balboa segment to Panagra would be simply filling in an established service pattern. The distance from Miami to Balboa is only 20% of the distance from New York to Buenos Aires.

The C.A.B. in its 1944 order said:

> "However, the principal consideration which influences us is the fact that to extend the Panagra system from the Canal Zone to a point in Florida would constitute a basic transformation of the character of the carrier. Panagra, now a connecting carrier as to through traffic between the United States and South America, would be made a carrier directly serving that traffic—and serving moreover in competition with an affiliated com-

pany. There is a fundamental difference between the position of a carrier whose routes stop so far short of the continental United States as those of Panagra and which depends upon connecting carriers for access to traffic to and from that area, and a carrier which has direct access to the continental United States over its own system."

—20—

[fol. 1594] It can no longer be said, in view of existing one-plane operations between Buenos Aires and New York, that extension from Balboa to Miami would effect a "basic transformation of the character" of Panagra. Moreover, notice should be taken of the fact that Panagra's general offices are located in New York City, and that its operational and maintenance headquarters are located in Miami. For the last ten years Panagra aircraft and crews have been regularly serving the traffic south from Miami. Certification into Miami would be recognition of this fact.

It is significant to note that in 1954 the average trip length per passenger for all international and overseas traffic of U. S. flag air carriers was 1,314 miles.* This is 13.4% longer than the 1,159 miles between Miami and Balboa. In 1946, the year in which the Through Flight Agreement was signed, the average passenger trip length for U. S. international carriers was only 1,057 miles. Thus, the evolution of basic transportation patterns since 1946 has made the Miami-Balboa leg a less than average trip for international air passengers. Could the addition of such a segment effect a "basic transformation" of the United States fourth largest international air carrier? Panagra's own average trip length grew from 857 miles in 1946 to 1,178 miles in 1955.

(5) DC-8 Jet Service

The Pan American Through Flight Agreement was ne

—21—

[fol. 1595] gotiated and signed in a period of DC-4 opera-

*SOURCE: U. S. Civil Traffic Forecasts 1960-1965, C.A.A. August 1955, p. 20.

tions. Its terms were geared to these aircraft and the DC-6s for which orders were then placed.

The DC-6 had a gross takeoff weight of 93,000 pounds and a maximum range, with space limited payload plus fuel reserve, of 2,000 miles. Its cruising speed was approximately 300 miles per hour. The capacity of the DC-6 was 52 passenger seats and approximately 5,000 pounds of cargo and baggage. The purchase price was about $700,000.

Since then, DC-6Bs and DC-7Bs have replaced the DC-6 in the operation of the through flights. By 1960 and 1961, for which preparation must now be made, through flights will be operated with DC-8 jet aircraft. The Panagra Board of Directors has authorized the purchase of four of these new planes powered by the large Pratt and Whitney J-75 turbine engines, with an option on an additional two planes. The first of these will be delivered in early 1960.

Initial estimates by the manufacturer indicate that the DC-8 jet transport will have a gross takeoff weight of 275,000 pounds, triple that of the DC-6. Its range, with payload and fuel reserve, will be 4,000 miles, double that of the DC-6. Cruising speed of the DC-8 will be in excess of 550 miles per hour, 250 miles per hour faster than the DC-6 (and more than twice as fast as the DC-4). Capacity of the DC-8 will be 125 passenger seats and 13,500 pounds for cargo and baggage. This is more than double the capacity of the DC-6. The purchase price of the DC-8 is in excess of $5,200,000 or almost *seven* times the cost of the DC-6.

—22—

[fol. 1596] The coming introduction of DC-8 flights over Panagra's routes will undoubtely create an entirely different type of operation from that which was possible or contemplated in 1946 and 1947. Balboa landings will no longer be operationally necessary, and according to reasonable traffic forecasts upon which the acquisition of the jets was based, it is entirely possible that the landings will not be desirable traffiewise on all flights between New York and Miami on the north and Lima and Buenos Aires on the south.

Balboa-Miami is but a 2½ hour flight for a 550-mile per hour DC-8. The flight took the DC-6 4½ hours.

A Miami-Lima flight will take the DC-8 only 6 hours, and Buenos Aires will be only 3½ hours beyond Lima. This compares to an elapsed DC-6 time from Miami to Lima, via Balboa, of 10½ hours, and beyond Lima to Buenos Aires of 6½ hours.

The nature of jet service will thus require authority to overfly Balboa on some trips.

Prorating the fares, control of aircraft and costs if and when a non-stop flight is operated to the United States from a point south of Balboa is no answer. Such an arbitrary splitting of control and costs in mid-flight is unprecedented and undesirable. If non-stop service between two points is convenient and necessary to the public, as well as technologically feasible, the Act would seem to require that a certificate for the service should be awarded to one carrier, not two, to operate the service—unless a second *competing* service is warranted by a large volume

—23—

[fol. 1597] of traffic and an indicated insufficiency of service. The certificate requirement of the Act is based on the almost axiomatic consideration that a carrier which retains all the revenues and control of a flight will provide better and more efficient service.

Moreover, Panagra should not be made dependent upon Pan American in the operation of its DC-8s, which will provide a highly competitive service to Pan American jet aircraft operating to Buenos Aires via the east coast of South America.

(6) Summary.

To recapitulate, the following developments have occurred since 1946 when the Through Flight Agreement was signed:

1. Growth in through traffic and need for only minimal local service operations Balboa-Miami in addition to through flights.

2. Reduction or elimination of Government subsidy support to Panagra.

3. Union and financial difficulties in continuing to operate under the Agreement.

[fol. 1598] —24—

4. Firm establishment of a Buenos Aires-New York traffic pattern via Miami and Lima.

5. Coming introduction of larger, long-range and highly expensive jet aircraft.

These new developments have rendered the Through Flight Agreement an instrument unconducive to the sound development of air transportation as required by Section 2 of the Civil Aeronautics Act. The new developments have effected a change of situation sufficient to demand a re-examination of the Agreement by the Civil Aeronautics Board. The situation requires recognition of the natural traffic flows which now exist and replacement of the Through Flight Agreement with a Panagra certificate.

[fol. 1599] —25—

E. Estimate of Profit for Future Year

If Panagra itself were to operate Balboa-Miami in 1957 with the same frequencies and equipment as are presently operated under the Through Flight Agreement, it is estimated that the profit and loss statement for that sector would appear as follows:

1957 Profit and Loss Estimate
Panagra Operation of Balboa-Miami Sector
(Dollar amounts expressed in thousands)

Operating Revenues	
Passenger	$ 4,442
Mail Pay—U.S.	296
Mail Pay—Foreign	161
Freight	342
Excess Baggage	215
Total Scheduled Transportation Revenue	$ 5,456
Other Transportation Revenues	—
Total Operating Revenues	$ 5,456

Operating Expenses	
Flying Operations	$ 1,165
Direct Maintenance—Flight Equipment	488
Depreciation—Flight Equipment	522
Total Direct Flying Operations Expense	$ 2,175
Ground Operations	$ 458
Ground and Indirect Maintenance	341
Passenger Service	355
Traffic and Sales	650
Advertising and Publicity	250
General and Administrative	149
Depreciation—Ground Equipment	16
Total Ground Operations Expense	$ 2,219
Total Operating Expenses	$ 4,394
Net Operating Income Without Federal Subsidy and Before Income Taxes	$ 1,062
Less Estimated Return on Investment before Taxes from Through Flight Agreement in 1957	$ 396
Net Annual Financial Gain from Independent Operation	$ 666

—26—

[fol. 1600] As shown, Panagra's estimated 1957 net operating profit, before federal income taxes and without subsidy, for the sector would be $1,062,000. This estimate is after a full determination of expenses on an additional cost basis, giving effect to a DC-7B and DC-6B operation for the entire year. Traffic and revenues were estimated on a conservative basis. An analysis of the estimated traffic, revenues and expenses is provided in Sections F, G and H immediately following.

The profitable results of an independent Balboa-Miami Operation must be compared to the profit that would be

obtained by continuing to operate under the Through Flight Agreement. It is estimated that under the provisions of the Agreement as presently in effect, Panagra would receive from Pan American in 1957 only $396,000 (before federal income taxes). This amount is computed on the current C.A.B. subsidy allowable basis of a 9% return after taxes (14.5% before taxes) on an allocated investment in flight equipment of $2,633,000. See section J below.

Consequently, Panagra stands to earn in 1957 $666,000 more from an independent operation than by continuing to operate under the Through Flight Agreement.

Moreover, the profit estimate for an independent operation assumes an average passenger load factor of only 56.7%. This load factor results from a conservative analysis of actual Miami-Balboa traffic levels and is somewhat below Panagra's system experience. Panagra aircraft had an average load factor of approximately 58% in 1955, including both through and local passengers over the through flight sector.

[fol. 1601] —27—

F. Estimate of Traffic for Future Year

In the year 1957, it is estimated that Panagra would carry 36,256 through passengers, i.e., those passengers traveling through Balboa in Panagra equipment to or from a point south of Balboa on Panagra's routes. This represents a normal traffic increase of 10% compounded annually over the number of through passengers actually carried on the through flight aircraft in 1955.

It is estimated that Panagra would in addition carry 16,113 local passengers, i.e., those passengers traveling over the through flight sector in Panagra equipment who enplane or deplane at Balboa. This represents a decrease of 20% from the number of local passengers carried by the through flight aircraft in 1955. The reason for the decrease, in spite of an anticipated 10% annual increase in the local traffic level, is to account for competitive non-stop flights which Pan American might provide.

The resultant total of 52,369 local and through passengers that Panagra would carry over the Balboa-Miami sector in 1957 would provide daily DC-7B and daily DC-6B through flights in each direction with an average passenger load factor of 56.7%.

The relative number of first class and tourist passengers as estimated for 1957 and the actual number for 1955 are as follows:

	Miami-Balboa						
	Local PAX		Through PAX		Local & Through		
Year	1 Cl.	Tourist	1 Cl.	Tourist	1 Cl.	Tourist	Total
1957 (Est.)	5,446	10,667	18,744	17,512	24,190	28,179	52,369
1955	7,857	12,304	15,905	13,973	23,762	26,177	49,939
% Incr./ (Decr.)	(30.7%)	(12.6%)	17.8%	25.3%	1.8%	7.6%	4.9%

—28—

[fol. 1602] The 1955 figures are based on the recorded number of revenue passengers carried over the through flight sector as recorded in the Panagra station logs at Balboa.

The 1957 traffic estimate is believed conservative for the following reasons:

(1) With respect to the local passengers, it is assumed that Pan American would provide competitive nonstop local flights in the event that Panagra were to have an independent Miami-Balboa operation of its own. It is anticipated that Panagra will be able to retain two-thirds of the local passengers to be carried by the through flights in 1957. This is a cautious estimate because: (a) Panagra is already well established and known in the local market; (b) by reason of through traffic support Panagra will be able to continue to provide twice daily frequencies each way; and (c) by reason of the National interchange Panagra will be able to provide one-plane service to Balboa from New York and Washington while Pan American cannot.

(2) Panagra's system experienced a load factor of 59.6% in 1955, 2.9 percentage points above the load factor allowed for Miami-Balboa in 1957.

(3) Actual Miami-Balboa through flight load factors averaged approximately 58% in the year 1955.

(4) Miami-Balboa through passengers showed a weighted average increase of 10.9% over the past five years.

(5) The full effect of the increased tourist frequencies by Panagra aircraft (increased from 5 to 7 per week in each direction in June 1955) will not be felt until 1956.

—29—

[fol. 1603] The 1957 traffic estimates for the through flight sector have been developed in detail as follows:

The Balboa logs reveal that during 1955, 49,939 full fare and half fare passengers flew between Miami and Balboa on Panagra equipment, broken down as follows:

Passengers on Panagra Through Flights in 1955

Local PAX	Through PAX	Total All PAX
20,061	29,878	49,939
40.2%	59.8%	100.0%

Local PAX		Through PAX		Total All PAX	
1 Cl.	Tourist	1 Cl.	Tourist	1 Cl.	Tourist
7,857	12,204	15,905	13,973	23,762	26,177
39.2%	60.8%	53.2%	46.8%	47.6%	52.4%

Revenue passenger miles for scheduled operations of the Panagra system increased in the past four years as follows:

Year	Revenue Passenger Miles (000)	% Increase over Previous Year
1955	160,681	7.8%
1954	149,099	9.6%
1953	136,038	2.1%
1952	133,186	5.9%
1951	125,784	—
Weighted Average % Increase		6.9%

—30—

[fol. 1604] Revenue passenger miles of through passengers over the through flight sector increased during the past four years as follows:

Year	Revenue Passenger Miles (000)	% Increase over Previous Year
1955	34,629	8.8%
1954	31,837	7.4%
1953	29,631	3.7%
1952	28,567	18.3%
1951	24,138	—
Weighted Average % Increase		10.9%

While revenue passenger miles for the scheduled operations of Panagra increased an average of 6.9% over each of the past four years, revenue passenger miles of through passengers over the through flight sector increased by an average of 10.9% each year. Therefore, a 10% increase during 1956 and 1957 for passengers using the through flight sector on Panagra equipment can be conservatively predicted, especially in view of the now increased frequency of Panagra tourist flights.

Estimated Total Passengers Using the Through Flights in 1957

1955 49,939—Total Through Flight PAX in 1955
4,994—Estimated 10% increase in 1956

1956 54,933—Estimated Total Through Flight PAX in 1956
5,493—Estimated 10% increase in 1957

1957 60,426—Estimated Total Through Flight PAX in 1957

—31—

[fol. 1605] In 1955 60% of the passengers carried on the through flights were through passengers and 40% were local. The same experience in 1957 would produce the following results:

Estimated Passengers Using Through Flights in 1957
Without Increased PAA Competition

Local PAX	Through PAX	Total PAX
24,170	36,256	60,426

Therefore, Panagra aircraft could expect to carry 24,170 local and 36,256 through passengers over the through flight sector in 1957—provided Pan American does not reinstate local nonstop service between Balboa and Miami.

Even if Pan American were to put on competing local flights, it is estimated that Panagra would keep virtually all of the through traffic. It can be expected that PAA competitive flights would take one-third of the indicated local traffic. This indicated local traffic, as shown by the Balboa logs, is actually overstated in that some through flight passengers deplaned at Balboa for a layover and then continued on at a later date. Thus, the estimated PAA diversion allows for somewhat more than one-third of the local traffic.

—32—

[fol. 1606] It is expected that PAA will keep all of its present local traffic carried by its own equipment plus any increases in that traffic. In other words, there would be no diversion of local traffic by the through flights.

Estimated Passengers Using Through Flights in 1957
With Increased PAA Competition

Local PAX	Through PAX	Total PAX
16,113	36,256	52,369

Between June 1, 1955 and December 31, 1955, when the increased tourist frequency was in effect over the Miami-Balboa sector, the Balboa logs show the following breakdown between first class and tourist passengers:

% of Total Local PAX			% of Total Through PAX		
1 Cl.	Tourist	Total	1 Cl.	Tourist	Total
33.8%	66.2%	100.0%	51.7%	48.3%	100.0%

Assuming roughly the same experience in 1957, the results are:

[fol. 1607] —33—

Estimated Passengers Using Through Flights in 1957
With Increased PAA Competition

Local PAX		Through PAX		Total PAX	
1 Cl.	Tourist	1 Cl.	Tourist	1 Cl.	Tourist
5,446	10,667	18,744	17,512	24,190	28,179

Therefore, in 1957 Panagra could conservatively expect to carry 24,190 first class passengers and 28,179 tourist class passengers.

With 58 seats northbound and southbound on the DC-7B first class flights and a daily frequency each way, the first class passenger load factor is estimated at 57.8%.

With 70 seats northbound and southbound on the DC-6B tourist class flights and a daily frequency each way, the tourist class passenger load factor is estimated at 55.8%.

The result is an overall passenger load factor of 56.7%. From past experience this estimate would appear conservative.

[fol. 1608] —34—

G. Estimate of Revenues for Future Year

Based on the above passenger traffic forecasts, it is estimated that Panagra's Balboa-Miami passenger revenues for 1957 will be $4,442,000. Compensatory U. S. mail pay, foreign mail pay, freight, and excess baggage revenues are estimated to add an additional $1,014,000, resulting in total operating revenues of $5,456,000 for the sector. The profit forecast indicates that there will be no subsidy need for operation of the sector.

(1) Passenger Revenues

Balboa-Miami one-way passenger fares are as follows:

First Class	$110.00
Tourist Class	94.00
Excursion Class (Saleable in Panama only)	62.50

Reducing the one-way fares 15% to cover half fares, round trip discounts, and reduced fares results in the following ticket yields:

First Class	$ 93.50
Tourist Class	79.90
Excursion Class	53.13

The number of Balboa-Miami passengers is estimated for 1957 in Section F above as follows:

First Class	24,190
Tourist Class	28,179

Of the 28,179 tourist passengers, 10,667 are local tourist passengers. If 50% of them are northbound, or 5,334,

—35—

[fol. 1609] and half of this number take advantage of the special excursion rate provided by IATA carriers for northbound passengers at Balboa only, it is estimated that 2,667 passengers will fly north at the reduced rate. In all 8,000 tourist class local passengers will pay the regular tourist fare.

Estimated passenger revenues for the Miami-Balboa segment for 1957 are therefore:

24,190	× $93.50	= $2,261,765
25,512	× $79.90	= $2,038,409
2,667	× $53.13	= $ 141,698
Total Passenger Revenue		= $4,441,872

(2) U. S. Mail Pay

Since Pan American L.A.D. operated no DC-6s of its own in 1955, their experience for DC-6 operation as re-

ported to the C.A.B. reflected their operation of Panagra's DC-6s over the through flight sector, Miami-Balboa.

Dividing the ton miles of U. S. mail reported carried by Pan American DC-6s for the first nine months of 1955 by the DC-6 revenue plane miles reported flown results in the average mail tonnage carried per mile over the Miami-Balboa sector. The result was 0.3505 tons of mail carried per mile flown.

The estimated annual scheduled mileage for Panagra DC-6Bs and DC-7Bs over the through flight sector is 1,666,758. Estimated mail ton miles for the Miami-Balboa segment in 1955 were therefore:

1,666,758 × 0.3505 tons per mile = 584,199 MTMi.

—36—

[fol. 1610] U. S. Mail ton miles for the Panagra system are expected to increase at an average annual rate of 4% beginning in 1956, compared with a 3% average annual increase between 1951 and 1955. Increasing the estimated 1955 mail ton miles of the Balboa-Miami sector at the 4% rate results in an estimated 631,038 MTMs for 1957.

Having assumed above that PAA will take one-third of the local passengers owing to increased competition, or roughly 15% of the total through flight traffic, it is therefore reasonable to assume that 15% of all potential traffic, including mail, moving over the through flight sector would be diverted to PAA.

To adjust for this diversion, the 631,038 estimated mail ton miles in 1957 were reduced by 15% to 536,382.

A final mail order received by PAA shows that the U. S. mail rate for the Miami-Balboa segment is 55.10 cents per mail ton mile.

Hence the estimated U.S. mail revenue for the through flight sector during 1957 is:

536,382 MTM × 55.10 cents = $295,546.

(3) Foreign Mail Pay

Using the same approach as above (working from Pan American's experience operating DC-6s for the first nine months of 1955), a weighted average tonnage of foreign mail carried per mile was obtained.

Multiplying this result by the estimated annual scheduled mileage to be flown by 6Bs and 7Bs over the through

—37—

[fol. 1611] flight sector, results in the estimated revenue ton mileage of foreign mail for the sector in 1955.

Foreign mail ton miles for the Panagra system increased at an average annual rate of 13.18% between 1951 and 1955. Assuming this same annual rate of increase between 1955 and 1957 for the Balboa-Miami sector gives an estimated 180,320 ton miles of foreign mail in 1957. This result was then reduced by 15% to account for expected diversion by PAA.

It is estimated that by 1957 the yield per ton mile for foreign mail will have declined 25% from Panagra's yield for the year 1955.

The estimated foreign mail revenues for the Balboa-Miami sector in 1957 are therefore:

153,272 ton miles × $1.05 $160,936

(4) Freight Revenues

1,005,971 ton miles of freight estimated to be carried on the through flight sector in 1957 were derived in the same manner as mail from Pan American's reported DC-6 experience for the first nine months of 1955, using a 10% annual growth factor and 15% PAA diversion factor.

To arrive at the approximate rate PAA receives per ton mile for freight over the through flight sector, a random sampling of freight rates for different weights from Miami to Panama and Panama to Miami was made. The results were averaged both by weight and by northbound and southbound rates, and an average sample rate arrived at. That rate worked out to 35.62¢ per ton mile.

[fol. 1612] The freight rates charged by Panagra for the same weights were then taken and a corresponding average rate per ton mile of freight for key points on the Panagra system was arrived at. That rate was 44.44¢ per ton mile. PAA's average sample rate of 35.62¢ was thus found to be 80.15% of Panagra's average sample rate.

Applying the 80.15% against Panagra's 42¢ per ton mile overall system freight yield, it is estimated that PAA receives 34¢ per ton mile for freight over the through flight sector.

Applying the 34¢ against the estimated 1,005,921 ton miles of freight expected in 1957, freight revenues for the through flight sector in 1957 are estimated at:

$$1{,}005{,}921 \times \$.34 = \$342{,}013.$$

(5) Excess Baggage Revenues

During 1955, Panagra received $14,108,700 in passenger revenues and $683,000 in excess baggage revenues. Excess baggage revenues were therefore 4.84% of passenger revenues.

Based on estimated passenger revenues in 1957 of $4,441,772 for the Miami-Balboa segment, estimated excess baggage revenues for 1957 are therefore:

$$4.84\% \times \$4{,}441{,}772 = \$214{,}982$$

[fol. 1613] —39—

H. Analysis of Expense Estimate for Future Year

Total expenses of an independent Balboa-Miami operation in 1957 are estimated to be $4,394,000.*

(1) Flying Operations

The net recorded costs of DC-6B and DC-7B flying operations for the Panagra system from January through November, 1955 were ascertained. To these were added back all expense credits received from National and Pan American. Fuel and hull insurance costs were then deducted to be treated separately. The rental cost of one plane contained in this account was also deducted.

The itemized flying costs for DC-6Bs and DC-7Bs for the Panagra system developed above were then divided by the applicable hours of flying time to arrive at the present Panagra cost per flying hour.

A separate calculation of the cost for hull insurance was made by taking the number of planes (5 of each class), multiplying that number by the insurable value of each plane, and then multiplying the result by Panagra's present rate for hull insurance. The result was then reduced to a cost per flying hour.

—40—

[fol. 1614] The average consumption of gas per hour was computed for both DC-6Bs and DC-7Bs. The cost per gallon of gas was then estimated by averaging the cost per gallon of gas at Miami and that at Panama. Multiplication then produced the cost of fuel per flying hour.

The total estimated cost per hour for flying operations, as developed above, was then multiplied by the estimated number of flying hours for each type of equipment over the through flight sector in 1957.

---

* This expense estimate assumes that sales and maintenance expenses will not exceed the level of rates charged by Pan American.

As a result, it was estimated that Flying Operations for the through flight sector in 1957 will cost:

DC-6B	$161 x 3333 =	$ 536,613
DC-7B	212 x 2962 =	627,944
Total		$1,164,557

(2) Direct Maintenance—Flight Equipment

The net recorded costs of Direct Maintenance of Flight Equipment for the Panagra system in 1955 were ascertained for DC-6Bs and DC-7Bs from accounting records. The share of maintenance charges absorbed by Pan American and National were then added back and the gross costs were divided by the gross hours of flying time, including the through flight and interchange sectors, for the DC-6Bs and DC-7Bs to arrive at a per hour cost for direct maintenance.

In 1955 the Aircraft Overhaul Reserve was adjusted, because of favorable experience, by $2.00 per flying hour for DC-6Bs, $1.20 of which applied to Direct Maintenance and $.80 to Ground and Indirect Maintenance. That portion applicable to prior years was added back to the 1955 unit cost.

—41—

[fol. 1615] The hourly costs were then multiplied by the estimated number of hours of flying time over the through flight sector in 1957 for each type of equipment. The cost of Maintenance of Flight Equipment in 1957 for the through flight sector is estimated as follows:

DC-6B	$ 61 x 3333 =	$ 203,313
DC-7B	96 x 2962 =	284,752
Total		$ 487,665

(3) Depreciation—Flight Equipment

The net charges for depreciation of Panagra's DC-6B and DC-7B flight equipment for the last quarter of 1955 were ascertained from accounting records. This period was

used because the DC-7Bs were in operation only during the last quarter of 1955. To the actual charges covering five 7Bs and four 6Bs was added the estimated quarterly depreciation charge for a fifth 6B.

The depreciation charges absorbed by Pan American and National during the last quarter were added back. The charges made by Pan American during the last quarter for obsolescence of Flight Equipment Spare Parts (FESPA) were deducted as these were handled separately. The resulting estimated charge for depreciation was then projected to an annual basis.

The FESPA charges by PAA during the last quarter of 1955 were divided by the number of revenue plane miles flown by Panagra DC-6Bs and DC-7Bs over the Panagra system and the interchange sector (excluding Miami-Balboa). The charge per revenue plane mile was then multiplied by the estimated annual revenue plane miles to

—42—

[fol. 1616] be flown by Panagra including the through flight and interchange sectors. The estimated FESPA charges for each type of equipment were then added to the 1957 estimated depreciation charges developed above.

The annual estimated charge for depreciation was then allocated to the interchange sector, through flight sector and present system on the basis of the revenue plane miles to be flown over each sector. The resulting Depreciation of Flight Equipment charges allocable to the through flight sector were thus forecast at $522,000 in 1957.

(4) Ground Operations

Six elements were considered in estimating Ground Operating expense for independent operation of the through flight sector in 1957; namely, additional charges at Tocumen, additional charges at Miami, in-transit services presently shared by Pan American, landing fees, communication fees in the Caribbean, and overhead charges presently paid by Pan American but non-recoverable if Panagra were to operate the through flight sector.

To arrive at the additional charges for use of the Tocumen airport, the 1955 pool of expenses was analyzed, broken down by expense classification, and recomputed on the basis that Panagra were operating the through flight sector. This totaled $82,000. Additional landing fees at Tocumen were estimated at another $26,000.

—43—

[fol. 1617] To arrive at the additional cost of ground operations at Miami, the annual cost of renting counter and cargo space was estimated at $10,000. A staff of 18 counter and cargo personnel was provided for at an average annual salary of $4,000. The estimated additional cost for ground operations at Miami is therefore $82,000.

Expense of overnight in-transit services performed by Pan American at Miami are now absorbed by Pan American to the extent of an estimated $91,000 per year with any excess borne by the Panagra system. If Panagra were to operate the through flight sector in 1957, it would have to carry the entire estimated in-transit service charge of $422,000, but the additional cost allocable to Balboa-Miami would be only $91,000.

Landing fees for DC-6Bs and DC-7Bs were ascertained at Miami and multiplied by the number of DC-6B and DC-7B landings expected in 1957. The result was an estimated $25,000.

From information received at Miami, the charges for communications in the Caribbean were estimated at $100 per round trip, or $73,000 per year. The cost of replacing the present communications system of PAA, presently used by Panagra, with a private Panagra teletype system was estimated and one-fifth of the cost allocated to the Balboa-Miami sector. The allocated amount was $28,000.

The 1955 overhead charges of the chief pilot's office at Lima and Miami, the communications superintendent at Lima, etc., which are now partly absorbed by Pan American, were reduced to a per revenue mile cost and multiplied by the estimated annual number of revenue miles to be flown over the through flight sector. The result was $51,000 of overhead charges which would be non-recoverable in 1957 if Panagra operated the through flight sector.

—44—

[fol. 1618] Ground Operations Expense during 1957 for the through flight sector was therefore estimated at:

Use of Tocumen Airport	$ 82,000
Landing Fees at Tocumen	26,000
Cost of Miami facilities	82,000
Overnight In-Transit Service	91,000
Landing Fees at Miami	25,000
Communications in Caribbean	73,000
Allocable cost of private teletype system	28,000
Pan American Non-Recoverable Overhead Charges	51,000
Total	$458,000

(5) Ground and Indirect Maintenance

The charges by Pan American to Panagra for Ground and Indirect Maintenance of DC-6Bs and DC-7Bs during 1955 were divided by the total number of hours flown by each in 1955 to arrive at a per hour cost.

In addition, the charges made in 1955 by Pan American to Panagra representing a return on Pan American's investment in maintenance facilities were added to produce a cost per flying hour which included a return on Pan American's investment in maintenance facilities properly allocable to the through flight sector.

That portion of the adjustment for DC-6Bs in the Aircraft Overhaul Reserve applicable to the Ground and Indirect Maintenance account was treated in a corresponding manner to that described in Section (2) above.

—45—

[fol. 1619] The Ground and Indirect Maintenance costs per hour for DC-6Bs and DC-7Bs were then multiplied by the estimated flying hours for each type of equipment over the through flight sector in 1957 as follows:

DC-6B	$41 x 3333 =	$136,653
DC-7B	$69 x 2962 =	204,378
		$341,031

(6) Passenger Service

The cost of Passenger Service for the Balboa-Miami sector during 1957 was estimated at 8% of passenger revenue for the Balboa-Miami sector, the same percentage relationship experienced by the Panagra system in 1955, or $355,342.

(7) Traffic and Sales

Traffic and Sales expense was 13.39% of non-mail revenues (passenger, freight, and excess baggage) for the Panagra system in 1955.

In 1957 an estimated 13% of total non-mail revenues will be spent for Traffic and Sales or $649,840.*

—46—

[fol. 1620] The estimated traffic and sales expense, together with the advertising and publicity expense analyzed next, constitute 18.00% of non-mail revenues for the sector. This is believed to be a fair and reasonable allocation.

(8) Advertising and Publicity

Advertising and publicity expense was 7.53% of non-mail revenues (passenger, freight, and excess baggage) for the Panagra system in 1955. However, 5% of total non-mail revenue estimated to be produced by the sector in 1957 is deemed appropriate for this new sector because Panagra's name is already well known in this market. On this basis, advertising and publicity expense was estimated at $249,938.

(9) General and Administrative

Three factors were considered in estimating the general and administrative cost for independent operation of the through flight sector: charges now paid by Pan American which would be non-recoverable if Panagra operated the through flights, additional general and administrative charges for use of the Tocumen airport, and increased employee benefit costs and payroll taxes for employees at Miami.

* See footnote page 39.

Charges not recoverable from PAA were broken down into employee insurance, payroll taxes, and New York office

—47—

[fol. 1621] charges. The costs for employee insurance and payroll taxes reflect the latest proposed rates and were increased to reflect the pilot contract put into effect July 1, 1955. The three non-recoverable costs were divided by revenue plane miles flown by Panagra in 1955 to get a cost for each item per revenue plane mile. The results were multiplied by the estimated annual revenue plane miles to be flown over the Miami-Balboa sector and amounted to $125,000.

Panagra's charges for its increased share of general and administrative costs at Tocumen owing to independent operation of the through flight sector were then computed by analyzing the latest monthly pool of expenses shared by all carriers using Tocumen and estimated at $15,000.

Increased employee benefit costs and payroll taxes for additional Miami employees are estimated at 11.91% of $72,000, or $9,000.

The total added General and Administrative cost for operation of the Balboa-Miami sector in 1957 is thus $149,000. It is believed that an independent Balboa-Miami operation would require no additional general and administrative expense, because key personnel of Panagra now spend considerable time in connection with operations under the Through Flight Agreement.

(10) Depreciation—Ground Equipment

Four elements were considered in estimating the charges for depreciation of ground equipment needed for an independent operation of the through flight sector in 1957:

—48—

[fol. 1622] depreciation of maintenance facilities, depreciation of counter facilities at Miami, depreciation of ramp service facilities, and charges now paid by Pan American which would be non-recoverable if Panagra operates the through flight sector.

Depreciation of maintenance facilities at both Miami and Balboa is included in the Pan American charges to Panagra for Ground and Indirect Maintenance. Consequently, the estimate of costs for ground and indirect maintenance (see Section 5 above) adequately covers this item of cost.

If Panagra were to operate the through flight sector independently, a completely furnished counter and cargo space at Miami would be necessary. A capital expenditure of $18,000 for such space, depreciated over three years, results in an estimated depreciation charge of $6,000 per year.

An estimated outlay for ramp service facilities (fork lift truck, starting unit, cargo carts, passenger ladder, etc.) of $18,400 would be required. Depreciating these facilities over three years would result in an annual depreciation charge of $6,100.

Depreciation of Ground Equipment costs charged to Pan American in 1953, but non-recoverable if Panagra operates the through flight sector, were divided by the revenue plane miles flown by Panagra's DC-6Bs and DC-7Bs over the through flight sector in 1955. The result was multiplied by the estimated annual revenue plane miles for the through flight sector.

[fol. 1623] —49—

In summary, the estimated charge for depreciation of ground equipment in 1957, assuming independent operation by Panagra, is as follows:

Miami Booth Facilities	$ 6,000
Ramp Service Facilities	6,100
PAA Non-Recoverable Charges	4,000
Total	$16,100

J. Estimate of Return on Investment for Future Year under Through Flight Agreement

The return on Panagra's investment in flight equipment and working capital devoted to the through flight sector was estimated for 1957 at $396,000. This was computed as follows:

	DC-6B ('000)	DC-7B ('000)	Total ('000)
Original Cost of Panagra Fleet	$7,713	$12,151	$19,864
Reserve for Depreciation (Estimated)			
December 31, 1956	$3,777	$ 2,072	$ 5,849
December 31, 1957	4,459	3,577	8,036
Net Book Value (Estimated)			
December 31, 1956	$3,936	$10,079	$14,015
December 31, 1957	3,254	8,574	11,828
Less 50% Built-In Overhaul Residual Value	$ 75	$ 75	$ 150
Total Investment Base in Flight Equipment (Estimated)			
December 31, 1956	$3,861	$10,004	$13,865
December 31, 1957	3,179	8,499	11,678
Average for Year 1957	$3,520	$ 9,252	$12,772
Return on Investment in Flight Equipment @ 14.5161% (9% plus 38% Income Taxes)	$ 511	$ 1,343	$ 1,854

[fol. 1624] —50—

The above represents a return on the entire Panagra investment in DC-6Bs and DC-7Bs at the C.A.B. allowable rate of 9%. Pan American is required under the Through Flight Agreement as presently in effect to pay the 9% rate of return on that part of the investment allocable to Balboa-Miami. To allocate Pan American's share, the total revenue plane miles to be flown by Panagra's DC-6Bs and

DC-7Bs in 1957, including the through flight and interchange portions, were computed. This mileage is broken down in percentages as follows:

	DC-6B	DC-7B
National—Miami/New York	22.59%	18.94%
Pan American—Balboa/Miami	23.96%	19.34%
Panagra—South-of-Balboa	53.45%	61.72%
	100.00%	100.00%

The difference in the percentages between types of equipment is a result of the varied schedules of DC-6Bs and DC-7Bs.

Applying the Balboa-Miami allocation of revenue plane miles to be flown in 1957 against the total return on investment figures results in the following amounts:

(thousands of dollars)

	DC-6B	DC-7B	Total
Return on Flight Equipment	$122	$260	$382

[fol. 1625] —51—

To this must be added the return payable by Pan American on Panagra's investment in working capital devoted to the Through Flight operation. This is computed on the following basis:

	DC-6B	DC-7B	Total
Revenue plane miles to be flown—Balboa-Miami in 1957	833,379	833,379	
Mileage rate	0.52¢	1.15¢	
Return on working capital (dollar amount in thousands)	$4	$10	$14

The total estimated return payable by Pan American under the Through Flight Agreement in 1957 is thus $382,000 plus $14,000, or $396,000.

[fol. 1626]

PART TWO

MIAMI-WASHINGTON/NEW YORK

A. *Nature of Application*

This application is supplemental to that for Balboa-Miami. It would extend Panagra beyond Miami directly into Washington and New York on a restricted basis. That is, Panagra would not operate domestic turnaround flights but would have local traffic rights at Miami, Washington and New York on its planes serving South America.

The air route distance between Miami and New York is 1100 miles nonstop and 1137 miles via Washington, representing a 17% increase in the unduplicated route mileage of the present Panagra system plus the Balboa-Miami sector.

It is contemplated that initially, on an independent operation, three first class flights per week in each direction would stop at Washington and the other four first class and all tourist flights would operate Miami-New York nonstop. Additional Washington stops would be implemented as soon as the international traffic would warrant. It is believed that authority to serve Washington as well as New York is essential to a flexible, balanced operation for Panagra and to adequate service for United States-South America traffic.

Direct entry into Washington and New York, of course, would eliminate the need for an interchange with a domestic carrier and would supersede the National-Pan American-Panagra Interchange Agreement.

[fol. 1628] —53—

B. *Reasons for Application*

As will be more fully discussed below, Panagra should be extended beyond Miami into Washington and New York for the following reasons:

1. The National-Pan American-Panagra Interchange Agreement has proved to be deficient. It has not provided

United States-South America passengers and cargo with the sort of service necessary to attract, or even to retain, international traffic. Moreover, it has proven to be a heavy financial drain on Panagra. The domestic operator has subordinated and disregarded international traffic requirements and preferences in favor of its own domestic operation.

2. The extension would be profitable to Panagra. The sector itself would produce an annual operating profit of $365,000, and in addition, the present Panagra system profit and loss statement would no longer reflect certain cost penalties resulting from the interchange operation.

3. The extension would require no subsidy, and, further, would serve to strengthen Panagra's entire system to the point of ultimate self-sufficiency. The profit from this sector would help to offset any future reduction or elimination of subsidy from the government.

[fol. 1629] —54—

4. Panagra needs to receive the full revenues from the United States-South America passengers it generates. The new route would help to reduce Panagra's unit operating costs and provide a larger traffic base over which to spread its overhead expense.

5. The bulk of United States-South America traffic carried by Panagra originates in or is destined to the northeastern United States. Panagra should be permitted to serve this primary traffic market so inextricably related to its existing South American market.

6. Two or three carrier operation of the same flight will not and cannot serve efficiently the traffic volume that will develop in the near future. The projected growth in long haul United States-South America air traffic, which will be substantial, should not be stultified by a domestic carrier having little interest in its development. Nor should the inevitable growth be a windfall to a carrier having little to do with its generation. Within a foreseeable period of time traffic volume will outgrow the interchange type of service.

7. Extension into New York will cause little diversion of domestic passengers from domestic carriers, and in the international field will simply equalize Panagra's competitive position vis-a-vis other United States flag carriers and foreign airlines.

8. The coming DC-8 operation will permit, and indeed will call for, long haul nonstop flights between New York and South America. Such an operation will have no relation to National's regional domestic operation between

[fol. 1630] New York and Miami. Indeed, Panagra may well want to overfly Miami with jets on certain of its flights. The sharing of profits from jet service would hurt Panagra in this future era of high cost turbine operation. The necessary route adjustment proposed here cannot await delivery of jet equipment to Panagra because of the vast amount of preparatory work and planning which must be done.

C. *Inadequacy of the National Interchange*

By order dated August 10, 1955 (E-9481) in Docket No. 4882, the Civil Aeronautics Board approved the establishment of a National-Pan American-Panagra interchange operation. This interchange permits Panagra planes from and to South America to operate over National's route between Miami and New York. Interchange service began on September 14, 1955, and has now been in operation for more than ten full months.

The interchange flights have been highly disappointing to passengers and shippers in terms of service and scheduling, and to Panagra in terms of cost. Intense efforts have been made by Panagra to solve these difficulties but the efforts have been in large part unsuccessful. No means of curing the situation appear possible under the existing interchange arrangements. The inadequacies of the interchange operation will be documented below under three main categories: passenger and cargo service, plane scheduling and operating costs.

The basic difficulty stems from attempting to mesh the operations of a long haul international airline in competition against foreign airlines, with the high volume and

—56—

[fol. 1631] relatively short haul operations of a regional domestic carrier. It is now evident that the attempt to combine these two different types of operations cannot be successful. The interchange has resulted in costly operational rigidities and conflicts for each partner in its basic transportation objective. National, because of its competitive position in the mass Miami-New York market, subordinates the international flights to its own relatively short haul requirements. This may be quite justifiable from National's own limited viewpoint. However, the Miami-New York sector comprises only one-fifth of the distance of the entire international flight from New York to Buenos Aires, and consequently, from Panagra's and the public's overall viewpoint, the primary emphasis over the Miami-New York sector should be placed upon the convenience and expectations of the international passengers and shippers. This, indeed, seemed to be the original purpose of the Interchange Agreement as approved by the Civil Aeronautics Board.

To provide an international service geared to international traffic needs and to provide the basis for generating additional international traffic, it is apparent that international service and scheduling requirements should be given priority. That this has not been the case under the existing interchange operation is indicated below:

1. *Passenger and Cargo Service.*

National does not provide interchange flights with the standard of flight service to which international passengers are accustomed. For example, National does not serve meals by courses, it does not offer free drinks or wine, and

—57—

[fol. 1632] it does not provide a third cabin attendant. These services have been standard fare on Panagra first class flights and on virtually all other first class international flights throughout the world. The excellence of its meals and the manner in which they are served have been

major items in Panagra's sales appeal and reputation. However, the food service of National is of significantly lesser quality than that of Panagra. Passengers uniformly report, or complain, that the general level of all enroute service is substantially lower over the domestic interchange sector than over the Caribbean and South American portions of the flights.

There is a major difference in the treatment accorded passengers by National and Panagra: Panagra provides a great deal more individual attention to its passengers. This is a natural result of the fact that Panagra's key sales object is the international long haul passenger, whereas National's key sales object is the domestic medium or short haul passenger. Panagra's passengers, who pay fares at international levels and travel between several countries on a trip lasting ten to twenty hours, expect and need more individual attention than a New York-Miami passenger, who pays less per mile and is in the air less than four hours.

By contrast, a New York-Miami local passenger pays $44 to $77 for an 1,100 mile trip; a New York-Buenos Aires traveler pays $456 to $549 to travel 6,000 miles; a Miami-Lima traveler pays $262 to $319 to travel 2,600 miles. These are key passengers whom Panagra must now serve and for whom Panagra must *now* compete.

[fol. 1633] —58—

The difference in passenger treatment is not only a result of what the market requires but also what the market yields, both in the volume of traffic and in the net revenue per passenger. National operates in a mass market; Panagra is in what is by domestic standards a relatively sparse market. Panagra's routes, even with the most optimistic traffic projections, could not produce anything approaching the traffic density of National's operation. As a result, each single passenger is vastly more important to Panagra than to National.

Statistically, the average Panagra system passenger has a trip length on the *portion* of his journey *south of Balboa* of approximately 1,200 miles producing an average revenue yield to Panagra of $108.65. National's average system

passenger trip length complete is only 700 miles, producing an average revenue yield of only $36.76.

With respect to cargo, National has not provided the concentrated effort and expeditious handling necessary for dealing with international cargo traffic. Panagra generates substantial amounts of cargo into and out of New York, but its developmental and promotional efforts in this field are being diffused by National's relative apathy towards cargo movement (even in its own domestic operations) and by the inevitable lack of complete coordination that results from three separate companies handling a single shipment. Indeed, for the better part of a month in the spring of 1956 National arbitrarily stopped all international cargo shipments on the interchange flights. This stoppage together with previous deficiencies in National's movement

—59—

[fol. 1634] of international cargo has caused grave problems for Panagra in its relationship with both shippers and consignees.

2. *Plane Scheduling.*

a. *Washington Stop.*

National has been unwilling to agree to schedules based on international traffic flows. For example, at National's insistence, the DC-7B interchange flights presently stop daily at Washington. However, there has been no international traffic justification for daily stops which add more than sixty minutes in elapsed time between New York and Miami. This unnecessary delay serves to neutralize the competitive advantage of the DC-7B equipment in Panagra's primary New York-Buenos Aires market.

National has refused to consider Panagra's first preference for splitting first class schedules (some nonstop and some Washington-stop flights) even though from an international traffic viewpoint it is often desirable not to provide service to identical points on every day of the week. National has also refused to act on Panagra's second preference to eliminate the Washington stop entirely, unless Panagra would agree to a departure time from New York

that would be undesirable to international passengers and would result in undesirable and competitively disadvantageous arrival and departure times at points in South America.

National's stated reasons for opposing Panagra on the Washington service issue are that Washington provides a large number of domestic Miami passengers on this flight

[fol. 1635] and that Panagra has not produced enough international passengers, relative to National's voluine domestic operation, to warrant National's consideration of an alternate schedule.

b. *On Time Performance.*

National has been unwilling to agree to realistic scheduling of the interchange flights and is jeopardizing Panagra's reputation by failing to operate the Panagra aircraft on time. In the six months, November 1955 to April 1956 inclusive, an average of 77% of Panagra's flights from South America, after traveling more than 4,900 miles, reached Miami on time. However, only 37% of these flights arrived in New York, only 1,100 miles beyond, at the scheduled time of arrival. National's southbound performance has been even worse, with only 16% of the interchange flights arriving in Miami on time. Southbound delays over the interchange sector, of course, throw back Panagra's performance record along the entire line to Buenos Aires. Following is the monthly performance record:

Percentage Daily Interchange Flights on Time
(within 15 minutes of scheduled arrival time)

	Panagra Performance		National Performance			
	N B		N B		S B	
	Ar MIA		Ar IDL		Ar MIA	
	FC	TC	FC	TC	FC	TC
November 1955	73%	82%	70%	82%	11%	17%
December	61	77	32	36	21	18
January 1956	77	90	36	46	25	21
February	69	89	26	54	11	0
March	68	84	7	36	20	10
April (2 weeks)	75	83	8	8	39	8

[fol. 1636] —61—

National attempts to rationalize its unrealistic scheduling on the basis of competitive scheduling with Eastern in the domestic Miami-New York market. This again is simply one more aspect of the primary domestic emphasis which National places upon the interchange flights.

c. *Cancellations and Consolidations.*

National has unilaterally cancelled trips at Miami on those occasions when delays occurred on northbound flights over Panagra's routes, thus eliminating through service on certain flights. When National cancels the interchange flight, it usually operates the interchange equipment then available at Miami as a domestic flight, thus obliging the passengers on the delayed plane from the south to use connecting domestic flights. Panagra has been forced to accede to this practice in order to have a plane in New York to meet the southbound interchange schedule out of New York.

In some cases National has used Panagra planes at New York to fly an earlier domestic southbound schedule, thus requiring international passengers out of New York with interchange reservations to change planes at Miami. There is some evidence that this practice has resulted in a loss of passengers to Panagra over its international sectors.

There have been repeated occasions when National has consolidated domestic flights into the interchange flights, in some cases combining a tourist flight with the interchange first class flight. This latter type of consolidation, especially, results in inconvenience and dissatisfaction to international passengers aboard the aircraft. There have

—62—

[fol. 1637] also been occasions when National has flag-stopped the interchange flight at a domestic point other than Washington between Miami and New York in order to serve its domestic passengers.

Some of these practices, of course, are reasonable actions for a regional domestic carrier to take and should be ex-

pected in the usual interchange operation. However, they serve to defeat the international through service which the C.A.B. intended that the National-Pan American-Panagra Interchange Agreement establish. It is no rebuttal to Panagra's objections listed here for National to state that it does the same thing with interchange flights it operates under agreement with other domestic carriers. The National-Pan American-Panagra Interchange Agreement is the only interchange in existence between a long haul international carrier and a regional domestic carrier (other than the Eastern-Braniff Interchange, which operates only six frequencies per week compared to Panagra's fourteen). These operational practices affect acutely the character and competitive quality of Panagra's international service.

Cataloging them here is not intended to reflect unfavorably upon National's admittedly highly efficient operation, as geared to its particular regional route structure. They are recorded simply to evidence the incompatibility of National's and Panagra's operations which are adapted to entirely different markets as demonstrated by almost a full year's experience.

[fol. 1638] —63—

d. *Scheduling Inflexibility.*

In general effect, the interchange is an inflexible element in Panagra's schedule planning. Panagra's long haul route presents severe problems of equipment utilization resulting from long layover times at route terminals. These long layovers are made necessary in order to provide saleable arrival and departure times along the line and to permit daylight operation (the only possible at the present time) at certain of the airfields in South America. In order to experiment in an attempt to reduce these layover times and increase its average daily aircraft utilization, Panagra needs full scheduling freedom. Since the New York-Buenos Aires routing is the heart of Panagra's service pattern, the fixed interchange requirements limit the ability of Panagra's management to deal with a signal problem.

3. Operating Costs.

a. Extra Overhead Expenses.

The constant negotiation with National over interchange policies and practices has absorbed an inordinate amount of Panagra management's time and concentration. Panagra's top executives have had to travel to Miami several times to confer with National over relatively minor matters.

b. Operating Expense Differentials.

It must be understood that at the time the Interchange Agreement was negotiated between Panagra and National in June of 1955, Panagra was, in a very weak bargaining position. The Braniff-Eastern interchange had been ap-

—64—

[fol. 1639] proved by the C.A.B. and was to go into operation in the near future. The C.A.B. directed Panagra, Pan American and National to reach agreement on their own interchange. Only Panagra could be hurt by a failure to reach an agreement on an interchange operation. As a result, National held all the cards and Panagra was forced to accede to several very burdensome financial provisions.

Panagra suffers an annual loss under the Interchange Agreement of $358,000 based on a full allocation of expenses to the interchange operation. The difference between the actual expenses incurred by Panagra's planes operating over the interchange sector and the lower amounts actually reimbursed by National must be absorbed by the Panagra system.

The principal reasons for the cost penalty are twofold: First, under the terms of the Interchange Agreement Panagra is obliged to accept reimbursement from National on the basis of its own domestic cost levels which are naturally lower than the international cost levels experienced by Panagra. Second, and more costly to Panagra, National reimburses on a cost per available seat mile unit basis using its own larger domestic aircraft seat capacity. Because National provides passenger journeys of no more than four hours at most, compared to passenger journeys

in excess of twenty hours' elapsed time by Panagra, National is able to operate aircraft with reduced seating space available for each passenger and still stay within the bounds of passenger acceptance. Consequently, National's DC-6Bs and DC-7s have more seats (86 and 69 respectively) than the similar equipment owned by Panagra (72 and 63

—65—

[fol. 1640] including lounge seats respectively). This second factor represents a cost penalty of roughly 13% at the present time.

The expense differentials fall into four separate categories:

(1) *Flying Operations*

The flying operations expense not fully reimbursed by National is the cost of fuel. The available seat mile fuel cost difference between National and Panagra is .0724 cents for DC-6Bs and .0562 cents for DC-7Bs. Based on April 10, 1956 seating capacities and present schedules, Panagra's DC-6Bs will provide 56,609,000 available seat miles annually over the interchange sector. Panagra's DC-7Bs will provide 51,419,000 available seat miles. As a result, the estimated annual cost of fuel loss to Panagra, directly attributable to the terms of the Interchange Agreement is as follows:

DC-6B	56,609,000 x .0724¢	=	$41,000
DC-7B	51,419,000 x .0562¢	=	29,000
			$70,000

(2) *Direct and Indirect Maintenance*

Panagra's 1955 maintenance cost per available seat mile, excluding certain system overhead charges that cannot be considered out-of-pocket expenses allocable to the interchange operation, was .5035¢ for DC-6Bs and .8985¢ for DC-7Bs. However, National has reimbursed at its own lower maintenance rate of only .4269¢ for DC-6Bs and .8304¢ for DC-7Bs. Applying the unit cost differential to the estimated available seat miles to be flown over the

interchange sector results in an annual loss to Panagra of $43,000 for its DC-6Bs and $35,000 for its DC-7Bs.

—66—

[fol. 1641] The total maintenance differential attributable to the Interchange Agreement is thus estimated at $78,000 per year.

(3) *Depreciation of Flight Equipment*

Panagra's allocable depreciation, on a revenue plane mile basis, of the five DC-7Bs and five DC-6Bs (assuming the fifth DC-6B is owned and not leased), including spare parts and engines used in the interchange operation amounts to $506,000 per year. Using Panagra's available seat miles to be operated over the interchange sector in the future year, this reduces to .3409¢ per ASM for DC-6Bs and .6087¢ per ASM for DC-7Bs. National, however, reimburses Panagra for flight depreciation at its own rate of only .2170¢ per ASM for DC-6Bs and .4523¢ per ASM for DC-7Bs.

National's depreciation cost per ASM is lower than Panagra's as a result of several factors: First, National's aircraft capital costs are lower than Panagra's, particularly with respect to the DC-7 type aircraft since Panagra's are the later and more expensive DC-7Bs as compared with National's DC-7s. Aircraft operated by long haul international airlines invariably include additional cost over aircraft operated by medium haul domestic carriers. Secondly, National has higher aircraft utilization than Panagra, made possible by National's shorter routes and more frequencies, allowing for faster turnarounds. On an annual basis, this means that National obtains more mileage per plane than Panagra can obtain within the same period of time. Third, for the reasons described previously National's planes have more seats than Panagra's, and therefore operate more seat miles than Panagra on the same plane mileage.

[fol. 1642]

—67—

On an annual basis, the depreciation differential amounts to $70,000 on the DC-6Bs and $80,000 on the DC-7Bs, or an annual loss to Panagra of $150,000.

(4) *Passenger Service*

The passenger service expense not fully reimbursed by National is in the cost of passenger service equipment and supplies furnished by Panagra. The equipment and supplies provided by Panagra and used by National include items such as silverware, dishes, blankets, head rests and seat covers, linen and pantry equipment. (They do not include food and liquor which are supplied over the interchange sector by National's own commissary.) National reimburses Panagra on the basis of the quantity and quality of similar items supplied on its domestic flights, which are of lesser quantity and quality than furnished on the interchange aircraft by Panagra. As a result of this and the greater number of available seat miles over which to spread the allocable costs, differentials amount to an estimated annual $60,000 loss to Panagra.

(5) *Summary*

Based on present schedules, the inequities of the National Interchange Agreement penalize Panagra largely as a result of having to accept reimbursement on a seat mile basis related to National's (a domestic carrier) cost level rather than Panagra's (an international carrier) to the extent of $358,000 broken down as follows:

[fol. 1643] —68—

Flying Operations	$ 70,000
Maintenance—Direct and Indirect	78,000
Depreciation—Flight Equipment	150,000
Passenger Service	60,000
	$358,000

The large annual expense penalty would be eliminated if the Interchange Agreement were terminated and Panagra were to operate into New York on its own certificate since the revenues from the sector would accrue to Panagra.

D. *Estimated Financial Effect of Termination of Interchange Agreement.*

Partially in offset to a saving of the cost items just discussed, there are certain other financial implications of replacing the Interchange Agreement with an independent Panagra operation. These will be treated here.

1. *Capital Gains Tax.*

The Interchange Agreement provides that upon its termination for any reason, title to one DC-6B and one DC-7B will pass immediately to National. National must pay $1,300,000 for the 6B and $2,100,000 for the 7B, less any payments it made for depreciation of flight equipment during the term of the Agreement. Because Panagra had depreciated the DC-6B aircraft for a period prior to the interchange, and because National's depreciation payments on both the 6B and 7B aircraft are less than the depreciation taken by Panagra, the sale price to National will be in excess of the depreciated value to Panagra.

For purposes of illustration, if Panagra were to terminate the Agreement effective December 31, 1956 (six months' notice required), the resultant taxable capital gain to Panagra is estimated as follows:

—69—

[fol. 1644]

	DC-6B	DC-7B
Agreed Upon Value at 9/15/55	$1,300,000	$2,100,000
Estimated Depreciation paid by NAL to 12/31/56	130,000	240,000
Sale Price to NAL at 12/31/56	$1,170,000	$1,860,000
Depreciated Value for Tax Purposes at 12/31/56	787,000	1,700,000
Taxable Capital Gain to PNG	$ 383,000	$ 160,000

The federal income tax at the effective Western Hemisphere rate of 11% (discussed in subsection 5 below) on

the total $543,000 taxable capital gain to Panagra for both aircraft would be $60,000.

2. *Additional Depreciation Charges.*

Panagra, in event of termination of the Agreement, has the option (a) to repurchase these same aircraft from National at the then current market value or (b) to lease for a period not to exceed 18 months, unless otherwise agreed, at a rental to be agreed upon. In the absence of agreement on the repurchase price or rental, the matter is subject to arbitration. There is little doubt that if Panagra were to obtain a New York certificate of its own, the option to repurchase or lease would be exercised in order to acquire immediate use of the planes already in Panagra's fleet configuration. If Panagra elected to repurchase, it would have to pay a premium for the reacquisition of the planes, since their market value in all probability would be in excess of the sale price to National.

[fol. 164a] —70—

Based on today's indicated market value for used DC-6 type aircraft, it is reasonable to assume that a DC-6B might bring something in the neighborhood of $1,800,000 and a DC-7B something in the neighborhood of $2,500,000; the precise amounts are, of course, to a large extent conjectural, particularly in the case of the DC-7B where there have been no known transactions. Moreover, considerations other than the market value might affect the nature of the transaction.

Again for purposes of illustration, assuming $1,800,000 for the DC-6B and $2,500,000 for the DC-7B, the premium would be approximately as follows:

	DC-6B	DC-7B
Estimated Market Value at 12/31/56	$1,800,000	$2,500,000
Sale Price to NAL at 12/31/56	1,170,000	1,860,000
Premium	$ 630,000	$ 640,000

The total premium of $1,270,000 represents the estimated additional cash payment which Panagra would have to make to National in order to reacquire the planes but it is reasonable to anticipate that the transaction might be negotiated on a more favorable basis.

[fol. 1646] —71—

Panagra would presumably have to depreciate the repurchase planes on the basis of a seven year write-off of the full repurchase price less residual value. This would exceed the present annual depreciation being taken on these planes by $111,000:

Annual Depreciation of Repurchased	DC-6B	DC-7B
Aircraft	$214,000	$299,000
Annual Depreciation Presently Taken	152,000	250,000
Differential	$ 62,000	$ 49,000

However, the effect of the increased depreciation charges can be considered as offset in part by the non-recurring net book capital gain realized on the sale of the two aircraft to National. The net book capital gain is computed as follows:

	DC-6B	DC-7B
Sale Price to NAL at 12/31/56	$1,170,000	$1,860,000
Net Depreciated Book Value at 12/31/56	809,650	1,734,500
Book Capital Gain to PNG	$ 360,350	$ 125,500
Capital Gains Tax ($60,000)	42,000	18,000
Net Book Capital Gain	$ 318,350	$ 107,500
Amortization of Net Book Capital Gain over seven years	$ 45,000	$ 15,000

If the amortized net book capital gain were applied against the depreciation differential, the increased annual depreciation charges on the repurchased aircraft become only $51,000:

	DC 6B	DC 7B
Depreciation Differential	$62,000	$49,000
Amortized Capital Gain	45,000	15,000
	$17,000	$34,000

[fol. 1647]

—72—

3. *Additional Interest Charges*

Upon termination of the Interchange Agreement Panagra will incur certain additional interest expenses.

Under the Interchange Agreement, National deposited with Panagra an amount corresponding to Panagra's investment in equipment and working capital devoted to the interchange. Panagra issued to National non-interest-bearing notes as evidence of the deposit. These notes have been discounted by National, without recourse, with the banks that are parties to Panagra's Credit Agreement. Under these arrangements, although Panagra is obligor on the principal of the notes, National is responsible for the interest. Terminating the Interchange Agreement would necessitate retirement of the non-interest-bearing Panagra notes issued to National. In all probability arrangements can be made with the banks for the substitution of new Panagra interest-bearing notes of equivalent amount payable to the banks.

Panagra might also require additional borrowings, depending on Panagra's working capital position at the time, to finance the premium required for repurchase of the two aircraft, title to which will pass to National on termination of the Interchange Agreement.

To continue the same illustration, if Panagra were to terminate the Interchange Agreement effective December 31, 1956, it is estimated that additional interest charges

—73—

[fol. 1648] would not exceed an estimated $145,000, computed as follows:

Amount of new Panagra notes payable to banks to be substituted for Panagra notes issued to NAL, based on estimated NAL deposit as at December 31, 1956	$3,234,000

Additional borrowings that may be required to cover premium cost in event of repurchase of two aircraft	1,270,000
Total	$4,504,000
Annual interest charge at 3½% on average amount to be outstanding during 1957	$ 145,000

(It should be borne in mind that Panagra has a net of three surplus DC-6s available for sale, the proceeds from which could be used to provide additional working capital and thereby reduce or eliminate the amount of additional borrowing contemplated above.)

4. *Summary*

The financial effects on an annual basis of terminating the Interchange Agreement and reacquiring the DC-6B and DC-7B would be as follows:

(a) Expense differential owing to interchange operation absorbed by Miami-New York sector P&L		$358,000
(b) Added costs:		
Additional Depreciation Charges (Net of Capital Gains)	$ 51,000	
Additional Interest Charges	145,000	196,000

If Panagra were to operate into New York directly from Miami, there are two additional factors which must be

—74—

[fol. 1649] considered in connection with termination of the interchange:

1. Increased federal income taxes systemwide as a result of loss of Western Hemisphere Trade Corporation tax status;

2. Estimated sector operating profit.

These will be discussed below in subsection 5 and Section E respectively.

5. *Loss of Western Hemisphere Trade Corporation Tax Status*

If Panagra were to operate into New York on its own certificate, it would derive more than 5% of its gross income from sources within the United States and hence would lose its preferred tax status as a Western Hemisphere Trade Corporation under the federal Internal Revenue Code. This means that Panagra's entire operating income would be taxed at a 52% rate rather than the effective 38% rate which it presently enjoys. Also, Panagra's capital gains would be taxed at a 25% rate rather than the currently effective 11% rate. To date, the Treasury has accepted Panagra's tax status as a Western Hemisphere Trade Corporation in all tax years audited and finally closed up to and including 1947 through the running of the statute of limitations.

[fol. 1650] —75—

6. *Future System Result on Annual Basis*

If Panagra were certificated into New York and lost its Western Hemisphere status, the overall effect on Panagra's profit and loss statement would be roughly as follows:

1. Estimated Net Income before Taxes for 1956 from present system operations exclusive of capital gains, federal subsidy, plane rental income and return on investment from Pan American Through Flight Agreement	$ (272,000)
2. Estimated Sector Net Operating Income for 1957 from certificated Balboa-Miami operation (see Part One above).	1,062,000
3. Estimated Sector Net Operating Income for 1957 from certificated Miami-New York operation (see Section E below).	365,000

4. Estimated annual expense differential owing to current interchange operation absorbed by Miami-New York sector (see Section C above).	358,000
5. Estimated additional annual expenses owing to termination of Interchange Agreement (see Subsection 4 above).	(196,000)
	$1,317,000
6. Federal income tax at 52%	685,000
7. Estimated System Net Profit for future year based on certificated Balboa-Miami-New York operation and without federal subsidy.	$ 632,000
8. Estimated Net Profit for 1956 from present system operations including federal subsidy ($17,000) and return on investment from Pan American but excluding capital gains and plane rental income and after federal income tax at 38%.	$ 125,000
9. Estimated net improvement in system Net Profit as result of being certificated Balboa-Miami-New York	$ 507,000

NOTE: System Net Profit figures in items 1 and 8 are based on 8 months' actual. A 1956 estimate for the present Panagra system has been used because no 1957 forecast is available. The estimated profit and loss statements for the Balboa-Miami and Miami-New York sectors are on an added cost basis.

—76—

[fol. 1651] If after-tax rental income from the lease of aircraft is included in the net profit figures shown on the preceding page, the expanded system would show a net

profit without subsidy of $1,220,000 (item 7). The present system net profit for 1956, including rental income as well as subsidy payment and return under the Through Flight Agreement, would total $971,000 (item 8). This would result in an estimated net improvement as a result of being certificated Balboa-Miami-New York of $249,000 (item 9), or a 25.6% increase over the present system.

E. *Estimated Sector Operating Profit for Future Year.*

If Panagra were to operate Miami-New York independently, it would schedule three first class flights per week with a Washington stop and four first class flights per week nonstop. There is little doubt that three flights per week would be able to handle adequately the three international passengers per daily flight now generated at Washington. Panagra would continue to schedule all tourist class flights nonstop Miami-New York.

Using these schedules, it is estimated that the profit and loss statement for 1957 for the Miami-New York sector, on an added cost basis, would be as follows:

[fol. 1652] —77—

Panagra Operation of Miami-New York Sector
Profit and Loss Estimate for Future Year
(000)

Operating Revenues	
Passenger	$3,459
Mail Pay—U. S.	115
Freight	469
Excess Baggage	125
Total Operating Revenues	$4,168
Operating Expenses	
Flying Operations	$ 999
Direct Maintenance—Flight Equipment	432
Depreciation—Flight Equipment	506
Total Direct Flying Operations Expense	$1,937

Ground Operations	$ 407
Ground and Indirect Maintenance	302
Passenger Service	393
Traffic & Sales	405
Advertising and Publicity	250
General and Administrative	92
Depreciation—Ground Equipment	17
Total Ground and Indirect Expense	$1,866
Total Operating Expenses	$3,803
Net Operating Income without Federal Subsidy and before Income Taxes	$ 365

[fol. 1653] —78—

1. *Operating Revenues.*

a. *Passenger*

Presented below is a table breaking down the actual number of passengers carried by National in Panagra interchange flights for the first full six-month period of the interchange operation, October 1, 1955 to March 31, 1956 (Column 1). The table projects these passengers to an annual basis and then to the future year 1957 on the assumptions explained in the paragraphs following the table. From the resultant number of passengers shown, estimated passenger revenues for 1957 were computed.

Estimated Passenger Traffic and Revenues for Independent Operation of Miami-New York Sector During 1957.

	Number of Passengers			Revenues
	(1) Actual Oct.-Mar.	(2) Annual Estimate	(3) 1957 Estimate	(4) 1957 Estimate
First Class				
Miami-N. Y. (Int'l)	4,684	9,368	12,928	$ 867,598
Miami-Wash. (Int'l)	1,144	2,288	2,288	126,732
Tourist Class				
Miami-N. Y. (Int'l)	5,125	10,250	16,323	646,391
Total International	10,953	21,906	31,539	$1,640,721
First Class				
Miami-N. Y. (Dom)	—	—	7,828	$ 525,337
Miami-Wash. (Dom)	3,832	16,058	6,882	381,194
Wash.-N. Y. (Dom)	4,849	8,816	3,778	47,603
Tourist Class				
Miami-N. Y. (Dom)	11,289	20,525	20,525	864,246
Total Domestic (a)	20,121	36,583	35,235	$1,818,380
Total Int'l & Dom (a)	31,074	58,489	66,774	$3,459,101

Weekly Frequencies & Average Load Factors		Fre.	L.F.	Fre.	L.F.	Fre.	L.F.
Miami-N. Y.	FC	–	—	–	—	4	71.4%
Miami-Wash.	FC	7	70.1%	7	66.3%	3	71.8%
Wash.-N. Y.	FC	7	45.6%	7	43.5%	3	41.7%
Miami-N. Y.	TC	7	63.2%	7	59.3%	7	71.0%

(a) Passenger totals exclude Washington-New York passengers.

—79—

[fol. 1654] *The Annual Estimate* (Column 2) for the number of international passengers carried between Miami and New York was derived by doubling the six months' actual figure. Based on Panagra's experience, the six months period October-March is a reasonably good sampling for the entire year and is not distorted to any great extent by seasonal characteristics.

The Annual Estimate for domestic passengers was obtained by increasing the six months' actual figures by 82% to account for the seasonal fluctuation experienced by National. The total revenue passenger miles flown by National during the twelve months ended June 30, 1955, were 182% of those flown between October 1, 1954 and March 31, 1955.

The 1957 Estimate (Column 3) for international passengers was based upon a 20% annual rate of increase in first class traffic and a 30% annual rate of increase in tourist class traffic. The reasons for estimating these rates of increase are set forth in Section F, subsection 2, below.

Since the Annual Estimate included three months of 1956, the full rate of increase was not used for the intermediate year 1956. The manner in which the Annual Estimate was projected to the year 1957 is as follows:

International Passengers	1956 Estimate	1957 Estimate
First Class Miami-New York	15% increase over Annual Estimate	20% increase over 1956 Estimate
First Class Miami-Washington	No increase	No increase
Tourist Class Miami-New York	22½% increase over Annual Estimate	30% increase over 1956 Estimate

—80—

[fol. 1655] In the case of Miami-Washington international passengers, no increase between the Annual Estimate and the 1957 Estimate is projected, because it is conservatively estimated that the three first class flights per week stopping in Washington will handle only the annual traffic presently

carried by the seven first class flights per week stopping in Washington.

The 1957 Estimate for domestic passengers shows a decrease from the Annual Estimate. It is estimated that Panagra would carry 7,828 New York-Miami first class domestic passengers, producing a 71.4% load factor on the four non-stop flights. It is estimated that the three Washington-stop flights will carry three-sevenths of the number of domestic passengers actually carried by National on the seven Washington-stop interchange flights.

No increase is anticipated in the tourist class domestic traffic, but it is expected that Panagra will be able to carry as many domestic tourist passengers as National is presently carrying on interchange flights.

It should be noted that the traffic figures for 1957 result in a yearly average passenger load factor of approximately 70%, a conservative figure for this high density sector.

Estimated 1957 Passenger Revenues (Column 4) are based on the following passenger revenue yields:

First Class	Yield
Miami-New York	$67.11
Miami-Washington	55.39
Washington-New York	12.60
Tourist Class	
Miami-New York (day coach)	$45.45
Miami-New York (night coach)	39.60

—81—

[fol. 1656] The passenger revenue yields were arrived at by reducing the published first class fares by 12½% to account for half fares and round trip discounts. The published tourist class fares were reduced by 10% to account for half fares only because no round trip discount is given for tourist travel.

In arriving at the passenger revenue estimate for the tourist class international passengers, the present practice was followed of charging the international tourist passen-

ger the night coach rate regardless of which type of tourist flight he uses. As to the tourist class domestic passenger revenues, it was assumed that three-sevenths of the total such passengers would travel on day coach flights and four-sevenths would travel on night coach flights.

b. *Mail, Cargo and Excess Baggage*

U. S. Mail Pay was estimated from limited information, supplied by National, covering southbound flights from New York for the first 3½ months of the interchange operation. This information indicated the average tonnage of mail carried per flight by Panagra planes southbound from New York during November and December, 1955. Assuming the same tonnage northbound and southbound, and increasing the tonnage on the three first class flights scheduled to stop at Washington by 20%, the annual mail ton miles for the sector were estimated at 378,630. Using the same per ton mile rate for U. S. Mail received by National in the year ended September 30, 1955, or $.304, the annual U. S. Mail Pay for the sector was estimated at $115,000. This is believed conservative because it does not provide for any increase in present mail movement by air.

—82—

[fol. 1657] *Cargo Revenues* were computed on the basis of carrying an average of 1,500 kilos of cargo per flight southbound from New York and 400 kilos northbound from Miami. It is believed that there is sufficient cargo volume to fill approximately 60% of available cargo space southbound after allowing for a 71% passenger load factor. (Initially, it is not contemplated that cargo service would be provided at Washington.) On this basis the sector would produce an estimated 1,668,000 ton miles of cargo per year. Using the same yield per ton mile for freight and express received by National for the year ended September 30, 1955, or $.281, the annual cargo revenue for the sector is estimated at $469,000.

Excess Baggage Revenues were based upon historical relationships: Panagra's excess baggage revenues in 1955

were 4.84% of passenger revenues; this same percentage was applied to the $1,641,000 passenger revenues from international passengers estimated for 1957. Excess baggage revenues of National Airlines were 2.52% of passenger revenues for the year ending September 30, 1955; this same percentage was applied against the $4,818,000 domestic passenger revenues estimated for 1957. Excess Baggage Revenues were therefore estimated at $125,000.

2. *Operating Expenses.*

a. *Direct.*

Flying Operations expense was computed by multiplying the estimated annual number of flying hours between Miami and New York by the adjusted per hour cost of flying operations to Panagra for DC-6Bs and DC-7Bs. The $161.00 DC-6B and $212.00 DC-7B per hour flying operation costs

—83—

[fol. 1658] developed in the Balboa-Miami route application were adjusted by $4.50 per hour for DC-6Bs and $6.56 for DC-7Bs for the lower cost of fuel within the United States.

Maintenance of Flight Equipment expense was computed by multiplying the estimated annual number of flying hours over the Miami-New York sector by the costs per flying hour to Panagra for Maintenance of Flight Equipment of its DC-6Bs ($61.00) and DC-7Bs ($96.00) as developed in the Balboa-Miami route application.

Depreciation of Flight Equipment expense was developed by taking the total charge per year for Depreciation of Flight Equipment, including FESPA on a fleet of five DC-7Bs and five DC-6Bs as developed in the Balboa-Miami route application and allocating a portion to the Miami-New York sector on the basis of the estimated annual revenue plane miles to be flown by Panagra's DC-6Bs and DC-7Bs over that sector.

[fol. 1659] —84—

b. *Ground and Indirect*

Ground Operations expense was estimated as follows:

New York (14 landings per week)	
Ramp service fees	$ 88,000
Salaries for 12 counter personnel	54,000
Salaries for 6 cargo personnel	29,000
Landing fees	23,000
Annual rental of counter & cargo space	9,000
Miscellaneous	3,000
	$206,000
Washington (6 landings per week)	
Salaries for 3 counter personnel	$ 12,000
Ramp service fees	9,000
Landing fees	3,000
Annual rental of counter space	1,000
Miscellaneous	1,000
	$ 26,000
Miami (14 landings per week)	
Ramp service fees	$ 41,000
Landing fees	25,000
Salaries for 2 additional counter personnel	8,000
Miscellaneous	3,000
Annual rental of additional counter space	500
	$ 77,500
Other Ground Operations Expenses	
Ground to air communications	$ 47,000
Allocable cost of private teletype system (1/5)	28,000
Salaries for flight dispatch	16,000
Salary for crew scheduling	6,000
	$ 97,000
Total Estimated Ground Operations Expense	$406,500

Ramp service fees at Miami were estimated on the basis of ten man hours per southbound landing at $5.70 per man hour, the present per man hour charge to Panagra by Pan American. At Washington, ramp service fees were estimated at five man hours per northbound and southbound

—85—

[fol. 1660] landing at $5.70 per man hour. The ramp service fees at New York were developed from the published schedule of charges for complete turnaround services performed by Flight Dispatch Services, Inc.

Ground and Indirect Maintenance expense was computed by multiplying the estimated annual flying hours over the Miami-New York sector by the cost per flying hour to Panagra for ground and indirect maintenance including return on investment to PAA, of its DC-6Bs ($41.00) and DC-7Bs ($69.00), as developed in the Balboa-Miami route application.

Passenger Service expense for independent operation of the Miami-New York sector was derived from the average between Panagra's unit cost (.71¢ per revenue passenger mile) and the unit cost for all domestic carriers for the year ended September 30, 1955 (.37¢ per revenue passenger mile), or .54¢. The unit cost was multiplied by the approximately 73,000,000 1957 revenue passenger miles estimated for the sector, resulting in a 1957 expense of $393,000.

Traffic and Sales expense was estimated at 10% of total non-mail revenues rather than the 13% estimated in the Balboa-Miami route application because of the lower commission paid on domestic ticket sales (5% rather than 10% paid on international tickets.)

Advertising and Publicity expense was estimated at $250,000, the same as that estimated for the Balboa-Miami sector. This would result in an advertising budget of $500,000 per year to promote the extension of Panagra's own

—86—

[fol. 1661] service into New York from Balboa. A budget of this proportion appears ample in view of the fact that Panagra's present budget permits extensive advertising in the United States.

Gene and Administrative expenses were estimated as follows

4 additional accounting department employees	$20,000
Increased legal fees	10,000
Employee benefits for additional employees (9.3% of salaries)	49,000
Payroll taxes for additional employees (2.5% of salaries)	13,000
	$92,000

Depreciation of Ground Equipment expense was computed on the basis of the following estimated capital expenditures:

Washington	
Furnishing counter space	$ 6,000
Motor scooter	400
Passenger ladder	3,600
New York	
Furnishing counter & cargo space	$18,000
Truck for cargo section	3,000
Fork lift truck	4,000
Starting unit	5,000
Cargo pallets	1,800
Cargo carts	900
Passenger ladder	3,600
Motor scooter	400
Station wagon	3,000
	$39,700

Depreciating these capital expenditures over a three year period results in an estimated annual charge for Depreciation of Ground Equipment of $16,567.

[fol. 1662] —87—

F. Importance of New York and Washington to Panagra's Operations.

1. Present Traffic Flow to and from West Coast of South America.

New York and Washington are vitally important terminals for Panagra's routes. United States-South America passengers represent more than one-third of Panagra's *present* revenue. Of the 79,790,000 revenue passenger miles flown by Panagra's system in the six months October 1955 through March 1956, 28,095,000, or 35.2%, were flown by revenue passengers originating in or destined to the United States.

New York City is the ultimate destination or originating point for half of these passengers.

In the six months October 1955 through March 1956, the interchange flights carried over the Miami-New York sector, by actual count, approximately 11,000 Latin America passengers. These Panagra passengers produced 24,713,000 revenue passenger miles north of Balboa over the routes of Pan American and National, or 31% of Panagra's total system revenue passenger miles south of Balboa for the same period.

The actual count of passengers carried on Panagra aircraft during the period October 1, 1955-March 31, 1956 is shown below. Also shown is an annual estimate projected on the basis explained above in Section E, subsection 1.

[fol. 1663] —88—

Origination and Destination of Passengers Carried by Panagra Aircraft over Through Flight and Interchange Sectors, October 1, 1955-March 31, 1956.

Balboa-Miami Sector	Actual 6 mos.	Estimated Annual
South America-Washington New York	7,542	15,084
South America-Miami	6,462	12,924
Balboa-Washington New York	3,411	6,822
Total Transiting PAX	17,415	34,830

Balboa-Miami Sector	Actual 6 mos.	Estimated Annual
Balboa-Miami Local	7,284	14,568
Sector Total	24,699	49,398
Transiting as % of Sector Total	70.5%	70.5%
Miami-New York Sector		
South America-Washington/New York	7,542	15,084
Balboa-Washington/New York	3,411	6,822
Total International PAX	10,953	21,906
Miami-Washington/New York Domestic	20,121	36,583
Sector Total	31,074	58,489
International as % of Sector Total	35.2%	37.5%

As shown, international through passengers (i.e., those transiting the local sector) presently constitute 70% of the total traffic carried over the Balboa-Miami sector, and 37% of the total traffic carried over the Miami-New York sector. (With respect to the latter sector, it should be noted that international passengers are estimated to comprise 48% of the total Miami-New York passengers for the year 1957 on the basis of an independent Panagra operation).

Of the 49,398 passengers carried in the estimated year between Balboa and Miami, only 21,906, or 44% traveled

—89—

[fol. 1664] on to Washington and New York. It is believed that these 21,906 passengers do not constitute the total number of the Balboa-Miami sector passengers who began or ended their journeys in Washington and New York. A considerable number of the balance of 27,942 who are estimated to enplane or deplane at Miami are believed to have traveled to or from New York and Washington by some other means.

For example, a study of northbound passenger addresses made for a six months' period in 1954 indicated that 71% of Panagra passengers who arrived at Miami from South America (excluding Balboa) were enroute to Washington and New York. Including all passengers who arrived at

Miami on Panagra aircraft (i.e., including those who boarded at Balboa), 68% indicated travel to or via New York and Washington. (See Docket No. 4882, Exhibit No. PGR 4.) It is apparent from these figures that there is still a sizable number of Washington and New York bound passengers who have not to date used the interchange planes north of Miami.

This is borne out by a survey of northbound passengers conducted at Miami over a three week period in May and June of 1956. The survey indicated that 68% of all passengers who arrived at Miami on Panagra aircraft during this period were finally destined to or via Washington and New York, confirming precisely the results of the 1951 study. However, only 55% stayed aboard for through travel to Washington and New York. The 55% shows a substantial increase over the 44% who traveled on to Washington and New York in the six months' period October 1, 1955 through March 31, 1956, giving some evidence that

—90—

[fol. 1665] as the through service becomes better known and understood, passengers who formerly disembarked at Miami will continue on. Nevertheless, at the moment approximately 13% of Panagra's Washington and New York bound passengers stop over at Miami. This would indicate that there will be a continuing increase in the number of international passengers over the Miami-New York sector irrespective of overall traffic growth.

2. *Future International Traffic Growth.*

If Panagra were certificated from South America into Washington and New York, it is estimated that there would be an annual 20% increase in the number of first class passengers carried by Panagra between South America and these two cities, and an annual 30% increase in the number of tourist class passengers.

It is forecast that the steady economic growth of the United States and the areas in South America which Panagra now serves will of itself produce a general increase of 10% per year in the number of United States-South

America passengers carried by Panagra. This minimum expected increase simply reflects Panagra's historical experience. Each of the past four years has shown a weighted average 11% increase over the preceding year in the number of Panagra through passengers between points south of Balboa and Miami. (See Part One, page 30, above.)

In addition to the 10% general increase in both tourist class and first class passengers based on historical traffic

—91—

[fol. 1666] indications, it is forecast that there will be an additional 10% annual increase in first class passengers and an additional 20% annual increase in tourist class passengers as a result of the special factors discussed below.

It is believed that the number and proportion of international passengers presently carried over the Miami-New York sector by Panagra aircraft will increase, without regard to a general increase in the traffic volume or generation of new traffic. In time, the habit of changing planes at Miami should give way to the advantages of one plane through service and more of the New York and Washington passengers will stay on the same plane. Equally important, if Panagra were to operate the sector itself, an international standard of service would be provided for the entire journey into New York that would induce those passengers, who now see little reason not to change planes at Miami, to use the same plane the entire trip.

With respect to first class traffic, another reason to expect an increase over and above the historical 10% growth is the improved and faster service resulting from the elimination of Washington stops on four first class flights per week.

But there are major reasons outside of Panagra's present interchange service on which to expect a faster rate of traffic increase.

There is now developing a new hemispheric emphasis on inter-American travel that will generate new traffic. This emphasis was dramatically evidenced at the recent Costa

—92—

[fol. 1667] Rica conference. Within the next several years

there will be a vastly expended program for advertising South America and Central America as desirable destinations for American tourists. The Latin American governments are taking steps to encourage tourism to their countries and to compete for the more than 500,000 American tourists who annually visit Europe, many of whom are now looking for new areas to visit. In 1955 fewer than 50,000 American tourists visited South America. The concentrated advertising program will have a profound effect on the volume of traffic to Latin America.

A further increase in passenger volume will result from the recent institution of year-round excursion fares by Panagra. These fares are 30% below regular first-class and tourist rates and should generate a substantial amount of new business which would not otherwise be generated by Panagra's existing service. The lower revenue per passenger yielded by the excursion fares would be applicable entirely to the international sectors where the fare structure is higher than the domestic fare levels between Miami, Washington and New York. Consequently, an increase in traffic as a result of the excursion fares would result in an increased number of passengers at the same fare levels used in the estimated sector operating profit shown in Section E above. Systemwide, it is believed the lower fares will be more than offset by the increased traffic volume.

—93—

[fol. 1668] There is yet another factor for estimating the large increase in United States-South America traffic which Panagra could expect to carry: the impact of Panagra's own independent operation into Washington and New York. The identification of Panagra in the mind of the American traveling public would be emphasized by actual entry of Panagra into these principal markets. Direct contact with the United States market would emphasize the availability of daily air service to South America. Panagra airport counters, and the other activities apparent to air travelers that go with operating on its own certificate, would increase public familiarity with Panagra as an *independent* United States flag airline. Also, domestic passengers on Panagra planes would be treated to an international standard of

service and to special South American advertising that would promote their interest in visiting the areas Panagra presently serves.

The developmental and promotional value to air transportation in certificating Panagra into the northeastern United States cannot be overestimated. Such authorization will produce desirable and healthy competitive and public benefits.

Of course, if Panagra is not permitted to expand its routes and service, there is every doubt whether Panagra could expect even to continue its present annual growth rate, let alone improve upon it. Air transportation is an industry which requires growth in all aspects in order simply to keep even with other airlines and to meet the enlarged demands of the traveling public. If these demands are not met, the airline will lose patronage to car-

—94—

[fol. 1669] riers, either domestic or foreign, who are able to meet them.

3. *Little Diversion from Domestic Carriers and No Subsidy Need from Government.*

Although Panagra's application contemplates the use of local traffic rights, there would be no substantial diversion of domestic passengers from the domestic carriers operating between Miami, Washington and New York. Panagra proposes to operate only two daily frequencies, or 4% of the 50 daily frequencies presently operated by the two certificated carriers. These frequencies would not be increased until warranted by *international traffic.*

In the first year of operating roughly 34% of the seating capacity offered by the two frequencies will be occupied by international passengers to and from Latin America. Preference will in all cases be given to these international passengers. Thus, Panagra estimates that it will need to carry only 35,235 domestic passengers to or from Miami in order to make the Washington/New York extension an economical one at the outset. As the volume of international

through traffic builds up, the number of domestic passengers carried by Panagra on its through flights would be decreased. Domestic traffic rights will be essential for economical operation at first but will become less important in time.

There will be no subsidy needed by Panagra to operate into Washington and New York. On the contrary, operation into these domestic points would provide the Panagra

—95—

[fol. 1670] system with a natural breadth and strength that would serve ultimately to insure a subsidy-free system.

A New York certificate would provide Panagra with $4.2 million additional revenues from the new sector above Miami. Revenues of $5.5 million would be obtained from the proposed Balboa-Miami sector. The expected revenues for Panagra's present system in 1957, based on historical growth, are $19.2 million. Combined, these would total annual revenues of $28.9 million in 1957. This is an increase of 70% over the $17.0 million operating revenues produced by the present Panagra system south of Balboa in 1955.

The expanded system, linking natural traffic flows, allowing for more efficient utilization of equipment and personnel, and producing revenues in the sizable amounts indicated, should produce an international airline capable of standing on its own feet without government support except in the most unfavorable circumstances.

4. *DC-8 Operations.*

Within four years there will be available 125-passenger turbine propelled air transports to operate between New York and Buenos Aires. They will be capable of flying the 5,500 mile Great Circle distance at speeds of 550 miles per hour with only one stop.

—96—

[fol. 1671] When these commercial jet aircraft are placed in service between New York and Buenos Aires, the route will immediately become the most important international route in the Western Hemisphere. By cutting present travel time almost in half, it will bring the largest city in

North America within a half-day's journey of the largest (and about the southernmost) city in South America.

All three United States flag carriers, including Panagra, that now operate between North and South America have such jet equipment on order.

Braniff will receive delivery of Boeing 707s in 1959 and 1960 and could provide service under its present certificate from Houston and Chicago to Rio de Janeiro and Buenos Aires via Bogota. Pan American will receive delivery of DC-8s and 707s in 1959 and 1960 and will be able to operate New York-Buenos Aires via Caracas under its present certificate.

Thus, Panagra's primary competitors will be able to operate directly from the United States to Buenos Aires with one-stop service under their present certificates. In order to be competitive, Panagra must be able to operate the new jet equipment New York-Buenos Aires one-stop via Lima. However, its present certificate will not permit this.

New York-Buenos Aires and New York-Lima are now Panagra's most important markets.

Realizing the significance of the new long range jet equipment to its primary routing between New York and Buenos Aires, Panagra acted promptly by ordering four,

—97—

[fol. 1672] and optioning an additional two, DC-8 aircraft with J-75 turbine engines. Panagra will receive delivery on them in early 1960—in time to protect its competitive position, *if* it is in the meantime given authority to operate the new planes where traffic patterns will demand.

The four DC-8s on order by Panagra involve an estimated expenditure of more than $25 million. In addition, of course, large capital expenditures will be required to improve the ground facilities in South America. Extensive planning must now be done in closest cooperation with the countries which Panagra serves. Financing arrangements for this necessary flight and ground equipment will

depend upon obtaining legal authority to operate the long haul service.

It is apparent that the jet age of air travel will have outmoded the National-Pan American-Panagra Interchange Agreement. The extremely high cost and speed of jet operation will make the splitting of revenues and expenses an uneconomic and burdensome practice for any of the three carriers involved. Moreover, the New York-Buenos Aires and intermediate United States-South America markets will have become so integrated as to warrant the preferable one-carrier service.

Jet operation will require a routing flexibility that would be impossible in any sort of interchange arrangement. The nature of jet transportation will make obsolete the necessity of a Miami or Balboa stop.

These combined technological-traffic developments are not more than four to six years in the future. They require

—98—

[fol. 1673] extensive planning and preparation now. The staggering job cannot be budgeted on any sound financial basis without an international route structure permitting Panagra unrestricted access to Miami, Washington and New York. There can be little doubt that this will be a natural evolution of Panagra's operations.

The proper jet equipment is necessary and ordered. The route authority is necessary and must be applied for. Unless Panagra obtains both equipment *and* routes, it will not be able to provide the service the public will demand and need.

[fol. 1674]

[fol. 1675] —99—

PART THREE

BALBOA-MEXICO CITY-LOS ANGELES/ SAN FRANCISCO

A. *Nature of Application*

This application is to extend Panagra's route 3,390 miles north from Balboa to Mexico City, Los Angeles and San Francisco. San Francisco and Los Angeles would be requested as co-terminals on the route which would begin at its southern end at Buenos Aires. Los Angeles-Mexico City turnaround authority would be requested, although only flights through Mexico City to and from South America would be operated initially.

B. *Reasons for Application*

1. If Panagra is to become a major United States air carrier and a sound investment in its own right, it must obtain access to relatively heavy traffic areas. Today, it operates into no such areas. Extension into Miami and New York would provide Panagra with one needed area, but this extension would not develop any *new* traffic areas. Mexico City and Los Angeles are volume markets which would buttress and sustain the rest of Panagra's long, lean route structure in South America.

—100—

[fol. 1676] 2. The Mexico-California extension from Balboa together with a Florida-New York extension would produce an airline generating an estimated $33.6 millions in revenues in the first year of operation and an estimated profit, after income taxes at 52% and without federal subsidy, of conservatively $1.1 million. An airline operation of this scope would result in uniformly lower unit costs and would permit Panagra to operate at a cost level which would be substantially in line with other international air carriers. It would also provide a breadth, diversity and balance sufficient to minimize the effect of traffic fluctuations in any one area alone (e.g., the drop in Argentine traffic as a result of the revolution and devaluation of the peso).

3. Exclusive of any subsidy support, the route would provide an operating profit of $442,000. Moreover, it would soon contribute toward making the rest of Panagra's system free from subsidy need.

4. The expanded system would be a major step toward the most desirable route structure for the operation of large jet aircraft between the United States and Latin America.

5. Panagra has been a primary and pioneer United States-South America air carrier. Since 1930, it has had access into Central America at Panama. It is the logical carrier to be extended to Mexico and to connect the West Coasts of the two American continents.

—101—

[fol. 1677] 6. Of vital importance is the need to improve air service connecting the West Coast of the United States, Mexico, the West Coast of South America, and Buenos Aires. At present, there is *no* one carrier or one plane service between the West Coasts. There is no U.S. flag service such as proposed by Panagra between California and Mexico or from Mexico to South America. Panagra, as a U.S. flag carrier which already serves the southern portion of this route to connect continents, is uniquely qualified to furnish the needed northern connection.

C. *The Proposed Operation*

It is proposed that Panagra operate three-round trips per week between the West Coast of the United States and the West Coast of South America. One DC-7B frequency would be operated weekly from the two California coterminals to Mexico City, then nonstop to Lima, then south to Buenos Aires, and then return serving the same points. Two DC-6B frequencies would be operated weekly from Los Angeles to Mexico City, Balboa, Lima, and return. At Lima, the 6B flights would connect with 6B flights coming from or going to Bolivia, Chile and Argentina. The expanded Panagra operation is shown on the map on the following page:

—103—

[fol. 1679] The DC-7B flight would be operated in first class configuration identical to the 7B flights serving the East Coast of the United States. The DC-6B flights would be used in tourist class configuration, identical to the 6Bs serving the East Coast of the United States. Consideration might be given to converting the entire Panagra fleet of 7Bs and 6Bs to dual configuration in order to increase the flexibility of the combined operation.

The theoretical block-to-block flying times for the proposed western route are as follows:

Sector	DC-7B	DC-6B
San Francisco-Los Angeles	1:30	—
Los Angeles-Mexico City	5:20	5:40
Mexico City-Balboa	)	5:40
	) 10:20	
Balboa-Lima	)	5:30
Lima-Buenos Aires	6:20	—
	23:30	16:50

D. *Additional Aircraft*

The South America-Mexico-California operation would be possible with the acquisition of only one additional DC-7B and one additional DC-6B. Thus, Panagra's total long-range fleet would comprise six 7Bs and six 6Bs. Because all 7Bs and all 6Bs would be in identical configuration, they would be completely interchangeable as between the East

—104—

[fol. 1680] Coast U.S. and West Coast services. Interchange of the 7Bs could take place at Buenos Aires and the 6Bs at Lima. It should be noted that currently four of the seven 6B frequencies between New York and South America terminate at Lima.

The proposed Mexico-California operation would result in an average daily utilization for the expanded system, including Miami and New York, of 7:31 hours for the six DC-7Bs and 7:43 hours for the six DC-6Bs, well within maintainable standards of aircraft use.

Panagra already has a sixth DC-7B on order for delivery in July of 1957. Substantial payments have been made to the manufacturer on this aircraft and the balance is budgeted to be paid out of Panagra's current cash flow. The sixth DC-6B would, presumably, have to be purchased on the open market at a price approximating $1,800,000. It is anticipated that Panagra would borrow the amount of money necessary to purchase the additional 6B.

Panagra is in the unique position of having the capacity to put the route into almost immediate operation with modern equipment without in any way diminishing its present main stem service between New York and Buenos Aires. Nonetheless, it should be recognized that the proposed schedules are only the minimum necessary to meet the

—105—

[fol. 1681] immediate need for new through service in the western area. The lift capacity would be considerably expanded with the advent of the new jet equipment in 1960. The 7B and 6B service over the proposed route would be superseded in large measure after 1960 by the jet equipment now on order.

E. *Financial Result*

It is estimated that the new route extension would generate revenues of $4.7 million in its first year of operation. This would produce an operating profit of $442,000, without subsidy, and after absorbing the full depreciation on both the additional planes. In its first year of operation it is estimated that the route would produce on an added cost basis a net profit of $153,000 after taxes at 52%. On an allocated cost basis, the result would be even more favorable.

The revenue estimate of $4.7 million for the Mexico-California extension reflects a conservatively estimated 55% average passenger load factor south of Los Angeles. The basis for this traffic estimate is explained in Section H below.

If the assumed average load factor is increased to 60% from 55% on the sectors south of Los Angeles, which would easily be foreseeable, the route's revenues would increase to $5.1 millions and the net profit to $274,000.

—106—

[fol. 1682] The estimated revenues as well as the expenses include the portion of the flights south of Balboa over Panagra's present system. Expenses are constructed on an added cost basis. A detailed explanation of the revenue and expense estimates appears in Section L below.

The estimated profit and loss statement for the first year's operation of the proposed route appears on the next page:

[fol. 1683]

—107—

1957 Profit and Loss Estimate
Buenos Aires—Lima—Mexico City—Los Angeles/
San Francisco Operation

(Dollar amounts expressed in thousands)

Operating Revenues	
Passenger	$4,004
Mail—U.S.	94
Mail—Foreign	132
Freight	330

Traffic & Sales	584

Advertising & Publicity	337
General and Administrative	132
Depreciation—Ground Equipment	39
Total Ground Operations Expense	$2,135
Total Operating Expenses	$4,278
Net Operating Income Without Federal Subsidy and Before Income Taxes	$ 442

[fol. 1684]

—108—

F. *Prior C.A.B. Proceedings and Applications*

With respect to the California-Mexico City segment, Western and American have applications pending. In the same Latin American Service Case which granted Braniff routes into South America, the C.A.B., with President Truman's approval, certificated Western Airlines between Los Angeles and Mexico City. Subsequently, when the U. S. Mexican bilateral air treaty negotiations faltered and no new U. S. carrier was permitted by the Mexican government to serve Mexico, President Truman "withdrew" his approval of the certification of new carriers into Mexico (Western, Braniff and Eastern). The legality of this withdrawal of approval by the President is an issue in the pending "New York-Mexico City Nonstop Service Case". Whatever the legality of its status, Western is generally regarded as having the inside track on the Los Angeles-Mexico City route whenever Mexico opens it, although American now also has an application pending for this same route. Hearings have not been scheduled, nor is the Mexican bilateral situation yet resolved.

With respect to the Mexico City-South America segment, no American carrier has applied for authority to operate a route that would include both Mexico City and points in South America.

G. *Present Service*

Fares. The San Francisco-Buenos Aires first class fare is $667 and the Los Angeles-Lima tourist class fare is $333. Broken down by sector these fares are:

[fol. 1685] —109—

	First Class	Tourist
San Francisco-Los Angeles	$ 22	$ 14
Los Angeles-Mexico City	98	75
Mexico City-Balboa	143	110
Mexico City-Lima	352	258
Balboa-Lima	209	168
Lima-Buenos Aires	220	180

Los Angeles-Mexico City segment. The only nonstop service being operated today between Los Angeles and Mexico City is that of Compania Mexicana de Aviacion (CMA). CMA, a Pan American affiliate, operates a daily DC-6 first class service; CMA's published flying time is 5:40 hours. CMA operates no tourist class nonstop service—its daily DC-4 tourist planes make five intermediate stops between Los Angeles and Mexico City.

Mexico City-Balboa-Lima segment. The only carrier to operate nonstop between Mexico City and Lima is Canadian Pacific Airlines (CPAL). It offers a twice weekly service from Vancouver through Mexico City nonstop to Lima, using DC-6B dual configuration equipment. CPAL's scheduled flying time between Mexico City and Lima is ten hours northbound and eleven hours southbound. CPAL recently inaugurated service beyond Lima nonstop to Buenos Aires.

Pan American operates local tourist class service between Mexico City and Balboa, using DC-6B equipment. A one-stop flight is operated three times weekly and takes approximately seven hours; a 4- or 5-stop flight is operated daily and takes ten hours. Foreign flag carriers and the type of service offered by them between Mexico and Balboa are:

[fol. 1686] —110—

Carrier	Equipment	Weekly Frequency	No. of Stops	Type of Service
TACA	DC-4	1	5	Tourist
Aerovias Guest	Constellation	2	1	Tourist
IACSA	Convair 340	3	2	Tourist
KLM	Convair/DC-6*	1	4	Tourist

* Change of plane en route.

Pan American's San Francisco/Los Angeles-Guatemala City flights now proceed on with intermediate stops to Balboa and Caracas and return, so that it is possible to fly between Los Angeles and Balboa on PAA DC-6 type equipment in about 14 hours. This compares with approximately 12½ hours LAX-MEX-TUM via Panagra's DC-6Bs.

H. *Traffic Volume*

Presented on the next page is an analysis of the most recent March and September C.A.B. traffic surveys. These surveys record the number of passengers who were carried at some point in their journeys by a U.S. flag carrier. They do *not* reflect the number of passengers whose entire journeys were via foreign carriers. The number of passengers shown on the table following has been projected to an annual basis from the two months' actual count.

The totals include passengers who actually traveled between South America and Mexico City and the U.S. West Coast, and potential passengers, i.e., those who presumably would have traveled between South America and Mexico City and beyond if adequate service were offered. These totaled an estimated 33,972 in 1955, a 78% increase over 1953.

—111—

[fol. 1687] In addition to the C.A.B. figures, the table below also shows the number of Panagra passengers who traveled or might have traveled to, from, or via Mexico City, as derived from Panagra's internal records. In 1955, a total of 7,408 passengers were in this category, a 37% increase over 1953.

Number of Actual and Potential Passengers Between South America and Mexico City

Total South America

Year	S.A.-Mexico City C.A.B.	S.A.-Mexico City PNG	S.A.-Mex-Lax & Pac. C.A.B.	S.A.-Mex-Lax & Pac. PNG
1955	33,972	7,408	17,580	4,467
1954	27,636	6,675	13,320	4,109
1953	19,116	5,402	11,406	3,321

Lima and Points South

Year	S.A.-Mexico City C.A.B.	S.A.-Mexico City PNG	S.A.-Mex-Lax & Pac. C.A.B.	S.A.-Mex-Lax & Pac. PNG
1955	16,548	6,004	8,928	3,645
1954	13,818	5,259	6,306	3,333
1953	7,800	4,317	5,466	2,735

Points North of Lima to and Including Balboa

Year	S.A.-Mexico City C.A.B.	S.A.-Mexico City PNG	S.A.-Mex-Lax & Pac. C.A.B.	S.A.-Mex-Lax & Pac. PNG
1955	17,424	1,404	8,652	822
1954	13,818	1,416	7,014	776
1953	11,316	1,085	5,940	586

—112—

[fol. 1688] The preceding table also shows the number of passengers originating or terminating in South America who did travel or might have traveled *through* Mexico City to and from the western part of the United States and points in the Pacific or the Orient. In 1955, there were an estimated 17,580 passengers in this category.

The total South America-Mexico City passengers have been broken down to show the desirability of a Balboa stop between Mexico City and Lima. Of the estimated 33,972 passengers who traveled or might have traveled between South America and Mexico City in 1955, 16,548 came from

or went to Lima and points south, while 17,424 came from or went to points north of Lima to and including Balboa. Thus, 51% of South American passengers presently traveling from, to or through Mexico City would prefer or require use of the Balboa gateway.

The above table does not show any of the turnaround passengers carried by CMA between Mexico City and Los Angeles. CMA's statistics have been unavailable. Assuming that CMA has operated on a year-round passenger load factor of 65% with its daily nonstop frequency and that its DC-6 carries 52 first class seats (the same number as Panagra's DC-6s carried), CMA transported an estimated 24,674 passengers annually.

The growth potential in this general area is indicated by the increase in the number of passengers carried by Pan American on its nonstop Los Angeles-Guatemala City route. According to the examiner's report in C.A.B. Docket No. 6615, Pan American carried since its first full year of operation:

[fol. 1689] —113—

Year	Passengers	% Increase Over 1952
1954	10,662	55.5%
1953	7,743	12.9%
1952	6,856	—

Canadian Pacific has also shown a steady increase in the number of passengers it carries between Mexico City and Lima, on its twice weekly service. The first full year of CPAL's operation was 1954.

Year	Passengers	% Increase Over 1954
1956	3,228[a]	59.6%
1955	2,222	9.8%
1954	2,023	—

[a] Projected from nine months actual.

Projected Load Factor. Based upon these traffic indications and new traffic that would be generated by the new

Panagra service, an average revenue passenger load factor of 55% has been estimated for the first year of operating the sectors of the new route south of LAX. (Because no local traffic rights would be requested for the LAX/SFO sector, a passenger load factor of only 25% has been estimated for the first year of operating one weekly 7B flight LAX/SFO.) The estimated 55% load factor appears conservative in view of the lack of adequate through air service now existing in the area.

—113A—

[fol. 1690] On the LAX-MEX segment, an average load factor of 55% for three weekly frequencies appears low. PAA estimated a revenue passenger load factor in the "Guatemala-Los Angeles Renewal Case" of 64.5% for the year beginning July 1, 1955, on its LAX-GUA route. (PAA estimated 30% on the LAX/SFO segment.) Pan American now operates four DC-6B frequencies per week between SFO/LAX and GUA. SFO/LAX-MEX has every evidence of being a stronger route, even with CMA and possibly other competition, than PAA's Guatemala City route. The table on page 111 indicates that 17,580 passengers traveled between South America and the West Coast of the United States in 1955. If Panagra's new service were to carry only half of these total available through passengers, without carrying any of the heavy local traffic, it would have a passenger load factor of 44.5% on its three weekly frequencies MEX-LAX. New traffic generated by the new service, local traffic, and a general increase in air travel, would account for at least another 10.5% of the ASMs.

On the MEX-TUM-LIM segment, an average load factor of 55% also appears on the low side. With one-plane direct service and three weekly round trips connecting MEX and LIM, Panagra would supply annually 59,408,000 available seat miles. If one-half of the 16,548 LIM-MEX potential passengers in 1955 shown in the table on page

—113B—

[fol. 1691] 111, and one-half of the 33,972 TUM-MEX potential passengers in 1955 traveled via Panagra, they would produce 37,956,000 revenue passenger miles per

year, or a 63.9% load factor between Lima and Mexico City. The one-half of total available annual traffic does not appear excessive when it is realized that 6,904 of the 8,274 LIM-MEX potential passengers and 7,408 of the 16,986 TUM-MEX potential passengers in 1955 actually traveled on Panagra planes for some part of their journey. Assuming these passengers would remain on Panagra planes between LIM and MEX, they would produce annual revenue passenger miles of 20,171,000. These assured passengers alone would thus produce an annual load factor of 34.0% on Panagra's proposed flights connecting LIM and MEX.

[fol. 1692] —114—

I. *South America-Orient Traffic Indications*

Although it has not been possible to date to develop any precise travel statistics between the Orient and South America, there is sound reason to believe that this is a developing market. There are already a substantial number of Orientials in Bolivia, Peru, Ecuador, Argentina and Brazil, and there is the prospect of an even larger immigration movement within the next several years from Japan to South America. With the resurgence of the Japanese economy, traffic between Japan, as well as other Far Eastern points, and South America is bound to increase. This appears already to be the case.

Japan Airline has operated a number of charter flights across the Pacific, through the California gateway, across the United States and the Caribbean to South America. With that airline's gain in stature it can be expected that it will attempt to implement routes to South America which it is now actively surveying.

A sizeable part of CPAL's traffic to Lima has been Oriental. Canadian Pacific, of course, connects its Vancouver-Mexico City-Lima-Buenos Aires service with its Great Circle route across the North Pacific to Japan.

Pan American operates a Los Angeles-Guatemala City-Balboa-Caracas-Rio de Janeiro service which ties in with its central Pacific route to Japan and the Orient. This all-

Pan American routing, of course, is substantially longer in time and mileage than that of Canadian Pacific or the proposed Panagra route.

—115—

[fol. 1693] These developing Orient-to-South America services would indicate an increasing volume of traffic and cause for diversion from Panagra unless Panagra offers a competitive service.

J. *Growing California*

California is one of the heavily industrialized and fastest expanding areas in the United States. The state's dramatic population increase in the post-war years is shown in the following table:

Year	Population (000)	% Increase Over 1940	National Average Increase
1940	6,907	—	—
1950	10,586	53%	15%
1956 (est)	13,433	95%	27%

Source: Current Population Reports, U. S. Bureau of Census.

The Los Angeles metropolitan area had a population of 4.4 million in 1950. The San Francisco metropolitan area had a population of 2.2 million in 1950.

Increases in population and other aspects of Mexico, as well as of the countries of South America, are detailed in the Annexes, and portend an ever increasing demand for the type of service proposed by Panagra.

K. *Comparative System Profit and Loss*

1. *Estimate of First Year's Earnings.*

The estimated 1957 profit and loss statement for the proposed Panagra system is presented on the following page:

Proposed Panagra System
Estimated Profit and Loss Statement
(After Extension to New York and San Francisco on an added cost basis)

Future Year

Projection to 1957	Present Panagra System (000)	Balboa-Miami Sector (000)	Miami-New York Sector (000)	Mexico Calif. Extension (000)	Proposed Panagra System (000)	Cents Per Available Ton Mile
Operating Revenue

DC-6B	1,864	833	802	901	4,400	
Total	4,534	1,666	1,593	1,565	9,358	

[fol. 1695] The estimated profit and loss statements on the preceding page are based on an investment in a fleet of six DC-7Bs and six DC-6Bs.

As a result of charging the Miami-New York sector with the increased depreciation for the two aircraft reacquired from National and because of the expected diversion from the Balboa-Miami sector due to operations of the SFO/LAX-MEX-TUM-LIM-BUE route, the estimated net operating income shown on the preceding page for the Balboa-Miami and Miami-New York sectors differs from the estimates for these sectors in Parts One and Two above. It should also be noted that the present Panagra system P & L on the preceding page eliminates return on investment from PAA under the Through Flight Agreement and eliminates $358,000 of expenses allocable to the interchange operation not reimbursed by National but which have been charged to the Miami-New York sector in this study. A detailed explanation of the revenue and expense estimates appears in Section L below.

2. *Estimated Return on Investment.*

Average stockholder equity in the present Panagra system in 1956 and for the proposed system in 1957 is summarized below:

	Net Worth			
	Present Panagra System 1/1/56 (000)	Present Panagra System 12/31/56 (Est.) (000)	Proposed Panagra System 1/1/57 (Est.) (000)	Proposed Panagra System 12/31/57 (Est.) (000)
Capital Stock	$ 7,500	$ 7,500	$ 7,500	$ 7,500
Surplus and Surplus Reserves	5,312	6,259	6,259	7,157
	$12,812	$13,759	$13,759	$14,657

	1956	1957
Average Net Worth	$13,286,000	$14,208,000

—118—

[fol. 1696] Net profit after interest charges and income taxes (at 38%) for the present Panagra system for 1956 is estimated at $971,000 or 7.3% on the average net worth during the period. Net profit after interest charges and income taxes (at 52%) in the first year of operation of the proposed Panagra system is estimated at $1,123,000 or 7.9% on the average net worth during the period.

The estimated average total capital employed by the present Panagra system in 1956 and by the proposed Panagra system in 1957 is computed below:

	Present Panagra System 1/1/56 (000)	Present Panagra System 12/31/56 (Est.) (000)	Proposed Panagra System 1/1/57 (Est.) (000)	Proposed Panagra System 12/31/57 (Est.) (000)
Net Worth	$12,812	$13,759	$13,759	$14,657
Long Term Debt	7,760	6,744	10,774	8,828
	$20,572	$20,503	$24,533	$23,485
		1956		1957
Average Capital Employed		$20,538,000		$24,009,000

Net profit *before* interest charges but after income taxes (at 38%) for the present Panagra system for 1956, is estimated at $1,052,000 or 5.1% of the average *capital employed* during the period. Net profit before interest charges but after income taxes (at 52%) in the first year of operation of the proposed Panagra system, is estimated at $1,300,000 or 5.4% of average capital employed during the period.

—119—

[fol. 1697] The return on investment for the expanded Panagra system in 1957 shows only a slight increase from the expected return on investment from the present system in 1956. This reflects a 37% increase in income taxes as a result of loss of Western Hemisphere Trade Corporation status, and an increase of $3.5 million in the investment base as a result of the initial borrowings required to finance the route expansions. However, as long term debt decreases and net profits increase as the route extensions are de-

veloped, the investment return should improve considerably.

3. *Comparison of Unit Costs.*

If the present Panagra system were to be extended as proposed in this study, the resulting unit expenses on an available ton mile basis would compare favorably with the average unit expenses of U.S. International air carriers for the most recent period available. The unit expenses of the expanded Panagra system would be substantially lower than those of the present system. This is demonstrated by the following table:

[fol. 1698]

—120—

	Present Panagra System Jan/June 1956	Proposed Panagra System 1957 (Est.)	Average All U.S. Int'l Air Carriers Jan/June 1956
	(Cents Per Available Ton Mile)		
Operating Expenses			
Flying Operations	12.17¢	10.11¢	11.31¢
Direct Maint.—Flt. Equip.	3.57	3.75	3.83
Deprec.—Flt. Equipment	4.51	4.17	2.74
Total Direct Operating Expense	20.25¢	18.03¢	17.88¢
Ground Operations	6.06¢	4.60¢	4.63¢
Ground & Indirect Maint.	3.94	3.34	2.46
Passenger Service	2.52	2.86	2.70
Traffic & Sales	5.50	4.99	4.74
Advg. & Publicity	2.90	2.75	1.71
Genl. & Administrative	4.77	2.88	3.11
Deprec.—Ground Equipment	0.39	0.33	0.33
Total Ground & Indirect Expense	26.08¢	21.75¢	19.68¢
Total Operating Expense	46.33¢	39.78¢	37.56¢

Reasons for the reduced unit expenses may be summarized as follows:

1. No Interchange cost penalties.
2. Extensive operations within the United States, resulting in lower average fuel costs.

3. Increased DC-6B and DC-7B operations, and therefore reduced impact of relatively high unit cost of local service operations in Ecuador and Bolivia with DC-3 and DC-4 equipment.

4. Longer nonstop flights, and hence fewer landings per route mile, with a resultant decrease in unit expenses, particularly for ground operations.

5. Fixed overhead costs spread over greatly expanded operations.

[fol. 1699] —121—

L. *Analysis of Revenues and Expenses*

Following is an explanation of the bases and assumptions used in estimating the revenues and expenses for operation of the proposed expanded system. Unless otherwise indicated below, the same figures were used for computing the Balboa-Miami and Miami-New York sector profit-and-loss estimates as set forth in detail in Parts One and Two above.

To estimate revenues, traffic projections were generally based upon 1955 traffic volumes. In deriving passenger revenues from the passenger traffic projections, either current fares or passenger revenue yields for the most recent period available (the twelve months ended June 30, 1956) were used. Cargo and mail revenue rates and yields were treated separately on a sector-by-sector basis depending upon information available.

No non-scheduled revenue or expense has been included in the estimated profit and loss statement for the proposed Panagra system as it is believed that the net income from such operations would be negligible in amount.

1. *Passenger Revenues*

Panagra System. Estimated 1957 Panagra system passenger revenues are based on a 7% annual increase over 1955 revenue passenger miles, adjusted for a certain amount of diversion to the proposed SFO/LAX-MEX-TUM-LIM-BUE route. Analysis of internal traffic records indicated that 5½% of the revenue passenger miles of the present

Panagra System might be diverted annually to the new California service. After making this adjustment, RPM's for the Panagra System in 1957 were estimated at 173,700,000. Revenues were based on Panagra's passenger yield for the year ended June 30, 1956, 8.82 cents per RPM.

—122—

[fol. 1700] *Balboa-Miami.* Analysis of internal traffic records for 1955 indicated that 5% of the Balboa-Miami through travelers might have been diverted from this sector had Panagra operated into Mexico City and Los Angeles during that year. The 29,878 through passengers over the through flight sector in 1955 were reduced by 5% and then increased by 10% in 1956 and 1957 resulting in an estimated 34,344 through and 16,113 local passengers in 1957. These totals were multiplied by the applicable one-way nonstop fares reduced by 15% to account for round-trip discounts, half-fares, etc.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. The proposed Panagra schedule would operate two round-trip tourist flights per week between Los Angeles and Lima with DC-6B equipment and one round-trip first-class flight per week between San Francisco and Buenos Aires with DC-7B equipment.

First-class passenger revenue on the DC-7B flights between LAX and BUE was estimated by reducing the published LAX-BUE first-class fare by 15% to account for round-trip discounts, half-fares, etc., and multiplying the reduced fare by an average annual 55% load factor on 58 seat aircraft, adjusted to account for the performance factor.

First-class passenger revenue on the DC-7B flights between San Francisco and Los Angeles was estimated by reducing the published SFO-LAX first-class fare by 15% and multiplying the reduced fare by an average annual 25% load factor on 58 seat aircraft, adjusted to account for the performance factor.

—122A—

[fol. 1701] Tourist class passenger revenue on the DC-6B flights between Los Angeles and Lima was estimated by

reducing the published LAX-LIM tourist fare by 15% and multiplying the reduced fare by an average annual 55% load factor on 70 seat aircraft, adjusted to account for the performance factor.

[fol. 1702] —123—

2. *U.S. Mail Revenues*

Panagra System. Panagra's 1955 U.S. Mail ton miles were increased by 4% per annum through 1957 to 553,902 and multiplied by Panagra's U. S. Mail per ton mile rate for the twelve months ended June 30, 1956, 56.9¢.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Panagra's tonnage of U.S. Mail per revenue plane mile flown for the twelve months ended June 30, 1956 was multiplied by the revenue plane miles scheduled for 1957 over the SFO/LAX-MEX-TUM-LIM-BUE route, and the resultant 171,072 ton miles multiplied by 55¢ per ton mile, the same yield as estimated for the Balboa-Miami sector.

3. *Foreign Mail Revenues*

Panagra System. The 1955 Panagra system foreign mail ton miles were increased through 1957 at a compounded annual rate of 13.18%, the average annual increase in foreign mail ton miles for Panagra from 1951 through 1955. Panagra's yield per ton mile for the twelve months ended June 30, 1956 was reduced by 25% in anticipation of a possible downward revision of rates.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Panagra's ton miles of foreign mail-per-scheduled revenue plane mile for the twelve months ended June 30, 1956 was multiplied by the revenue plane miles over the SFO/LAX-MEX-TUM-LIM-BUE route. The foreign mail revenue yield per ton mile for the present Panagra system for the twelve months ended June 30, 1956 was reduced by 25% to allow for an anticipated downward revision in rates, and multiplied by the estimated 125,683 foreign mail ton miles in 1957.

[fol. 1703] —124—

4. *Freight Revenues.*

Panagra System. The 1955 Panagra system freight ton miles were increased 10% per annum through 1957. The 3,187,320 estimated 1957 freight ton miles were then multiplied by Panagra's freight yield per ton mile for the twelve months ended June 30, 1956, 41.97¢.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Panagra's ton miles of freight per scheduled revenue plane mile for the twelve months ended June 30, 1956 were multiplied by the estimated 1957 revenue plane miles over the sector. The resulting 971,449 ton miles were multiplied by $.34, the same freight yield estimated for 1957 over the Balboa-Miami sector.

5. *Excess Baggage Revenues.*

Panagra System. Excess baggage revenue was estimated at 4.67% of estimated 1957 passenger revenues, the same relationship experienced by the present Panagra system for the twelve months ended June 30, 1956.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Since PAA-LAD is the only American carrier operating in this area, its 1955 experience of 4% of passenger revenue was used for this sector.

6. *Incidental Revenues.*

Panagra System. Incidental revenues for the present Panagra system in 1957 are estimated to include annual rental of $1,080,000 on four DC-6 aircraft and $475,000 from other sources. The estimated total annual incidental rev-

—125—

[fol. 1704] enue of $1,555,000 does not include either rental income from one DC-4 expected to be sold before the end of 1957 or return on investment under the Through Flight Agreement.

7. Flying Operations Expense

Panagra System. 1957 Panagra system flying operations expense was estimated by taking the highest of the first three quarters of 1956 and adding it to Panagra's actual flying operation expense for the first nine months of 1956. From the annual estimate was deducted $70,000, the annual available seat mile fuel cost difference between National and Panagra which is presently being absorbed by the Panagra System. Since this fuel cost for operating over the interchange sector is now reflected in the Miami-New York sector P & L Statement, the present Panagra system P & L estimate will no longer reflect this cost.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Panagra's 1955 basic cost of Flying Operations per flying hour for DC-7Bs and DC-6Bs, excluding rentals, fuel and hull insurance, was developed as in Part One:

	Basic Flying Operations Cost Per Flying Hour
DC-7B	$72
DC-6B	61

The fuel cost per flying hour for DC-7Bs and DC-6Bs was computed by multiplying the average consumption of fuel per flying hour by the average cost per gallon of fuel over the SFO/LAX-MEX-TUM-LIM-BUE route. The following typical fuel costs per gallon were used:

[fol. 1705] —126—

	DC-7B	DC-6B
San Francisco	19 cents	18 cents
Los Angeles	19 cents	18 cents
Mexico City	24 cents	22 cents
Balboa	23 cents	21 cents
South of Balboa	29 cents	28 cents

The per flying hour cost of fuel for each sector was then added to the basic per hour cost and the total multiplied by the estimated number of flying hours over the sector.

The annual cost of hull insurance for the California route was computed by multiplying Panagra's present rate for

hull insurance times the insurable value of one DC-7B and one DC-6B. The result was then added to the total developed above.

8. *Maintenance—Flight Equipment*

Panagra System. Maintenance of Flight Equipment expense for the Panagra System in 1957 was estimated by adding the highest of the first three quarters of 1956 to Panagra's actual Maintenance of Flight Equipment expense for the first nine months of 1956. From the annual estimate $78,000, the available seat mile cost difference resulting from the terms of the Interchange Agreement, was subtracted, since full maintenance of flight equipment expense for the Miami-New York sector has been included in the Miami-New York sector P & L estimate.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. The per flying hour cost of Maintenance of Flight Equipment based on Panagra's 1955 experience was estimated at $61 for DC-6Bs and $96 for DC-7Bs in Parts One and Two. These basic costs were multiplied by the estimated number of flying hours for each type of equipment over the route to California.

[fol: 1706] —127—

9. *Depreciation—Flight Equipment*

Panagra System. Depreciation of Flight Equipment expense for the Panagra system in 1957 was estimated by adding the highest of the first three quarters of 1956 to Panagra's actual Depreciation of Flight Equipment expense for the first nine months of 1956. From this estimate was deducted the annual allocable depreciation charge of $150,000 for the Miami-New York sector not reimbursed by National, because the Miami-New York sector estimated P&L reflects a full allocation of depreciation charges.

Miami-New York. In Part II above a full allocation of depreciation charges based on Panagra's fleet of DC-6Bs and DC-7Bs was developed for the Miami-New York sector. To this estimated $506,000 was added $51,000, the estimated annual increase in depreciation charges for the one DC-6B and one DC-7B reacquired from National upon

termination of the Interchange Agreement (after amortizing the net book capital gain from sale of the two aircraft to National against the increased depreciation of the two reacquired aircraft).

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. The annual depreciation charges were determined by taking the cost of the DC-7B, $2,100,000, and the cost of the DC-6B, estimated at $1,800,000 less 15% for residual value and $30,000 for built-in overhaul reserve for each plane. To this figure was added $450,000 for spare engines, props, etc. and $175,000 for three maintenance kits at the three cities not now served less 10% for residual value. The net depreciable value of the two aircraft plus spares was then depreciated over a seven year period. To this annual depreciation charge was added a spare parts obsolesence charge by PAA computed by multiplying the revenue plane miles for each plane over the sector by 0.66¢ and 3.4¢ per plane mile for the DC-6B and DC-7B respectively.

[fol. 1707] —128—

10. *Ground Operations*

Panagra System. Ground Operations expense for the Panagra system in 1957 was estimated by adding the highest of the first three quarters of 1956 to the actual Ground Operations expense of the Panagra system during the first nine months of 1956.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Ground Operations expense for the new route was estimated by multiplying the estimated annual number of take-offs at each point by the following amount per take-off.

San Francisco	$600
Los Angeles	377
Mexico City	466
Balboa	285
Lima	403
Buenos Aires	260

Analysis of the CAB Form 41 Schedules B-4 and B-5 of Pan American (LAD) for the year 1955 and the first

six months of 1956 reveal that LAD's Ground Operations cost at San Francisco per take-off averaged $392 in 1955 and $437 for the first six months of 1956. Since Panagra's total annual take-offs at San Francisco will be fewer than LAD's, a cost of $600 per take-off was estimated.

LAD had 190 take-offs at Los Angeles during 1955, the approximate annual number anticipated by Panagra (208). Therefore, LAD's average cost of $377 per take-off during 1955, was used to estimate Panagra's Ground Operations expense at Los Angeles. (For the first six months of 1956, LAD's average take-off charge declined to $359 with 241 take-offs.)

—129—

[fol. 1708] LAD's ground operations expense at Mexico City during 1955 averaged $233 per take-off and $266 per take-off during the first six months of 1956. Since LAD's annual take-offs at Mexico City equal 1000-1200 per year, compared with an expected 300 for Panagra's new route, LAD's 1955 average cost of $233 was doubled.

Ground Operations cost per take-off at Balboa, Lima, and Buenos Aires for the California service was obtained by taking Panagra's average cost per take-off at these three points during the first six months of 1956.

11. *Ground and Indirect Maintenance*

Panagra System. Estimated by adding the highest of the first three quarters of 1956 to Panagra's actual Ground and Indirect Maintenance expense for the first nine months of 1956.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires.

The per flying hour cost for Ground and Indirect Maintenance, estimated at $41 for DC-6Bs and $69 for DC-7Bs, as developed in Parts One and Two above, was multiplied by the estimated number of flying hours for each type of equipment over the route to LAX/SFO.

12. *Passenger Service Expense.*

Panagra System. Estimated at 8% of passenger revenue, based on Panagra's experience in 1954 and 1955. From

—130—

[fol. 1709] this estimated annual amount $60,000, the amount of passenger service expense incurred by Panagra over the interchange sector but not reimbursed by National, was subtracted because the Miami-New York P&L statement reflects a full allocation of passenger service expense for that sector.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Estimated at 8% of passenger revenues, Panagra's experience during 1954 and 1955.

13. *Traffic and Sales Expense.*

Panagra System. Estimated at 13% of total commercial revenues (passenger, freight and excess baggage) based on Panagra's experience in 1954 and 1955.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Estimated on same basis as Panagra system.

14. *Advertising and Publicity Expense.*

Panagra System. Estimated by adding the highest of the first three quarters of 1956 to Panagra's actual Advertising and Publicity expense for the first nine months of 1956.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Estimated at 7.5% of total commercial revenues for the sector, based on Panagra's experience in 1955.

15. *General and Administrative Expense.*

Panagra System. Estimated by adding the highest of the first three quarters in 1956 to Panagra's actual G&A expense for the first nine months of 1956.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Estimated by taking 12% of the estimated annual cost of salaries for this sector representing em-

—131—

[fol. 1710] ployee benefits and payroll taxes. To this was

added $100,000 to cover increased legal fees, franchise taxes, and additional overhead expenses for operation of this route.

16. *Depreciation of Ground Equipment.*

Panagra System. Estimated by adding the highest of the first three quarters in 1956 to Panagra's actual Depreciation of Ground Equipment expense for the first nine months of 1956.

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. It was assumed that ground equipment needed at San Francisco, Los Angeles, and Mexico City would approximate that estimated in detail for New York in Part Two above. The same $13,000 annual depreciation charge for ground equipment was therefore applied at each new station.

17. *Non-Operating Expense.*

Panagra System. Estimated by adding the highest of the first three quarters in 1956 to Panagra's actual Non-Operating expense for the first nine months of 1956.

Miami New York. Estimated at $145,000, representing the estimated interest on the additional debt incurred in replacing the National deposit and in reacquiring the one DC-6B and one DC-7B from National (See Section D-3 in Part II above).

San Francisco/Los Angeles-Mexico City to Lima and Buenos Aires. Consists of interest charges on additional borrowings required to put the new route into operation. No additional borrowing will be required for the DC-7B being delivered in July, 1956; the DC-6B will require an

—132—

[fol. 1711] estimated $1,800,000; 1½ months of cash operating expenses for working capital will require $460,000; and it is estimated that $500,000 of the $625,000 required for spare parts will have to be borrowed. Assuming a 4½% interest rate on total additional borrowings of $2,760,000 results in an estimated annual interest charge of $110,000.

[fol. 1712]

A-1

ANNEX A

GENERAL ECONOMIC GROWTH INDICATORS FOR LATIN AMERICA

Table I shows the estimated total population of the Central and South American countries for the years 1946, 1950 and 1954. The table shows that the population of Latin America has increased 21% between 1946 and 1954. Compared to this, the population of the United States has increased only 15% and that of Western Europe only 8%. As shown, a United Nations study estimates that by 1980 the 1954 population of Latin America will have increased 80% to a total of roughly 300 million people.

Table II shows the value of United States direct investments in Latin America for the years 1949 through 1954.

This table shows that six and one quarter billion dollars was invested in the Latin American republics in the year 1954, a 36% increase over 1949.

Table III shows the total foreign trade of selected Latin American countries for the years 1938, 1948 and 1954. For the last year reported the total was 16.8 billion dollars, five times higher than the pre-war level.

Table IV shows the foreign trade of selected Latin American countries with the United States for the years 1938, 1948 and 1954. This table shows that in 1938 28% of the total Latin American trade was with the United States. In 1948 44% was with the United States. In 1954 the United States percentage had slipped to 41%, indicating increased competition from Europe for Latin American trade and the need for the United States to meet this renewed competition.

[fol. 1716] A-2

Table V presents industrial production indices for selected Latin American countries. Using 1948 as the base period. Latin American production had increased 38% by 1954, compared to a 20% increase for the U.S. in the same period.

Table VI shows the gross national product in selected Latin American countries, both total and per capita, for the years 1946, 1950 and 1954. Total gross national product for all of Latin America for 1954 shows an increase of 41% over 1946, compared with a 28% increase for the U.S. in the same period.

Parenthetically, on almost every basis of comparison, Brazil, which Panagra does not serve, has shown the greatest advances.

ANNEX B

UNITED STATES—LATIN AMERICA AIR TRAVEL

Table I is a summary of passenger travel by air between the United States and Central and South America for the years 1949, 1950 and 1954, 1955. This table shows that United States-Latin American air travelers have increased 91% between 1949 and 1955.

Table II is a summary of passenger travel by *sea and air* for the same years between the United States and Latin America. When read in conjunction with Table I, this Table reveals that the number of travelers by sea between the U. S. and Latin America actually decreased between 1949 and 1955.

Table III shows air travel as a percentage of sea and air travel between the United States and South America, Europe and Asia, for the years 1949, 1950 and 1954, 1955. This table shows that in 1955, 82% of total U.S.-South America passengers traveled by air, whereas only 46% of U.S.-Europe travel was by air and only 47% of U.S.-Asia passengers traveled by air. Air transportation thus plays an overwhelmingly predominant role in the total travel between the United States and South America.

ANNEX C

PANAGRA'S RECORD AS AN AIRLINE

1. Pioneering History
2. International Reputation
3. Growth of Service
4. Identity of the Company

1. *Pioneering History*

Today Panagra with a fleet of DC-7B and DC-6B four-engine aircraft provides twice daily service between New York City and Buenos Aires. This is a distance, including through flight and interchange sectors, of 6,000 miles. The flight takes under one day. The planes carry approximately sixty passengers each at speeds in excess of 300 miles per hour. For the past thirteen years Panagra has operated its routes without a single fatal accident.

Less than a generation ago, in 1929, Panagra had inaugurated the first regular air service over the length of South America. The north-south route was then largely uncharted and relatively dangerous. Tri-motored Ford planes flew over it on a weekly airmail service 4,370 miles long, linking six countries. The flight took more than a week. No other U.S. airline was operating over such great distances at that time. American aviation had barely begun to stretch its wings as it explored a few short routes between Central America and the Caribbean area, and even in the United States the longest route in operation at that time was between Chicago and San Francisco, a distance of 1,943 miles.

C-2

[fol. 1728] Panagra had achieved this continent-spanning operation within the space of one year. Its operations began on September 13, 1928 with a single-engine Fairchild monoplane. The first flight carried four passengers and some mail for 600 miles, taking off from a racetrack in Lima and landing on a soccer field in Talara, Peru.

From origins such as these the present daily, long-ranging, scheduled four-engine service of Panagra grew. There has been a vast and steady improvement in all aspects of the service. Nevertheless, after that first year of phenomenal growth from 600 to 4,370 route miles, Panagra's basic routes have remained virtually the same to this day.

The development and operation of air services over the years by Panagra constituted pioneering in a very real sense. In developing its route Panagra had to overcome many obstacles. Initial operating rights, airmail contracts and other arrangements with various countries had to be negotiated. In addition, the basic ground facilities required for airline operation had to be installed by Panagra itself. At Panagra's expense and effort, new airports had to be built in regions where none existed. The new airports had to be successively improved to meet the changing requirements of the aircraft to be used. Existing airports were enlarged and modernized. Overhaul and maintenance facilities were established and expanded.

Because no weather bureaus existed on its routes, to supply reports or forecasts, Panagra established its own meteorological services. Forecast offices staffed by professional meteorologists were placed at key locations. This

C-3

[fol. 1729] was the only complete meteorological reporting and forecasting organization on the South American continent.

A complete aeronautical and communications network was built up and navigational aids were installed to permit night operation. New and modern radio transmitting and receiving units were installed for ground-to-aircraft communications and point-to-point contact between airports in the various countries. Radio beacon facilities for aircraft direction finding were supplied when required.

In 1944 the Company controlled, owned and operated some 75 radio stations in the countries that it served. Panagra owned and operated this vast communications network in its entirety until the late 1940s when governmental agencies of Peru, Colombia and Argentina took

over the Panagra facilities in their countries. Panagra still maintains and operates radio services in the other countries on its route south of Panama.

The sector linking Santiago with Buenos Aires is only 705 miles, but it is also one that involves a flight over some of the most rugged terrain in the world, the towering Andes. In 1928, before there was any air service, the trip between Santiago and Buenos Aires took two days by single track railroad over the Andes. Frequent snowstorms and landslides made regular train service impossible. The sea voyage around the Horn or through the Straits of Magellan took 12 to 15 days. Panagra's operations personnel surveyed this trans-Andean route both from the ground and from the air. In early 1929, mail service was started with single-engined Fairchilds. At C-4
[fol. 1730] that time there were no radio and no weather reports. The pilot would go up to 14,000 feet above Santiago, take a look at the pass and if the weather was clear he would go through.

By late 1929, regular passenger service across the Andes was inaugurated with tri-motored Ford planes. Panagra had thus accomplished a pioneering job second to none in less than a year after its inception. It had linked the Americas from the United States to Buenos Aires with a direct, regular, scheduled passenger, mail and cargo air service.

Panagra pioneered in a specialized area of national defense as well as in commercial aviation. Just before Pearl Harbor, when war with the Axis was imminent, Panagra, with the assistance of the respective South American governments and at the request of the U. S. State Department, first paralleled and then replaced the local service of German controlled airlines in Ecuador, Peru and Bolivia.

In 1942 when the was accelerated the movement of heavy freight by air, Panagra used two of its planes as veritable "flying boxcars" and inaugurated an all-cargo service from the Canal Zone to Lima. This was the first operation of all-cargo aircraft by a United States airline on certificated routes.

In 1953, in consultation with the manufacturer, Panagra decided to buy radar equipment for its aircraft. By spring of the following year, Panagra operated in regular service a plane equipped with experimental Bendix X-band radar. This was the first commercial radar set to be used in scheduled air transportation and Panagra subsequently became the first U. S. airline to order commercial radar for installation on a fleet basis.

[fol. 1731] C-5

2. *International Reputation*

The South Americans on Panagra's route regard the line as a beneficial part of their national picture. In times of disaster Panagra has always flown to their aid and it is an agent of goodwill among their countries. When a power plant in Ecuador broke down, for example, leaving the city without electricity, Panagra flew in 3,000 pounds of generator parts and the plant was in operation within two days.

Time and again, Panagra planes have been sent on missions of mercy. Sometimes it flew only a vial of life-saving medicine to a town where a man lay dying; sometimes an iron lung to a polio victim; sometimes a shipment of drugs to arrest the spread of an epidemic. One time a Panagra pilot and plane flew in rifles and ammunition to an oil company camp in the interior of Ecuador that had been attacked and besieged by Indians.

There have been other times of national emergency when Panagra actually placed its entire team at the disposal of a stricken nation. This was the case in 1939, when an earthquake literally shook cities to pieces in Chile. Panagra pilots were decorated by the Chilean government for their service. In these emergencies, Panagra airlifts brought tons of medical supplies and food to the stricken places, and flew out the injured and the sick. Victims in the earthquake-susceptible West Coast area were aided by Panagra again in 1942 (Ecuador), 1947 (Peru) and 1949 (Ecuador).

These humanitarian services have stamped the name of Panagra indelibly on the national consciousness of these countries.

C-6

[fol. 1732] In the countries served by Panagra in South America, the company enjoys a position of public trust and acceptance in a degree not normally achieved by airlines elsewhere. During the 1930s the name "Panagra" became almost synonymous with South American commercial aviation itself. In the Aymara Indian language of the Bolivian and Peruvian highlands, the word "Panagra" become part of the language as a word for "airplane". Theatres referred to their balconies as "Panagras". From Argentina to Panama a whole new generation of South American nationals learned modern skills (aircraft and engine mechanics, weather observers, radio operators, etc.) under Panagra's direction. These people continue to form not only the nucleus of Panagra's operation in South America but with the transfer of certain of Panagra's maintenance activities to Miami and with the gradual change from short-haul to long-range operations, many of the employees and the laborers first trained by Panagra are now in key positions in other airline and related industries throughout the continent.

It is not surprising that in an area where air travel itself became so closely identified with an individual company the public has a more direct relationship and a greater familiarity with that company than is customary elsewhere—not only with the company as such, but with its officials and personnel throughout South America.

As a consequence, Panagra enjoys a prestige in the countries it serves oftentimes exceeding that of the national carriers. This is evidenced by the fact that chiefs of state of many of these countries select Panagra as the

C-7

[fol. 1733] carrier to provide them with transportation on tours outside their own countries. In 1951 the president of Chile was carried via Panagra to and throughout the United States on a goodwill tour. In 1953 a Panagra plane, one of the famous El Interamericanos, carried the president of Peru on an epoch-making flight from Lima to Rio de Janeiro and return. In 1955 Panagra carried the president of Bolivia on a state visit to Peru, Ecuador and Colombia. On many other occasions Panagra's regular scheduled flights have carried the chief executives and

other top governmental officials of the Latin American nations.

In October, 1953, in commemorating its 25th Anniversary, Panagra invited thirty-five teenage "junior ambassadors" from the countries on its route to tour the United States in their own Panagra DC-6. The youths were picked personally by the presidents of their respective countries. They were welcomed here from coast to coast. The U.S. State Department enthusiastically supported Panagra's efforts toward international goodwill and a cementing of Pan American sympathies.

Panagra's reputation is not based solely upon special activities. The Latin Americans and the North Americans who travel on the West Coast have developed confidence in the punctuality, safety and standard of Panagra's regular service. These standards of service were developed from Latin American customs independently of competitive considerations and are looked upon by South Americans as services directed especially at them. It is fair to say C-8
[fol. 1734] that Panagra has gained a greater acceptance and favor among foreign sovereign nations than any other U. S. air carrier operating in international service.

Panagra's record of international good will deserves recognition in the tangible form of route expansion. This reputation, valuable both to Panagra and to the United States, should not be permitted to wither away because Panagra is prevented from meeting the enlarged demands of the area it now serves so well.

3. *Growth of Service*

Panagra's record as an airline can be demonstrated in no more effective way than by indicating the amount of traffic it has generated within its existing route structure. In the year 1955, the airline carried 136,000 fare-paying passengers a total of more than 160 million passenger miles. In 1930, its first full year of operation, Panagra carried but 3,000 passengers less than 1 million passenger miles.

As pointed out in the preceding section, its basic route structure and length of operations have not changed to any substantial degree since that first full year of operation. Thus Panagra's growth is attributable solely to its vigorous development of traffic within its existing route framework. Nevertheless, Panagra's present route is inherently a lean one when compared to L.A.D., or more strikingly, to the North Atlantic or major domestic operations. (See Annex B, Tables I and III, and Annex J, Table II.)

C-9

[fol. 1735] Panagra now needs and deserves to expand beyond its route framework. To a large extent, the new traffic obtained in later years has been passengers whose trips started or ended on another carrier's routes beyond the area of Panagra's present operations. This is evidenced in part by the fact that in 1947 only 24 percent of Panagra's total traffic was inter-line, whereas in 1955, 39 percent was inter-line.

This increase in inter-line traffic and concomitant decrease in intra-line traffic is attributable to three factors: First, the development, and acquisition by Panagra, of modern long-range aircraft capable of efficiently and economically serving long-haul traffic. Second, the loss of cabotage rights in certain countries has forced Panagra to withdraw from local service type operations in favor of national carriers. This occurred in Argentina in 1947 and in Peru in 1949. Third, as a United States certificated carrier Panagra believed its primary obligation to be service to United States-South America passengers rather than to intra-South America passengers and has concentrated on development of this long-haul traffic. This indeed is a requirement under the various bilateral air agreements to which the United States has become a party and under which Panagra operates. In line with this Panagra has abandoned or suspended many of its short routes to remote, less populated areas in South America which could no longer be justified upon strictly traffic and financial considerations.

A further evidence of the change in the type of passenger Panagra is carrying is the increase in the average pas-

C-10

[fol. 1736] senger trip length. In 1938 the average passenger trip length was 600 miles, in 1946 it was 857 miles and in 1955 it was 1,178 miles. 1955 is 38 percent over 1946 and 97 percent over 1938.

Table I at the end of this Annex shows the growth of Panagra's passenger traffic and revenues over the years. 1955 represented an increase in passenger miles operated of 80% over 1946, the first full post-war year. In 1955 the number of passengers carried was 31% over 1946.

Table II shows the historical growth of Panagra's revenue ton miles and available ton miles.

Table III compares Panagra's intra-line and inter-line traffic for the post-war years.

Table IV shows the average trip length of Panagra's passengers since the inception of the airline.

4. *Identity of the Company*

In summary, Panagra has pioneered and established a most difficult route at great expense and effort. It has created an appeal to passengers, and has operated, and with impressive schedule regularity, safely under often difficult circumstances. (It is worthy of note that every day of the year, Panagra's aircraft operating between New York and Buenos Aires fly through a complete change of seasonal weather fronts.) The drive and motivation that spurred this accomplishment on the part of the people actually working in the airline was the prospect of growth. The consolidation of service over Panagra's routes is now, for practical purposes, completed, and the Panagra organization is with legitimate right, looking toward the expansion of the airline into new markets. The gradual evolution of Panagra from short haul to long range operation has already established a strong connection with markets outside its present route structure.

C-11

[fol. 1737] The excellent reputation achieved by Panagra in South America has provided a real basis for an extraordinary degree of pride on the part of Panagra's 1,400 employees, 82% of whom are based in South America.

There is a feeling throughout the organization of responsibility toward the various countries Panagra serves and to the traveling public. Many of these people have been with Panagra since its earliest days and they are determined to maintain the position of leadership Panagra has so long and deservedly enjoyed. A continued ban on the logical expansion of Panagra could only have harmful effects on the morale of pilots and other company employees, particularly when they see other carriers expanding their routes and service in step with the growing industry.

[fol. 1738]

ANNEX D

PANAGRA'S EQUIPMENT HISTORY

Panagra's equipment program has been consistently abreast, and oftentimes ahead, of the rest of the United States airline industry. Since 1929 Panagra service has evolved through every state of the commercial aircraft art.

Panagra has the unique record of having acquired and operated every commercial plane produced in quantity by the Douglas Aircraft Company. It placed DC-2s in operation in 1934, the first year of their appearance. It acquired DC-3s in 1937, within a year after that airplane was first manufactured. It operated DC-4s during the transitional period immediately following the war and in 1947 placed in operation the 11th, 19th and 23rd DC-6 aircraft to be delivered to the airlines. In 1951 Panagra acquired DC-6Bs and in 1955 DC-7Bs, being the first international carrier to order DC-7 type equipment. Finally, in early 1960 Panagra will begin operating the Douglas Company's newest plane, the DC-8 jet.

Prior to the operation of Douglas aircraft, Panagra experimented with a number of different types of planes. These planes were at the time Panagra placed them in service the newest developments in common carrier transportation. Panagra began its operations with the now historic Fairchild monoplane, carrying four passengers. The plane that actually performed Panagra's first sched-

D-2

[fol. 1743] uled service has been turned over to the Smithsonian Institution.

Panagra's first fleet plane was the larger 420 hp, 110 mph Fairchild which was operated from Talara, Peru, south to Santiago, Chile, during 1929. During the 1930-1935 period Panagra operated the famous Ford trimotor planes. These planes carried twelve passengers and permitted Panagra to offer the first scheduled service over the Andes from Santiago to Buenos Aires. A total of nine of these planes was purchased by Panagra and they became a

familiar sight over the West Coast countries. During this same developmental period of airline operation, Panagra operated Sikorsky amphibian planes on its Northern Division from Peru to the Canal Zone. Panagra acquired twelve of these amphibians in all. Meanwhile, during the early 1930s Panagra experimented with various other types of aircraft, including the Loening amphibian, the Lockhead Vega, the Curtiss Falcon and Travelair, and the Consolidated Commodore.

With the acquisition of the Douglas Aircraft Company's revolutionary DC-2, Panagra was able to schedule regular operation of the "Diagonal" route across Bolivia from Lima to Buenos Aires. It was in this same year that American Airlines began operating the DC-2 in the continental United States, and the world had its first glimpse of modern air transportation as it has become known today. Panagra was in on the ground floor.

—D-3—

[fol. 1744] During the later 1930s and over the war years, the backbone of Panagra's fleet was the DC-3. These planes carried twenty-one passengers at a speed of 180 miles per hour over a range of 1,100 miles. Four DC-3A planes, a modernized higher powered model, are still in operation on Panagra's routes.

In September 1944 Panagra contracted with Douglas for three pressurized DC-6 aircraft to be delivered after the termination of hostilities. In recognition of Panagra's participation in the pre-war DC-4 development contract, Panagra was allotted favored early delivery positions on the 52 passenger DC-6s. In all, six of these aircraft were acquired and put into service from Buenos Aires through Balboa and, under the Through Flight Agreement with Pan American World Airways, to Miami. As the DC-6s were put into first class service, the DC-4s operated by Panagra were switched over to tourist class.

During the first half of 1952 Panagra took delivery of DC-6B aircraft which replaced the DC-4s in long haul tourist service. Panagra now has in operation five 70 passenger

DC-6B aircraft, four of which are owned and one of which is chartered from another airlines. In September 1955, under an interchange agreement with National Airlines, the DC-6Bs started operating into New York.

In 1953 Panagra learned from the Douglas Aircraft Company and the Wright Aeronautical Division of pro-

—D-4—

[fol. 1745] posed engineering changes in the DC-7 plane and the availability of the more powerful Wright Cyclone engine, model DA4. Prior to this time the DC-7 aircraft being operated on domestic transcontinental routes did not meet Panagra's international performance requirements. Panagra therefore entered into negotiations with the Douglas Company and in September 1953 sent a telegram ordering five modified DC-7 aircraft, thus becoming the first international carrier to order this equipment. These aircraft, with the modifications insisted upon by Panagra, later became known as the DC-7B. Five DC-7Bs were delivered to Panagra and placed in first class service between the United States and Buenos Aires during 1955. They replaced the DC-6s, two of which have been sold and the remaining four chartered to another airline. A sixth DC-7B will be delivered to Panagra in July 1957.

In December 1955 Panagra took the long step into the age of jet transportation. Its board of directors authorized the acquisition by Panagra of four Douglas DC-8 jet transports, with an option of two additional DC-8s. These planes will be specially designed for long haul international operation and will be powered by the large J-75 Pratt and Whitney turbine engines. The first of these aircraft will be placed in service in early 1960.

[fol. 1746] —E-1—

ANNEX E

Certification of Braniff International Airways in Latin America

In the Latin American Air Service Case, 6 C.A.B. 857 (1946), Braniff Airways was awarded extensive routes in South America directly competitive with those of Panagra. Braniff began operations on these routes in June of 1948. In the past year, 1955, Braniff operated an average of 6,898 international route miles, compared with 5,447 operated by Panagra.

Braniff's certificated routes connect nine capitals of the Latin American republics. In addition to obtaining rights to serve all but one (Santiago) of the six national capitals now served by Panagra, Braniff was granted rights into Rio de Janeiro, Asuncion, Bogota and Havana.

Table I shows the population of cities served by Braniff International and Panagra. Braniff is shown to serve 37% more population than Panagra.

Table II compares Panagra revenues with Braniff revenues since the first year of Braniff's international operations. Between June 1948 and year-end 1955, Braniff's international operations received 37 million dollars in passenger and cargo revenues, a considerable part of which otherwise would have accrued to Panagra. During 1955 Braniff generated revenues equal to 40% of Panagra's total revenues.

[fol. 1747] —E-2—

Despite this substantial diversion by a competitor introduced into Panagra's historical markets, Panagra has not been placed in a position to compete for additional traffic in new markets. It seems equitable that if a competitor is placed in Panagra's home territory, Panagra in turn be permitted to expand its route mileage into new areas so as to strengthen competition everywhere.

Braniff's extensive domestic system provides a strong base for its international route structure. Panagra, without the support of the rich domestic air traffic market, is

placed at a severe disadvantage both inherently and competitively. This will be especially true in the event that subsidy for international airlines is withdrawn.

Table III is an indication of the relative earning power of Panagra and the Braniff System including its domestic operation. In the year 1955 Braniff's net operating profit before subsidy amounted to 5.8% of its invested capital, in air transportation, even after absorbing substantial losses on its international operation. Panagra, on the other hand, showed a net operating profit of only 3.7%.

Table IV shows the increase in Braniff System's weighted average route miles operated. Including Braniff's international routes acquired in 1948, the routes of Mid-Continent Airlines acquired in 1952, and the new domestic routes acquired in 1955, Braniff route mileage is shown to have expanded an estimated 335% since 1946.

This increase in route mileage has generated new traffic and revenue for Braniff at a pace far exceeding that possible for Panagra within its unchanged route structure.

—E-3—

[fol. 1748] Table V compares the revenue passenger miles operated by Panagra with those operated by the Braniff system in the years 1949 through 1955. Whereas in 1949 Panagra's passenger traffic amounted to 46% of Braniff's system, by 1955 this percentage decreased to 24%

Table VI compares the revenue ton miles carried by Panagra and Braniff System. In 1949 Panagra is shown to have carried traffic amounting to 56% of the Braniff system. By 1955 Panagra's percentage had decreased to 28%.

Table VII compares the operating revenues exclusive of mail pay for Braniff System and Panagra. Panagra's commercia' revenues are shown to have amounted to 90% of Braniff System commercial revenues in 1949 but only 39% in 1955.

ANNEX F

ROUTE EXPANSION IN LATIN AMERICA OF PAN AMERICAN WORLD AIRWAYS AND PAN AMERICAN'S FOREIGN AIR CARRIER AFFILIATES

Table I compares the 10% increase in weighted average route miles operated by Pan American's Latin American Division with the 11% decrease for Panagra between 1946 and 1955. (Comparison of the traffic characteristics of Panagra's and LAD's routes is shown in Annex J, Table II.)

Table II shows the 160% average increase in unduplicated route miles for Pan American's various foreign affiliate air carriers in Latin America between the year 1946 and the year 1955. As shown, Pan American has 11 such affiliates. This table indicates that, although Panagra has been prevented from expanding its route mileage, Pan American's foreign affiliate carriers have been able to extend their routes and gain entry into new markets. The table also shows the changes in Pan American's stock ownership during this period of its affiliates' route expansion. Pan American's stock interest in most cases decreased. For example, Avianca, in which Pan American's stock interest decreased from 48% in 1946 to 38% in 1955, added 24,142 unduplicated route miles during that period. Panair do Brasil, in which Pan American's stock interest decreased from 58% to 48%, added 11,617 unduplicated route miles. In contrast, the route mileage operated by Panagra, in which Pan American's stock interest remained constant at 50%, decreased by 644 miles.

—F-2—

[fol. 1757] Table III shows *eight* route sectors on which Pan American's Latin American Division has direct competition with Pan American's foreign affiliate air carriers. Point-to-point competition exists on such major sectors as Buenos Aires—Rio de Janeiro and Caracas—Miami. A total of 7,050 route miles exists on which LAD is in direct competition with foreign affiliates of its parent.

[fol. 1758]

ANNEX F
TABLE I

COMPARISON OF PAN AMERICAN AND PANAGRA

Weighted Average Route Miles Operated—1955 vs. 1946

	12 Months Ended Dec. 31, 1946	12 Months Ended Dec. 31, 1955	Percentage Increase/ (Decrease) 1955 vs. 1946
Pan American System	34,466	63,155[1]	83.2%
Pan American LAD	13,690	15,009	9.6%
Panagra	6,097	5,453	(10.6)%

[1] Includes American Overseas Airlines. AOA represented a 16% addition to the Pan American system route miles operated in 1946.

[fol. 1761]

ANNEX G

PANAGRA'S FOREIGN AIR COMPETITION

Table I shows the percentage of air travelers to and from the United States traveling via American flag and foreign carriers. This table shows that in 1953, 35% of United States-South America air travelers were carried by foreign flag airlines. Foreign air carrier operations are thus shown to be a substantial factor in considering the competitive situation in U. S.-South American air traffic.

Map II shows the present and proposed routes of the 28 foreign flag airlines competing with Panagra. (Three of these competitors are affiliates of Pan American World Airways.) The test of competition with Panagra is whether the operated, or proposed, routes divert, or would divert, revenues from Panagra's present services.

As shown on the map, the LAN operation Montevideo-Buenos Aires-Santiago-Lima in conjunction with the TAN operation Lima-Miami offer considerable direct competition to Panagra. Aereolinas Argentinas competes Santiago-Buenos Aires and for the Buenos Aires-New York market by means of its east coast route. Canadian Pacific diverts considerable traffic from Panagra by its Lima-Mexico City-Vancouver-Orient service, and has announced immediate plans for entering Buenos Aires from Lima. KLM offers strong competition from Lima through Guayaquil to Balboa with its service that extends on to Curacao, New York

—G-2—

[fol. 1762] and Europe. Avianca competes with Panagra between Quito and Cali, carrying passengers on to Bogota and New York. LAV has a strong operation between Lima, Balboa and Caracas.

All but one of these seven carriers operate modern four-engine equipment in direct competition with Panagra. The seventh, TAN, is a non-IATA carrier and has a serious competitive impact upon Panagra by reason of its cut rates.

ANNEX G
TABLE I

PERCENTAGE OF AIR TRAVELERS TO AND FROM THE U. S. TRAVELING VIA U.S. AND FOREIGN CARRIERS

Area of Embarkation or Debarkation	Year Ended June 30th

[fol. 1765] —II-1—

ANNEX H

ROUTE EXPANSION OF U.S. CERTIFICATED AIR CARRIER INDUSTRY

Table 1 compares the 11% decrease, between 1946 and 1955, in Panagra's weighted average route miles operated with the 112% increase in route mileage of all U.S. international carriers, the 14% increase for all domestic trunk carriers and the 89% increase for the certificated industry total.

It is apparent that Panagra has lagged far behind the industry, and especially behind other U.S. international carriers.

Table II shows the estimated growth in weighted average route miles operated for certain medium sized U.S. domestic carriers as a result of recent route awards by the C.A.B. These increases are not reflected in Table I. The additional increase in route mileage ranges from an estimated 13% for Capital to 92% for Northeast. It should be noted that of these carriers only Continental and Northeast are smaller than Panagra in terms of either traffic or revenues:

	Scheduled Operations for Year Ended December 31, 1955	
	Revenue Passenger Miles	Gross Operating Revenues
Delta (domestic)	952,601,000	$57,647,000
Capital	792,095,000	50,211,000
Braniff (domestic)	604,674,000	39,300,000
Continental	221,223,000	16,022,000
Panagra	160,681,000	17,772,000
Northeast	116,450,000	10,098,000

ESTIMATED EFFECT OF RECENT C.A.B. DECISIONS ON ROUTE MILEAGES OF CERTAIN MEDIUM SIZED U. S. DOMESTIC CARRIERS

ANNEX J

PANAGRA'S ROUTE CHARACTERISTICS

Table I compares Panagra's recent ground and indirect expense ratios with those of Braniff International, Pan American L.A.D., and the average for all U.S. flag international air carriers. The table shows that Panagra's ratios in operating its route are higher than those of the rest of the industry.

Table II compares the traffic characteristics of the routes of Panagra, L.A.D. and Braniff. These comparisons indicate that Panagra has a long, relatively lean route with a high number of stations on it.

In Table I, Panagra's ground and indirect unit expenses are shown to be higher than those of Braniff, although Braniff operates a comparable routing. As shown in Table II, this is in part a result of the larger number of passenger stations maintained by Panagra on its route—23 compared to 11 maintained by Braniff. Panagra thus has only 237 route miles per station, compared to 627 route miles per station for Braniff. The same long haul factor is also reflected in Braniff's longer average passenger trip length, 2,163 miles for the year ended September 30, 1955 compared to 1,178 miles for Panagra. Another factor is that Braniff is able to allocate administrative and other overhead expenses between both the international and domestic operations, thus reducing the impact of such costs on its international division.

Compared to Panagra, L.A.D.'s routes have a substan- —J-2—

[fol. 1768] tially higher traffic density. This is shown in terms of revenue ton miles per route mile per day, revenue passengers per route mile, and revenue passenger miles per route mile per day (172 for L.A.D. compared to 81 for Panagra in the year ended 1955).

Even if the Braniff traffic were added to Panagra, the traffic density of the West Coast routing is still markedly below the density of L.A.D.'s East Coast and Caribbean routes (111 revenue passenger miles per route mile per day for the West Coast carriers, compared to the 172 for L.A.D.).

APPLICATIONS PENDING BEFORE THE CIVIL AERONAUTICS BOARD FOR ROUTES TO LATIN AMERICA

Docket No.	
2909	(N.Y.—Mexico City Nonstop Service Case)—Eastern, American and Pan American applications for exclusive authority to operate nonstop between New York and Mexico City. The proposed service would be competitive with the existing operation of Air France. Hearings were completed in November of 1954. Examiner's report has not yet been issued.
2622	(Brazilian Cut Off Route Case)—Braniff application for authority to operate Bogota-Manaos-Goiania-Rio de Janeiro/Sao Paulo. Hearing has not yet been called.
4724–4823	Delta application for Caracas-Manaos-Goiania-Asuncion-Buenos Aires and Pan American application for nonstop Caracas-Asuncion (and presumably on to Buenos Aires). Hearing has not yet been called.
5032	National application to operate Miami-Jamaica-Balboa. Hearing has not yet been called.
6746	American application for nonstop authority between Los Angeles and Mexico City. Western had previously been awarded this route, but Mexico refused to grant operating rights and the President of the U.S. subsequently withdrew his approval of the Western certificate. The legality of this withdrawal is open to question and is an indirect issue in Docket 2902. Hearing has not yet been called.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 1

BRANIFF
Airways

[Handwritten notation—Return to Friendly]

LOVE FIELD
DALLAS 5, TEXAS

[Stamp—Received—Oct 14 1946—Pan American Airways, Inc.—Vice President—Latin American Div.]

October 11, 1946

Mr. Wilbur L. Morrison
Vice President—Latin American Div.
Pan American Airways System
Miami, Florida

Dear Mr. Morrison:

This Company has just completed a survey flight over its new route from the United States to Panama and South America, including stops at various capitols of countries on the West Coast and then crossing over to Rio de Janeiro and Buenos Aires on the East Coast.

The personnel of Pan American Airways System gave us excellent service on our entire trip. In fact, airplane, crew, and employees could not have received any better attention had we been traveling over our own system. We want to take this opportunity to thank you, and through you all of the employees involved, for their efforts in making this flight a complete success. We experienced no weather or mechanical delays, and our only deviation from the schedule set up prior to leaving Dallas was caused by our own inability to complete our work in one or two of the cities visited. You have a very fine organization of Operations people, and they are all splendid fellows.

In this connection, I believe there has been some misunderstanding regarding our negotiations with the Canal Zone Air Terminal. On our arrival there the 2nd of September, we were informed by the Chief of the Aeronautics

Section of the Canal Zone that when the terminal building and hangar were built for the use of commercial airlines, certain space was reserved for the second United States airline certificated into Panama. As this second certificated airline happens to be our Company, we were informed that certain terminal building and hangar shop space then being used by other companies was actually being used on a 30 day cancellation basis, so it would be available for the second United States airline when required.

We informed the Airport Manager that the date on which we would need any space was indefinite, as it depended upon the completion of sufficient proving runs necessary to secure C.A.A. operations certificate covering the proposed route, which runs cannot be made until negotiations with various South American countries for operating permits have been successfully completed. I therefore suggested to the Airport Manager that we present our application for the space required, and that the present occupants of the quarters which were to be assigned to us be notified that sometime within the next several months our Company would require some of the space for which application was made. I also informed him that we would be very happy to continue the 30 day cancellation notice, so the present

PAA-5860

3185 5/6/55

JPL

[fol. 1778] occupants would have ample time to make other arrangements. This was done because we do not want to cause any more disturbance or reorganization in other companies than is absolutely necessary and still give us the minimum of space which will be needed to conduct our operations. Furthermore, it was necessary for us to apply for considerably more space than will be actually needed for our initial operation, because we do not know what expansion may take place within a few months' time.

On my return through Panama a few days ago, I learned that Canal Zone authorities had issued vacating notices, to be effective as of November 1, to the present occupants of quarters for which we made application. While this may be the only way the matter could be handled legally, it

certainly was not our intention for any eviction notices to be issued. We intended for the present occupants to be notified that the quarters had been leased to this Company, but that they could continue occupancy on the present basis until such time was we would need the space leased to us. We informed both your people and Taca's that occupancy could be continued, as at present, until such time as we would have to have certain space. Furthermore, we stated that we did not intend to take possession of all the space leased to us at the same time, but would defer giving the 30 day notice on each of the several offices just as long as possible.

If it will be of any advantage to you to continue the use of any of this space which you are now occupying for the number of months that will elapse before we have need for the space, you are at perfect liberty to do so. We want you to know that you can have considerable length of time after November 1 in order to complete your reorganization plans, if you so desire. I believe the Airport Manager informed me that he understood from your personnel that January 1 would be a far more desirable date for them, and I feel quite sure we will not need more than one office prior to that date.

Will you please let me know your desires regarding this matter at your convenience.

Sincerely yours,

/s/ R. C. SHRADER
R. C. Shrader
Vice President—Operations

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 2

AGREEMENT

BETWEEN

PAN AMERICAN AIRWAYS, INC.

AND

PAN AMERICAN-GRACE AIRWAYS, INC.

DATED JULY 30, 1946

[fol. 1779a] AGREEMENT made and entered into this 30th day of July, 1946 by and between PAN AMERICAN AIRWAYS, INC., a New York corporation (hereinafter called PAA), and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation (hereinafter called Panagra):

RECITALS

A. PAA holds various certificates of convenience and necessity for routes between the continental United States and the Canal Zone, and Panagra holds a certificate of convenience and necessity for a route between the Canal Zone and various points in South America.

B. A substantial amount of the passenger, air express, mail and cargo traffic proceeding between the continental United States and the Canal Zone originates at or is destined to points on Panagra's certificated route in South America.

C. PAA and Panagra believe it is in the public interest that such through traffic should be enabled to proceed by fast direct flight without change of plane at the Canal Zone and that the making of arrangements to that end is desirable in order that they may compete effectively with

foreign-flag and other American-flag carriers operating or contemplating operations between the continental United States and the countries of South America which Panagra is certificated to serve.

D. Because of the foregoing and a desire to settle outstanding differences, PAA and Panagra desire to make arrangements, as hereinafter set forth, whereby PAA will charter aircraft of Panagra to be operated with Panagra flight crews over PAA's certificated routes between the Canal Zone and the continental United States.

[fol. 1786] TERMS OF AGREEMENT

Now, therefore, in consideration of the premises and the mutual covenants herein contained, it is agreed as follows:

1. *Charter of Panagra Aircraft by PAA.* PAA will, at the request of Panagra as hereinafter provided, charter any aircraft operated by Panagra into the Canal Zone from Lima, Peru or any point on Panagra's certificated route in South America south of Lima, Peru, for through operation from the Canal Zone over one of PAA's routes to the continental United States, and for return operation to the Canal Zone over the same route. All such chartered aircraft shall be operated with Panagra flight crews. If Panagra shall deem it impracticable for the particular aircraft operated by Panagra into the Canal Zone to continue the flight to the continental United States, Panagra may substitute another aircraft of the same or comparable type.

2. *PAA Routes over which Through Flights are to be Operated.* (a) The initial route over which through flights are to be operated under this agreement shall be PAA's certificated route between the Canal Zone and Miami, Florida. Such flights shall be operated non-stop between the Canal Zone and Miami unless operating or traffic experience demonstrates to the satisfaction of both parties the desirability of making one or more intermediate stops.

(b) Upon the granting to PAA of a certificate for a route between Miami, Florida and Washington, D. C., and/or New York, New York, and/or a certificate for a route from

Miami, Florida, to Chicago, Illinois, through flights under this agreement shall proceed over such route to and from such points. Such flights may utilize the most direct non-stop route available to PAA. In the event PAA is certificated to operate between Miami, Florida and Boston, Massachusetts or any other points on the east coast of the United States, through flights may also be operated under this agreement to and from such points provided operating or traffic experience demonstrates the desirability thereof.

[fol. 1781] (c) If Panagra shall so request, PAA will file with the Civil Aeronautics Board such applications as may be necessary to permit non-stop operation between the Canal Zone and New Orleans, Louisiana, it being understood that nothing herein contained shall limit PAA's rights to apply for such non-stop authority without a request on the part of Panagra. Upon PAA's receiving such non-stop authority, whether as a result of applications filed at Panagra's request or otherwise, through flights may be made by Panagra aircraft pursuant to this agreement between the Canal Zone and New Orleans, Louisiana, to such extent as Panagra shall determine appropriate from time to time in the light of competitive conditions and the relative amount of traffic available for such route. If PAA shall have obtained authority from the Civil Aeronautics Board to operate a route between New Orleans, Louisiana, and Chicago, Illinois, such flights with Panagra aircraft may proceed over such route provided operating or traffic experience demonstrates the desirability thereof.

(d) PAA agrees to use its best efforts to obtain from the Civil Aeronautics Board authority to operate the various routes and non-stop services referred to in this paragraph 2 and Panagra agrees to support PAA to this end.

(e) Panagra aircraft chartered to PAA are not to be operated over any of PAA's routes other than those described above except by mutual consent.

3. *Number and Destination of Flights.* (a) At least thirty (30) days prior to the first scheduled through flight proposed to be made with Panagra aircraft and crews under

charter to PAA pursuant to this agreement, Panagra shall give notice to PAA as to the number and nature of the through flights proposed to be so operated during the ensuing six (6) months period over each of PAA's routes specified in paragraph 2 above. At least sixty (60) days prior to the expiration of said six (6) months period and of each six (6) months period thereafter, Panagra shall give notice to PAA of the number and nature of such through flights proposed to be so operated during the succeeding six (6) [fol. 1782] months period. Except with PAA's consent, the number of through flights to be so operated shall not during any period exceed the number specified in such notice. Subject only to operating or other conditions beyond Panagra's or PAA's control, Panagra shall be obligated to furnish the aircraft and crews for the performance of the flights specified in such notice and PAA shall be obligated to operate the through flights with such aircraft and crews over its routes as specified in such notice.

(b) If experience over any six (6) months period shall demonstrate that the load factors (including both local and through traffic) on the through flights operated north of the Canal Zone with Panagra aircraft and crews under charter to PAA pursuant to this agreement shall be inadequate, the parties shall take appropriate action to increase such load factors through reduction or adjustment of their schedules or otherwise.

4. *Schedules.* (a) PAA and Panagra will consult from time to time with a view to fixing the schedules of the through flights being operated over PAA s routes with Panagra aircraft and crews under charter to PAA pursuant to this agreement in such manner as to provide the most convenient and advantageous schedules for the benefit of through traffic between the continental United States and points on Panagra's certificated route in South America. In the event of disagreement the schedules for the through flights shall be established as follows: Panagra shall fix the hours of arrival of northbound through flights at the Canal Zone and of departure of southbound through flights from the Canal Zone, and PAA will immediately adjust the through schedules north of the Canal Zone to be flown with

Panagra aircraft pursuant to this agreement accordingly so as to provide the most expeditious direct through one-plane service. It is the intention of the parties that, within the limitations which may be necessary by reason of Panagra's operations over its own route, through flight schedules and turnarounds shall be arranged to assure maximum utilization by PAA of Panagra's aircraft chartered by PAA pursuant to this agreement.

[fol. 1783] (b) The parties will instruct their respective personnel to cooperate in arranging and adjusting from time to time as occasion may arise reasonable and sound procedures for meeting traffic and operating problems that may arise in respect of any particular flight by reason of through flights arriving at the Canal Zone northbound or southbound unduly delayed. Due consideration shall be given in this connection to the purpose of this agreement to provide through one plane service for traffic between the continental United States and points on Panagra's certificated route in South America.

5. *Panagra Aircraft and Crews to be Operated under Agreement.* (a) The Panagra aircraft to be operated over PAA's routes under charter to PAA pursuant to this agreement shall be operated with Panagra's flight crews and cabin attendants. All Panagra aircraft so operated shall be properly licensed for operation over such routes and all of said flight crews shall be fully licensed for operation on the aircraft and over the routes required. Panagra will furnish PAA with all data required for the inclusion of such aircraft and flight crews in PAA's air carrier operating certificate, and the parties will cooperate generally in accomplishing this result.

(b) The aircraft which shall be tendered by Panagra for operation under charter by PAA pursuant to this agreement shall be of a modern type capable of carrying on the services herein contemplated a reasonable load, at competitive speeds, and with equivalent accommodations and comfort-level, all measured in the light of the aircraft types currently being operated by other American-flag airlines over routes of similar length and characteristics.

(c) PAA shall have a right to inspect any aircraft tendered by Panagra for operation pursuant to this agreement before accepting same and may refuse to operate any aircraft tendered which is not in satisfactory operating condition in the light of regulations of the Civil Aeronautics Authority and prevailing airline standards.

[fol. 1784] 6. *Responsibility for Operations on PAA Routes.* PAA shall have full responsibility for and control over the operation of Panagra's aircraft over PAA's routes as provided in this agreement. PAA's responsibility for such operation, without limiting the generality of the foregoing, shall include responsibility for operation dispatch, flight plane clearance, radio plane guard and "in flight" instructions and all communications, navigation and weather facilities and services, and also for loading and discharge of airplanes, handling of traffic, and passenger service. PAA undertakes to furnish in connection with such operations adequate and efficient ground facilities and personnel, to conduct such operations in accordance with approved and modern standards which shall in no event be lower than those provided in the case of its own aircraft, and to treat Panagra's aircraft on a basis of complete equality with its own aircraft.

7. *Maintenance and Overhaul.* (a) PAA shall undertake and perform at convenient maintenance bases in the continental United States all major overhaul of flight equipment owned by Panagra of the same or similar type as the flight equipment chartered by PAA under this agreement, and such other maintenance and overhaul of other types of flight equipment as Panagra may request from time to time on reasonable notice. If experience indicates the desirability, from the point of view of cost, efficiency or service to the public, of PAA's arranging for any or all of such maintenance or overhaul to be done by third parties or of Panagra's making other arrangements for the performance of any or all such maintenance and overhaul in the continental United States, PAA and Panagra will join in developing plans whereby this may be accomplished.

(b) PAA will also furnish to Panagra's aircraft operated over PAA's routes pursuant to this agreement, air-

plane and engine inspection and on-line maintenance service.

(c) The maintenance, overhaul and inspection services furnished Panagra by PAA pursuant to this agreement shall not be less in character, quality or extent than the [fol. 1785] service given by PAA or Panagra to their aircraft or as may be required from time to time under the standards of the Civil Aeronautics Authority.

(d) Panagra may station a reasonable number of its employees at maintenance bases of PAA at which maintenance and overhaul of Panagra's flight equipment is being performed pursuant to this paragraph for purposes of expediting and general coordination, and PAA will furnish to such employees reasonable office facilities and access to the work.

8. *Training.* At the request of Panagra, PAA will join with Panagra in developing plans whereby Panagra's pilots or other personnel (whether to be engaged in the charter service or otherwise) may be trained in any training centers in the continental United States operated by PAA, PAA to be compensated for such training on bases to be arranged from time to time.

9. *Preference for Through Traffic.* Since the purpose of the through flights to be made with Panagra aircraft under charter to PAA pursuant to this agreement is primarily to accommodate traffic between the continental United States and points on Panagra's route in South America, PAA and Panagra shall book and route such traffic via such aircraft to the fullest extent practicable. In order to give such traffic precedence over any other traffic to be carried by such aircraft, it is agreed that in the case of all northbound and southbound through flights operated over PAA's routes pursuant to this agreement, Panagra shall, from time to time, request PAA to block off until a reasonable time prior to departure a specific number of seats and a designated amount of mail and cargo capacity which will be designed to accommodate the through traffic reasonably expected, and will itself block off for the through flights on its own route a number of seats and amount of

mail and cargo capacity reasonably related to the seats and amount of capacity which it shall have requested PAA to block off, and the parties shall arrange their reservations control accordingly. If experience over a reasonable time indicates that the seats or capacity so blocked off unduly [fol. 1786] exceed the through traffic actually carried, the parties will take appropriate action to prevent non-utilization of capacity, with due regard, however, for the requirements of through traffic destined to or originating at points on Panagra's certificated route. Subject to the foregoing, it is the intention of this agreement that PAA will route local and way-to-way traffic on the aircraft under charter to PAA pursuant to this agreement in the same manner as it does on its schedule operated with its own aircraft.

10. *General Sales Agency of PAA for Panagra.* (a) PAA shall continue to act as general sales agent for Panagra (with the right to appoint sub-agents) in the United States and in all other parts of the world except the countries of South America served by Panagra and Panama City, Panama. PAA shall use its best efforts to promote and develop traffic for Panagra, both in the United States and elsewhere, without discrimination and on the same basis on which it promotes and develops traffic over it own routes.

(b) If at any time Panagra presents to PAA evidence reasonably indicating that any employee of PAA shall have diverted or attempted to divert any traffic intended for transportation over Panagra's routes or on the through flights operated pursuant to this agreement, or shall have withheld information as to the availability of Panagra's services from any person seeking such transportation, Panagra shall cooperate with PAA as to the establishment by the latter of adequate disciplinary machinery for preventing further conduct of the type indicated.

(c) Panagra shall from time to time indicate to PAA methods and procedures which Panagra desires to have established by PAA or PAA's sub-agents in connection with the selling, handling or servicing of traffic to be carried over Panagra's certificated route. PAA will put such methods

and procedures into effect wherever practicable. If after full consideration such methods or procedures appear to PAA to be undesirable or impracticable, PAA shall use its best efforts to work out with Panagra substitute methods and procedures designed to accomplish the results which Panagra is seeking.

[fol. 1787] (d) PAA will designate W. R. Grace & Co. and its qualified affiliated companies as sub-agents for the sale of Panagra traffic in the area for which PAA shall act as general sales agent.

11. *Panagra Display and Representation at Airports and Ticket Offices.* (a) PAA will cause the name "Pan American-Grace Airways, Inc." and, if Panagra shall so request, the name "Panagra", in such form as Panagra may determine, and the Panagra-insignia in the form as presently in use, to be displayed on traffic counters at all airports in the continental United States to which Panagra's aircraft may be operated under charter to PAA pursuant to this agreement. At any such airport Panagra may, if it determines the same to be necessary or desirable, employ a reasonable number of personnel to assist in the handling of traffic arriving or departing from or to points on Panagras certificated route. Persons so employed shall have reasonable access to PAA's space and facilities at such airports.

(b) PAA will cooperate with Panagra to assure that adequate space and personnel are available to PAA's city ticket offices for the efficient handling of traffic originating at or destined to points on Panagra's certificated route or which proceeds via the through flights provided in this agreement.

At least one responsible employee of PAA working full time in PAA's city ticket offices in New York, Chicago, Washington and in any other place in the continental United States to which Panagra's aircraft shall be operated pursuant to this agreement shall be appointed by PAA and serve subject to the approval of Panagra, which approval shall not be unreasonably withheld. Such employee shall among other duties be particularly charged with the duties

of promoting the sale of Panagra traffic and of facilitating and improving the handling of Panagra traffic and traffic routed via the through flights provided in this agreement. Such employee shall regularly keep Panagra fully advised through procedures approved by PAA of all matters relating to such traffic.

PAA will use its best efforts to encourage and bring about the fullest cooperation between its United States sales offices and Panagra's traffic department.

[fol. 1788] At all of PAA's city ticket offices in the continental United States there shall be available at all times full information as to the routes operated by Panagra and the through flights provided by Panagra aircraft under charter to PAA, and the name "Pan American-Grace Airways, Inc." and, if Panagra shall so request, the name "Panagra", in such form as Panagra may determine, and the Panagra insignia in the form as presently in use, shall be held out to the public by display or otherwise.

(c) Panagra's right to utilize the word "Panagra", in such form as it may determine, as a trade name for all purposes it may deem fit is hereby acknowledged by PAA. Nothing in this agreement shall prevent PAA, in its system advertising or otherwise, from referring to Panagra as "Pan American-Grace Airways, Inc."

12. *Tickets and Documentation; Through Rates.* (a) All tickets or other documents relating to transportation to be performed by Panagra's aircraft being operated under charter to PAA pursuant to this agreement shall show that such transportation is being made via PAA and, to such extent as practicable, passenger tickets shall show that such transportation is being made with Panagra aircraft.

(b) PAA and Panagra will establish through rates for services over their respective certificated routes between all principal points as may be required and revenue therefrom will be divided on a mileage flown basis or such other basis as may be agreed.

(c) PAA, by one or more qualified employees, shall continue to act as tariff and schedule publishing agent for Panagra.

13. *Further Agreements.* (a) Within a reasonable time after the inauguration of through flights pursuant to this agreement, PAA and Panagra will negotiate with the objective of entering into an agreement, subject to the approval of the Civil Aeronautics Board, for sharing, in the light of the services offered by the parties and the mileage operated by each of them, all revenues arising out of transportation by each of them, both northbound and [fol. 1789] southbound, of passengers, air express, cargo and mail (other than United States mail) originating in or routed through the continental United States and destined to Buenos Aires, Argentina, and/or Montevideo, Uruguay, and vice versa.

(b) If either party shall be of the opinion that technical and traffic developments in the field of air transportation would make advantageous the operation of non-stop flights between a point or points in the continental United States on the certificated routes of PAA and any point or points on the certificated route of Panagra in Ecuador, Peru, Chile, or Argentina, the parties will negotiate with the objective of making a further agreement which will permit the operation of such flights (for the account and under the control of PAA north of the latitude of Balboa and for the account and under the control of Panagra south of such latitude), subject to compliance with all applicable laws and regulations and to the approval of the Civil Aeronautics Board.

(c) If, after reasonable efforts, the parties are unable to negotiate either of the agreements contemplated by subparagraphs (a) or (b), the terms of such agreement shall, on the request of either party, be settled by arbitration as provided in Paragraph 25.

14. *Advertising and Publicity.* The name "Pan American-Grace Airways, Inc." and, if Panagra so desires, the name "Panagra", in such form as Panagra may determine, and the Panagra insignia in the form as presently in use,

shall appear on the exterior of all airplanes chartered to PAA under this agreement in addition to an appropriate statement inside the airplane informing the public that the airplane is a Panagra airplane under charter to PAA. PAA will advertise and otherwise publicize that through one plane service is afforded over PAA's and Panagra's routes between the continental United States and points on Panagra's certificated route in South America. Panagra will advertise and otherwise publicize that such service is afforded with Panagra aircraft over Panagra's and PAA's routes. In this connection PAA and Panagra will work out [fol. 1790] from time to time appropriate programs for advertising the through service afforded under this agreement as well as the services afforded by Panagra on its certificated route in South America and will establish the relative contributions to such advertising to be made by Panagra and PAA.

15. *Liability to third parties.* PAA will indemnify Panagra and hold it harmless in respect of any liability (other than to employees of Panagra who are not travelling as passengers on aircraft operated pursuant to this agreement) arising or claimed to arise as a result of the operation of Panagra's aircraft over PAA's certificated routes as provided in this agreement. PAA will carry passenger and public liability and property damage insurance policies covering risks attendant upon the operation of Panagra's aircraft over PAA's certificated routes to the same extent and on the same basis as for operations conducted by its own aircraft and will cause Panagra to be included as a party insured. Panagra will indemnify PAA and hold it harmless from claims of Panagra employees arising or claimed to arise as a result of the operation of Panagra's aircraft over PAA's certificated routes as provided in this agreement (except employees travelling as passengers) and will carry appropriate policies of workmen's compensation insurance with respect to such employees. All indemnities herein shall include related costs and expenses.

16. *Risk of Loss of Aircraft.* Panagra shall be responsible for loss of or damage to its aircraft or other property while under charter to PAA pursuant to this agreement,

except as hereinafter provided. Unless otherwise agreed, Panagra shall carry appropriate insurance providing against loss of or damage to such aircraft or other property while under charter to PAA, with the same coverage as that carried by Panagra for similar property while in Panagra's possession, and will cause PAA to be included as a party insured. Except in the case of risks as to which Panagra is so obligated to insure, PAA shall be liable to Panagra for loss of or damage to Panagra's aircraft or [fol. 1791] other property while under charter to PAA pursuant to this agreement if such loss or damage arises out of gross negligence on the part of PAA or its employees. If there should arise operating conditions peculiar to the routes of PAA over which Panagra's aircraft are operated pursuant to this agreement which the parties agree require Panagra to carry insurance against risk of loss of its property while under charter to PAA by reason of war risk, riots, strikes or civil commotion, such insurance may be carried by Panagra and the cost thereof included as a direct cost chargeable to PAA.

17. *Financial Provisions.* (a) As compensation for the flight equipment and flight crews furnished by Panagra for operation under charter to PAA pursuant to this agreement, PAA shall pay to Panagra an amount representing (1) reimbursement of all direct costs incurred by Panagra in such operation, and a reasonable proportion of such indirect costs of Panagra as are fairly attributable to such operation, and (2) a fair rate of return on the investment of Panagra used in or useful for such operation.

The payments so to be made by PAA to Panagra shall be determined initially in accordance with the detailed provisions of Annex 1 hereto attached.

If either party shall be of the opinion that the detailed provisions for payment by PAA to Panagra in effect at any time do not properly carry out the intent of this subparagraph (a) or are operating unfairly or inequitably, such party may request review of such provisions. The parties will thereupon negotiate in an effort to adjust such provisions and in the event of their inability to agree the

matter will be arbitrated as provided in paragraph 25. Pending any such negotiation or arbitration, payments shall continue on the basis theretofore in effect, subject to such agreement or award as may ultimately be made.

(b) Panagra will pay PAA for maintenance and overhaul of Panagra's flight equipment performed by PAA pursuant to paragraph 7 of this agreement, an amount representing (1) reimbursement of all of PAA's costs for direct labor and materials used in such maintenance or overhaul and a [fol. 1792] reasonable proportion of PAA's indirect or burden expenses applicable thereto (distributed on the basis of direct labor costs) and (2) a fair rate of return on so much of PAA's investment in maintenance and overhaul facilities, flight equipment spare parts and assemblies and working capital as may be properly allocable to such maintenance and overhaul performed by PAA for Panagra. The parties will from time to time agree upon such detailed provisions as may be appropriate to establish the amount of such payments.

The costs to be reimbursed by Panagra to PAA pursuant to this subparagraph (b) shall be the direct and indirect expenses of the type presently set forth in accounts 401-408 and 421-428 inclusive of the Civil Aeronautics Board's Uniform System of Accounts for International Air Carriers. Amounts payable by Panagra to PAA pursuant to this subparagraph (b) shall, to such extent as appropriate, be reflected in the billings by Panagra to PAA for charter flights performed by Panagra pursuant to this agreement as set forth in subparagraph (a) hereof.

If, in pursuance of its obligations under subparagraph (a) of paragraph 7 of this agreement, PAA shall have acquired maintenance equipment or facilities specially designed for the maintenance or overhaul of flight equipment of Panagra of a type different from any of PAA's flight equipment which is or could practicably be maintained at the same maintenance base and if Panagra shall cease to utilize such special maintenance equipment or facilities prior to the date when the same shall have been depreciated to the residual value thereof in accordance with recognized

standards as to depreciation rates, then, unless Panagra shall elect to purchase such maintenance equipment or facilities at their depreciated value, PAA will sell such maintenance equipment or facilities at the best price obtainable and the difference between the price so obtained (less any expenses of sale) and the depreciated value thereof shall be paid by Panagra to PAA in the case of a deficiency or paid to Panagra by PAA in the case of an excess.

(c) Each of the parties will render to the other as soon as possible after the end of each calendar month bills for the payments due under this agreement with respect to such [fol. 1793] month. Such bills shall be paid within fifteen (15) days after receipt. Unless otherwise agreed, billings during any calendar year shall be on a cumulative basis for purposes of periodic payment and shall be subject to adjustment from time to time prior to the close of the accounts at the end of the calendar year.

(d) References in this paragraph and in Annex 1 to payment of a fair rate of return shall mean such rate as is required to yield, after taxes, the rate of return on investment, after taxes, allowed by the Civil Aeronautics Board in fixing mail pay compensation in accordance with the provisions of the Civil Aeronautics Act for the particular carrier whose investment is involved. It is contemplated that while such rate of return will vary from time to time, the rate of return payable under this agreement shall at all times be equal to the rate of return currently in effect under decisions of the Board. If the Board has not determined mail pay compensation by fixing a rate of return on investment or if for any other reason the foregoing provisions shall not result in establishing a rate of return for the purposes of this agreement, then the rate of return payable hereunder shall be fixed by mutual agreement and in the event of failure to agree shall be arbitrated under paragraph 25 hereof.

(e) If it shall develop in the course of operations under this agreement that either party is utilizing major items of property owned by the other which have been fully depreciated on the books of the owner without the user

having contributed its proportionate share of the full depreciation, the parties will negotiate provisions for appropriate payments for the use of such property. In the event of their failure to agree, the matter shall be arbitrated under paragraph 25 hereof.

(f) Either party shall have such access to the books, records and accounts of the other as may be reasonably required to verify billings under this agreement.

18. *PAA to Maintain Certificates in Good Standing.* Except with Panagra's written consent PAA will not transfer or abandon any of its certificates covering routes over [fol. 1794] which Panagra aircraft may be operated under charter to PAA pursuant to this agreement or seek to modify such certificate or certificates in any manner which would prevent or adversely affect the operations contemplated hereunder.

19. *Representation of Panagra in Questions Related to this Agreement.* PAA agrees that any action to make any claim, to take any position, or to enforce any rights of Panagra under this agreement may be taken on behalf of Panagra by its President; provided, however, that the foregoing shall not be deemed to withdraw from the Board of Directors of Panagra its function of determining independently of this agreement such questions of general business policy relating to the conduct of Panagra's affairs (such as the purchase of equipment, the establishment of equipment reserves and the fixing of depreciation rates) as are determined by a board of directors in accordance with law or normal corporate practice.

20. *Proceedings for Approval; Effective Date.* (a) PAA will forthwith file application with the Civil Aeronautics Board for approval of this agreement. The parties will use their best efforts to obtain such approval as expeditiously as possible. If the Board shall impose conditions upon its approval of this agreement or shall suggest modifications in the same but within the general framework hereof, the parties undertake to negotiate in an effort to meet all such conditions and suggestions.

(b) Except for Paragraph (a) of this Paragraph 20 and Paragraph 22, which shall become effective immediately, this agreement shall become effective only upon the entry of an order by the Civil Aeronautics Board approving the same and upon said order becoming final.

21. *Term.* As between the parties, this agreement shall be for a term of 99 years from the date upon which it shall have become effective; except that it may be sooner terminated as hereinafter provided:

(a) If at any time subsequent to December 31, 1948, Panagra shall consider that this agreement is not satisfactory [fol. 1795] because of failure by PAA promptly and adequately to perform any of PAA's obligations under this agreement (including without limitation, such matters as failure to establish the proper schedules for flights under this agreement, failure to handle flights under this agreement in such manner that the schedules shall be duly and punctually performed, failure properly to maintain and overhaul Panagra's aircraft used in the service performed under this agreement, or failure to discharge the provisions of this agreement with respect to the selling and handling of traffic) in such manner as to promote the fullest development of through traffic between the continental United States and points on Panagra's certificated route in South America within the spirit and intendment of this agreement, Panagra may give notice to PAA stating the respect in which it considers PAA's performance to be unsatisfactory. Thereupon Panagra and PAA will negotiate in an endeavor to see whether the views of Panagra can be met. If such negotiations shall not succeed within thirty (30) days, reference shall be had to arbitration as provided in paragraph 25 to determine whether Panagra's dissatisfaction is reasonable and, if so, what measures should be taken to meet Panagra's views. If such arbitration determines that Panagra's dissatisfaction is reasonable, PAA shall be bound to take the action recommended by the arbitrators and thereafter diligently proceed with the same. If PAA shall fail to do so, Panagra may thereupon cancel this agreement upon three (3) month's notice, but such right of cancellation shall not exclude any other remedy.

(b) If at any time subsequent to December 31, 1948, PAA shall be of the opinion that Panagra's services are not consistent with recognized standards of other United States flag air carriers operating outside the continental limits of the United States in any particular which for a substantial period of time unreasonably interferes with the efficient conduct of the through flights over PAA's routes, PAA may give notice to Panagra stating the respects in which it considers such services to be unsatisfactory. Panagra and PAA will thereupon negotiate in an effort to see whether the views of PAA can be met. If such negotiations shall not succeed within thirty (30) days, reference shall [fol. 1796] be had to arbitration as provided in paragraph 25 to determine whether PAA's dissatisfaction is reasonable and, if so, what measures should be taken to meet PAA's views. If such arbitration determines that PAA's dissatisfaction is reasonable, Panagra shall be bound to take the action recommended by the arbitrators and thereafter diligently proceed with the same. If Panagra shall fail to do so, PAA may thereupon cancel this agreement upon one (1) year's notice, but such right of cancellation shall not exclude any other remedy.

22. *Non-prejudice.* If this agreement is not approved by the Civil Aeronautics Board or for any other reason does not become effective or if, having become effective, this agreement should be terminated or canceled, the negotiation and the terms of this agreement and all applications filed and acts done hereunder shall be without prejudice to the rights or future position of any of the parties.

23. *Construction.* (a) It is the intention of the parties that within the general framework and conception of this agreement, the various provisions shall be broadly and liberally construed to accommodate technical, commercial, international and regulatory developments in the field of air transportation to the end that through traffic will be handled at maximum efficiency and in a manner to meet changing competitive conditions.

(b) Nothing in this agreement shall be deemed to require either of the parties to take any action in violation of any applicable law, regulation, or order.

(c) This contract shall be construed in accordance with the laws of the State of New York.

(d) The various headings herein and the grouping of the provisions of this agreement into separate paragraphs shall not be construed to limit or restrict the meaning or application of any provision hereof, and are for the purpose of convenience only.

(e) The parties will formulate procedures for evidencing the delivery of flight equipment by Panagra to PAA for operation under this agreement and the return of such flight [fol. 1797] equipment by PAA to Panagra. All provisions of this agreement with respect to liability, risk or loss, etc. shall date from the delivery or return of flight equipment as shown in such evidence.

24. *Notice.* Notice to PAA wherever provided in the agreement shall be given in writing by registered letter addressed President, Pan American Airways, Inc., Chrysler Building, New York, New York, or in such other manner or to such other address as PAA may designate to Panagra in writing. Notice to Panagra wherever provided in the agreement shall be given in writing by registered letter addressed President, Pan American-Grace Airways, Inc., 7 Hanover Square, New York, New York, or in such other manner or to such other address as Panagra may designate to PAA in writing. Notice shall not be considered given until the date when the same shall have been received as evidenced by the Post Office return receipt or, if the addressee shall have refused to accept the registered notice, the date on which such registered notice shall have been first tendered to the addressee.

25. *Arbitration.* Any and all disputes as to the construction or operation of this agreement shall be submitted to arbitration pursuant to the rules of the American Arbitration Association having general application, in the manner hereinafter provided. The party requesting arbitration shall notify the other party naming its arbitrator in the notice. The other party shall appoint an arbitrator within ten (10) days after the receipt of such notice. Within ten

(10) days after such appointment, the two arbitrators shall appoint a third arbitrator and the decision or the award of any two of such three arbitrators shall be final, binding and conclusive upon the parties. If either party fails to appoint the arbitrator to be appointed by such party, or if the arbitrators appointed by or for the respective parties shall fail to appoint such third arbitrator, then and in either such event such then unappointed arbitrator shall be appointed by the then President of the American Arbitration Association or in the event such President shall be disqualified by reason of his association with either party or otherwise, then by the next highest ranking official of such Association. Any such arbitration shall be conducted in accordance with the law of the State of New York and [fol. 1798] held in New York City, New York, unless the parties shall otherwise agree in writing.

26. *References.* (a) All references in this agreement or in Annex 1 to the Civil Aeronautics Authority and/or the Civil Aeronautics Board shall include any Federal agency having jurisdiction similar to that now exercised by said Authority and said Board.

(b) If changes shall be made from time to time in the Civil Aeronautics Board's Uniform System of Accounts for International Air Carriers, appropriate modifications to give effect to such changes shall be made in this agreement and in Annex 1.

(c) All references to flight equipment in this agreement or in Annex 1 shall include aircraft, engines, propellers and other property as defined in said Uniform System of Accounts as presently in effect.

In Witness whereof each of the parties hereto has caused this agreement to be executed at New York, New York, in its respective corporate name and its respective corporate seal to be hereunto affixed and attested by its respective

officer or officers thereunto duly authorized as of the day and year first above written.

ANNEX 1

Detailed Provisions for Payments by PAA to Panagra

1. *Direct Costs.*

A. PAA shall pay directly the cost of fuel used in the charter service, Accounts 358 and 359, and of clearance of aircraft while in use in the charter service, Account 371. Any amounts properly recorded by Panagra for employees' compulsory compensation, Account 369, and Social Security taxes, Account 370, insofar as the same relate to the charter service, shall be charged directly by Panagra to PAA.

PAA will reimburse Panagra for all flight costs properly recorded by Panagra for the aircraft type used in the charter service in Accounts 351-372 inclusive, 401-408 inclusive, 421-428 inclusive and 4501-4505 inclusive, such costs to be

---

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for International Air Carriers presently in effect.

allocated to the charter service on the basis of the ratio of the revenue miles flown by such aircraft type in the charter service to the total revenue miles flown by such aircraft type including those flown in the charter service. If it shall appear that major items of cost recorded in such accounts are applicable only to the charter service or to Panagra's common carrier service, provision will be made for removing such costs from allocation and charging such costs directly to the charter service, if applicable thereto.

It is intended that the payments provided to be made directly by PAA and the flight costs to be allocated shall include non-revenue flights by the aircraft type used in the charter service. PAA shall determine the fuel cost, Accounts 358 and 359, incurred by it for such non-revenue flights and charge Panagra for this expense. Panagra shall determine the fuel cost, Accounts 358 and 359, for such flights incurred by it. PAA shall pay to Panagra a portion of the total fuel cost of non-revenue flights by such aircraft type equal to the ratio of the revenue miles flown by such aircraft type in the charter service to the total revenue miles flown by such aircraft type including those flown in the charter service.

[fol. 1800] Flight Equipment Depreciation, Accounts 4501 to 4506, shall be computed in accordance with Panagra's rates, or in the event such rates are not satisfactory to PAA, at rates to be mutually agreed upon by the two companies, or, in the event of their inability to agree, to be fixed by arbitration consistently with rates generally prevailing in the international air transport industry for the type of flight equipment used in the charter service.

The shop burden of Panagra applicable to the maintenance and overhaul of the type of flight equipment used in the charter service, Accounts 421 to 428 inclusive, will be determined in accordance with the CAB Uniform System of Accounts for International Air Carriers and will be distributed on the basis of direct labor costs.

B. Panagra shall be reimbursed for passenger service direct flight costs incurred by Panagra in the charter service and charged to Account 660—Pursers, Stewards and

Stewardesses—(including appropriate provision for vacations earned while in the charter service) and related expenses in Accounts 664—Travel and Incidental Expenses, 673—Employees' Compensation and Other Insurance, and 686—Social Security Taxes, and in addition, to the extent applicable as a direct charge, costs incurred in the following accounts:

677—Injuries, Loss and Damage
685—Compulsory Compensation
687—Passenger Supplies and Expenses
688—Food Expense—Caterers
689—Food Expense—Company Restaurants
692—Interrupted Trips Expenses
699—Miscellaneous

C. Panagra shall be reimbursed for a portion of its costs of training flight crews (including pursers, stewards and stewardesses) not reimbursed pursuant to paragraphs A and B, to be allocated to the charter service on the basis of the ratio of the salaries of flight crews charged to the charter services to the total such salaries.

[fol. 1801] 2. *Indirect Costs.*

A. Panagra will be paid a portion of so much of the operations overhead of Panagra as consists of the office of the operations manager, the office of the chief pilot (after proper deduction for revenue flying done by him or his staff), the office of the superintendent of flying, the office of the communications superintendent, New York expenses applicable to the operations, maintenance and communications departments (including the salaries and related expenses of Panagra's United States maintenance representatives as provided in paragraph 7), and the costs of Panagra's medical department. The amount so payable shall be the amount obtained by multiplying the total of these costs by a fraction of which the numerator will be 50% of the available ton miles flown in the charter service and the denominator the total available ton miles flown in Panagra's common carrier service plus 50% of the available ton miles flown in the charter service.

B. Panagra will be paid a portion of so much of its passenger service overhead as consists of the office of passenger service superintendent and the office of chief purser. The amount so payable shall be the amount obtained by multiplying the total of these costs by a fraction of which the numerator will be 40% of the available ton miles flown in the charter service and the denominator the total available ton miles flown in Panagra's common carrier service plus 40% of the available ton miles flown in the charter service.

C. Panagra will be paid a portion of the costs of its financial and accounting departments (up to and including the level of the offices of assistant treasurer and assistant comptroller directly supervising the accounting under this agreement) and the cost of the personnel department located at New York. The amount so payable shall be the amount obtained by multiplying the total of these costs by a fraction of which the numerator will be 35% of the available ton miles flown in the charter service and the denominator the total available ton miles flown in Panagra's common carrier service plus 35% of the available ton miles flown in the charter service.

[fol. 1802] D. All references to available ton miles flown are to miles flown on revenue flights.

3. *Return on Panagra's Investment.*

Panagra shall be paid an amount representing a fair rate of return on

(i) So much of Panagra's investment (computed at cost less depreciation at rates fixed as provided in 1A above) in the type of flight equipment (Accounts 1501-1506) used in the charter flights as shall be allocable to such service on a revenue miles basis as set forth in paragraph 1A.

(ii) So much of Panagra's funds or securities earmarked and reasonably required for replacement of or additions to the type of flight equipment operated or to be operated in the charter service (not less than the funded depreciation reserve with respect thereto) as

shall be allocable to the charter service on a revenue miles basis as set forth in paragraph 1A. In case disbursement of such funds or use of the equipment purchased shall be other than as indicated by such earmarking, appropriate adjustments of prior billings under this subparagraph will be made.

(iii) So much of Panagra's working capital as shall be allocable to the charter service operated by Panagra pursuant to this agreement, to wit, three times Panagra's expenses for this operation for each month, exclusive of depreciation accruals and of amounts paid in the first instance by PAA.

(iv) So much of Panagra's investment in maintenance and overhaul facilities as shall be allocable to the flight equipment maintenance and overhaul services performed by Panagra for the charter service on the same basis as stated in paragraph 1A with respect to shop burden.

(v) So much of Panagra's investment in planes normally used for training, in link trainers and in other major items of special equipment used for the training of flight crews as shall be allocable to the charter service on the same basis stated in paragraph 1C.

PANAGRA

[Handwritten notation—CAB 727]

PAN AMERICAN-GRACE AIRWAYS, INC.

OFFICE OF THE PRESIDENT
7 HANOVER SQUARE
NEW YORK 5, N. Y.

May 28, 1947

President,
Pan American Airways, Inc.
135 East 42nd Street,
New York 17, New York

Dear Sir:

Reference is made to Paragraph 20 of the agreement between Pan American Airways, Inc. and Pan American-Grace Airways, Inc. dated July 30, 1946, which was approved, together with the agreement of the same date between W. R. Grace & Co. and Pan American Airways Corporation, by order of the Civil Aeronautics Board dated May 5, 1947, subject to the following four terms, conditions and modifications:

"(1) That paragraph 13 of the through flight agreement is disapproved and shall be deleted from the agreement;

(2) That approval of the agreements shall be for a term of 3 years from the date of the Board's order, at which time the Board without further hearing, if deemed appropriate, may extend the approval for such period as may be desirable at that time;

(3) That any changes in accounting under the agreements even though considered minor by the parties shall be reported to the Board through the Economic Bureau in accordance with section 407 of the Act;

(4) That agreements in relation to compensation in regard to agency fees, training, or other matters not previously agreed upon in the through flight agreement shall be filed with the Board in accordance with section 412 of the act."

This is to advise that Pan American-Grace Airways, Inc. considers the above within the general framework of the agreement between it and Pan American Airways, Inc. and proposes that said agreement, as modified by paragraph (1) above and subject to the terms and conditions stated in paragraphs (2), (3) and (4) above, shall become effective immediately.

Please indicate your acceptance and concurrence by signing and returning the attached duplicate copy of this letter.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

Office of the President

May 28, 1947

Pan American Airways Corporation
Wilmington, Delaware

Gentlemen:

Reference is made to the letter of even date addressed by Pan American-Grace Airways, Inc. to Pan American

Airways, Inc. placing the agreement between these parties, dated July 30, 1946, in effect immediately, subject to the terms, conditions and modifications ordered by the Board. We are writing to note our ratification of that letter.

We wish also to confirm our understanding that the agreement dated July 30, 1946 between W. R. Grace & Co. and Pan American Airways Corporation shall become effective immediately except as to the provisions of Paragraph 6 which shall become effective only upon the order of the Board dated May 5, 1947 becoming final or such earlier date as may be agreed upon.

Will you kindly note your ratification of the letter between Pan American-Grace Airways, Inc. and Pan American Airways, Inc. referred to above and your concurrence in this letter by signing the attached duplicate.

Very truly yours,

W. R. GRACE & CO.

CONFORMED COPY

Supplement No. 2

TO

THROUGH FLIGHT AGREEMENT

BETWEEN

PAN AMERICAN AIRWAYS, INC.

AND

PAN AMERICAN-GRACE AIRWAYS, INC.

DATED JANUARY 9, 1948

[fol. 1806]

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 2

AGREEMENT made and entered into this 9th day of January, 1948, by and between PAN AMERICAN AIRWAYS, INC., a New York corporation (hereinafter called "PAA"), and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation (hereinafter called "Panagra"):

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946 (hereinafter referred to as the "Through Flight Agreement") and to a letter agreement dated May 28, 1947, with respect thereto; and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

28. The letter agreement dated May 28, 1947 between PAA and Panagra is hereby designated "Through Flight

Agreement—Supplement No. 1" and is assigned the paragraph number 27. Unless otherwise agreed, all further amendments of the Through Flight Agreement shall be designated "Through Flight Agreement—Supplement No. " and shall be consecutively numbered, and their paragraphs shall likewise be numbered in continuous sequence. The parties will prepare and distribute to their respective staffs, for working purposes, copies of the Through Flight Agreement as from time to time supplemented and revised. Except where otherwise expressly stated, this Supplement No. 2 shall be effective as of 0:01 A. M., E. S. T., May 31, 1947.

29. Charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training shall, until further notice, be at the following rates:

Miami Schools

Mechanics	1.1156 (Dollars per hour)
Meteorologists	1.2906
Navigators	.9320
Radio	1.2244
Station Manager	1.7399
Link	6.3142
Pilot	16.3218

[fol. 1807] *Miami Aircraft*

C-47	41.6864
DC-3 Cargo	73.4179
DC-3 Passenger	71.5699
C-54 Trainer	107.9692
C-54 Cargo	146.6863
C-54 Passenger	169.8414

Note: Flight training charges per hour are the sum of the school rate and the aircraft rate for the type aircraft used.

If either PAA or Panagra shall no longer regard the above rates as fair and equitable, such party shall give written notice to the other; provided, however, that the first such notice may not be given prior to January 1, 1948, and that

no notice may be given less than six months after a new rate shall have been established. The parties will thereupon endeavor to agree upon new rates, failing which the matter shall be arbitrated as provided in paragraph 25. Unless otherwise agreed, any new rates established as a result of such notice shall be effective as from the first day of the month following that in which notice was given.

30. Pursuant to paragraph 12(b) of the Through Flight Agreement it is agreed that, until further agreement of the parties, revenues from through rates shall be divided as set forth in Annex 3.

31. Pursuant to paragraph 14 it has been agreed that for the calendar year 1947 PAA and Panagra will share the costs of special advertising of the through flight service within the total budgeted for expenditure by the respective companies, in the proportion of 31½% to PAA and 68½% to Panagra.

32. Paragraph 15 of the Through Flight Agreement is amended to read as follows:

> "15. *Liability to third parties.* (a) PAA will indemnify Panagra and hold it harmless in respect of any liability (other than to Panagra's flight employees including stewards and stewardesses engaged in the operation of Panagra's aircraft) arising or claimed to [fol. 1808] arise as a result of PAA's possession of Panagra's aircraft. PAA shall be deemed to be in possession of Panagra's aircraft (1) in the case of aircraft turned over to PAA for operation on through flights under this agreement, from the time when such aircraft is so turned over to PAA by Panagra until the time when such aircraft is returned to Panagra, and (2) in the case of aircraft turned over to PAA for maintenance, from the time when such aircraft is turned over to PAA at one of the latter's maintenance bases until the time when such aircraft is returned to Panagra; except, in either case, for non-revenue or other special flights during such period made at the instance and request of Panagra. PAA will carry passenger and

public liability and property damage insurance policies covering risks attendant upon the foregoing to the same extent and on the same basis as in the case of its own aircraft and will cause Panagra to be included as a party insured.

"(b) Panagra will indemnify PAA and hold it harmless (1) in respect of any liability arising or claimed to arise as a result of the operation of Panagra's aircraft except when such aircraft shall be in the possession of PAA, and (2) from all claims of Panagra's flight employees including stewards and stewardesses engaged in the operation of Panagra's aircraft. Panagra will carry appropriate policies of public liability and property damage insurance covering the risks against which it agrees to indemnify PAA under clause (1) hereof and will cause PAA to be included as a party insured, and will carry appropriate policies of workmen's compensation insurance with respect to the employees referred to in clause (2) hereof.

"(c) All indemnities herein shall include related costs and expenses.

"(d) No employees of Panagra shall be permitted to travel on Panagra's aircraft operated over PAA's certificated routes as provided in this Agreement except (1) when holding an appropriate PAA ticket or pass; or (2) as members of the flight crew as specified in the Civil Aeronautics Administration's operating specifications, or as stewards or stewardesses. Subject to payload permitting, and to applicable regulations of the Civil Aeronautics Administration, Panagra flight crew personnel may travel without charge as additional members of the flight crew on flights of Panagra's air- [fol. 1809] craft over PAA's certificated routes pursuant to this Agreement when traveling for training to be conducted by PAA pursuant to paragraph 8 of this Agreement, but all such employees shall be deemed for the purposes of this paragraph 15 to be Panagra's employees engaged in the operation of Panagra's aircraft."

33. Paragraph 16 is amended as follows:

(1) By striking from the first sentence the words "while under charter to PAA pursuant to this agreement" and substituting the words "at all times".

(2) By striking from the second and fourth sentences the words "while under charter to PAA" and substituting the words "while in PAA's possession".

(3) By striking out from the third sentence the words "while under charter to PAA pursuant to this agreement" and substituting the words "while in PAA's possession".

34. Paragraph 17 is amended by adding the following at the end thereof:

"(g) For accounting purposes the Through Flight Agreement shall be deemed to have become effective as of 0:01 A. M., E. S. T., May 31, 1947. Billings for the through flights performed on May 31, 1947 will be made on the basis of one-thirtieth of the costs for June, 1947.

"(h) Route mileages to be used in determination of Revenue Miles Flown and Available Ton Miles as referred to in the Agreement, will be those effective as shown in C. A. B. *Mileage Booklet No: 2 (Revised), Airport to Airport Mileages Over International Routes and Overseas Routes of Certificated Air Carriers* and in any revisions thereof.

"(i) Special services not covered by this agreement rendered by PAA to Panagra, on the written request of Panagra's authorized representatives, at PAA's bases in the United States (e. g., physical examinations and other services being rendered by PAA's medical department) shall be billed at rates to be established forthwith by mutual agreement upon the commencement of such services.

[fol. 1810] "(j) To the extent that Panagra shall require passenger service equipment to be maintained at

any of PAA's bases in the continental United States for use in Panagra's aircraft engaged in the charter service or in other Panagra aircraft being maintained or overhauled by PAA, Panagra will cause the necessary stock of such equipment to be made available to PAA at such base at Panagra's expense. PAA will provide suitable space for the storage of such equipment and will accord to such equipment the same treatment as to other equipment held by PAA, but any shortages or overages in such equipment shall be for Panagra's account."

35. Annex 1 of the Agreement is amended to read in the form attached hereto as Annex 1-A.

36. Paragraph 17(b) of the Through Flight Agreement is amended by striking out the first two paragraphs thereof and substituting the following:

"(b) Panagra will pay PAA for maintenance and overhaul of Panagra's flight equipment performed by PAA pursuant to paragraph 7 of this Agreement an amount representing (1) reimbursement of all of PAA's costs for direct labor and materials used in such maintenance or overhaul and a reasonable proportion of PAA's indirect or burden expenses applicable thereto; (2) a fair share of depreciation expense incurred by PAA with respect to flight equipment spare parts and assemblies maintained by PAA at the base or bases where Panagra's flight equipment is maintained or overhauled and used in or useful for such maintenance or overhaul; and (3) a fair rate of return on so much of PAA's investment in maintenance and overhaul facilities, flight equipment spare parts and assemblies, and working capital, as may be properly allocable to maintenance and overhaul performed by PAA for Panagra. The payments so to be made by Panagra to PAA shall be determined initially in accordance with the detailed provisions of Annex 2 hereto attached. If either party shall be of the opinion that the detailed provisions for payment by Panagra to PAA in effect at any time do not properly carry out the intent of this subparagraph

(b) or are operating unfairly or inequitably, such party may request review of such provisions and thereupon [fol. 1811] proceedings will be taken in the same manner as set forth in paragraph 17(a) hereof. Amounts payable by Panagra to PAA pursuant to this subparagraph (b) shall, to such extent as appropriate, be reflected in the billings by Panagra to PAA for charter flights performed by Panagra pursuant to this Agreement as set forth in subparagraph (a) hereof.

"If, in pursuance of its obligations under subparagraph (a) of paragraph 7 of this Agreement, PAA shall require flight equipment spare parts and assemblies specially designed for Panagra's flight equipment of a type different from any of PAA's flight equipment which is maintained at the same maintenance base, Panagra will cause an adequate inventory of such flight equipment spare parts and assemblies to be delivered to PAA at such maintenance base at Panagra's expense, and to replenish such inventory as may be required from time to time. Title to such inventory shall remain in Panagra. PAA agrees to provide suitable space for the storage of such inventory and to accord to it the same treatment as is accorded to other inventory held by PAA, but any shortages or overages in such inventory shall be for Panagra's account. If such inventory relates to a type of flight equipment used in the charter service, the shortages or overages shall, notwithstanding any other provision of this Agreement or of any Annex thereto, be prorated between Panagra and PAA on the basis of the ratio of the revenue miles flown by such flight equipment in the charter service to the total revenue miles flown by such flight equipment."

37. Paragraph 17(d) is amended by adding the following at the end thereof:

"Wherever payments by PAA to Panagra or by Panagra to PAA include the provision of an element of return on investment, such return for the year 1947 shall be calculated as follows:

"(a) For the purposes of billing, it will be tentatively assumed that the rate of return after taxes allowed by the Civil Aeronautics Board in fixing mail pay compensation is 10% per annum; that Panagra, as a Western Hemisphere trading corporation, is subject to Federal income tax at an effective rate of 24%; and that PAA is subject to Federal income tax at an effective rate of 38%;

[fol. 1812] "(b) Accordingly, Panagra billings to PAA will include 13.16% on investment where applicable and PAA billings to Panagra will include 16.13% on investment where applicable—in both cases to net 10%;

"(c) These billings will be altered if it should be determined that in 1947 Panagra will not be taxable as a Western Hemisphere trading corporation."

38. Paragraph 17(e) of the Through Flight Agreement is amended by adding the following at the end thereof:

"If either party, under accounting procedures consistent with applicable regulations of the Civil Aeronautics Board, shall make retroactive changes in depreciation accruals with respect to property in respect of which the other shall have made payments on account of depreciation, proper adjustments shall be made."

39. Paragraph 23(e) of the Through Flight Agreement is amended to read as follows:

"(e) The parties will formulate procedures for the delivery of receipts to evidence the transfer of possession of Panagra's aircraft from Panagra to PAA and the return of such possession from PAA to Panagra."

40. The first sentence of paragraph 24 of the Through Flight Agreement is amended to read as follows: "Notice to PAA wherever provided in the Agreement shall be given in writing by registered letter addressed to Erwin Bal-

luder, Vice President, Pan American Airways, Inc., Chrysler Building, New York, N. Y., or in such other manner or to such other address as PAA may designate to Panagra in writing." Paragraph 24 is further amended by adding at the end thereof: "Notwithstanding the foregoing provisions of this paragraph, notice may likewise be given in writing by letter delivered to the person designated to receive notice as aforesaid, provided a receipted copy is secured."

This amendment shall be effective as of the date hereof.

41. Paragraph 26(b) of the Through Flight Agreement is amended by striking out the word "International".

[fol. 1813] 42. Any amounts payable by PAA to Panagra or by Panagra to PAA in the settlement of their respective accounts, whether arising under the Through Flight Agreement or otherwise, will be paid in United States currency.

IN WITNESS WHEREOF the parties have caused this agreement to be executed by their officers thereunto duly authorized on the day and year first above written.

[fol. 1814]

ANNEX 1-A

*Detailed Provisions for Payments by PAA to Panagra**

1. *Direct Costs.*

A. 1. Charges for gasoline used in the charter service shall be accounted for as follows:

(1) PAA will advise Panagra at the close of each month of the total gallonage delivered by PAA, classified by aircraft types;

(2) Panagra will allocate to the charter service a gallonage equal to the amount obtained by multiplying the respective gallonages loaded during the month into the types of aircraft used in the charter service by a fraction of which the numerator shall be the revenue miles flown by such type in the charter service and the denominator shall be the total revenue miles flown by such type;

(3) PAA will price the amount specified in (2) at the weighted average price of the deliveries specified in (1). This amount will be retained as a cost of PAA.

(4) Any excess of the cost of the deliveries described in (1) over the cost to be retained by PAA as described in (3) will be billed by PAA to Panagra. Any excess of the cost described in (3) over the cost of the deliveries described in (1) will be credited to Panagra by PAA.

2. PAA will pay as a direct charge (1) expenses of clearance of aircraft while in use in the charter service, Account 5167, and (2) any amounts properly recorded by Panagra for employees' compulsory competition of flight crews (other than pursers, stewards, and stewardesses) recorded in Account 5174, and Social Security taxes of said em-

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for Air Carriers presently in effect.

ployees charged to Account 6668 in so far as the same relate to the charter service.

[fol. 1815] 3. PAA will reimburse Panagra for all costs properly recorded by Panagra for the aircraft type used in the charter service in Accounts 5123-5180 inclusive (excluding costs of gasoline in Account 5145, gasoline taxes in Account 5169 and accounts included in the preceding paragraph 2), 5225-5227 and 5246-5248 inclusive, 5270, 5274, 5280 (except for credits arising out of charges to PAA), shop burden expenses applicable to the maintenance and stores departments charged in the accounts as set forth in paragraph 5 below, costs recorded in Accounts 5975-5977 inclusive, and 5980 (except for credits arising out of charges to PAA), cost of insurance of all kinds included in Account 6657 applicable to flight crews, and costs recorded in Accounts 6227, 6248 and 6978 applicable to Passenger Service Equipment carried in the aircraft type used in the charter service. All costs dealt with in this paragraph shall be allocated to the charter service on the basis of the ratio of the revenue miles flown by such aircraft type in the charter service to the total revenue miles flown by such aircraft type including those flown in the charter service. If it shall appear that major items of cost recorded in such accounts are applicable only to the charter service or to Panagra's common carrier service, provision will be made for removing such costs from allocation and charging such costs directly to the charter service, if applicable thereto.

4. Flight Equipment Depreciation, Accounts 5975-5977 inclusive and 5980 and Depreciation on Passenger Service Equipment, Account 6978, shall be computed in accordance with Panagra's rates, or in the event such rates are not satisfactory to PAA, at rates to be mutually agreed upon by the two companies, or, in the event of their inability to agree, to be fixed by arbitration consistently with rates generally prevailing in the international air transport industry for the type of flight equipment used in the charter service.

5. The shop burden of Panagra applicable to the maintenance and overhaul of the type of flight equipment used in

the charter service shall include shop burden expenses ap-
[fol. 1816] plicable to the maintenance and stores departments charged in Accounts 6221-6274 and solely applicable to maintenance of flight equipment and ground equipment used in connection with maintenance of flight equipment; salaries and expenses of the purchasing and cost accounting departments included in Accounts 6621-6674; insurance—public liability, property damage and general insurance expenses included in Account 6655 and applicable to the maintenance, purchasing and stores departments; cost of insurance of all kinds included in Account 6657 and applicable to the maintenance, purchasing and stores departments; payroll taxes included in Account 6668 and applicable to the maintenance and stores departments; and depreciation included in Account 6978 and applicable to the hangar, shop and ramp equipment occupied or used by the maintenance, purchasing and stores departments; and will be distributed on the basis of direct labor costs.

B. PAA will reimburse Panagra for passenger service direct flight costs incurred by Panagra in the charter service and charged to Account 6324 (including appropriate provision for vacations earned while in the charter service) and related expenses in Accounts 6328, 6336, 6374, 6380 (except for credits arising out of charges to PAA), 6657 and 6668. Expenses in the foregoing group of Accounts will be allocated to PAA in the same manner as similar accounts in the 5100 group. PAA will reimburse Panagra for passenger service direct flight costs recorded on the books of Panagra and incurred by either PAA or Panagra in the charter service and charged to Accounts 6343 and 6352.

PAA will reimburse Panagra for passenger service direct flight costs incurred by Panagra for the charter service and charged to Accounts 6353 and 6354 after proration to types of aircraft on a revenue mile basis for those costs included in the above Accounts not directly allocable to aircraft types.

All costs incurred under the charter service as described in the first two paragraphs of this paragraph B shall be prorated on the basis of the ratio of the revenue miles

flown by aircraft types in the charter service to the total revenue miles flown by such aircraft types including the revenue miles flown in the charter service.

[fol. 1817] Expenses recorded in Accounts 6351 (except for food withdrawals authorized by and for the other party), 6358 and 6367 on the books of PAA or Panagra should be absorbed by the respective Companies. Expenses in Account 6363 shall be for the account of the respective Companies in their respective areas of operation under the charter service except that expenses incurred at Balboa shall be for the account of the delivering carrier.

C. Panagra shall be reimbursed for training costs incurred in training flight crews (including pursers, stewards, and stewardesses) not reimbursed pursuant to Paragraphs A and B, as follows: Panagra shall segregate the training costs incurred in training flight crews other than pursers, stewards, and stewardesses on all aircraft types employed in the charter service and PAA will share in the costs so segregated for each type on the basis of a fraction the numerator of which shall be the flight crew salaries for such type chargeable to the charter service and the denominator of which shall be the total flight crew salaries for such type. In the case of training costs incurred with respect to pursers, stewards, and stewardesses PAA will share in such costs on the basis of a fraction the numerator of which shall be the salaries of pursers, stewards, and stewardesses chargeable to the charter service and the denominator of which shall be the total such salaries.

2. *Indirect Costs.*

A. Panagra will be paid a portion of so much of the operations overhead of Panagra as consist of the offices of Regional Manager, Operations Manager, Director of Safety, Chief Pilot (after proper deduction for revenue flying done by him or his staff, Operations Superintendent, Communications Superintendent, CAA Liaison and Panagra's Medical Department, together with the costs related to the functions of such offices, provided, however, that the offices of the Regional Manager shall be taken into account only to the

extent of 50%. Panagra will also be paid a portion of its United States expenses applicable to the operations, maintenance and communications departments, including [fol. 1818] amounts paid to PAA for such services, and a portion of the salaries and related expenses of Panagra's United States Maintenance Representatives as provided in Paragraph 7, to the extent that these have not been taken into account in other payments herein provided for. The amount so payable shall be the amount obtained by multiplying the total of the costs herein specified by a fraction of which the numerator will be 50% of the available ton miles flown in the charter service and the denominator the total available ton miles flown in Panagra's common carrier service plus 50% of the available ton miles flown in the charter service.

B. Panagra will be paid a portion of so much of its passenger service overhead as consists of the office of passenger service superintendent and the office of chief purser. The amount so payable shall be the amount obtained by multiplying the total of these costs by a fraction of which the numerator will be 40% of the available ton miles flown in the charter service and the denominator the total available ton miles flown in Panagra's common carrier service plus 40% of the available ton miles flown in the charter service.

C. Panagra will be paid a portion of the costs of its financial and accounting departments (up to and including the level of the offices of assistant treasurer and assistant comptroller directly supervising the accounting under this agreement and including the audit staff attached to Panagra's United States Maintenance Representatives) and the cost of the personnel department located at New York. The amount so payable shall be the amount obtained by multiplying the total of these costs by a fraction of which the numerator will be 35% of the available ton miles flown in the charter service and the denominator the total available ton miles flown in Panagra's common carrier service plus 35% of the available ton miles flown in the charter service.

D. All references to available ton miles flown are to miles flown on revenue flights.

[fol. 1819] 3. *Return on Panagra's Investment.*

Panagra shall be paid an amount representing a fair rate of return on

(i) So much of Panagra's investment (computed at cost less depreciation at rates fixed as provided in 1A4 above) in the type of flight equipment (Accounts 1601-1608) and the passenger service equipment thereon (Account 1611) used in the charter flights as shall be allocable to such service on a revenue miles basis as set forth in paragraph 1A3.

(ii) So much of Panagra's funds or securities earmarked and reasonably required for replacement of or additions to the type of flight equipment operated or to be operated in the charter service (not less than the funded depreciation reserve with respect thereto) as shall be allocable to the charter service on a revenue miles basis as set forth in paragraph 1A3. In case disbursement of such funds or use of the equipment purchased shall be other than as indicated by such earmarking, appropriate adjustments of prior billings under this subparagraph will be made.

(iii) So much of Panagra's working capital as shall be allocable to the charter service operated by Panagra pursuant to this Agreement, to wit, three times Panagra's expenses for this operation for each month, exclusive of depreciation accruals and of amounts paid in the first instance by PAA.

(iv) So much of Panagra's investment (net of depreciation reserves) in maintenance and overhaul facilities as shall be allocable to the flight equipment maintenance and overhaul services performed by Panagra for the charter service on the same basis as stated in paragraph 1A5 with respect to shop burden.

(v) So much of Panagra's investment (net of depreciation reserves) in planes normally used for training, in link trainers and in other major items of special equipment used for the training of flight crews as the amounts in Account 5128 allocated to the charter service shall bear to the total amounts in such account.

[fol. 1820]

ANNEX 2

*Detailed Provisions for Payments by Panagra to PAA Pursuant to Paragraph 17(b)**

A. The costs to be reimbursed by Panagra to PAA under clause (1) shall be the direct and indirect expenses of the types presently set forth in the following accounts:

(1) The direct labor of employees engaged in the maintenance, periodic inspection, repair, overhaul, etc. of Panagra's aircraft, engines and other flight equipment of the type normally recorded in Accounts 5225-5227, inclusive.

(2) The cost, less return parts credit and/or salvage, of spare parts and assemblies, materials and supplies consumed in the maintenance, periodic inspection, repair, overhaul, etc., and the cost of outside repairs of Panagra's aircraft, engines and other flight equipment, of the type normally recorded in Accounts 5246-5248, inclusive.

(3) A share of the following indirect or burden expenses attributable to the base or bases at which Panagra's aircraft are maintained or overhauled (distributed on the basis of direct labor costs):

(a) Shop burden expenses applicable to the maintenance and stores departments charged in Accounts 6221-6274 and solely applicable to maintenance of flight equipment and ground equipment used in connection with maintenance of flight equipment.

(b) Salaries and expenses of the purchasing and cost accounting departments included in Accounts 6621-6674.

(c) Insurance—public liability, property damage and general insurance expenses included in Account

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for Air Carriers presently in effect.

6655 and applicable to the maintenance and stores departments.

[fol. 1821] (d) Cost of insurance of all kinds included in Account 6657 and applicable to the maintenance and stores departments.

(e) Payroll taxes included in Account 6668 and taxes other than payroll included in Account 6669 and applicable to the maintenance and stores departments.

(f) Depreciation included in Account 6978 and applicable to the hangar, shop and ramp equipment occupied or used by the maintenance, purchasing and stores departments.

B. The amount payable by Panagra to PAA for depreciation of flight equipment spare parts and assemblies under clause (2) shall be determined by applying to the portion of Account 5977—Flight Equipment Spare Parts and Assemblies for the bases where Panagra's aircraft and/or engines are maintained a ratio of which the numerator shall be the dollar value of such spare parts and assemblies issued out for the account of Panagra and the denominator shall be the total dollar value of all such spare parts and assemblies issued.*

C. The investment of PAA on which a return shall be paid pursuant to clause (3) shall be the sum of the following:

(a) The sum obtained by multiplying PAA's total investment (net of depreciation reserves) in maintenance and overhaul facilities used in or useful for maintenance and overhaul of Panagra's aircraft at the bases where such work is performed by a fraction the numerator of which will be the total direct maintenance labor costs charged to Panagra, and the denominator of which shall be the total direct maintenance labor costs for such bases.

---

* See attached letter agreement.

(b) The sum obtained by multiplying PAA's investment (net of depreciation reserves) in Flight Equipment Spare Parts and Assemblies at the bases where Panagra's aircraft are maintained by the same fraction described in paragraph B above; and

[fol. 1822] (c) An allowance for working capital equal to three times PAA's charges under subparagraph 17(b) for the preceding month (after eliminating the portion of such charges representing depreciation accruals, FESPA obsolescence and return on investment).

[fol. 1823]

ANNEX 3

Basis for Division of Revenues from Through Rates

Revenues from transportation between a point on PAA's route and a point on Panagra's route conducted under through rates (whether or not moving over the charter service) shall be divided as follows:

(1) *Passenger Fares*—Normal adult one-way all year joint fares shall be apportioned between PAA and Panagra in proportion to the applicable normal adult one-way all year fare in U. S. dollars for the PAA section of the route to the applicable such fare in U. S. dollars for the Panagra section of the route. All other joint fares, such as round trips, circle, open jaw, excursion, children's, Government, sleeper and extra fares, shall be apportioned in accordance with the respective applicable fares in U. S. dollars for the respective sections of the route.

(2) *Excess Baggage Charges*—to be apportioned on the same principle as passenger fares. Excess baggage valuation charges will be retained by the collecting carrier.

(3) *Express Charges* (transportation, valuation, and shippers' cargo insurance)—to be apportioned in propor-

tion to the respective mileages via the most direct routes between the points of origin and destination on the routes of PAA and Panagra and the junction point of PAA's and Panagra's services (the premium cost of air express carrier's liability insurance and air press shippers' cargo insurance on shipments moving under through rates to be divided in proportion to the shares in the express revenues).

(4) *Transportation Rates for Foreign Mail*—(a) Foreign Mail Destined to the United States, its possessions and territories, (exclusive of charges for domestic handling)—to be apportioned in proportion to the respective mileages via the most direct routes between agreed control point or points in the country of origin and [fol. 1824] the junction point of PAA's and Panagra's services and between such junction point and the PAA United States terminus to which the mail is dispatched.

(b) Foreign Mail Destined to Other Foreign Countries Applicable under New Transportation Rates—In accordance with the transportation rates for foreign mail approved by the U. S. Post Office Department for effectiveness January 1, 1947, as of the first day of the month in which each country accepts such new rates the transportation charges will be apportioned in proportion to the respective mileages via the most direct route between agreed control point or points in the country of origin and the junction point of PAA and Panagra services and between such junction point and the terminus on PAA or Panagra, as the case may be, to which the mail is dispatched.

(c) The route mileages applicable in (a) and (b) above will be determined in accordance with mileages approved by the U. S. Post Office Department.

(d) Foreign Mail Destined to Other Foreign Countries Applicable Prior to Effectiveness of New Transportation Rates—Until such time as the respective countries served by PAA and Panagra accept the transportation rates approved by the U. S. Post

Office Department on January 1, 1947, the initial carrier will retain the mail pay received from the country of origin and will pay the onward carrier an amount obtained by multiplying the weight of the mail transferred to the latter by the existing rate from the country of transfer to the country of final destination. In the case of mail transferred in the Canal Zone, Panama will be considered the country of transfer. In the case of mail transferred at Buenos Aires, Argentina will be considered the country of transfer. For mail transferred at the Canal Zone and Buenos Aires, the rate to be used as a basis of calculation will be the rate in effect as of December 31, 1946. As each country con- [fol. 1825] cerned accepts the new reduced transportation rates, the mail transportation charges will, as of the first day of the month in which such rates are accepted by each such country, be apportioned on the same mileage basis as stated in sub-paragraph (b) above. It is the obligation of each carrier to notify the other of the effective date of the acceptance of new transportation rates by the respective countries served by its lines.

(5) Route mileages applicable to paragraphs (1), (2) and (3) will be determined in accordance with C. A. B. Mileage Booklet No. 2 (Revised) and any revisions thereof.

The foregoing provisions are intended to be consistent with applicable resolutions of International Air Transport Association (IATA) of which PAA and Panagra are members; in the event that such resolutions should be changed in such a manner that any of the foregoing provisions would no longer be consistent therewith, the foregoing provisions shall be automatically amended to conform with the changed IATA resolutions.

[fol. 1826] January 9, 1948.

Pan American-Grace Airways, Inc.
135 East 42nd Street
New York City

Dear Sirs:

This letter will evidence the agreements that have been reached as to the method in which Annex 2, Paragraphs B and C(b), shall be applied.

The amount payable by Panagra to PAA under Paragraph B will be determined in the following manner:

Separate computations will be made for FESPA at each location where Panagra uses FESPA. FESPA will be divided into six separate categories, to wit: airplane parts, engine parts, engine accessories, instruments and parts, propeller parts, and aircraft accessories. Each of these categories will be further subdivided into sub-categories as between DC-3, DC-4, CV-240 and other types of airplanes. Depreciation on each of these sub-categories shall be considered as a separate pool of expense. Panagra will share in such depreciation only in months in which issues at the respective base and out of the respective sub-category are made to Panagra, and, in the case of FESPA relating to CV-240 aircraft, effective only commencing with the month in which PAA begins scheduled operation with such aircraft.

The same procedure shall be followed in computing the amount on which return on investment shall be computed pursuant to Paragraph C(b).

It is understood that the arrangements set forth in this letter represent simply a practical application, under present conditions, of the principles set forth in the specified paragraphs of Annex 2 of the contract, and that either party may at any time give notice that it no longer considers these arrangements to be suitable, such notice, however, to have no effect upon any months preceding that in which such notice is given.

[fol. 1827] If the foregoing represents your understanding, kindly so indicate on the enclosed copy of this letter.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.

[Stamp—Date Illegible]

THROUGH FLIGHT AGREEMENT
—SUPPLEMENT NO. 3

THIS AGREEMENT, made and entered into this 28 day of January, 1949, by and between PAN AMERICAN AIRWAYS, INC., a New York corporation, hereinafter called "PAA" and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra".

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by Supplement No. 1 dated May 28, 1947 and by Supplement No. 2 dated January 9, 1948, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

43. The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in paragraph 29, effective as of March 1, 1948:

Miami Schools	*Dollars Per Hour*
Mechanics	1.2247
Meteorologists	2.1370
Radio	1.6534
Pilot	18.0160
Link	7.0411
Miami Aircraft	
DC-3 Passenger	77.6875
DC-3 Cargo	83.3226
DC-3 Trainer	54.3134
DC-4 Passenger	165.8967
DC-4 Cargo	131.4446
DC-4 Trainer	115.2668

44. The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in paragraph 43, effective from September 1, 1948 until further notice:

[fol. 1829]

School	*Hourly*
Miami—Ground Training	$ 1.4493
Miami—Link	9.6116
Brownsville—Link	9.1569
Miami—Pilot	25.1983
Brownsville—Pilot	33.0830
Rio—Pilot	10.4547
New York—Pilot	26.8186
Aircraft Type	
DC-3 Aircraft	101.5666
DC-4 Passenger	189.5431
DC-4 Cargo	171.6570

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year first above written.

THROUGH FLIGHT AGREEMENT
—SUPPLEMENT NO. 4

THIS AGREEMENT, made and entered into this Ninth day of February, 1949, by and between PAN AMERICAN AIRWAYS, INC., a New York corporation, hereinafter called "PAA and PAN AMERICAN GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra".

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946 which agreement has been supplemented and amended by Supplement No. 1 dated May 28, 1947 and by Supplement No. 2 dated January 9, 1948, and by Supplement No. 3, dated January 28, 1949 said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

45. With respect to the year 1948 only, and notwithstanding the provisions of paragraph 17 (c) of the Through Flight Agreement, return on investment and depreciation

payable by PAA to Panagra with respect to Panagra-owned DC-4 equipment shall be accumulated separately for each of the two periods; January 1, 1948 through April 30, 1948; and May 1, 1948 through December 31, 1948. All other items of expense shall be payable for the year 1948 on the accumulative basis for the entire year as is provided in paragraph 17 (c) of the Through Flight Agreement.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year first above written.

SUPPLEMENT NO. 5

TO

THROUGH FLIGHT AGREEMENT

BETWEEN

PAN AMERICAN AIRWAYS, INC.,

AND

PAN AMERICAN-GRACE AIRWAYS, INC.

DATED MAY 11, 1949

[fol. 1832]

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 5

AGREEMENT made and entered into as of the 11th day of May, 1949, by and between PAN AMERICAN AIRWAYS, INC., a New York corporation, (hereinafter called "PAA"), and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation (hereinafter called "Panagra"):

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, and supplements thereto dated respectively May 28, 1947, January 9, 1948, January 28, 1949, and February 9, 1949, relating to the charter of Panagra's aircraft to PAA for through operation on certain of PAA's routes north of the Canal Zone and other matters, which agreements are hereinafter referred to as "the Through Flight Agreement"; and

WHEREAS, Panagra desires to enter into an agreement with National Airlines, Incorporated, a Florida corporation (hereinafter called "National"), for the further charter to National of Panagra's aircraft which have been operated by PAA between the Canal Zone and Miami for operation by National over National's Miami-New York route; and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement so as to provide for such further charter and in certain other respects as herein set forth.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

46. PAA agrees that Panagra's aircraft chartered to PAA pursuant to the Through Flight Agreement for through operation between the Canal Zone and Miami, Florida may be further chartered by Panagra to National for through operation by National over National's Miami-New York route upon the specific terms and conditions set forth in an agreement between Panagra and National being [fol. 1833] executed simultaneously herewith (hereinafter referred to as "the Panagra-National Agreement"). Panagra does not admit that such agreement by PAA is re-

quired to enable Panagra to enter into the Panagra-National Agreement.

47. Panagra hereby constitutes and appoints PAA as Panagra's agent, for the term of the Panagra-National Agreement, to deliver Panagra's aircraft to National at Miami, for the purpose of flights over National's route pursuant to the said agreement and to receive delivery of Panagra's aircraft from National at Miami. PAA is authorized as such agent, on Panagra's behalf, to receive and execute such receipts, to perform such inspections, to make such checks and measurements, and to perform all such other acts as may be necessary or appropriate in connection with the delivery or return of the said aircraft. In acting as such agent with respect to the delivery of Panagra's aircraft to National and the return of Panagra's aircraft by National at Miami, PAA shall be bound to exercise the same and only the same degree of care as PAA exercises with respect to the delivery and return of its own aircraft under an agreement between PAA and National being executed simultaneously herewith (hereinafter referred to as "the PAA-National Agreement").

48. PAA and Panagra shall from time to time agree as to the personnel to be assigned to National's airports pursuant to Paragraph 6 (b) of the PAA-National Agreement and the Panagra-National Agreement to the end of avoiding duplication of such personnel.

49. The second sentence of paragraph 3 of the Through Flight Agreement is amended by substituting the words and figures "forty-five (45)" for "sixty (60)".

50. Paragraph 10 of the Through Flight Agreement is amended by adding at the end thereof:

"(c) PAA will furnish Panagra with monthly reports showing for all sales from New York, Washington and [fol. 1834] Miami to Buenos Aires how many were routed via the East Coast of South America and how many were routed via the West Coast of South America."

51. The last sentence of paragraph 14 of the Through Flight Agreement is amended to read as follows:

> "PAA and Panagra will agree with each other (and with National if the Panagra-National Agreement shall become and be effective) in advance on appropriate advertising programs (including newspaper and magazine space, advertising and display pieces and collateral material) and budgets therefor, for promoting the through flights made pursuant to this Agreement and the approved expense of all such advertising shall be apportioned among them as from time to time agreed, provided, however, that no charge shall be made for transporting advertising material to the most effective point of use."

52. The second sentence of paragraph 15(a) of the Through Flight Agreement as amended is further amended to read as follows: "PAA shall be deemed to be in possession of Panagra's aircraft (1) in the case of aircraft turned over to PAA for operation on through flights under this agreement, from the time when such aircraft is so turned over to PAA by Panagra until the time when such aircraft is either (i) returned by PAA to Panagra or (ii) turned over by PAA to National for operation by National pursuant to the Panagra-National Agreement or (iii) turned over by PAA to National with Panagra's consent for operation pursuant to the PAA-National agreement, in either of which latter events the aircraft shall again be deemed to be in PAA's possession when returned to it by National, and (2) in the case of aircraft turned over to PAA for maintenance, from the time when such aircraft is turned over to PAA at one of the latter's maintenance bases until the time when such aircraft is returned to Panagra; except, in either case, for non-revenue or other special flights (excluding test flights made under [fol. 1835] PAA custody following maintenance and according to CAA requirements) during such period made at the instance and request of Panagra".

53. Paragraph 15 of the Through Flight Agreement is further amended to include the following: "(e) In the

event of loss or damage to or delay in the delivery of baggage or personal effects of a passenger, or cargo, express or mail on an aircraft making a through flight hereunder, the party having possession of the aircraft at the time the loss, damage or delay occurs shall as between the parties hereto be responsible therefor. In case it is not possible to establish which party had possession of the aircraft at the time of such loss, damage or delay, any liability or expense arising therefrom shall be shared between the parties in proportion to the revenue received from the transportation of the passenger whose baggage or personal effects shall have been lost, damaged or delayed or from the transportation of the cargo, express or mail which shall have been lost, damaged or delayed, provided, however, that if any such flight has been operated under the Panagra-National Agreement (including a flight operated with PAA aircraft at Panagra's request) any such liability or expense shall be shared in said proportions among Panagra, PAA, and National or if it shall be possible to establish that one of such parties did not have possession of the aircraft at the time of such loss, damage or delay, by the other two parties in said proportion".

54. Paragraph 16 of the Through Flight Agreement as amended is amended to read as follows:

"16. *Risk of Loss of Aircraft.*

Unless otherwise agreed Panagra shall carry appropriate insurance providing against loss of or damage to its aircraft or other property under charter to PAA pursuant to this Agreement and Panagra will cause PAA to be included as a party insured. Such insurance [fol. 1836] shall have the same coverage as is provided by Panagra for similar aircraft or other property while in Panagra's possession. Panagra will advise PAA from time to time of the provisions of its insurance policies on such aircraft or other property and PAA will not knowingly operate or use the aircraft or other property chartered to it in such a manner that Panagra shall be deprived of the benefits of its insurance coverage. PAA shall not be liable to

Panagra for loss or damage to Panagra's aircraft or other property while under charter to PAA pursuant to this Agreement, except for violation by PAA of the obligations assumed by PAA in the preceding sentence and except for any loss or damage occasioned by PAA's use of such aircraft or other property as to which Panagra is unable to collect from its insurer by reason of any franchise or deductible provisions in its insurance policies if such loss or damage was occasioned by the gross negligence of PAA or its employees acting within the course of their employment."

55. Paragraph 17(h) of the Through Flight Agreement (added by paragraph 34 of Supplement No. 2) is amended by adding the following at the end thereof: "and in the case of mileage flown over the route of National pursuant to the Panagra-National agreement will be those effective as shown in CAB Mileage Booklet No. 1, Airport-to-Airport Mileages over Interstate Routes of Certificated Air Carriers, and in any revisions thereof".

56. Paragraph 23(e) of the Through Flight Agreement is amended by adding at the end thereof the words: "and the delivery of possession of Panagra's aircraft to National and the return of such possession from National pursuant to the Panagra-National Agreement".

57. (a) All references in Annex 1A to the Through Flight Agreement to "the charter service" shall refer only to the charter service operated by PAA pursuant to said agree-
[fol. 1837] ment. All references in said Annex 1A to the total revenue miles flown by Panagra's aircraft or to a revenue mile basis shall include revenue miles flown by such aircraft pursuant to the Panagra-National Agreement.

(b) Paragraph 1A1(1) of said Annex 1A is amended by adding at the end thereof the following: "and Panagra will cause National to advise Panagra at the close of each month of the total gallonage delivered by National to Panagra's aircraft, classified by aircraft types, under the Panagra-National Agreement".

(c) The last sentence of paragraph 1A3 of said Annex 1A is amended by adding after the words "or to Panagra's common carrier service" the words "or to the charter service operated pursuant to the Panagra-National Agreement" and by eliminating the last seven words of the sentence and substituting therefor the words "to the service to which they relate".

(d) The parenthetical phrases in paragraphs 1A3 and 1B of said Annex 1A now reading: ("except for credits arising out of charges to PAA") are amended to read: ("except for credits arising out of charges to PAA and charges to National").

(e) Paragraph 1A4 of Annex 1A of the Through Flight Agreement is amended by adding thereto the following paragraph:

> "If Panagra shall base its computations of depreciation of Flight Equipment used in the charter service on a residual value of such equipment which is increased by the amount of one major overhaul and shall make such computations effective as from May 31, 1947, PAA will not participate in the credits resulting from reversal of the amount by which major overhaul reserves shall have been so increased when such equipment is sold or otherwise disposed of."

(f) The last sentence of paragraph 2A, the last sentence of paragraph 2B, and the last sentence of paragraph 2C of [fol. 1838] said Annex 1A are amended by adding at the end of each sentence the words "and in the charter service operated pursuant to the Panagra-National Agreement".

(g) The first parenthetical clause in paragraph 3(i) of said Annex 1A is amended by adding at the end thereof the words "and less overhaul reserves against such flight equipment computed in the manner recognized by the Civil Aeronautics Board".

58. PAA agrees that at Panagra's written request it will exercise its right of termination under paragraph 19, sub-section (2), clauses (ii) and (vi) of the PAA-National

Agreement. Panagra agrees that at PAA's written request it will exercise its right of termination under paragraph 19, sub-section (2), clauses (ii), (iii), (iv), (v), and (vi) of the Panagra-National Agreement.

59. This Supplement No. 5 shall become effective only in the event that the agreement dated May 11, 1949 between Panagra and National shall become effective, except that paragraphs 49, 50, 51 and 53 (except for the proviso to the last sentence of the amendment made therein) shall become effective immediately and that the amendments made in paragraphs 57 (e) and (g) shall be effective as from May 31, 1947.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by the officers thereunto duly authorized on the day and year first above written.

[fol. 1840]

Before the

CIVIL AERONAUTICS BOARD

Docket No. 3787

In the Matter of the Application of

PAN AMERICAN WORLD AIRWAYS, INC.

for a modification of the Board's Order Serial No. E-570 approving an agreement between the Applicant and Pan American-Grace Airways, Inc. and a companion agreement between Pan American Airways Corporation and W. R. Grace & Co.

AMENDMENT NO. 1 TO APPLICATION

PAN AMERICAN WORLD AIRWAYS, INC. (herein called "PAA") hereby presents this Amendment No. 1 to its application herein:

1. In the application herein verified May 11, 1949, PAA prayed that the Board make and enter an order modifying order Serial No. E-570 so as to extend to July 1, 1960, or to such later date as the Board might determine, the Board's approval of the Through Flight Agreement dated July 30, 1946, between PAA and Pan American-Grace Airways, Inc., a Delaware corporation, of Supplements Nos. 1 to 5, inclusive, thereto, and of an agreement dated July 30, 1946 between Pan American Airways Corporation (a Delaware corporation, to the rights and liabilities of which PAA has since succeeded) and W. R. Grace & Co., a Connecticut corporation.

2. By Order Serial No. E 4130, the Board extended its approval of the two agreements dated July 30, 1946, until such time as the Board entered an order approving or disapproving the application of PAA herein.

[fol. 1841] 3. By Order Serial No. E-4575, the Board approved certain amendments to the Through Flight Agree-

ment until such time as the Board entered an order approving or disapproving the application of PAA herein. The amendments so approved did not include Supplement No. 5 (CAB File No. 727 A-6).

4. It appears from the atfached copy of a letter dated April 25, 1951, from PAA to Pan American-Grace Airways, Inc., that because of the repudiation by National Airlines, Inc., of an agreement between said National Airlines, Inc. and PAA dated May 11, 1949 (approval of which agreement had been sought in Docket No. 3786) and the dismissal by the Board of the said Docket No. 3786 and of an application for approval of an interchange agreement between National Airlines, Inc. and PAA, (Docket No. 3785), Supplement No. 5 to the Through Flight Agreement will not become effective, except in respect of paragraphs 49, 50, 51, 53 (except for the proviso to the last sentence of the amendment made therein), and 57 (e) and (g). PAA, therefore, withdraws its application herein for approval of said Supplement No. 5 to the Through Flight Agreement except for those portions thereof indicated in the preceding sentence.

5. Since the Board's Order Serial No. E-4575, PAA has entered into Supplements Nos. 8 and 9 to the Through Flight Agreement which have been filed as Agreements CAB Nos. 727 A-9 and 727 A-10.

WHEREFORE, PAA amends the prayer of its application herein so that the same shall request the Board to make and enter an order modifying order Serial No. E-570 so as to extend to July 1, 1960, or to such later date as the Board may determine, the Board's approval of the Through Flight Agreement dated July 30, 1946, of CAB Agreements Nos. 727, 727 A, 727 A-2, 727 A-3, 727 A-4, 727 A-5 so much of 727 A-6 as is contained in paragraphs 49, 50, 51, [fol. 1842] 53 (except for the proviso to the last sentence of the amendment made therein) and 57 (e) and (g), 727 A-7, 727 A-8, 727 A-9 and 727 A-10, and of the agreement dated

July 30, 1946, between Pan American Airways Corporation and W. R. Grace & Co.

Respectfully submitted,

PAN AMERICAN WORLD AIRWAYS, INC.

By /s/ J. T. TRIPPE

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 10

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 6

THIS AGREEMENT, made this 18 day of October, 1949, by and between PAN AMERICAN AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra",

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by Supplement No. 1 dated May 28, 1947, by Supplement No. 2 dated January 9, 1948, by Supplement No. 3 dated January 28, 1949, by Supplement No. 4 dated February 9, 1949, and by Supplement No. 5 dated May 11, 1949, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth, with a view to saving executive, accounting and clerical expense in connection with calculation and auditing of certain payments provided for in the Through Flight Agreement;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

60. The amounts payable by Panagra to PAA which are referred to in the provisions of Annex 2 of Supplement No. 2 to the Through Flight Agreement mentioned below shall be determined as follows:

(a) The payment referred to in subsection (a) of section 3 of paragraph A. of said Annex 2 in respect of work done at Miami during the calendar year 1949 shall be an amount equal to 210% of the direct labor charges to Panagra for maintenance and overhaul of Panagra's flight equipment at Miami pursuant to para-

graph 7 of the Through Flight Agreement during the year 1949.

(b) The payment referred to in paragraph B. and section (b) of paragraph C. of said Annex 2 shall [fol. 1845] (i) for the year 1948 be an amount equal to 35% of the amounts billed by PAA to Panagra for Flight Equipment Spare Parts and Assemblies (FESPA) utilized during 1948, and (ii) for the year 1949 be an amount equal to 30% of the amounts billed by PAA to Panagra for FESPA utilized during 1949. The FESPA referred to in this subparagraph (b) to which said percentages will be applied shall include only FESPA used by PAA in connection with maintenance, conversion and modification of Panagra's aircraft, engines, and other flight equipment, it being specifically understood that it shall not include FESPA issues to Panagra line stations or FESPA classified as component parts which are handled on a free exchange basis, but shall include FESPA used in repair, overhaul or maintenance of such component parts or in replacing non-repairable components. Any return of FESPA to inventory, as well as any adjustment in cost, will be reflected in an adjustment in the amount payable hereunder, such adjustment to be applicable to the period when such return to inventory or adjustment in cost takes place.

(c) The payments referred to in sections (a) and (c) of paragraph C. of said Annex 2 for the year 1949 in respect of work done at Miami shall be an amount equal to 17½% of the direct labor charges to Panagra for maintenance and overhaul of Panagra's flight equipment at Miami pursuant to paragraph 7 of the Through Flight Agreement during the year 1949.

(d) The parties will consult as soon as practicable in 1950, and each year thereafter while the Through Flight Agreement continues in effect, with a view to fixing the basis for determining the amounts of the payments referred to in the provisions of said Annex

2 mentioned above. In the event that the parties shall not have agreed on or before the first day of April of any year as to the basis for such determination for the current year with respect to any of said provisions and said date shall not have been extended by mutual agree-
[fol. 1846] ment, the payments under the provision or provisions as to which agreement is not reached shall be determined for such year in accordance with the provisions of Annex 2, without regard to the foregoing provisions of this Supplement No. 6.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 11

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 7

THIS AGREEMENT, made and entered into this 31st day of January, 1950, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation (the corporate name of which was formerly "Pan American Airways, Inc."), hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra".

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by Supplement No. 1 dated May 28, 1947, by Supplement No. 2 dated January 9, 1948,

by Supplement No. 3 dated January 28, 1949, by Supplement No. 4 dated February 9, 1949, by Supplement No. 5 dated May 11, 1949, and by Supplement No. 6 dated October 18, 1949, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth:

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

61. The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in paragraph 44, effective as of January 1, 1950:

School	*Asociated and Affiliated Companies*
Miami—Ground Training	$ 1.7317
Miami—Link	10.6945
Miami—Pilot	29.0495
Aircraft Type	*Hourly*
DC-3 Aircraft	96.4380
DC-4 Passenger	186.5386
DC-4 Cargo	172.3714

[fol. 1848] IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year first above written.

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 8

THIS AGREEMENT, made this 26th day of December, 1950, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra",

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by Supplement No. 1 dated May 28, 1947, by Supplement No. 2 dated January 9, 1948, by Supplement No. 3 dated January 28, 1949, by Supplement No. 4 dated February 9, 1949, by Supplement No. 5 dated May 11, 1949, by Supplement No. 6 dated October 18, 1949, and by Supplement No. 7 dated January 31, 1950, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth, with a view to saving executive, accounting and clerical expense in connection with calculation and auditing of certain payments provided for in the Through Flight Agreement:

NOW, THEREFORE, This Agreement Witnesseth:

62. The following paragraph is hereby substituted for paragraph 17(c) of the Through Flight Agreement, effective for the period commencing on the date of this Supplement No. 8 and terminating on the date this paragraph 62 ceases to be effective as hereinafter provided:

"(c) Each of the parties will render to the other as soon as practicable after the end of each calendar month bills for the payments due pursuant to the Through Flight Agreement with respect to such month. All such bills will be paid on or before the fifteenth day after the close of the month to which such bills relate or on or before the fifth day after receipt of such bills, whichever is later. In the event payment of any such bill is delayed beyond the time specified in the preceding sentence, the amount due thereon shall be increased for each day of such delay by an amount which bears the same ratio to one-thirtieth of the total amount of the return on working capital hereunder for such month to the party to which payment is due (com-
[fol. 1850] puted in accordance with the rates shown in paragraph 67 hereof or in Annex 1-B, whichever is applicable) as the amount due on such bill bears to the total amount due on all bills rendered by said party under the Through Flight Agreement for such month."

63. Annex 1-B attached hereto and made a part hereof is hereby substituted for Annex 1-A to the Through Flight Agreement, effective for the period commencing on January 1, 1950 and terminating on the date this paragraph 63 ceases to be effective as hereinafter provided.

64. In the event that there shall be an adjustment in Panagra's hull insurance expense for any period after September 30, 1948, to reflect Panagra's actual experience for such period, there shall be a proportionate adjustment in the amount charged to Pan American pursuant to the Through Flight Agreement in respect of hull insurance for such period.

65. Section A of Annex 2 to Supplement No. 2 to the Through Flight Agreement is amended by adding the following at the end of said Section A, effective for the period commencing on January 1, 1950 and terminating on the date this paragraph 65 ceases to be effective as hereinafter provided:

"(4) The costs payable by Panagra to PAA referred to in subsections (1), (2) and (3) of this Section A in

respect of work performed at Miami shall be determined on the basis of applicable prices in the currently effective quarterly official price lists for such work issued by Pan American World Airways, Inc., Latin American Division. The official price lists referred to in this subsection (4) relating to the first, second, third and fourth calendar quarters of the calendar year 1950 are attached hereto, marked Exhibit A, January-March, 1950, Exhibit B, April-June, 1950, Exhibit C, July-September, 1950, and Exhibit D, October-December, 1950, respectively, and made a part hereof, and are hereby accepted by Panagra. The prices set forth in the official price lists referred to in this subsection (4) shall be adjusted retroactively to reflect any change in pay scales provided in any collective bargaining agreement with employees which affects the cost of work to which such prices relate. The prices set forth in such price list for overhauls include labor and overhead appropriate to the overhaul work or services specified in such price lists, and any work or services in addition to, or different in nature or extent from, the work and [fol. 1851] services so specified, which shall be requested by Panagra in writing, whether normally considered as involving direct labor or as being included only in overhead, will be charged for separately either in accordance with such price lists or, in case no price therefor is set forth therein, at prices to be negotiated at the time such work is requested. Such prices will include overhead where appropriate. Such additional work or services are in the nature of, but not limited to, the following types of services:

(1) Aircraft and radio engineering services over and above the requirements of the Miami Overhaul Base maintenance, overhaul and repair functions.

(2) Laboratory fuel and oil sampling and other testing or research services.

(3) Flight and crew scheduling services applicable to Panagra's certificated routes.

(4) First aid, medical service and physical examinations furnished to Panagra employees or applicants.

(5) Civil Aeronautics Authority specifications handling services.

(6) Packaging, clearance and shipping services to fulfill the requirements of Panagra, such clearance and shipping services to be charged for in accordance with purchasing and shipping agreement dated July 14, 1948."

66. The provisions of subparagraphs (b) and (c) of paragraph 60 of the Through Flight Agreement applicable to the year 1949 shall continue in effect for the period commencing on January 1, 1950 and ending on March 31, 1950.

67. Effective as of April 1, 1950, the amounts payable by Panagra to PAA which are referred to in paragraphs B and C of Annex 2 of Supplement No. 2 to the Through Flight Agreement shall be determined at the following rates per revenue mile for each revenue mile flown by Panagra in its own service and in the service of others, except revenue miles flown pursuant to the Through Flight Agreement over the routes of PAA:

[fol. 1852]

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Return on Investment Working Capital	0.43 ¢	0.52 ¢
Miami Overhaul Base facilities (including return on investment in prepaid rent and deferred shop burden)	1.03	1.54
Flight Equipment Spare Parts and Assemblies	1.97	1.89
Depreciation on Flight Equipment Spare Parts and Assemblies	4.62	1.85

68. The prices and charges provided for in paragraphs 65 and 67 and in Annex 1-B hereof shall be subject to review and change as follows:

(a) PAA shall furnish to Panagra the official price list referred to in paragraph 65 for each calendar quarter before the beginning of such quarter, and if Panagra shall not have given PAA written notice of objection thereto within a period of three (3) weeks commencing on the first day of such calendar quarter or within such longer period as may be mutually agreed upon, said price list shall be effective for the purposes of paragraph 65 hereof as of the first day of such calendar quarter. In the event Panagra shall give written notice of objection to said price list within the period specified in the preceding sentence, billings and payments shall be tentatively made in accordance with the prices in the price list last agreed upon, until such time as all prices in the price list shall have been settled for the period in question, at which time the tentative billings and payments shall be adjusted in accordance with the prices so settled.

(b) The charges provided for in Annex 1-B and paragraph 67 hereof shall be subject to review at six months' intervals, on a prospective basis, such reviews to be for the six months' periods commencing with April 1 and October 1 of each year, starting with October 1, 1950. The parties will consult as early as practicable prior to the end of each such period with a view to fixing such charges for the ensuing six months' period, and the charges when agreed upon between the parties shall be effective as of the beginning of such [fol. 1853] six months' period. In the event that the parties are unable to agree before the first day of any such six months' period, or any such later date as may be mutually agreed upon, as to the charges for such period under Annex 1-B and paragraph 67, billings and payments shall be tentatively made in accordance with the prices last agreed upon, until such time as all prices shall have been settled for the period in question, at

which time the tentative billings and payments shall be adjusted in accordance with the prices so settled. Any change agreed upon in the charges provided for in Annex 1-B or paragraph 67 will be reflected in an appropriate amendment to the Through Flight Agreement.

(c) In the event the parties are unable to agree on the price list or charges within the respective times specified in subparagraphs (a) and (b) of this paragraph 68, paragraphs 63, 65 and 67 of this Supplement No. 8 shall cease to be effective as of the last date on which agreed price lists and charges were both in effect, and payments for the period thereafter shall be determined in accordance with the provisions of the Through Flight Agreement without regard to said provisions. In such event, billings shall be cumulative from the date said provisions cease to be effective to the end of the then current year, and thereafter in accordance with Paragraph 17(c) of the Through Flight Agreement.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

[fol. 1854]

ANNEX 1-B

DETAILED PROVISIONS FOR PAYMENTS BY PAA TO PANAGRA*

1. Charges for gasoline used in the charter service shall be accounted for as follows:

(1) PAA will advise Panagra at the close of each month of the total gallonage delivered by PAA, classified by aircraft types;

(2) Panagra will allocate to the charter service a gallonage equal to the amount obtained by multiplying the respective gallonages loaded during the month into the types of aircraft used in the charter service by a fraction of which the numerator shall be the revenue miles flown by such type in the charter service and the denominator shall be the total revenue miles flown by such type;

(3) PAA will price the amount specified in (2) at the weighted average price of the deliveries specified in (1). This amount will be retained as a cost of PAA;

(4) Any excess of the cost of the deliveries described in (1) over the cost to be retained by PAA as described in (3) will be billed by PAA to Panagra. Any excess of the cost described in (3) over the cost of deliveries described in (1) will be credited to Panagra by PAA.

2. PAA will reimburse Panagra for all costs properly recorded by Panagra for the aircraft type used in the charter service in Accounts 5123, 5124, 5225-5227, and 5246-5248, inclusive, 5270, 5271 and 5280 (except for credits arising out of charges to PAA), excluding that portion of such costs which relate to return on investment and depreciation on flight equipment spare parts and assemblies

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for Air Carriers presently in effect.

and which originates with PAA, but including shop burden of Panagra determined as set forth below. All costs dealt with in this paragraph shall be allocated to the charter service on the basis of the ratio of the revenue miles flown by such aircraft in the charter service to the total revenue miles flown by such aircraft type including those flown in the charter service. If it shall appear that major items of cost recorded in such accounts are applicable only to the charter service or to Panagra's common carrier service, provision will be made for removing such costs from allocation [fol. 1855] and charging such costs directly to the charter service, if applicable thereto. The shop burden of Panagra applicable to the maintenance and overhaul of the type of flight equipment used in the charter service shall include shop burden expenses applicable to the maintenance and stores departments charged in Accounts 6221-6274 and solely applicable to maintenance of flight equipment and ground equipment used in connection with maintenance of flight equipment; salaries and expenses of the purchasing and cost accounting departments included in Accounts 6621-6674; insurance—public liability, property damage and general insurance expenses included in Account 6655 and applicable to the maintenance, purchasing and stores departments; cost of insurance of all kinds included in Account 6657 and applicable to the maintenance, purchasing and stores departments; payroll taxes included in Account 6668 and applicable to the maintenance and stores departments; and depreciation included in Account 6978 and applicable to the hangar, shop and ramp equipment occupied or used by the maintenance, purchasing and stores departments; and will be distributed on the basis of direct labor costs.

3. For all costs payable by PAA to Panagra, other than those provided for in paragraphs 1 and 2 above, PAA shall pay Panagra at the following rates per revenue mile flown by Panagra aircraft pursuant to the Through Flight Agreement over the routes of PAA:

	Cents per Revenue Mile Flown with DC-4 Aircraft	Cents per Revenue Mile Flown with DC-6 Aircraft
Account 5100—Flying Operations other than hull insurance	7.67¢	5.65¢
—Hull Insurance	3.64	7.64
Account 5900—Depreciation	38.42	22.56
Accounts 6200 and 6300—Passenger Service	5.41	5.76
Indirect Costs	8.00	8.66
Return on Investment Working Capital	.74	.76
Other	4.41	16.41
Amortization DC-6 Development Costs	—	2.46

[fol. 1856]

EXHIBIT A

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST—JANUARY 1-MARCH 31, 1950

AIRCRAFT SERVICES & OVERHAULS

I *Aircraft Type*	*Service Type*	*Fixed Price*
DC-4—AE and B Models	1	$ 250.00
	2	500.00
	3	1,730.00
	4	2,445.00
	5	10,000.00
	6	12,000.00
	7	11,000.00
	8	25,500.00
DC-6	1	900.00
	2	1,050.00
	3	2,625.00
	4	3,500.00
	5	11,000.00
	6	12,500.00

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect January 1, 1950, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above-numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a Mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

[fol. 1857]

II ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare engine overhaul	$ 1,170.00
Nacelle teardown	121.50
Nacelle overhaul	463.50
Nacelle buildup	135.00
	$ 1,890.00

Engine Type	*Fixed Price*
R-2800-15	
Bare engine overhaul	$ 2,025.00
Nacelle teardown	202.50
Nacelle overhaul	472.50
Nacelle buildup	225.00
	$ 2,925.00

Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

III COMPONENT OVERHAUL AND OTHER

Component Overhaul

[fol. 1858] All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be over-

hauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated May 26, 1950, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times by mutual agreement.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

V RATES

The applicable labor rates referred to in this Exhibit A shall be as follows:

	Cost per Man/Hour		
	Straight Time	Time and One Half[1]	Double Time[1]
Aircraft Service Work Center	$5.00	$6.00	$7.00
Component Overhaul Work Center	4.50	5.50	6.50

VI The applicable material rates referred to in this Exhibit A shall be as follows:

Freight Inventory Dissipation—1½% of material billings.

Inventory Price Variance Dissipation—1½% of material billings.

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis resulting in overtime hours in excess of 100 hours per project shall be billed at overtime rates for all hours in excess of 100 hours.

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft and radio engineering	$4.00 per hour
Laboratory research service	4.00 per hour

[fol. 1859]

Laboratory fuel sample testing	12.50 per test
Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month
Services of Supply Dept. Services	Rates as established in letter purchasing agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

EXHIBIT B

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST—APRIL 1-June 30, 1950

AIRCRAFT SERVICES & OVERHAULS

I *Aircraft Type*	*Service Type*	*Fixed Price*
DC-4 AE & B Models	1	$ 200.00
	2	450.00
	3 & 4 equalized	1,600.00
	4	1,675.00
	5	2,050.00
	6	9,150.00
	7	10,900.00
	8	9,350.00
		23,500.00

Aircraft Type	*Service Type*	*Fixed Price*
DC-6	1	$ 800.00
	2	1,050.00
	3	2,625.00
	4	3,500.00
	5	11,000.00
	6	12,500.00
	7	14,000.00

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect, April 1, 1950, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950 are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter [fol. 1861] set forth.

ENGINE & NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare engine overhaul	$1,305.00
Nacelle teardown	72.00
Nacelle overhaul	409.50
Nacelle buildup	103.50
	$1,890.00
R-2800-15	
Bare engine overhaul	$2,025.00
Nacelle teardown	139.50
Nacelle overhaul	310.50
Nacelle buildup	270.00
	$2,745.00

Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion, and/or customer request items which requires time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

III COMPONENT OVERHAUL & OTHER

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division component manual, as [fol. 1862] revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or at the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated May 26, 1950, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times by mutual agreement.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable rates, as hereinafter set forth.

V RATES

The applicable labor rates referred to in this Exhibit B shall be as follows:

	Cost per Man/Hour		
	Straight Time	Time and One Half[1]	Double Time[1]
Aircraft Service Work Center	$5.00	$6.00	$7.00
Component Overhaul Work Center	4.50	5.50	6.50

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis resulting in overtime hours in excess of 100 hours per project shall be billed at overtime rates for all hours in excess of 100 hours.

VI The applicable material rates referred to in this Exhibit B shall be as follows:

Freight Inventory Dissipation—1½% of material billings
Inventory Price Variance Dissipation—1½% of material billings

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft and radio engineering	
Labratory research service	450.00 per month
Labratory fuel sample testing	$ 4.00 per test
[fol. 1863]	4.00 per hour
Flight and crew scheduling	12.50 per test
CAA specification handling	150.00 per month
Services of Supply Dept. Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other services	Rates to be negotiated at the time of request for service.

[fol. 1864]

EXHIBIT C

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST—JULY 1-SEPTEMBER 30, 1950

AIRCRAFT SERVICE & OVERHAULS

I *Aircraft Type*	*Service Type*	*Fixed Price*
DC-4	1	$ 164.50
	2	376.00
	3	1,386.50
	3 & 4 equalized	1,480.50
	4	1,809.50
	5	8,836.00
	6	10,716.00
	7	8,836.00
	8	22,090.00
DC-6	1	634.50
	2	775.50
	3	2,326.50
	4	3,055.00
	1-4 equalized	893.00
	5	10,340.00
	6	11,750.00
	7	11,515.00

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect July 1, 1950, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that

required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both [fol. 1865] computed at the applicable material rates, as hereinafter set forth.

II ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare engine overhaul	$1,210.00
Nacelle overhaul	440.00
Nacelle buildup	110.00
	$1,760.00
R-2800-15	
Bare engine overhaul	$1,980.00
Nacelle overhaul	440.00
Nacelle buildup	264.00
	$2,684.00

Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/

or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above, will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

III COMPONENT OVERHAUL AND OTHERS

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, [fol. 1866] as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or at the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated May 26, 1950 as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times by mutual agreement.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for

each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable rates, as hereinafter set forth.

V RATES

The applicable labor rates referred to in this Exhibit C shall be as follows:

	Cost per man/hour		
	Straight Time	Time and One Half[1]	Double Time[1]
Aircraft Service Work Center	$4.70	$5.70	$6.70
Component Overhaul Work Center	4.40	5.40	6.40

VI The applicable material rates referred to in this Exhibit C shall be as follows:

Freight inventory, Dissipation—1½% of material billings
Inventory Price Variance, Dissipation—½% of material billings

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft and radio engineering	$ 4.00 per hour
Laboratory research service	4.00 per hour
Laboratory fuel sample testing	12.50 per test
[fol. 1867] Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis resulting in overtime hours in excess of 100 hours per project shall be billed at overtime rates for all hours in excess of 100 hours.

Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other services	Rates to be negotiated at time of request for service.

[fol. 1868]

EXHIBIT D

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST—OCTOBER 1-DECEMBER 31, 1950

AIRCRAFT SERVICES & OVERHAULS

I. *Aircraft Type*	*Service Type*	*Fixed Price*
DC-4	1	$ 174.80
	2	368.00
	3	1,380.00
	3 and 4 equalized	1,449.00
	4	1,771.00

	7	8,648.00
	8	21,620.00
DC-6	1-4 equalized	874.00
	5	11,270.00
	7	11,270.00

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect October 1, 1950, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, are non-predicable and are to be billed as extras on the basis

of actual man/hours of direct labor expended multiplied by the applicable rate per man/hour as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price, to be negotiated at the time such work is requested or if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

[fol. 1869]

II. ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare engine overhaul	$1,058.25
Nacelle overhaul	415.00
Nacelle buildup	124.50
	$1,597.75
R-2800-15	
Bare engine overhaul	$1,763.75
Nacelle overhaul	560.25
Nacelle buildup	186.75
	$2,510.75

Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective

parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or if no price is negotiated, at the applicable labor rates, as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

III. COMPONENT OVERHAUL AND OTHERS

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division component manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of [fol. 1870] cost, to be determined as of the time of removal from flight equipment at Miami or at the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated May 26, 1950, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times by mutual agreement.

IV. *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

V. RATES

The applicable labor rates referred to in this Exhibit D, shall be as follows:

	Cost per Man/Hour		
	Straight Time	Time and One Half[1]	Double Time[1]
Aircraft Service Work Center	$4.60	$5.60	$6.60
Component Overhaul Work Center	4.15	5.15	6.15

VI. The applicable material rates referred to in this Exhibit D, shall be as follows:

Freight Inventory Dissipation—1½% of material billings.
Inventory Price Variance Dissipation—½% of material billings.

VII. The rates applicable to the other special services referred to in Paragraph 65 shall be as follows:

Aircraft and radio engineering	$ 4.00 per hour
Laboratory research service	4.00 per hour
Laboratory fuel sample testing	12.50 per test
Flight and crew scheduling	450.00 per month

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis resulting in overtime hours in excess of 100 hours per project shall be billed at overtime rates for all hours in excess of 100 hours.

C.A.A. specification handling	$150.00 per month
Services of Supply Dept. Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended),
Other Services	Rates to be negotiated at time of request for service.

[fol. 1871] The rates herein established do not provide for retroactive salary adjustments developing from employee contract negotiations. Therefore should additional cost develop through future negotiation on a retroactive basis, such cost will be distributed on a percentage write-up of labor as billed on the above rates retroactive to the agreed upon effective date of such change.

[fol. 1872]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 13

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 9

THIS AGREEMENT, made this 24th day of January, 1951, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra",

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by eight agreements designated Supplement No. 1 through Supplement No. 8, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

69. Effective as of October 1, 1950, the following table of rates is hereby substituted for the table of rates appearing in paragraph 67 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Return on Investment Working Capital	.37¢	.47¢
Miami Overhaul Base Facilities	.78¢	1.33
Flight Equipment Spare Parts and Assemblies	1.95	1.89
Depreciation on Flight Equipment Spare Parts and Assemblies	5.02	1.93

70. Effective as of October 1, 1950, the following table of rates is hereby substituted for the table of rates appearing in paragraph 3 of Annex 1-B to the Through Flight Agreement:

[fol. 1873]

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Account 5100—Flying Operations other than Hull Insurance	7.31¢	5.91¢
—Hull Insurance	4.13	7.32
Account 5900—Depreciation	13.47	22.41
Accounts 6200 and 6300—Passenger Service	5.64	5.82
Indirect Costs	7.44	8.17
Return on Investment Working Capital	.48	.49
Other	3.98	16.82
Amortization DC-6 Development Costs	—	2.36

71. The last sentence of paragraph 1 A 4 of Annex 1-A of the Through Flight Agreement is hereby amended to read as follows:

"If Panagra shall base its computations of depreciation of flight equipment used in the charter service on a residual value of such equipment which is increased by the cost of one major overhaul and shall make such computations effective as of May 31, 1947, or an earlier date, PAA will not participate in the related credits resulting from reversal of major overhaul reserves upon sale or other disposition of such equipment corresponding to the amount by which residual values thereof shall have been so increased; provided, however, that if one or more elements of cost of overhaul, i.e., direct labor, materials or burden, are omitted from the amount by which the residual value of such equipment has been so increased, PAA will participate in the credits resulting from reversal upon sale or other disposition of such equipment of that portion of major overhaul reserves which relates to the cost elements omitted from the overhaul cost so included in residual value."

[fol. 1874] IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

THROUGH FLIGHT AGREEMENT— SUPPLEMENT No. 10

THIS AGREEMENT, made this 29 day of June, 1951, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by nine agreements designated Supplement No. 1 through Supplement No. 9, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

72. Effective as of April 1, 1951, the following table of rates is hereby substituted for the table of rates appearing in paragraph 69 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Return on Investment Working Capital	.38¢	.51¢
Miami Overhaul Base Facilities	.98¢	1.57
Flight Equipment Spare Parts and Assemblies	1.70	1.75
Depreciation on Flight Equipment Spare Parts and Assemblies	4.75	1.89

73. Effective as of April 1, 1951, the following table of rates is hereby substituted for the table of rates appearing in paragraph 70 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Account 5100—Flying Operations other than Hull Insurance	6.99¢	5.49¢
—Hull Insurance	2.55	6.93
[fol. 1876]		
Account 5900—Depreciation	12.18	20.74
Accounts 6200 and 6300—Passenger Service	6.01	6.24
Indirect Costs	7.58	7.33
Return on Investment		
Working Capital	.47	.49
Other	3.13	17.19
Amortization DC-6 Development Costs	—	2.35

74. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the first and second calendar quarters of the calendar year 1951 are attached hereto, marked Exhibit E, January-March 1951, and Exhibit F, April-June 1951, respectively, and made a part hereof, and are hereby accepted by PANAGRA,

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

EXHIBIT E

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST— JANUARY 1-MARCH 31, 1951

AIRCRAFT SERVICES & OVERHAULS

I. *Aircraft Type*	*Service Type*	*Fixed Price*
DC-4—AE & B Models	1	$ 197.80
	2	391.00
	3, 4 equalized	1,449.00
	5	8,740.00
	6	10,488.00
	7	8,740.00
	8	20,700.00
DC-6	1-4 equalized	$ 828.00

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect January 1, 1951, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, and deicer boots and control surfaces currently on "on condition" replacement basis, are nonpredictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

[fol. 1878]

II ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare engine overhaul	$ 1,037.50
Nacelle teardown & overhaul	415.00
Nacelle buildup	124.50
	$ 1,577.00
R-2800-15	
Bare engine overhaul	$ 1,763.75
Nacelle teardown & overhaul	560.25
Nacelle buildup	186.75
	$ 2,510.75

Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle ac-

cessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

III COMPONENT OVERHAUL AND OTHER

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of [fol. 1879] cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated May 26, 1950, as the same may be revised from time to time.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

V RATES

The applicable labor rates referred to in this Exhibit E shall be as follows:

	Cost Per Man/Hour		
	Straight Time	Time and One half[1]	Double Time[1]
Aircraft Service Work Center	$4.60	$5.60	$6.60
Component Overhaul Work Center	4.15	5.15	6.15

VI Applicable material rates referred to in this Exhibit E shall be as follows:

Freight Inventory Dissipation—1% Dr. of material billings.

Inventory Price Variance Dissipation—¼ of 1% Cr. of material billings.

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

[fol. 1880]

Aircraft and radio engineering	$ 4.00 per hour
Laboratory research service	4.00 per hour
Laboratory fuel sample testing	12.50 per test
Flight and crew scheduling and CAA specification handling	600.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis resulting in overtime hours in excess of 100 hours per project shall be billed at overtime rates for all hours in excess of 100 hours.

	7		11,162.50.
	8		21,375.00.
DC-6	1	Transit	451.25.
	2	Equalized	950.00.

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect April 1, 1951, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory

prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

ENGINE AND NACELLE OVERHAUL

II *Engine Type*	*Fixed Price*
R-2000	
Bare engine overhaul	$1,062.50.
Nacelle teardown and overhaul	425.00.
Nacelle buildup	127.50.
	$1,615.00.
R-2800-15	
Bare engine overhaul	$1,806.25.
Nacelle teardown and overhaul	573.75.
Nacelle buildup	191.25.
	$2,571.25.

Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

[fol. 1882] Material consumed in the work referred to above will be billed at the Latin American Division average

inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a mark-up to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

III COMPONENT OVERHAUL AND OTHER

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated April 1, 1951, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

V LABOR RATES

The applicable labor rates referred to in this Exhibit F shall be as follows:

	Cost Per Man/Hour		
	Straight Time	Time and One half[1]	Double Time[1]
Aircraft Service Work Center	$4.75	$5.75	$6.75
Component Overhaul Work Center	$4.25	$5.25	$6.25

VI The applicable material rates referred to in this Exhibit F shall be as follows:

Freight Inventory Dissipation—1% Dr. of material billings Inventory Price

Variance Dissipation—¼ of 1% Cr. of material billings.

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft and radio engineering	$ 4.00 per hour
Laboratory research service	4.00 per hour
Laboratory fuel sample testing	12.50 per test
Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14 1948 (as amended)
Other Services	Rates to be negotiated at time of request for service.

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951.

[fol. 1883]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 15

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 11

THIS AGREEMENT, made as of the 1st day of January, 1952, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "Panagra",

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by ten agreements designated Supplement No. 1 through Supplement No. 10, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, Panagra owns certain Douglas Model DC-6 aircraft, and both PAA and Panagra have on order Douglas Model DC-6B aircraft; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement with regard to flight equipment spare parts and assemblies for maintenance of DC-6 type aircraft as herein set forth;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

75. Paragraph 17(b) of the Through Flight Agreement is amended by adding the following at the end thereof:

"Notwithstanding the foregoing provisions of this Paragraph 17(b), it is agreed as follows with respect to certain of the flight equipment spare parts and assemblies for Douglas Model DC-6 or DC-6B aircraft (such aircraft being herein referred to collectively as "DC-6 type aircraft"):

(i) PAA and Panagra shall establish a joint inventory pool of flight equipment spare parts and assemblies for DC-6 type aircraft consisting of all such spare parts and assemblies owned by PAA

[fol. 1884] from time to time which shall be located at Miami or New York, other than engine parts, line station kits, seats, and such engine nacelles as are not interchangeable for use on aircraft of both parties. Said joint inventory pool will be maintained so long as both PAA and Panagra are operating in revenue service DC-6 type aircraft which are assigned for regular maintenance by PAA at Miami or New York, such aircraft so operated and assigned being hereinafter called "Assigned DC-6 Aircraft". PAA from time to time will acquire such additional flight equipment spare parts and assemblies as it deems appropriate for such inventory pool and will dispose of such items therein as it considers to be no longer required. For the purposes of said inventory pool, items will be classified by type of flight equipment on the basis of major usage in accordance with PAA's existing accounting practice. Transfers either into or out of the inventory pool will be made at PAA's net book value, i.e., recorded inventory cost, delivered at Miami or New York, as the case may be, less the related accumulated reserve for depreciation.

(ii) Panagra hereby sells and transfers to PAA as of January 1, 1952 its inventory of flight equipment spare parts and assemblies for DC-6 type aircraft, other than line station kits, aircraft seats and engine nacelles which are not interchangeable for use on aircraft of both parties. The purchase price thereof shall be net book value, i.e., the recorded inventory cost, delivered at Miami, less the accumulated reserve for depreciation at said date. The pur- [fol. 1885] chase price will be paid by crediting Panagra with the amount thereof against the deposit required as provided in subparagraph (iii) below.

(iii) Panagra shall deposit with PAA an amount to be determined in the manner hereinafter provided, which shall represent Panagra's share of the capital cost of said inventory pool. At the outset said deposit shall be an amount equal to the purchase price of the inventory sold by Panagra to PAA in accordance with subparagraph (ii) above. As of each of

the dates on which Panagra's two DC-6B aircraft now on order are, respectively, placed in revenue operation, said deposit will be increased by $175,000. As of April 1, 1953, or such other date as may be mutually agreed upon, as of the close of each calendar quarter thereafter, and as of each date on which the number of Assigned DC-6 Aircraft shall thereafter change, the amount of said deposit will be adjusted through the application of the following provisions and an appropriate cash payment will be made to reflect such adjustment. Each adjustment provided for above in the amount of said deposit shall be an adjustment to one of the following amounts, whichever shall be the lesser:

(a) An amount which bears the same ratio to the net book value of said inventory pool as the number of Panagra's Assigned DC-6 Aircraft at the time as of which such adjustment is made bears to the total number of Assigned DC-6 Aircraft at such time; or

(b) $175,000 (or such other amount as may be fixed as hereinafter provided) less the related [fol. 1886] amount of reserve for depreciation, multiplied by the number of Panagra's Assigned DC-6 Aircraft at such time. The related amount of reserve for depreciation to be deducted in accordance with this clause (b) shall be an amount which bears the same ratio to the total reserve for depreciation on all items in such joint inventory pool at such time as $175,000 (or such other amount as may be so fixed) bears to the total original inventory cost of the aggregate of all the items in said joint inventory pool at such time;

provided, however, that there shall be no adjustment in the amount of such deposit in connection with the decrease in the number of Assigned DC-6 Aircraft of either party unless such party shall withdraw a proportionate share of such joint inventory pool in connection with such decrease as provided in subparagraph (v) below. The parties agree to review

and adjust the $175,000 figure set forth in the preceding sentence, on a prospective basis, upon the request of either party; and, in the event the parties are unable to agree upon such figure on any such review, such figure shall be fixed prospectively as of the date such review is requested, by arbitration in accordance with Paragraph 25 hereof, it being understood that such figure is intended to represent an amount equal to approximately 15% of the selling price quoted at the time by the manufacturer for an aircraft similar to the DC-6B, fully equipped for flight.

(iv) Pending the placing of Panagra's first DC-6B aircraft in revenue operation, a monthly depreciation [fol. 1887] charge calculated on an inventory cost equal to the original cost to Panagra of the inventory of flight equipment spare parts and assemblies sold by Panagra to PAA in accordance with subparagraph (ii) above shall be assigned to Panagra, and the remainder of the monthly depreciation charge on the items in said joint inventory pool, after deducting the amount so assigned to Panagra, shall be assigned to PAA. During each month commencing with the first month following the placing in revenue operation of the first Panagra DC-6B aircraft and ending with March, 1953, or such other month as may be mutually agreed upon, the depreciation charge to Panagra shall be computed on the basis of an inventory of original cost of $175,000, multiplied by the number of Panagra's Assigned DC-6 Aircraft at the beginning of the month for which the depreciation is calculated. Commencing as of the termination of the period referred to in the preceding sentence, depreciation expense on said joint inventory pool will be charged in accordance with the provisions of Paragraph B. of Annex 2 of the Through Flight Agreement; provided, however, that the depreciation charge to Panagra for any month shall not exceed the depreciation calculated on an original investment in such flight equipment spare parts and assemblies in the amount of $175,000, or such other figure as

may be fixed in accordance with the last sentence of subparagraph (iii) above, multiplied by the number of Panagra's Assigned DC-6 Aircraft at the beginning of such month. For the purposes of the two preceding sentences, the number of Panagra's Assigned DC-6 Aircraft shall not be deemed to have been decreased at any time unless Panagra shall, in [fol. 1888] connection with such decrease, withdraw a proportionate share of said joint inventory pool as provided in subparagraph (v) below. For the purposes of Paragraph B. of Annex 2, the rate of issue out for the account of Panagra of items in said joint inventory pool shall be deemed not to have decreased as a result of any decrease in the number of Panagra's Assigned DC-6 Aircraft unless such rate shall actually decrease and Panagra shall, in connection with such decrease in number of Panagra's Assigned DC-6 Aircraft, so withdraw a proportionate share of said joint inventory pool.

(v) In the event that the number of the Assigned DC-6 Aircraft of either party is reduced, either through loss, transfer, sale, or otherwise, the party with respect to which such number is reduced shall have the option, to be exercised by notice in writing given to the other within thirty days after such reduction, of withdrawing a proportionate share of the items in said joint inventory pool, which share shall (a) comprise that number of each type of items in said joint inventory pool which bears approximately the same ratio to the total number of items of such type therein as the number by which the number of Assigned DC-6 Aircraft of such party is so reduced by such event bears to the total number of Assigned DC-6 Aircraft immediately prior to such reduction, and (b) have an aggregate net book value which bears the same ratio to the total net book value of all items in said joint inventory pool at the time of such reduction as is provided in the preceding clause (a). In the event the Through Flight Agreement [fol. 1889] shall terminate while said joint inventory pool is required to be maintained in accordance with

subparagraph (i) above, Panagra shall have the option, to be exercised by notice in writing given to PAA within thirty days after such termination, of withdrawing its proportionate share of the items in said joint inventory pool at the date of such termination, which share shall be determined as provided in the next preceding sentence. Any items of inventory withdrawn by Panagra pursuant to this subparagraph (v) shall be sold to Panagra at a price equal to net book value.

(vi) In the event the Through Flight Agreement terminates while said joint inventory pool is required to be maintained in accordance with subparagraph (i), or in the event said joint inventory pool is no longer required to be maintained in accordance with subparagraph (i) above, the deposit provided for in subparagraph (iii) above remaining at such time, if any, after any exercise of the options provided in subparagraph (v) above and after adjustment as provided in subparagraph (iii) shall either (a) be returned to Panagra if such event occurs after PAA has ceased accruing depreciation on the items in said joint inventory pool, or (b) be retained by PAA if such event occurs before PAA has ceased accruing depreciation on said items, and thereupon all options of Panagra to acquire any share of said inventory shall terminate.

[fol. 1890] (vii) In consideration of the deposit referred to in subparagraph (iii) above, no charge shall be made by PAA to Panagra for return on investment in the flight equipment spare parts and assemblies in such inventory pool. For the purpose of calculating the return on investment payable by PAA to Panagra provided for in accordance with the provision of Paragraph 17(a), the deposit established in accordance with subparagraph (iii) above shall be considered as investment of Panagra in flight equipment spare parts and assemblies for DC-6 type aircraft.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

THROUGH FLIGHT AGREEMENT—
SUPPLEMENT NO. 12

THIS AGREEMENT, made this 10th day of ~~February~~ April, 1952, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by eleven agreements designated Supplement No. 1 through Supplement No. 11, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

76. Effective as of October 1, 1951, the following table of rates is hereby substituted for the table of rates appearing in paragraph 72 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Return on Investment		
Working Capital	.44¢	.53¢
Miami Overhaul Base Facilities	.85¢	1.07
Flight Equipment Spare Parts and Assemblies	1.42	1.53

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Depreciation on Flight Equipment Spare Parts and Assemblies	4.73	1.66

77. Effective as of October 1, 1951, the following table of rates is hereby substituted for the table of rates appearing in paragraph 73 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft
Account 5100—Flying Operations other than Hull Insurance	6.34	5.41
—Hull Insurance	3.92	7.94
[fol. 1892]		
Account 5900—Depreciation	9.60	21.73
Accounts 6200 and 6300—Passenger Service	4.94	5.26
Indirect Costs	6.29	6.78
Return on Investment		
Working Capital	.50¢	.55¢
Other	2.48	16.50
Amortization DC-6 Development Costs	—	2.35

78. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the third and fourth calendar quarters of the calendar year 1951 and the first calendar quarter of the calendar year 1952 are attached hereto, marked Exhibit G, July-September 1951; Exhibit H, October-December 1951 and Exhibit I January-March 1952, respectively, and made a part hereof, and are hereby accepted by PANAGRA.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

EXHIBIT G

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST—JULY 1-SEPT. 30, 1951

AIRCRAFT SERVICES & OVERHAULS

Aircraft Type	*Service Type*		*Fixed Price*
DC-4—AE & B Models	1		341.25
	2		455.00
	3	Equalized	1,592.50
	5		10,806.25
	6		11,557.00
	7		11,011.00
	8		18,200.00
DC-6	1	Transit	432.25
	2	Equalized	978.25
	6		12,285.00

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect July 1, 1951, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, as amended, are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

ENGINE AND NACELLE OVERHAUL

II : *Engine Type*	*Fixed Price*
R-2000	
Bare engine overhaul	$1,050.00
Nacelle teardown and overhaul	420.00
Nacelle buildup	126.00
	$1,596.00

[fol. 1894]

R-2800-15	
Bare engine overhaul	$1,785.00
Nacelle Teardown and overhaul	567.00
Nacelle buildup	189.00
	$2,541.00

ENGINE AND NACELLE OVERHAUL

II

Power plant overhaul prices include the labor necessary to disassemble clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variances arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

COMPONENT OVERHAUL AND OTHER

III *Component Overhaul*

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated July 1, 1951, as the same may be revised

from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

[fol. 1895] RATES

V The applicable labor rates referred to in this Exhibit G shall be as follows:

	Cost Per Man/Hour		
	Straight Time	Time and One half[1]	Double Time[1]
Aircraft Service Work Center	$4.55	$5.55	$6.55
Component Overhaul Work Center	4.20	5.20	6.20

VI The applicable material rates referred to in this Exhibit G shall be as follows:

Freight Inventory Dissipation—1¼% Dr. of material billings

Inventory Price Variance Dissipation—¼ of 1% Cr. of material billings.

---

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft and radio engineering	$ 4.00 per hour
Laboratory research service	4.00 per hour
Laboratory fuel sample testing	12.50 per test
Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended)
Other Services	Rates to be negotiated at time of request for service.

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of maintenance policy in effect January 1, 1952, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, as amended, are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that

required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

ENGINE AND NACELLE OVERHAUL

II *Engine Type*	*Fixed Price*
R-2000	
Bare engine overhaul	$1,188.
Nacelle teardown and overhaul	440.
Nacelle buildup	132.
	$1,760.
R-2000-15	
Bare engine overhaul	$1,870.
Nacelle teardown and overhaul	594.
Nacelle buildup	198.
	$2,662.

[fol. 1900] ENGINE AND NACELLE OVERHAUL

II Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/

or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

COMPONENT OVERHAUL AND OTHER

III *Component Overhaul*

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List", dated January 1, 1952, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$ 176.
DC-6	198.

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rate as hereinafter set forth for each man/hour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed [fol: 1901] at actual man/hours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

V RATES

The applicable labor rates referred to in this Exhibit I shall be as follows:

	Cost per Man/Hour		
	Straight Time	Time and One Half[1]	Double Time[1]
Aircraft Service Work Center	$4.60	$5.60	$6.60
Component Overhaul Work Center	4.40	5.40	6.40

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

VI The applicable material mates referred to in this Exhibit I shall be as follows:

Freight Inventory Dissipation—1¼ Dr. of material billings.

Inventory Price Variance Dissipation—¼ of 1% Dr. of material billings.

VII. The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 4.50 per hour
Radio Engineering	4.00 per hour
Laboratory research service	4.50 per hour
Laboratory fuel sample testing	15.75 per test
Flight and crew scheduling	450.00 ~~700.00~~ per month
CAA specification handling	150.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 13

THIS AGREEMENT, made this 25th day of September, 1952, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA," and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by twelve agreements designated Supplement No. 1 through Supplement No. 12, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

79. The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in paragraph 61, effective as of April 1, 1952:

School	*Associated and Affiliated Companies*	
Miami—Ground Training	$1.7989	(Dollars per hour)
Miami—Link	10.5502	
Miami—Pilot	23.5611	

Aircraft Type	*Hourly*
DC-3	66.5383
DC-4	156.0552
CV-240	243.7815
C-46	123.7071

The flight training charges per hour hereunder shall be the sum of the school rate and the aircraft rate for the type aircraft used.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 18

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 14

THIS AGREEMENT, made this 8th day of May, 1953, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by thirteen agreements designated Supplement No. 1 through Supplement No. 13, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

80. Effective as of April 1, 1952, the following table of rates is hereby substituted for the table of rates appearing in paragraph 76 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 or DC-6B aircraft
Return on Investment Working Capital	.44¢	.74¢
Miami Overhaul Base Facilities	.85¢	1.13
Flight Equipment Spare Parts and Assemblies (R-2800 only)	1.42	1.21
Depreciation on Flight Equipment Spare Parts and Assemblies	4.73	1.11

The above rates with respect to DC-4 aircraft are applicable only to and including April 30, 1952 at which date scheduled operations with DC-4 equipment under the Through Flight Agreement were terminated.

81. Effective as of October 1, 1952, the following table of rates is hereby substituted for the table of rates appearing in paragraph 80 of the Through Flight Agreement:

[fol. 1904]

	Cents per revenue mile flown with DC-6 Aircraft	Cents per revenue mile flown with DC-6B Aircraft
Return on Investment Working Capital	.75¢	.75¢
Miami Overhaul Base Facilities	.89¢	.89¢
Flight Equipment Spare Parts and Assemblies	.81¢	.81¢
Depreciation on Flight Equipment Spare Parts and Assemblies	.82¢	.82¢

82. Effective as of April 1, 1952, the following table of rates is hereby substituted for the table of rates appearing in paragraph 77 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-4 aircraft	Cents per revenue mile flown with DC-6 aircraft	Cents per revenue mile flown with DC-6B aircraft
Account 5100—Flying Operations other than Hull	8.93	7.00	7.07
Insurance —Hull Insurance	4.00	8.00	7.56
Account 5900—Depreciation	5.65	23.76	28.09
Accounts 6200 and 6300—Passenger Service Indirect Costs	6.32	6.91	7.15
	8.39	8.68	10.74
Return on Investment Working Capital	.57¢	.62¢	.66¢
Other	3.13	15.36	33.99
Amortization DC-6 Development Costs	—	2.12	—

The above rates with respect to DC-4 aircraft are applicable only to and including, April 30, 1952, at which date scheduled operations with DC-4 equipment under the Through Flight Agreement were terminated.

83. Effective as of October 1, 1952, the following table of rates is hereby substituted for the table of rates appearing in paragraph 82 of the Through Flight Agreement:

[fol. 1905]

	Cents per revenue mile flown with DC-6 aircraft	Cents per revenue mile flown with DC-6B aircraft
Account 5100—Flying Operations other than Hull Insurance	7.00	7.07
—Hull Insurance	7.50	7.08
Account 5900—Depreciation	24.47	29.48
Accounts 6200 and 6300—Passenger Service	6.91	7.15
Indirect Costs	7.83	9.69
Return on Investment—Working Capital	.61¢	.64¢
Other	13.93	36.88
Amortization DC-6 Development Costs	.91¢	—

84. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the second, third and fourth calendar quarters of the calendar year 1952 and the first calendar quarter of the calendar year 1953 are attached hereto, marked Exhibit J, April-June 1952, Exhibit K, July-September 1952, Exhibit L, October-December 1952 and Exhibit M, January-March 1953, respectively, and made a part hereof, and are hereby accepted by PANAGRA.

85. Effective May 1, 1952, the prices set forth in Exhibits J, K, L and M for maintenance and overhaul of Panagra's DC-4 aircraft will be subject to a surcharge of 10.55% of the total price as otherwise determined in ac-

cordance with the provisions of the applicable Exhibits to cover the amounts payable under paragraphs B and C of Annex 2 to the Through Flight Agreement in respect of maintenance of DC-4 aircraft.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized, on the day and year above written.

EXHIBIT J

PAN AMERICAN WORLD AIRWAYS, INC.
OFFICIAL PRICE LIST—APRIL 1-JUNE 30, 1952
AIRCRAFT SERVICES & OVERHAULS

Aircraft Type	*Service Type*	*Fixed Price*
DC-4—AE & B Models	1	$ 412.
	2	728.
	3 (Equalized 3-5	1,698.
	5	16,733.
	6	17,703.
	7	16,878.
	8	25,220.
DC-6	1 (Transit) Excluding engine or	412.
	2 (Equalized 1-4)) supercharger change	1,334.
	Engine change	146.
	Supercharger change	78.

The above prices for aircraft services include the labor necessary to perform all routine and inspection items con-

tained in aircraft service work forms and declarations of maintenance policy in effect April 1, 1952, except that certain specific types of aircraft work as stated in "Standard Control Procedure" #136-11 dated January 1, 1950, as amended, are non-predictable and are to be billed as extras on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

ENGINE AND NACELLE OVERHAUL

II *Engine Type*	*Fixed Price*
R-2000	
Bare engine overhaul when part of power package overhaul	$1,202.
Bare engine overhaul when not part of power package overhaul	1,291.
Nacelle teardown and overhaul—Routine	445.
Nacelle buildup	134.
R-2800-15	
Bare engine overhaul when part of power package overhaul	$1,891.
Bare engine overhaul when not part of power package overhaul	1,891.
Nacelle teardown and overhaul—Routine	601.
Nacelle buildup	245.

[fol. 1907] ENGINE AND NACELLE OVERHAUL

II Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

COMPONENT OVERHAUL AND OTHER

III *Component Overhaul*

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the "Component Overhaul Price List" dated April 1, 1952, as the same may be revised for time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$ 178
DC-6	$ 200

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rate as hereinafter set forth for each man/hour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual man/hours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

[fol. 1908]

V RATES

The applicable labor rates referred to in this Exhibit J shall be as follows:

	Cost per Man Hour		
	Straight Time	Time and one Half	Double Time
Aircraft Service Work Center	$4.85	$5.85	$6.85
Component Overhaul Work Center	4.45	5.45	6.45

VI The applicable material rates referred to in this Exhibit J shall be as follows:

Freight Inventory Dissipation—1½% Dr. of material billings.

Inventory Price Variance Dissipation—½ of 1% Dr. of material billings.

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 4.50 per hour
Radio Engineering	4.00 per hour
Laboratory research service	4.50 per hour
Laboratory fuel sample testing	15.75 per test
Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

[fol. 1913] ENGINE AND NACELLE OVERHAUL

II Power plant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each/man hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

COMPONENT OVERHAUL AND OTHER

III *Component Overhaul*

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a flat price per individual component, including all elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from Line Stations, in accordance with the "Component Overhaul Price List" dated July 1, 1952, as supplemented by revision lists dated October 1, 1952 and, as the same may be revised

from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul *Propeller Type*	*Fixed Price*
DC-4	$ 178
DC-6	$ 227

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rate as hereinafter set forth for each man/hour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual man/hours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

[fol. 1914]

V RATES

The applicable labor rates referred to in this Exhibit L shall be as follows:

	Cost per Man Hour		
	Straight Time	Time and one half[1]	Double Time[1]
Aircraft Service			
Work Center	$ 5.00	$ 6.00	$ 7.00
Component Overhaul			
Work Center	4.45	5.45	6.45

VI The applicable material rates referred to in this Exhibit L shall be as follows:

Freight Inventory Dissipation—1½% Dr. of material billings.

Inventory Price Variance Dissipation—½ of 1% Dr. of material billings.

The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 4.50 per hour
Radio Engineering	4.00 per hour
Laboratory research service	4.50 per hour
Laboratory fuel sample testing	18.20 per test
Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

OFFICIAL PRICE LIST JAN. 1-MAR. 31, 1953

AIRCRAFT SERVICES & OVERHAULS

Aircraft Type	*Service Type*	*Fixed Price*
DC-4—AE & B Models	All Services	Flat rate per actual Man Hours expended
DC-6	All Services	Flat rate per actual Man Hours expended

The above prices for aircraft services include the labor necessary to perform all routine and inspection items contained in aircraft service work forms and declarations of and maintenance policy in effect January 1, 1953, xxxxxxxx certain specific types of aircraft work as stated in "Standard Control Procedure" =136-11 dated January 1, 1950, as amended, xxxxxxxxxxxxxx and are to be billed xxxxxxx on the basis of actual man/hours of direct labor expended multiplied by the applicable labor rate per man/hour, as hereinafter set forth. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine service or overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man/hour of direct labor utilized. The cost of overhauling aircraft or engine accessories removed during the above numbered services are not included in the above prices.

Material consumed in the services referred to will be billed at the Latin American Division average inventory

[Changes in first paragraph initialed by KAL and BALL.]

prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

ENGINE AND NACELLE OVERHAUL

II *Engine Type*	*Fixed Price*
R-2000	
Bare engine overhaul when part of power package overhaul	$1,524
Bare engine overhaul when not part of power package overhaul	1,593
Nacelle teardown and overhaul—Routine	455
Nacelle buildup	137
R-2800-16	
Bare Engine overhaul when part of power package overhaul	$1,934
Bare engine overhaul when not part of power package overhaul	1,934
Nacelle teardown and overhaul—Routine	614
Nacelle buildup	250

[fol. 1916] ENGINE AND NACELLE OVERHAUL

II Powerplant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each man hour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each man/hour of direct labor utilized.

COMPONENT OVERHAUL AND OTHER

III *Component Overhaul*

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component, including the elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from Line Stations in accordance with the "Component Overhaul Price List", dated January 1, 1953, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$182
DC-6	232

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated,

at the applicable labor rate as hereinafter set forth for each man/hour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual man/hours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per man/hour for each man/hour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

[fol. 1917]

V RATES

The applicable labor rates referred to in this Exhibit M shall be as follows:

	Cost per Man Hour		
	Straight Time	Time and one half[1]	Double Time[1]
Aircraft Service Work Center	$5.15	$6.15	$7.15
Component Overhaul Work Center	4.55	5.55	6.55

VI The applicable material rates referred to in this Exhibit M shall be as follows:

Freight Inventory Dissipation—1½% Dr. of material billings.

Inventory Price Variance Dissipation—½ of 1% Dr. of material billings.

---

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 4.50 per hour
Radio Engineering	4.00 per hour
Laboratory research service	4.50 per hour
Laboratory fuel sample testing	18.20 per test
Flight and crew scheduling	450.00 per month
CAA specification handling	150.00 per month
Services of Supply Dept. services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 19

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 15

THIS AGREEMENT, made this 20th day of January, 1954, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by fourteen agreements designated Supplement No. 1 through Supplement No. 14, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

86. Effective as of April 1, 1953, the following table of rates is hereby substituted for the table of rates appearing in paragraph 81 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-6 type aircraft
Return on Investment Working Capital	.71¢
Miami Overhaul Base Facilities	1.16
Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.70¢
Depreciation on Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.66¢

87. Effective as of October 1, 1953, the following table of rates is hereby substituted for the table of rates appearing in paragraph 86 of the Through Flight Agreement:
[fol. 1919]

	Cents per revenue mile flown with DC-6 type aircraft
Return on Investment Working Capital	.72¢
Miami Overhaul Base Facilities	1.07
Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.58¢
Depreciation on Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.60¢

88. Effective as of April 1, 1953, the following table of rates is hereby substituted for the table of rates appearing in paragraph 83 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-6 aircraft	Cents per revenue mile flown with DC-6B aircraft
Account 5100—Flying Operations other than Hull Insurance	7.60	7.83
—Hull Insurance	7.12	6.41
Account 5900—Depreciation	23.84	26.61
Accounts 6200 and 6300—Passenger Service	6.47	6.94
Indirect Costs	8.30	10.30
Return on Investment Working Capital	.61¢	.67¢
Other	13.10	36.01

89. Effective as of October 1, 1953, the following table of rates is hereby substituted for the table of rates appearing in paragraph 88 of the Through Flight Agreement:

[fol. 1920]

	Cents per revenue mile flown with DC-6 aircraft	Cents per revenue mile flown with DC-6B aircraft
Account 5100—Flying Operations other than Hull Insurance	7.61	8.02
—Hull Insurance	7.12	6.41
Account 5900—Depreciation	24.57	27.61
Accounts 6200 and 6300—Passenger Service	6.63	7.12
Indirect Costs	8.30	10.30
Return on Investment—Working Capital	.62¢	.66¢
Other	10.42	31.87

90. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the second, third and fourth calendar quarters of the calendar year 1953 and the first calendar quarter of the calendar year 1954 are attached hereto, marked Exhibit N, April-June 1953, Exhibit O, July-September 1953, Exhibit P, October-December 1953 and Exhibit Q, January-March 1954, respectively, and made a part hereof, and are hereby accepted by PANAGRA.

91. As provided in Exhibits N, O, P and Q, the prices set forth therein for maintenance and overhaul of Panagra's DC-4 aircraft will be subject to a surcharge of 10.55% of the total price as otherwise determined in accordance with the provisions of the applicable Exhibits to cover the amounts payable under paragraphs B and C of Annex 2 to the Through Flight Agreement in respect of maintenance of DC-4 aircraft.

92. Effective as of April 1, 1953 the following table of rates shall be established as the monthly depreciation charge on the joint DC-6 FESPA inventory pool for the period April 1, 1953 through March 31, 1954 as contemplated under sub-paragraph (iv) of paragraph 75:

April through June 1953	$6,940 per month
July through September 1953	$8,675 per month
October through December 1953	$7,868 per month
January through March 1954	$7,868 per month

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly [fol. 1921] authorized, on the day and year above written.

Flight and Crew Scheduling	450.00 per month
CAA Specification Handling	150.00 " "
Services of Supply Dept. Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended)
Other Services	Rates to be negotiated at time of request for service.

All DC-4 maintenance billings will be increased by 10.55% in accordance with the agreed upon revision to the Panagra Through Flight Agreement as detailed in letter of March 18, 1953 from the Treasurer to Executive Vice President Morrison.

[fol. 1931]

EXHIBIT Q

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST JAN. 1-MAR. 31, 1954

AIRCRAFT SERVICES & OVERHAULS

I *Aircraft Type*	*Service Type*	*Fixed Price*
DC-4—AE & B Models	All Services	applicable labor Flat/rate per actual Man Hours expended
DC-6 & DC-6B	All Services	applicable labor Flat/rate per actual Man Hours expended

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth. [The cost of overhauling aircraft or engine accessories removed during the above-numbered services are not included in the above prices.]

ENGINE AND NACELLE OVERHAUL

II *Engine Type*	*Fixed Price*
R-2000	
Bare Engine overhaul when part of power package overhaul	$1,625
Bare Engine overhaul when not part of power package overhaul	1,700
Nacelle teardown and overhaul—Routine	450
Nacelle overhaul—Major	500
Nacelle buildup	175

[Changes in "Fixed Price" column and bracketed matter initialled by KAL and BALL.]

Engine Type	*Fixed Price*
R 2800-17	
Bare Engine overhaul when part of power package overhaul	$2,200
Bare Engine overhaul when not part of power package overhaul	2,200
Nacelle teardown and overhaul—Routine	550
Nacelle overhaul—Major	725
Nacelle buildup	275

Powerplant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machinery and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each manhour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a markup to cover freight delivery cost of inventory at Miami and a markup to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair work, as distinguished from overhaul, will be billed at the applicable labor rates for each manhour of direct labor utilized.

Major changes in procedure and or tolerances occurring within the quarter are considered cause for adjusting the fixed manhours.

[fol. 1932]

COMPONENT OVERHAUL AND OTHER

III *Component Overhaul*

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component, including the elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from Line Stations, in accordance with the "Component Overhaul Price List" dated January 1, 1954, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$250
DC-6 & DC-6B	300

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rate as hereinafter set forth for each manhour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual manhours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

Major changes in procedures and/or tolerances occurring within the quarter are considered cause for adjusting the fixed manhours.

IV *Other*

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per manhour for each manhour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance markups at the applicable material rates, as hereinafter set forth.

V RATES

The applicable labor rates referred to in this Exhibit Q shall be as follows:

	Straight Time	Time and one half[1]	Double Time[1]
Aircraft Service			
Work Center	$5.65	$6.65	$7.65
Component Overhaul			
Work Center	5.00	6.00	7.00

VI The applicable material rates referred to in this Exhibit Q shall be as follows:

Freight Inventory Dissipation—1½% Dr. of material billings.

Inventory Price Variance Dissipation—½ of 1% Dr. of material billings.

[fol. 1933] VII The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 5.00	per hour
Radio Engineering	4.75	" "
Laboratory Research Service	5.35	" "
Laboratory Fuel & Oil		
Sample Testing	21.40	per test
Flight and Crew Scheduling	450.00	per month
CAA Specification Handling	150.00	per month

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

Services of Supply Dept. Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended)
Other Services	Rates to be negotiated at time of request for service

All DC-4 maintenance billings will be increased by 10.55% in accordance with the agreed upon revision to the Panagra Through Flight Agreement as detailed in letter of March 18, 1953 from the Treasurer to Executive Vice President Morrison.

[fol. 1934]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 20

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 16

THIS AGREEMENT, made this 29th day of June, 1954, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, which agreement has been supplemented and amended by fifteen agreements designated Supplement No. 1 through Supplement No. 15, respectively, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

93. The monthly depreciation charge on the joint DC-6 FESPA inventory pool for the period April 1, 1954 through

June 30, 1954 as contemplated under sub-paragraph (iv) of paragraph 75, shall be Seven Thousand Seven Hundred and Fifty Two ($7,752) Dollars per month.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized on the day and year above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 21

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 17

THIS AGREEMENT, made this 7th day of September 1955, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, as supplemented and amended, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

94. Effective as of April 1, 1954, the following table of rates is hereby substituted for the table of rates appearing in paragraph 87 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-6 type aircraft
Return on Investment Working Capital	.76¢
Miami Overhaul Base Facilities	1.26
Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.90¢
Depreciation on Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.75¢

95. Effective as of October 1, 1954, the following table of rates is hereby substituted for the table of rates appearing in paragraph 94 of the Through Flight Agreement:

[fol. 1936]

	Cents per revenue mile flown with DC-6 type aircraft
Return on Investment Working Capital	.66¢
Miami Overhaul Base Facilities	1.08
Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.66¢
Depreciation on Flight Equipment Spare Parts and Assemblies (R-2800 engine parts only)	.64¢

96. Effective as of April 1, 1954, the following table of rates is hereby substituted for the table of rates appearing in paragraph 89 of the Through Flight Agreement:

	Cents per revenue mile flown with DC-6 type aircraft
Account 5100— Flying Operations other than flight crew salaries and Hull Insurance	7.50
—Hull Insurance	5.85
Account 5900— Depreciation	19.85
Accounts 6200 and 6300— Passenger Service	6.96
Indirect Costs	8.77
Return on Investment	
Working Capital	.63¢
Other	24.69

97. Effective as of October 1, 1954, the following table of rates is hereby substituted for the table of rates appearing in paragraph 96 of the Through Flight Agreement:

[fol. 1937]

	Cents per revenue mile flown with DC-6 type aircraft
Account 5100— Flying Operations other than flight crew salaries and Hull Insurance	8.80
—Hull Insurance	5.09
Account 5900— Depreciation	16.95
Accounts 6200 and 6300— Passenger Service	7.44
Indirect Costs	8.36
Return on Investment	
Working Capital	.62¢
Other	22.79

98. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the second, third and fourth calendar quarters of the calendar year 1954 and the first and second calendar quarters of the calendar year 1955 are attached hereto, marked Exhibit R, April-June, 1954, Exhibit S, July-September, 1954, Exhibit T, October-December, 1954, Exhibit U, January-March, 1955, and Exhibit V, April-June, 1955, respectively, and made a part hereof, and are hereby accepted by PAN-AGRA.

99. The prices set forth in the Exhibits for maintenance and overhaul of Panagra's DC-4 aircraft, and engines, propellers and components therefore, will, effective as of April 1, 1954 and thereafter until the parties shall otherwise agree in writing, be subject to a surcharge of 6% of the total price as otherwise determined in accordance with the provisions of the applicable Exhibits to cover the amounts payable under paragraphs B and C of Annex 2 to the Through Flight Agreement in respect of maintenance of DC-4 aircraft.

100. Effective as of July 1, 1954 the following table of rates shall be established as the monthly depreciation charge on the joint DC-6 FESPA inventory pool for the period July 1, 1954 through March 31, 1955 as contemplated under sub-paragraph (iv) of paragraph 75:

[fol. 1938]

July through September 1954	$5,560 per month
October through December 1954	$5,706 per month
January through March 1955	$5,706 per month

101. (a) The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in paragraph 79, effective as of January 1, 1954:

School	*Dollars Per Hour*
Miami—Ground Training	$ 3.00
Miami—Link	20.00
Miami—Pilot	42.00

Aircraft Type	*Hourly*
DC-3	$ 68.00
DC-4	135.00
DC-6B	371.00
CV-240	222.00
L-49	336.00

The flight training charges per hour hereunder shall be the sum of the school rate and the aircraft rate for the type aircraft used.

(b) The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in subparagraph (a) of this paragraph 101, effective as of July 1, 1954:

School	*Dollars Per Hour*
Miami—Ground Training	$ 6.00
Miami—Link	20.00
Miami—Pilot	42.00

Aircraft Type	*Hourly*
DC-3	$ 68.00
DC-4	135.00
DC-6B	371.00
CV-240	222.00
L-49	336.00

The flight training charges per hour hereunder shall be the sum of the school rate and the aircraft rate for the type aircraft used.

(c) The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in subparagraph (b) of this paragraph 101, effective as of January 1, 1955:

[fol. 1939]

School	*Dollars Per Hour*
Miami—Ground Training	$ 8.00
Miami—Link	14.00
Miami—Pilot	48.00

Aircraft Type	*Hourly*
DC-3	$ 79.00
DC-4	144.00
DC-6A	360.00
DC-6B	376.00
CV-340	211.00
L-49	341.00

The flight training charges per hour hereunder shall be the sum of the school rate and the aircraft rate for the type aircraft used.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized on the day and year above written.

EXHIBIT R

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST APRIL 1-JUNE 30, 1954

I—AIRCRAFT SERVICES & OVERHAULS

Aircraft Type	*Service Type*	*Fixed Price*
DC-6 & DC-6B	Overnight Transit	$ 696
	#1	1,073
	#3 (Equalized)	4,147
	Engine Change*	174
	Supercharger Change*	145
DC-4—AE & B Models	All Services	Flat rate per actual Man-hours expended fixed prices

Except as noted in the following paragraphs, the xxxxxxx quoted provide for labor to perform routine, time limit, and inspection (discrepancy) items according to service work forms and policies in effect April 1, 1954.

fixed prices

a) The quoted xxxxxxxxxxx apply to services performed on aircraft regularly maintained at MOB. We reserve the right to quote special xxxxxxxx prices or to bill on the basis of actual hours for services to aircraft brought to MOB at infrequent or irregular intervals, and for minor services in combination with major modification projects. Aircraft entering the MOB service pattern for the first time are subject to billing at actual hours until the MOB Chief Inspector and the customer representative agree that the aircraft is up to MOB standard. The work described in Standard Control Procedure #136-11 of December 1, 1952, is non predictable and will be billed at actual hours.

---

* Applicable only on Services where this work has not been prorated into the fixed price (Overnight Transit and #1).

[Changes in first and second paragraphs initialed by KAL and BALL.]

b) Major structural inspection sampling may occur during this quarter on DC-6B aircraft, but since the method of accomplishment is indefinite, no attempt has been made to include this work in the flat price.

c) Engine changes for top overhaul, and top overhaul of installed engines are not included in the manhours quoted for aircraft services.

d) Overhaul of engines, propellers and components removed during services is not included in the quoted service figures. Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

II—ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare Engine overhaul when part of power package overhaul	$1,723
Bare Engine overhaul when not part of power package overhaul	1,802
Nacelle Overhaul—Routine	477
Nacelle Overhaul—Major	530
Nacelle Buildup	186
R-2800-17	
Bare Engine overhaul when part of power package overhaul	$2,332
Bare Engine overhaul when not part of power package overhaul	2,332
Nacelle Overhaul—Routine	583
Nacelle Overhaul—Major	769
Nacelle Buildup	292

[fol. 1941] Powerplant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and

functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each manhour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair and exploratory or diagnostic disassembly, as distinguished from routine engine and nacelle overhaul is not included in the above prices and will be billed on the basis of actual hours expended times the applicable labor rate.

Major changes in procedure and/or tolerances occurring within the quarter are considered cause for adjusting the fixed manhours.

III—COMPONENT OVERHAUL AND OTHER

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component, including the elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from Line Stations, in accordance with the "Component Overhaul Price List" dated April 1, 1954, as the same may be revised from time to time by mutual agreement. Such prices

shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$265
DC-6 & DC-6B	318

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rate as hereinafter set forth for each manhour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual manhours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth. Major changes in procedure and/or tolerance occurring within the quarter are considered cause for adjusting the fixed manhours.

[fol. 1942] IV—OTHER

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per manhour for each manhour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

V—RATES.

The applicable labor rates referred to in this Exhibit R shall be as follows:

	Straight Time	Time and one-half[1]	Double Time[1]
Aircraft Service Work Center	$5.80	$6.80	$7.80
Component Overhaul Work Center	5.30	6.30	7.30

VI The applicable material rates referred to in this Exhibit R shall be as follows:

Freight Inventory Dissipation—1½% Dr. of material billings.

Inventory Price Variance Dissipation—½ of 1% Dr. of material billings.

VII—MISCELLANEOUS

The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 5.00 per hour
Radio Engineering	4.75 " "
Laboratory Research Service	5.35 " "
Laboratory Fuel & Oil Sample Testing	21.40 per test
Flight and Crew Scheduling	450.00 per month
CAA Specification Handling	150.00 per month
Services of Supply Dept. Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended)

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

Other Services	Rates to be negotiated at time of request for service.

EXHIBIT S

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST JULY 1-SEPTEMBER 30, 1954

I—AIRCRAFT SERVICES & OVERHAULS

Aircraft Type	*Service Type*	*Fixed Price*
DC-6 & DC-6B	Overnight Transit	$ 556*
	#1	878*
	#3 (Equalized)	3,920*
	Engine Change	176**
	Supercharger Change	146**
DC-4—AE & B Models	All Services	Flat rate per actual man-hours expended.

[Paragraph stricken through initialed by BALL and KAL.]

* The fixed prices on the Overnight Transit, #1 and #3 (Equalized) Service, do not apply to the two new PAG DC-6B Aircraft, N6255C and N6256C whose low time-low work content status has caused them to be exempted. Aircraft service work on these two aircraft will be billed on the basis of actual manhours expended at the applicable labor rate.

** Applicable only on Services where this work has not been prorated into the fixed price (Overnight Transit and #1).

Except as noted in the following paragraphs, the fixed prices quoted provide for labor to perform routine, time limit, and inspection (discrepancy) items according to service work forms and policies in effect July 1, 1954.

a) The quoted fixed prices apply to services performed on aircraft regularly maintained at MOB. We reserve the right to quote special prices or to bill on the basis of actual hours for services to aircraft brought to MOB at infrequent or irregular intervals, and for minor services in combination with major modification projects. Aircraft entering the MOB service pattern for the first time are subject to billing at actual hours until the MOB Chief Inspector and the customer representative agree that the aircraft is up to MOB standard. The work described in Standard Control Procedure #136-11 of December 1, 1952 is non-predictable and will be billed at actual hours.

b) Major structural inspection sampling may occur during this quarter on DC-6B aircraft, but since the method of accomplishment is indefinite, no attempt has been made to include this work in the flat price.

c) Engine changes for top overhaul, and top overhaul of installed engines are not included in the fixed price quoted for aircraft services.

d) Overhaul of engines, propellers and components removed during services is not included in the quoted service figures.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

II—ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare Engine overhaul when part of power package overhaul	$1,706
Bare Engine overhaul when not part of power package overhaul	1,785
Nacelle Overhaul—Routine	473
Nacelle Overhaul—Major	525
Nacelle Buildup	184
R-2800-17	
Bare Engine overhaul when part of power package overhaul	$2,310
Bare Engine overhaul when not part of power package overhaul	2,310
Nacelle Overhaul—Routine	578
Nacelle Overhaul—Major	761
Nacelle Buildup	289

[fol. 1944] Powerplant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each manhour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle repair and exploratory or diagnostic disassembly, as distinguished from routine engine and nacelle overhaul is not included in the above prices and will be billed on the basis of actual hours expended times the applicable labor rate.

Major changes in procedures and/or tolerances occurring within the quarter are considered cause for adjusting the fixed manhours.

III—COMPONENT OVERHAUL AND OTHER

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component, including the elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from Line Stations, in accordance with the "Component Overhaul Price List" dated July 1, 1954, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$236
DC-6 & DC-6B	315

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the

applicable labor rate as hereinafter set forth for each manhour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual manhours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

Major changes in procedures and/or tolerances occurring within the quarter are considered cause for adjusting the fixed manhours.

[fol. 1945] IV—OTHER

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per manhour for each manhour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

V—RATES

The applicable labor rates referred to in this Exhibit S shall be as follows:

	Engine Change	158*
	Supercharger Change	131*
DC-4 AE & B Models	All Services	Flat rate per actual man-hours expended

Except as noted in the following paragraphs, the fixed prices quoted provide for labor to perform routine, time limit, and inspection (discrepancy) items according to service work forms and policies in effect October 1, 1954.

a) The quoted fixed prices apply to services performed on aircraft regularly maintained at MOB. We reserve the right to quote special prices or to bill on the basis of actual hours for services to aircraft brought to MOB at infrequent or irregular intervals, and for minor services in combination with major modification projects. Aircraft entering the MOB service pattern for the first time are subject to billing at actual hours until the MOB Chief Inspector and the customer representative agree that the aircraft is up to MOB standard. The work described in Standard Control Procedure =136-11 of December 1, 1952 is non-predictable and will be billed at actual hours.

b) Major structural inspection sampling may occur during this quarter on DC-4B aircraft, but since the method

* Applicable only on Services where this work has not been prorated into the fixed price Overnight Transit and =1

of accomplishment is indefinite, no attempt has been made

c) Engine changes for top overhaul, and top overhaul of installed engines are not included in the fixed price quoted for aircraft services.

d) Overhaul of engines, propellers and components removed during services is not included in the quoted service figures.

e) Due to continued low work content status of the two new PAG DC-6B aircraft, 6255C and 6256C, they are excluded from all 4th quarter flat prices.

f) Per the request of Panagra, the overhaul services on PAG DC-6/6B aircraft will be billed at actual hours times the applicable labor rate.

Material consumed in the services referred to will be billed at the Latin American Division average inventory prices, plus a mark-up to cover freight delivery cost of inventory at Miami and a mark-up to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

II—ENGINE AND NACELLE OVERHAUL

Engine Type	*Fixed Price*
R-2000	
Bare Engine Overhaul when part of power package overhaul	$1,607
Bare Engine Overhaul when not part of power package overhaul	1,683
Nacelle Overhaul—Routine	459
Nacelle Overhaul—Major	510
Nacelle Buildup	179
R-2800-17	
Bare Engine Overhaul when part of power package overhaul	2,244
Bare Engine Overhaul when not part of power package overhaul	2321
Nacelle Overhaul—Routine	561
Nacelle Overhaul—Major	740
Nacelle Buildup	281

[fol. 1947] Powerplant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each manhour of direct labor utilized. The cost of overhauling engine and nacelle accessories removed during overhauls are not included in the above prices.

Material consumed in the work referred to above will be billed at the Latin American Division average inventory prices, plus a mark up to cover freight delivery cost of inventory at Miami and a mark up to cover price variance arising from average inventory pricing procedure, both computed at the applicable material rates, as hereinafter set forth.

Engine and nacelle, repair and exploratory or diagnostic disassembly, as distinguished from routine, engine and nacelle overhaul is not included in the above prices and will be billed on the basis of actual hours expended times the applicable labor rate.

Major changes in procedures and or tolerances occurring within the quarter are considered cause for adjusting the fixed manhours.

III—COMPONENT OVERHAUL AND OTHER

Component Overhaul

All flight equipment accessories classified as components listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component, including the elements of cost, to be determined as of the time of removal from flight equipment at Miami or the time of receipt in Miami from Line

Stations, in accordance with the "Component Overhaul Price List" dated October 1, 1954, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price is subject to review and may be changed at other times at mutual agreement.

Propeller Overhaul

Propeller Type	*Fixed Price*
DC-4	$230
DC-6 & DC-6B	306

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiable at the applicable labor rate as hereinafter set forth for each manhour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual manhours utilized. Material consumed in the above will be billed at Latin American Division average inventory price plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth. Major changes in procedures and/or tolerance occurring within the quarter are considered cause for adjusting the fixed manhours.

[fol. 1948]

IV—OTHER

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per manhour for each manhour of direct labor utilized. Material consumed in such maintenance will be billed at Latin American Division average inventory prices plus freight and price variance mark-ups at the applicable material rates, as hereinafter set forth.

V—RATES

The applicable labor rates referred to in this Exhibit T shall be as follows:

	Straight Time	Time and one half[1]	Double Time[1]
Aircraft Service Work Center	$5.25	$6.25	$7.25
Component Overhaul Work Center	5.10	6.10	7.10

VI The applicable material rates referred to in this Exhibit T shall be as follows:

Freight Inventory Dissipation—1½% Dr. of material billings.

Inventory Price Variance Dissipation—½ of 1% Dr. of material billings.

VII—MISCELLANEOUS

The rates applicable to the other special services referred to in paragraph 65 shall be as follows:

Aircraft Engineering	$ 5.00 per hour
Radio Engineering	5.25 " "
Laboratory Research Service	5.35 " "
Laboratory Fuel & Oil Sample Testing	21.40 per test
Flight and Crew Scheduling	450.00 per month
CAA Specification Handling	150.00 per month
Services of Supply Dept. Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended)

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in "Standard Control Procedure" bulletin #136-17 dated March 1, 1951, as amended from time to time.

Other Services	Rates to be negotiated at time of request for service.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 22

SUPPLEMENT NO. 18

TO

THROUGH FLIGHT AGREEMENT

BETWEEN

PAN AMERICAN WORLD AIRWAYS, INC.,

AND

PAN AMERICAN-GRACE AIRWAYS, INC.

DATED AUGUST 4, 1955

[fol. 1956]

Through Flight Agreement

Supplement No. 18

Relating to Interchange Agreement with National Airlines, Incorporated

AGREEMENT made this 4th day of August, 1955, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York Corporation (hereinafter called "PAA"), and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware Corporation (hereinafter called "Panagra");

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, and supplements thereto numbered one through seventeen inclusive relating to the charter of Panagra's aircraft to PAA for through operation on certain of PAA's routes north of the Canal Zone and other matters, which agreements are hereinafter referred to as "the Through Flight Agreement"; and

WHEREAS, PAA and Panagra have entered into an agreement with National Airlines, Incorporated, a Florida corporation (hereinafter called "National"), dated as of the date hereof (hereinafter referred to as "the Interchange Agreement"); and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

102. All recitals and paragraphs of Supplement No. 5 to the Through Flight Agreement are hereby deleted except [fol. 1957] paragraphs 49, 50, 51 (except for the first parenthetical insertion), 53 (except for the proviso to the last sentence of the amendment made therein), 54 (notwithstanding any provisions of paragraph 59 to the contrary), 57(a) (as modified by paragraph 71), and 57(g).

103. The last sentence of paragraph 14 of the Through Flight Agreement as amended by paragraphs 51 and 102 above is amended to read as follows:

> "PAA and Panagra will agree with each other (and with National if the Interchange Agreement shall be-

come and be effective) in advance on appropriate advertising programs (including newspaper and magazine space, advertising and display pieces and collateral material) and budgets therefor, for promoting the through flights made pursuant to this Agreement, and the approved expense of all such advertising shall be apportioned among them as from time to time agreed, provided, however, that no charge shall be made for transporting advertising material to the most effective point of use."

104. For the term of the Interchange Agreement, Panagra's aircraft chartered to PAA pursuant to the Through Flight Agreement for through operation between the Canal Zone and Miami, Florida, shall, except as the Civil Aeronautics Board may otherwise permit, be further chartered to National for through operation by National upon the specific terms and conditions set forth in the Interchange Agreement.

105. Panagra hereby constitutes and appoints PAA as Panagra's agent, for the term during which the Through Flight Agreement and the Interchange Agreement shall be simultaneously in effect, to deliver Panagra's aircraft to National at Miami, for the purpose of flights over National's route pursuant to the said agreement and to receive [fol. 1958] delivery of Panagra's aircraft from National at Miami. PAA is authorized as such agent, on Panagra's behalf, to receive and execute such receipts, to perform such inspections, to make such checks and measurements, and to perform all such other acts as may be necessary or appropriate in connection with the delivery or return of the said aircraft. In acting as such agent with respect to the delivery of Panagra's aircraft to National and the return of Panagra's aircraft by National at Miami, PAA shall be bound to exercise the same and only the same degree of care as PAA exercises with respect to the delivery and return of its own aircraft under similar circumstances.

106. The second sentence of paragraph 15(a) of the Through Flight Agreement as amended is further amended to read as follows:

"PAA shall be deemed to be in possession of Panagra's aircraft (1) in the case of aircraft turned over to PAA for operation on through flights under this agreement, from the time when such aircraft is so turned over to PAA by Panagra until the time when such aircraft is either (i) returned by PAA to Panagra or (ii) turned over by PAA to National for operation by National pursuant to the Interchange Agreement, in which event the aircraft shall again be deemed to be in PAA's possession when returned to it by National, and (2) in the case of aircraft turned over to PAA for maintenance, from the time when such aircraft is turned over to PAA at one of the latter's maintenance bases until the time when such aircraft is returned to Panagra, or until it is turned over by PAA to National as provided above; except, in either case, for non-revenue or other special flights (excluding test flights made under PAA custody following maintenance and according to CAA requirements) during such pe-
[fol. 1959] riod made at the instance and request of Panagra."

107. Paragraph 17(h) of the Through Flight Agreement (added by paragraph 34 of Supplement No. 2) is amended by adding the following at the end thereof: "and in the case of mileage flown over the route of National pursuant to the Interchange Agreement will be those effective as shown in the 'Civil Aeronautics Board Official Airline Route and Mileage Manual' and in any revisions thereof."

108. Paragraph 23(e) of the Through Flight Agreement is amended by adding at the end thereof the words: "and the delivery of possession of Panagra's aircraft to National and the return of such possession from National pursuant to the Interchange Agreement."

109. (a) All references in Annex 1A to the Through Flight Agreement to "the charter service" shall refer only to the charter service operated by PAA pursuant to said Agreement. All references in said Annex 1A to the total revenue miles flown by Panagra's aircraft or to a revenue mile basis shall include revenue miles flown by such aircraft pursuant to the Interchange Agreement, except that

(i) in those instances where the expenses to be prorated under paragraph 1 of Annex 1A are not related to the miles flown by Panagra aircraft under the Interchange Agreement, the mileage under the Interchange Agreement shall be omitted, and (ii) in those instances where the expenses to be prorated under paragraph 1 of Annex 1A are only partially related to the miles flown by Panagra aircraft under the Interchange Agreement, the mileage under the Interchange Agreement shall be included on an appropriately weighted basis.

[fol. 1960] (b) Paragraph 1A1(1) of said Annex 1A is amended by adding at the end thereof the following: "and Panagra will cause National to advise Panagra at the close of each month of the total gallonage delivered by National to Panagra's aircraft, classified by aircraft types, under the Interchange Agreement."

(c) The last sentence of paragraph 1A3 of said Annex 1A is amended to read as follows:

> "If it shall appear that major items of cost recorded in such accounts are applicable only to the charter service or to Panagra's common carrier service or to the charter service operated pursuant to the Interchange Agreement, provision will be made for removing such costs from allocation and charging such costs directly to the service to which they relate."

(d) The parenthetical phrases in paragraphs 1A8 and 1B of said Annex 1A now reading: ("except for credits arising out of charges to PAA") are amended to read ("except for credits arising out of charges to PAA and of charges to National").

(e) The last sentence of paragraphs 2B and 2C of said Annex 1A are amended by adding at the end the words:

> "plus 20% of the available ton miles flown in the charter service operated pursuant to the Interchange Agreement."

110. Paragraph 102 of this Supplement No. 18 shall be effective immediately. The remainder of this Supplement

No. 18 shall become effective only in the event that the Interchange Agreement shall become effective and upon the making of an order by the Civil Aeronautics Board [fol. 1961] approving the Through Flight Agreement as herein modified, and shall remain in effect so long as the Interchange Agreement and the Through Flight Agreement shall remain simultaneously in effect.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their officers thereunto duly authorized on the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 23

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 19

THIS AGREEMENT, made this 7th day of August, 1957, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, as supplemented and amended, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth,

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

111. The following schedule of rates for charges to Panagra pursuant to paragraph 8 of the Through Flight Agreement for training is hereby substituted for the schedule of rates set forth in subparagraph (c) of paragraph 101, effective as of July 1, 1957:

School	*Dollars per Hour*
Miami—Ground Training	$ 8.19
Miami—Dehmel	16.55
Miami—Pilot	55.50
Aircraft Type	*Hourly Rate*
DC-3	$ 79.00
DC-4	130.00
DC-6 type	315.00
DC-7B	541.00
CV-240	211.00

The flight training charges per hour hereunder shall be the sum of the school rate and the aircraft rate for the type aircraft used.

IN WITNESS WHEREOF, the parties have caused this [fol. 1963] agreement to be executed by their officers thereunto duly authorized on the day and year above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 24

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 20

THIS AGREEMENT, made this 11th day of July, 1958, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, as supplemented and amended, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

112. The tables of rates set forth in Attachment A hereto are hereby substituted for the table of rates appearing in paragraph 95 of the Through Flight Agreement.

113. The tables of rates set forth in Attachment B hereto are hereby substituted for the table of rates appearing in paragraph 97 of the Through Flight Agreement.

114. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the third and fourth calendar quarters of the calendar year 1955, the four quarters of the calendar years 1956 and 1957 and the first calendar quarter of the calendar year 1958 respectively are attached hereto, marked Exhibit W, July-September, 1955, Exhibit X, October-December, 1955, Exhibit Y, January-March, 1956, Exhibit Z, April-June, 1956, Exhibit A1, July-September, 1956, Exhibit A2, October-December, 1956, Exhibit B1, January-March, 1957, Exhibit B2, April-June, 1957, Exhibit B3, July-September, 1957, Exhibit B4—Revision 1, October-December, 1957, and Exhibit C1, January-March, 1958, respectively, and made a part hereof, and are hereby accepted by PANAGRA.

115. The prices set forth in the Exhibits referred to in paragraph 114 for maintenance and overhaul of PAN-AGRA's DC-4 aircraft, and engines, propellers and com- [fol. 1965] ponents therefor, will, with respect to the period up to and including June 30, 1957, be subject to a surcharge of .... of the total price as otherwise determined in accordance with the provisions of the applicable Exhibits to cover the amounts payable under paragraphs B and C of Annex 2 to the Through Flight Agreement in respect of maintenance of DC-4 aircraft.

116. Effective as of April 1, 1955 the following table of rates shall be established as the monthly depreciation charge on the joint DC-6 FESPA inventory pool for the period April 1, 1955 through December 31, 1957 as contemplated under subparagraph (iv) of paragraph 75:

April through September, 1955	$6,236 per month
October, 1955 through March, 1956	$4,425 per month
April through September, 1956	$5,020 per month
October through December, 1956	$5,515 per month
January through June, 1957	$5,890 per month
July through December, 1957	$6,043 per month

117. Effective as of April 1, 1955, the following is hereby inserted at the end of clause (ii) of Section 3, *Return On Panagra's Investment*, of Annex 1-A:

"The amount of the return payable to Panagra by Pan American in respect of such funds or securities for any period shall be reduced by such portion of the amount of any interest payable thereon to Panagra by third parties for such period as is allocable to the charter service on a revenue mile basis as referred to above.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized on the day and year first above written.

THROUGH FLIGHT AGREEMENT— SUPPLEMENT NO. 21

THIS AGREEMENT, made this 23rd day of December, 1958, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York corporation, hereinafter called "PAA", and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware corporation, hereinafter called "PANAGRA",

WHEREAS, PAA and PANAGRA are parties to a certain agreement dated July 30, 1946, as supplemented and amended, said agreement as so supplemented and amended being hereinafter referred to as the "Through Flight Agreement"; and

WHEREAS, the parties desire further to supplement and amend the Through Flight Agreement as herein set forth;

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

118. The table of rates set forth in Attachment A1 hereto is hereby substituted for the table of rates appearing in Attachment A to Supplement No. 20 to, and referred to in paragraph 112 of, the Through Flight Agreement.

119. The table of rates set forth in Attachment B1 hereto is hereby substituted for the table of rates appearing in Attachment B to Supplement No. 20 to, and referred to in paragraph 113 of, the Through Flight Agreement.

120. The official price lists referred to in paragraph 65 of the Through Flight Agreement relating to the second, third and fourth calendar quarters of the calendar year 1958 are attached hereto, marked Exhibit C2, April-June, 1958, Exhibit C3, July-September, 1958, and Exhibit C4, October-December, 1958, respectively, and made a part hereof, and are hereby accepted by PANAGRA.

121. Effective as of January 1, 1958 the following table of rates shall be established as the monthly depreciation

charge on the joint DC-6 FESPA inventory pool for the [fol. 1967] period January 1, 1958 through December 31, 1958 as contemplated under subparagraph (iv) of paragraph 7a:

January through June, 1958	$6,415 per month
July through September, 1958	$6,110 per month
October through December, 1958	$7,782 per month

IN WITNESS WHEREOF, the parties have caused this agreement to be executed by their officers thereunto duly authorized on the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC.

OFFICIAL PRICE LIST—APRIL 1-JUNE 30, 1958

PANAGRA

I—AIRCRAFT SERVICES AND OVERHAULS—LABOR

Aircraft Type	*Service Type*	*Fixed Price*
DC-6B	#1 Service—Routine Only	$ 480
	#3 Equalized	3,990
	Engine Change	180*
	Supercharger Change	150*
DC-7B	#1 Service—Routine Only	630
	#3 Equalized	4,200
	Engine Change	240*
	Supercharger Change	180*
DC-4—AE & B Models	All Services	Flat Rate per Actual Man-hours Expended

Except as noted in the following paragraphs, the fixed prices quoted provide for labor to perform routine, time limit and inspection (discrepancy) items according to service work forms and policies in effect April 1, 1958.

a) The quoted labor dollars apply to services performed on aircraft regularly maintained at MOB. We reserve the right to quote special manhour prices or to bill on the basis of actual hours for services to aircraft brought to MOB at infrequent or irregular intervals, and for minor services in combination with major modification projects. Aircraft entering the MOB service pattern for the first time are subject to billing at actual hours until the MOB Chief Inspector and

* Applicable only on services where this work has not been prorated into the fixed price (Transit Services).

the customer representative agree that the aircraft is up to MOB standard. The work described in MOB Administrative Manual Publication #19.02.02 2 is non-predictable and will be billed at actual hours.

b) Overhaul of engines, propellers and components removed during services is not included in the quoted service figures.

c) The quoted manhour figures for all #1 Services apply only to the routine portion of the services. All inspection item category of work on #1 Services will be billed on the basis of actual manhours expended.

d) No fixed prices are quoted for any Overhaul Services that may be performed on any PAG aircraft during the Second Quarter 1958.

[fol. 1971]

II—ENGINE AND NACELLE OVERHAUL—LABOR.

	Fixed Price		
	R ~~2800~~	R 2800	R 3350 DA
Bare Engine Overhaul when part of power package overhaul	$1,782	$2,727	$3,321
Bare Engine Overhaul when not part of power package overhaul	1,863	2,862	3,483
Nacelle Overhaul—Routine	567	621	783
Nacelle Overhaul—Major	594	837	972
Nacelle Build-Up	189	297	459

Powerplant overhaul prices include the labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs, and to reassemble and functionally test the unit. Small machining and plating operations normally considered to be a part of routine overhaul are also included. Labor for modification, conversion and or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated, at the applicable labor rates as hereinafter set forth for each manhour of direct labor utilized. The cost of overhauling engine and nacelle ac-

cessories removed during overhauls is not included in the above prices.

Engine and Nacelle repair and exploratory or diagnostic disassembly, as distinguished from routine overhaul is not included in the above prices and will be billed on the basis of actual hours expended times the applicable labor rate. Major changes in procedures and or tolerances occurring within the quarter are considered cause for adjusting the fixed price.

III—COMPONENT OVERHAUL—LABOR AND MATERIAL

Component Overhaul

Flight equipment accessories classified as "Components" listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component including all elements of costs except material mark-up in effect as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the Component Overhaul Price List dated April 1, 1958, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times by mutual agreement. Components now listed in the above referred to Price List will be overhauled at actual man-hours at the applicable rate per hour and actual material consumed at Latin American Division average price plus the applicable mark-ups hereinafter set forth.

[fol. 1972] *Propeller Overhaul*

Propeller Type	*Fixed Price*
DC-4	$297
DC-6B	432
DC-7B	513

Propeller overhaul prices include labor necessary to disassemble, clean, inspect, replace worn or defective parts, make minor repairs and to reassemble and functionally test

the unit when such unit has been removed from the aircraft due to expiration of operating time limit. Labor for modification, conversion and/or customer request items which require time in excess of that required for a routine overhaul will be billed at a flat price to be negotiated at the time such work is requested, or, if no price is negotiated at the applicable labor rate hereinafter set forth for each manhour of direct labor utilized. Propeller repair work when not forming part of a normal overhaul will be billed at actual manhours utilized.

Major changes in procedures and/or tolerances occurring within the quarter are considered cause for adjusting the fixed price.

IV—OTHER—LABOR

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per manhour for each manhour of direct labor utilized.

V—MATERIAL

All material consumed in any of the services, overhauls, modifications or miscellaneous repairs will be billed at Latin American Division average prices, or fixed material prices if applicable, plus freight and price variance mark-ups at the applicable material rates as hereinafter set forth.

VI—RATES

The applicable labor rates referred to in this Exhibit C-2 shall be as follows:

	Cost Per Manhour
Aircraft Service Work Center	$6.00
Component Overhaul Work Center	5.40
Surcharges—Overtime Premiums—[1]	
Time and one half	1.30
Double Time	2.60

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in MOB Administrative Manual Publication =19.02.02 4.

The applicable material rates referred to in this Exhibit C-2 shall be as follows:

Freight Inventory Dissipation	—1½% Dr. of material billings.
Inventory Price Variance Dissipation	— ½ of 1% Dr. of material billings.

[fol. 1973] VII—MISCELLANEOUS

The rates applicable to the other special services referred to in paragraph 65, shall be as follows:

Engineering and Laboratory Service	$ 5.00 per hour
Laboratory Fuel & Oil Sample Testing	20.00 per test
Flight and Crew Scheduling	2,250.00 per month
CAA Specification Handling	150.00 per month
Services of Supply Department Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other Services	Rates to be negotiated at time of request for service.

Labor rate changes not anticipated herein developing through negotiations affecting this period will be distributed retroactively on the basis of the distribution of labor, so affected.

I AIRCRAFT SERVICES AND OVERHAULS—LABOR

All aircraft services and overhauls shall be performed on actual manhours expended at the applicable labor rate hereinafter set forth.

II ENGINE AND NACELLE OVERHAUL—LABOR

All engine and nacelle overhauls shall be performed on actual manhours expended at the applicable labor rate hereinafter set forth.

III COMPONENT OVERHAUL—LABOR AND MATERIAL

Component Overhaul

Flight equipment accessories classified as "Components" listed in the Latin American Division Component Manual, as revised from time to time, shall be overhauled at a price per individual component including all elements of costs except material mark-up in effect as of the time of removal from flight equipment at Miami or the time of receipt in Miami from line stations, in accordance with the Component Overhaul Price List dated July 1, 1958, as the same may be revised from time to time by mutual agreement. Such prices shall be subject to review at the time this price list is subject to review and may be changed at other times by mutual agreement. Components not listed in the above referred to Price List will be overhauled at actual manhours at the applicable rate per hour and actual material consumed at

Latin American Division average price plus the applicable mark-ups hereinafter set forth.

Propeller Overhaul

All propeller overhauls and services will be billed on the basis of manhours of direct labor utilized at the applicable labor rate hereinafter set forth.

IV OTHER—LABOR

All other miscellaneous maintenance work shall be billed on the basis of the applicable labor rates per manhour for each manhour of direct labor utilized.

[fol. 1975] V MATERIAL

All material consumed in any of the services, overhauls, modifications or miscellaneous repairs will be billed at Latin American Division average prices, or fixed material prices if applicable, plus freight and price variance mark-ups at the applicable material rates as hereinafter set forth.

VI RATES

The applicable labor rates referred to in this Exhibit C-3 shall be as follows:

	Cost Per Manhour
Aireraft Service Work Center	$6.00
Component Overhaul Work Center	5.45
Surcharges—Overtime Premiums—[1]	
Time and one half	1.30
Double Time	2.60

The applicable material rates referred to in this Exhibit C-3 shall be as follows:

Freight Inventory Dissipation	1½% Dr. of material billings.
Inventory Price Variance Dissipation	½ of 1% Dr. of material billings.

[1] Maintenance work requests resulting in a requirement to perform work on an overtime basis shall be handled as provided for in LAD Administrative Manual Publication #19.02.02/4.

VII MISCELLANEOUS

The rates applicable to the other special services referred to in paragraph 65, shall be as follows:

Engineering and Laboratory Service	$ 5.50 per hour
Laboratory Fuel & Oil Sample Testing	22.00 per test
Flight and Crew Scheduling	2,250.00 per month
CAA Specification Handling	150.00 per month
Services of Supply Department Services	Rates as established in Letter Purchasing Agreement dated July 14, 1948 (as amended).
Other services	Rates to be negotiated at time of request for service.

Labor rate changes not anticipated herein developing through negotiations affecting this period will be distributed retroactively on the basis of the distribution of labor, so affected.

Docket No. 4882 et al.

In the matter of the

REOPENED NEW YORK-BALBOA THROUGH SERVICE PROCEEDING

Docket No. .....

In the matter of the

Application of National Airlines, Incorporated, Pan American World Airways, Inc., and Pan American-Grace Airways, Inc. for approval of Equipment Interchange Agreement and Amendment to Through Flight Agreement under Section 412 of the Civil Aeronautics Act and, if deemed necessary, for approval under or exemption from Section 408 of the said Act.

APPLICATION OF NATIONAL AIRLINES, INCORPORATED, PAN AMERICAN WORLD AIRWAYS, INC., AND PAN AMERICAN-GRACE AIRWAYS, INC. FOR APPROVAL OF EQUIPMENT INTERCHANGE AGREEMENT AND AMENDMENT TO THROUGH FLIGHT AGREEMENT UNDER SECTION 412 OF THE CIVIL AERONAUTICS ACT AND, IF DEEMED NECESSARY, FOR APPROVAL UNDER OR EXEMPTION FROM SECTION 408 OF THE SAID ACT.

The application of National Airlines, Incorporated (hereinafter referred to as "National"), Pan American World Airways, Inc. (hereinafter referred to as "Pan American") and Pan American-Grace Airways, Inc. (hereinafter re-

ferred to as "Panagra") respectfully shows to the Board as follows:

1. National, a Florida corporation, is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail by air on Route No. 31 between New York, N. Y. and Miami, Florida, by various intermediate points.

2. Pan American, a New York corporation, is the holder of a certificate of public convenience and necessity authoriz- [fol. 1980] ing the transportation of persons, property and mail by air between Miami, Florida, and Balboa, Canal Zone, by various intermediate points.

3. Panagra, a Delaware corporation, is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail by air between the Canal Zone and points in South America.

4. National, Pan American and Panagra have entered into an Equipment Interchange Agreement for the provision of through-plane service between New York and Miami on National's route No. 31, Miami and Balboa on Pan American's Latin American route, and Balboa and points on Panagra's route, a copy of which is attached as Exhibit A.

5. Pan American and Panagra have entered into a supplement to the Through Flight Agreement between them dated July 30, 1946, as previously amended, heretofore approved by the Board, a copy of which Supplement is attached as Exhibit B.

6. The parties respectfully request: (1) that the Board approve, under Section 412 of the Civil Aeronautics Act, the Equipment Interchange Agreement, a copy of which is attached as Exhibit A, and the Through Flight Agreement as the same will be amended by the Supplement, a copy of which is attached as Exhibit B; and (2) that if the Board should deem that approval of either of said agreements under Section 408 of the said Act is required, that the Board grant such approval or, if the Board considers that a further hearing would be necessary to that end, that

the Board exempt the parties from the requirements of Section 408 of the Civil Aeronautics Act insofar as required [fol. 1981] to permit the said agreements to become effective.

Respectfully submitted,

EQUIPMENT INTERCHANGE AGREEMENT

THIS EQUIPMENT INTERCHANGE AGREEMENT, made this day of August, 1955, between NATIONAL AIRLINES, INCORPORATED, a corporation organized and existing under the laws of the State of Florida (hereinafter referred to as "National"), PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter referred to as "Pan American"), and PAN AMERICAN-GRACE AIRWAYS, INC., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as "Panagra"):

WITNESSETH:

I. WHEREAS, National is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail between New York,

N. Y. and Miami, Florida (such route being sometimes hereinafter referred to as "the New York-Miami route" or "the Miami-New York route") by various intermediate points;

II. WHEREAS, Pan American is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail between Miami, Florida and Balboa, C. Z. (Ancon, C. Z. or Panama City, Panama) by various intermediate points; and

III. WHEREAS, Panagra is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail between the Canal Zone and points in South America; and

IV. WHEREAS, Pan American is a party to an agreement dated July 30, 1946 with Panagra which has been supplemented by various further agreements (the said agreement as so supplemented being hereinafter called "the Through Flight Agreement"), whereby Pan American agrees to charter, as set forth in said agreement, certain [fol. 1983] aircraft of Panagra for through operation from and to Panagra's northern terminus at Balboa over certain routes or proposed routes of Pan American specified in such agreement, including Pan American's route between Balboa and Miami referred to in recital II; and

V. WHEREAS, concurrently herewith, Pan American and Panagra are executing a modification of the Through Flight Agreement providing that, for the term of this Agreement, unless the Board may otherwise permit, all flights operated under the Through Flight Agreement shall be through flights to and from New York operated between Miami and New York over the route of National, and making further provision whereby the aircraft of Panagra chartered to Pan American pursuant to the Through Flight Agreement for through operation by Pan American between the Canal Zone and Miami may be leased to National in accordance with this Agreement; and

VI. WHEREAS, in view of the substantial number of persons and the substantial quantity of property and mail

carried by connecting service between points on National's Route No. 31, on Pan American's Miami-Balboa route and on Panagra's route, National, Pan American and Panagra consider it in the public interest to furnish through-plane service to accommodate this traffic as hereinafter provided.

NOW, THEREFORE, in consideration of the premises, it is agreed as follows:

1. *Lease of Aircraft*

(a) National will lease Panagra aircraft (including cargo only aircraft) operated by Pan American from Balboa into Miami under the Through Flight Agreement, for through operation from Miami to New York and intermediate points on National's Route 31 and for return operation to Miami and thence to Balboa and beyond. Also, as provided in paragraph 2(b) of this Agreement, Pan American and Panagra, respectively, will lease National [fol. 1984] aircraft including cargo only aircraft, operated by National from New York to Miami for through operation over Pan American's route to Balboa and Panagra's route beyond and for return operation to Miami and thence to New York. The terms of the lease of National aircraft shall be agreed at an appropriate time and set forth in a supplement to this Agreement.

(b) The lease of Panagra aircraft shall become effective upon the delivery of the aircraft to National at National's loading ramps at Miami by Pan American as agent for Panagra, and the delivery by National of a receipt for such aircraft in a form to be agreed upon, and shall terminate upon delivery by National of the aircraft to Pan American as agent for Panagra at Pan American's loading ramps at Miami and the delivery to National of a similar receipt. The parties shall designate certain persons or certain classifications of employees who shall have authority to make and accept delivery of aircraft and to execute, deliver and accept receipts therefor on behalf of the parties, respectively. All line service work while Panagra aircraft are under lease will be performed by the lessee, it being understood that National at Miami will only be responsible therefor on northbound through flights. In the event that

for any reason an aircraft engaged in operations under this Agreement is required to bypass or overfly Miami, the lease shall become effective or shall terminate as the case may be, when such aircraft reaches 25 degrees, 49 minutes, North, or at such other time as may be agreed upon.

(c) Panagra aircraft may be withdrawn from lease at any time because of mechanical defects or when such withdrawal will not unreasonably interfere with the operation of a through flight. In the case of any such withdrawal, the lessor shall substitute another aircraft of the same or comparable type with substantially comparable seating capacity, if such aircraft is available, in time to enable the operation of any flight which otherwise would have been [fol. 1985] performed with the withdrawn aircraft. Receipts conforming to those to be given at the time of the regular lease and the return of aircraft under subsection (b) shall be executed by authorized personnel at the time of any such withdrawal or substitution.

(d) The route in the continental United States over which through flights are to be operated under this Agreement shall be National's Route No. 31 between Miami and New York, except that stops shall be made at Washington if agreed between Panagra and National, or if agreed between Pan American and National, provided, however, that such stops shall not be on such a number of schedules as would prejudice the purpose of this Agreement to provide through service between New York, Miami, the Canal Zone and points on Panagra's route in South America, and stops shall be made at other intermediate points on National's Route No. 31 as mutually agreed upon between the parties. If National's Miami-New York route shall be extended to any points beyond New York, any or all such flights may be operated thereto by mutual agreement.

2. *Number and Nature of Through Flights and Schedules*

(a) The parties agree that upon this Agreement becoming effective, National will immediately operate between Miami and New York with Panagra aircraft operated between the Canal Zone and Miami under charter to Pan American pursuant to the Through Flight Agreement, at

a frequency of two round trips per day, one of which will be the "El InterAmericano" first-class flight, and the other will be the "El Pacifico" tourist-class flight.

(b) National will operate additional flights between Miami and New York with Panagra aircraft operated between the Canal Zone and Miami under charter to Pan American pursuant to the Through Flight Agreement, provided that National agrees that such additional flights are reasonably required for the convenient handling of [fol. 1986] through traffic and provided further that if the number of through flights operated under this Agreement shall exceed twenty-one (21) per week, National shall have the option to furnish the necessary additional equipment for such flights in excess of twenty-one (21) in the ratio of the mileage flown over National's Route No. 31 on said additional flights to the total through flight mileage over which said additional flights in excess of twenty-one (21) flights weekly are operated.

(c) In addition to and apart from the above, whenever the parties determine that scheduled cargo-only flights are required for the convenient handling of through cargo traffic, the necessary schedules and equipment to be used on such cargo service will be mutually agreed upon.

(d) The parties will consult from time to time with a view to fixing the schedules of the through flights being operated pursuant to this Agreement in such manner as to provide the most convenient and advantageous schedules for the benefit of such through traffic, with due consideration to the need for adequate loads of both domestic and international traffic to provide load factors which will permit the continued operation of such schedules and will provide economical and efficient utilization of the aircraft. Nothing in this paragraph shall in any wise affect the obligations of Pan American to Panagra under paragraph 4(a) of the Through Flight Agreement.

(e) If experience shall demonstrate that the load factors (including both domestic and international through traffic) on the through flights operated pursuant to this Agreement shall be inadequate, the parties shall take appropriate ac-

tion to increase such load factors through reduction or adjustment of their schedules or otherwise. It is the intention of the parties that within the limitations which may be necessary by reason of the operations under the Through Flight Agreement and this Agreement, through flight schedules and turn-arounds shall be arranged to as- [fol. 1987] sure maximum utilization of aircraft leased pursuant to this Agreement, and each party shall exercise due diligence in delivering or redelivering such aircraft.

(f) In routing and selling local and way-to-way traffic, none of the parties shall discriminate in favor of flights not operated pursuant to this Agreement and the parties shall be under a continuing obligation to use their best efforts to develop economic load factors on all flights operated pursuant to this Agreement.

(g) The parties will instruct their respective personnel to cooperate in arranging and adjusting from time to time as occasion may arise reasonable and sound procedures for meeting traffic and operating problems that may arise in respect of any particular flight by reason of through flights arriving at Miami northbound or southbound unduly delayed. Due consideration shall be given in this connection to the purpose of this Agreement to provide through plane service for traffic between points on National's Route No. 31 and on Pan American's Miami-Balboa route and points on Panagra's route. Pan American shall give National immediate notice whenever aircraft scheduled to arrive in Miami northbound are to be unduly delayed, and thereafter, in order to accommodate National's Miami-New York traffic, at National's request, another aircraft will be substituted if such aircraft is available at Miami for operation of the scheduled flight to New York and return. It is the intention of the parties that in case of such substitution, or of operation by National of its own aircraft in lieu of the delayed aircraft, the delayed aircraft shall be operated through to New York when agreed to by the operations personnel of Panagra or Pan American and National. The parties agree to adjust their schedules or to make other appropriate arrangements if after a reasonable trial period National's Miami-New York traffic is un-

duly inconvenienced by reason of delays in the arrival of interchange aircraft. It is intended that the parties will [fol. 1988] exercise the same degree of diligence and effort in maintaining schedules to be operated pursuant to this Agreement as each party customarily exercises in operations over its own routes.

3. *Aircraft and Crews to be Operated under Agreement*

(a) Panagra aircraft operated pursuant to this Agreement over National's Route No. 31 shall, subject to agreement with the authorized representative of National's cabin attendants, be operated with Panagra cabin attendants except that there shall be one National cabin attendant, provided, however, that when such cabin attendants are to be in excess of National's normal complement of cabin attendants, for the same class of service, the additional cost shall be defrayed by Panagra. Panagra aircraft shall be operated with the pilots and flight engineers of National on National's Route No. 31 except that with respect to flights which, for operating or other reasons, do not land at Miami, the flight crew then operating the aircraft shall proceed to an appropriate alternate airport. All aircraft operated under this Agreement shall be properly licensed for operation over the routes, and all flight personnel on such aircraft shall be fully licensed and/or qualified for such operation. The parties will furnish each other with all data which may be required for the inclusion of their aircraft and flight personnel as specified in the others' Air Carrier Operating Certificates.

(b) The aircraft which shall be tendered pursuant to this Agreement shall be of a modern type capable of carrying on the services herein contemplated a reasonable load at competitive speeds, and with accommodations and comfort-level measured in the light of the aircraft types currently being operated over the Miami-New York route.

(c) The lessee shall have a right to inspect any aircraft tendered for operation pursuant to this Agreement before accepting same and may refuse to operate any aircraft [fol. 1989] tendered which is not in satisfactory operating

condition, subject only to customary line service, in the light of regulations of the Civil Aeronautics Administration and prevailing airline standards.

4. *Responsibility for Operations*

The lessee shall have full responsibility for and control over the operation of leased aircraft over its route while under lease to it as provided in this Agreement. The lessee's responsibility for such operation, without limiting the generality of the foregoing, shall include responsibility for and performance of operations dispatch, flight-plan clearance, radio, plane guard and in-flight instructions, all communications, navigation and weather facilities and services, all loading and discharge of airplanes, all handling of traffic and passenger service, all necessary airplane and engine inspection and on-line and turn-about maintenance service, and all emergency maintenance to the extent necessary or appropriate for the safety or preservation of the aircraft or to the extent requested by the lessor, provided that the lessee shall not be obligated to perform emergency maintenance at the lessor's request unless it has personnel and facilities capable of performing such emergency maintenance at the point where the aircraft is located. The lessee undertakes to furnish in connection with such operations adequate and efficient ground facilities and personnel to conduct such operations in accordance with approved and modern standards which shall in no event be lower than those provided in the case of its own aircraft, and to treat the lessor's aircraft on a basis of complete equality with its own aircraft.

5. *Traffic*

(a) The parties shall book and route through traffic between points on National's Route No. 31 and the Canal Zone and Panama on Pan American's route and points beyond on Panagra's route in South America via Panagra aircraft to the fullest extent practicable, provided that nothing herein contained shall be deemed to restrict the [fol. 1990] parties from operating through or connecting flights with each other or with any other carrier and rout-

ing traffic via such flights where a substantial improvement of service to the passenger or shipper would result.

(b) In order to assure that through traffic will be handled at maximum efficiency it is agreed that in the case of all northbound and southbound through flights operated over National's route, Panagra, and, subject to Panagra's reasonable requirements, Pan American, shall, from time to time, request National to block off until a reasonable time prior to departure a specific number of seats and a designated amount of mail and cargo capacity which will be designed to accommodate the through traffic reasonably expected, and shall themselves block off for the through flights on their own route a number of seats and an amount of mail and cargo capacity reasonably related to the seats and amount of capacity which they shall have requested National to block off, and the parties shall arrange their reservations control accordingly. If experience over a reasonable time indicates that the seats or capacity so blocked off unduly exceed the through traffic actually carried, the parties shall take appropriate action to prevent nonutilization of capacity, with due regard, however, for the requirements of the through traffic. Subject to the foregoing, it is the intention of this Agreement that the parties will route local and way-to-way traffic on the interchange aircraft in the same manner as on schedules operated with their own aircraft.

6. *Sales, Advertising and Publicity*

(a) The parties shall cooperate and shall use their best efforts to promote and develop traffic to be carried on through flights operated under this Agreement. The parties will advertise and otherwise publicize that through plane service is afforded over National's, Pan American's, and [fol. 1991] Panagra's routes between points on National's Route No. 31 in the northeastern United States and the Canal Zone and Panama and points on Panagra's route in South America. The parties hereto will agree in advance with each other on appropriate advertising programs (including newspaper and magazine space, advertising and

display pieces and collateral material) and budgets therefor, for promoting the through flights made pursuant to this Agreement and the approved expense of all such advertising shall be apportioned among them as from time to time agreed, provided, however, that no charge shall be made for transporting advertising material to the most effective point of use.

(b) National will cause the names of Pan American World Airways, Inc. and Pan American-Grace Airways, Inc., and, if Panagra shall so request, the name "Panagra", in such size and form as the parties may agree and the Pan American and Panagra insignia to be displayed on traffic counters at all airports and sales offices, including city ticket offices, at points in the continental United States (other than Miami) at which Panagra aircraft are operated under lease to National pursuant to this Agreement. At any airport in the continental United States at which Panagra aircraft may be operated under this Agreement Pan American and or Panagra may, at their expense, if they determine the same to be necessary or desirable, station a reasonable number of personnel who, without interferring with National's procedures, may assist in accommodating through traffic arriving from or departing to points on their respective certificated routes, it being understood that Pan American and Panagra will arrange between themselves to avoid duplication of such personnel. Persons so employed shall have access to National's space and facilities at such airports at National's absolute discretion.

(c) Pan American and Panagra will cause the name National Airlines, Inc. in such size and form as the parties [fol. 1992] may agree and the National insignia to be displayed on traffic counters at all airports and sales offices, including city ticket offices, at points outside the continental United States to which Panagra aircraft are operated.

(d) Panagra, acting through Pan American as Panagra's General Traffic and Sales Agent in the United States, and Pan American may from time to time indicate to National reasonable methods and procedures which they desire to

have established by National in connection with the selling, handling or servicing of traffic originating on or to be carried over their routes and National will put such methods and procedures into effect if agreed by it. The parties agree to furnish each other with periodic reports concerning the traffic sold to and from points on their respective routes in such reasonable detail and such form as shall be requested and mutually agreed.

(e) The name of the lessor, in such form as the lessor may determine, and its insignia shall appear on the exterior of all airplanes leased under this Agreement in addition to an appropriate statement inside the airplane informing the public that the airplane is the lessor's airplane under lease to the lessee.

7. *Liability to Third Parties and Insurance*

(a) The lessee will indemnify the lessor and hold it harmless in respect of any liability (other than to the lessor's flight crews and cabin attendants, if any, engaged in the operation of the lessor's aircraft) arising or claimed to arise as a result of lessee's operation, possession or use of the lessor's aircraft during the period of any lease. The lessee will carry passenger and cargo and public liability (including liability of lessor to employees of lessee) and property damage insurance policies covering risks attendant upon the foregoing in companies and with coverage which shall meet the lessor's reasonable satisfaction, such [fol. 1993] coverage to be in any event at least as extensive as in the case of its own aircraft; and will cause the lessor to be included in its policies as a party insured.

(b) The lessor will indemnify the lessee and hold it harmless (1) in respect of any liability arising or claimed to arise as a result of the operation of lessor's aircraft except when such aircraft shall be leased to the lessee, and (2) from all claims of lessor's flight crews and cabin attendants, if any, engaged in the operation of lessor's aircraft. The lessor will carry passenger and cargo and public liability and property damage insurance policies covering the risks attendant on the foregoing in companies and with

coverage which shall meet the lessee's reasonable satisfaction, such coverage to be in any event at least as extensive as in the case of its own operations, and will cause the lessee to be included in its policies as a party insured. The lessor will also carry appropriate policies of workmen's compensation insurance with respect to the employees referred to in clause (2) hereof.

(c) All indemnities herein shall include related costs and expenses.

(d) In the event of loss of or damage to or delay in the delivery of baggage or personal effects of a passenger, or cargo, express or mail on an aircraft making a through flight hereunder, the party having possession of the aircraft at the time the loss, damage or delay occurs shall, as between the parties hereto, be responsible therefor but in no event in excess of its liability under its stated conditions of carriage. In case it is not possible to establish which party has possession of the aircraft at the time of such loss, damage or delay, any liability or expense arising therefrom shall be shared among the parties in propor- [fol. 1994] tion to the revenue received from the transportation of the passenger whose baggage or personal effects shall have been lost, damaged or delayed or from the transportation of the cargo, express or mail which shall have been lost, damaged or delayed.

8. *Damage to Aircraft and Hull Insurance*

The lessee shall be liable for all loss or damage to aircraft or other property under lease to it pursuant to this Agreement within limits (which shall properly reflect the value of such aircraft or other property) to be agreed upon from time to time between the lessor and the lessee, irrespective of any question as to the proper maintenance of the aircraft or other property by lessor. Such value is hereinafter referred to as the "agreed value". If the loss or damage is of such extent that the aircraft is deemed to be a constructive total loss, the lessee shall pay to the lessor the agreed value of the damaged aircraft and the associated equipment installed therein, as of the date of

damage. Upon making such payment the lessee shall become the owner of such aircraft and the associated equipment installed therein and all salvage thereof. The lessee shall not be liable to the lessor for loss of use of the aircraft or other property as a result of loss or damage thereto.

The lessee shall, unless it desires to operate in whole or in part as a self-insurer, procure and maintain in full force and effect during the term of this Agreement at its own expense policies of hull insurance insuring against any loss of damage for which the lessee may be liable in an amount equal to the agreed value of each aircraft to be leased hereunder, in companies and under terms of insur- [fol. 1995] ance which shall meet the lessor's reasonable satisfaction. Said policies of insurance shall name the lessor as a co-insured and the lessee shall provide to the lessor a certificate of insurance evidencing such coverage. Such certificate of insurance shall have in it a "breach of warranty" clause providing that a breach of the insuring conditions by the lessee will not invalidate the insurance as to the lessor. The lessee agrees to require its insurers to waive any and all rights of subrogation such insurers may or could have against the lessor by virtue of such insurance contracts. The certificate of insurance shall also contain a provision that the lessor shall be given thirty (30) days' prior written notice by the insurers in the event either the insurers or the lessee desire to cancel or make a material change in the insuring conditions of such policies of insurance.

If the lessee desires to operate in whole or in part as a self-insurer, the lessor may require the lessee, prior to the commencement of operations or use of aircraft hereunder, or at any time thereafter, to deliver a bond with a surety and under terms and conditions reasonably satisfactory to the lessor which shall indemnify the lessor against any loss occasioned by such lessee's election not to procure hull insurance coverage in accordance with the provisions of this paragraph provided that a condition of any such bond shall be that it shall not be cancellable except upon thirty (30) days' prior written notice thereof from the surety to the lessor; and provided further that no such bond shall be

required if the amount of the hull insurance coverage carried by such self-insuring lessee is at least ninety percent (90%) of the agreed value of the aircraft.

[fol. 1996] 9. *Liens on Chartered Aircraft*

The lessee shall not permit any aircraft leased to it hereunder to remain subject to any mechanics or other lien whatsoever, and shall promptly satisfy or procure the discharge of any lien or garnishment of any nature whatsoever attaching to such aircraft.

10. *Compensation and Financial Provisions*

(a) *Rental*

National shall pay a rental for aircraft of Panagra leased hereunder at a rate per available seat mile based on National costs to be determined in accordance with the financial supplement attached and made a part hereof.

(b) *Expenses*

All expenses for the services contemplated to be performed by the lessee while the aircraft is under lease pursuant to this Agreement (except emergency maintenance as provided in paragraph 10(c)), and passenger and cargo liability, public liability and property damage and hull insurance as provided in paragraphs 7(a) and 8 shall be paid by the lessee.

(c) *Maintenance*

The lessor shall overhaul and maintain (except for turnaround maintenance while the aircraft is in the possession of the lessee) in accordance with its operations specifications, the aircraft leased hereunder. No aircraft shall be leased hereunder unless it is probable that it can be returned to the lessor before the time set for its next periodic inspection under the lessor's operations specifications unless, subject to agreement of the parties, the efficient utilization and routing of such aircraft makes such necessary or desirable. The lessee shall perform at the lessor's expense any emergency repairs or maintenance (not properly a

part of on-line or turnaround maintenance service) while the aircraft is in its possession to the extent requested by the lessor, but only to the extent to which it is capable with the personnel and facilities available at the point where [fol. 1997] the aircraft is located. The charge for such emergency repairs and maintenance shall be a fixed charge per man hour of direct labor, to be determined by agreement of the parties, plus the lessee's actual cost of materials used.

(d) Route mileages to be used in any determination under this Agreement will be those effective as shown in CAB Mileage Booklet No. 1, Airport-to-Airport Mileages over Interstate Routes of Certificated Air Carriers, and in any revisions thereof.

11. *Radio and Communications*

The lessor agrees to the installation in its aircraft of all radio or other communications and navigation equipment which may be necessary for the flight of such aircraft in scheduled operations over the lessee's route. Responsibility for the cost of such installation shall be fixed in a supplementary financial agreement to be entered into between the parties.

12. *Passenger Service*

It is the objective of the parties that on all through flights operated pursuant to this Agreement the quality of service, catering and attention afforded passengers on such flights shall be maintained at a level at least equal to the highest quality of service, catering and attention afforded passengers on any competitive international carrier serving Latin America. The parties will consult each other on a program for achieving this objective subject to the cost of maintaining this competitive standard of service being mutually agreed upon between the parties concerned.

13. *Training*

A training program shall be established designed to qualify flight personnel and other personnel for all operations called for by this Agreement, and the expenses of such

programs shall be allocated among the parties concerned [fol. 1998] in accordance with a supplementary financial agreement to be negotiated and entered into between such parties.

14. *Access to Books and Records*

The lessor and lessee of aircraft leased hereunder shall each have access to the books, records and accounts of the other as may be reasonably required to verify costs, expenditures and other data pertinent to this Agreement. Each party shall also furnish such information with respect to the operation of the leased aircraft as may be reasonably required by the other parties.

15. *Agreements with Other Carriers*

During the term of this Agreement National will not hereafter enter into any interchange agreement with any other carrier providing for the operation of that carrier's aircraft over National's route between Miami and New York which contains financial terms more favorable to such carrier than the financial terms of this Agreement without making such terms available to Panagra at its option.

16. *Construction and Definitions*

(a) It is the intention of the parties that within the general framework and conception of this Agreement the various provisions shall be broadly and liberally construed to accommodate technical, commercial, international and regulatory developments in the field of air transportation to the end that through traffic will be handled at maximum efficiency and in a manner to meet changing competitive conditions.

(b) Nothing in this Agreement shall be deemed to require any of the parties to take any action in violation of any applicable law, regulation, or order.

(c) This contract shall be construed in accordance with the laws of the State of New York.

[fol. 1999] (d) The various headings herein and the grouping of the provisions of this Agreement into separate paragraphs shall not be construed to limit or restrict the meaning or application of any provision hereof, and are for the purpose of convenience only.

(e) Reference to the Civil Aeronautics Board and to the Administrator of Civil Aeronautics shall mean any successor Federal agency having jurisdiction similar to that now exercised by the Board and the Administrator.

(f) Reference to specific aircraft includes engines, propellers, and accessories and other equipment of every nature which are physically attached to or in operation on such aircraft.

(g) References to Balboa or to the Canal Zone shall be deemed to include Panama, it being recognized that traffic to and from the Canal Zone presently is handled through the Tocumen Airport in Panama.

17. *Notice*

Notice to National wherever provided in the Agreement shall be given in writing by registered letter addressed to: President, National Airlines, Inc., 3240 Northwest 27th Avenue, Miami, Florida, or to such other address as National may designate in writing. Notice to Pan American wherever provided in the Agreement shall be given in writing by registered letter addressed to: Vice President-Administration, Pan American World Airways, Inc., 135 East 42nd Street, New York, N. Y., or to such other address as Pan American may designate in writing. Notice to Panagra wherever provided in the Agreement shall be given in writing by registered letter addressed to: President, Pan American-Grace Airways, Inc., 7 Hanover Square, New York, New York; or to such other address as Panagra may designate in writing. Notice shall not be considered given until the date when the same shall have been received as evidenced by the Post Office return receipt or, if the [fol. 2000] addressee shall have refused to accept the registered notice, the date on which such registered notice shall have been first tendered to the addressee. Notwith-

standing the foregoing provisions of this paragraph, notice may likewise be given in writing by letter delivered to the person designated to receive notice as aforesaid, provided a receipted copy is secured.

18. *Arbitration*

From and after the effective date of this Agreement any and all disputes as to the construction or operation of this Agreement shall be submitted to arbitration pursuant to the Commercial Arbitration Rules of the American Arbitration Association as amended and in effect January 1, 1952 (hereinafter referred to as the "Rules"), in the manner hereinafter provided; provided, however, that the foregoing shall not render subject to arbitration any matter which under this Agreement is subject to agreement between the parties. The party requesting arbitration shall notify the other parties as to the matter to be arbitrated. Within five (5) days after receipt of such notice, the other parties shall notify the party giving the notice whether they claim an interest in the arbitration. If both of the other parties shall give such notice, the arbitration shall be before three disinterested and unbiased arbitrators appointed by the Administrator (as defined in the Rules). If only one of the other parties shall give timely notice of claim of an interest in the arbitration, such party and the party giving the initial notice shall each appoint an arbitrator within fifteen (15) days after the giving of the initial notice and, within ten (10) days after such appointment, the two arbitrators so appointed shall appoint a third arbitrator. If either party fails to appoint the arbitrator whom such party is entitled to appoint, or if the arbitrators appointed by or for the respective parties shall fail to appoint the third arbitrator, such then unappointed arbitrator shall be [fol. 2001] appointed by the Administrator. The award of any two of the three arbitrators shall be final, binding and conclusive upon the parties, and judgment upon the award may be entered in any court having jurisdiction. Any arbitration hereunder shall be conducted in accordance with the laws of the State of New York, and shall be conducted in New York, N. Y. unless the parties shall otherwise agree in writing.

19. *Effective Date*

This Agreement shall become effective upon the date when the orders of the Civil Aeronautics Board taking the actions hereinafter specified shall have become effective; provided, however, that if, prior to the date of the initiation of operations hereunder, any of such orders shall have been stayed either by the Civil Aeronautics Board or by any court of competent jurisdiction, the effective date of this Agreement shall be postponed until the dissolution of such stay:

(1) Approval of this Agreement;

(2) Continued approval of the Through Flight Agreement.

20. *Term*

This Agreement shall terminate, or may be terminated:

(1) If the Civil Aeronautics Board should at any time withdraw its approval hereof; or

(2) If the Civil Aeronautics Board should at any time withdraw its approval of the Through Flight Agreement; provided, however, that anything to the contrary herein notwithstanding such withdrawal of approval shall not prevent National and Panagra from conducting through flights pursuant to this Agreement if Panagra should obtain legal authorization to engage in air transportation between the Canal Zone and Miami or National should obtain legal authorization to engage in air transportation between Miami and the Canal Zone; or

[fol. 2002] (3) At the option of any of the parties on six (6) months' written notice and subject to the approval of the Civil Aeronautics Board.

21. *Through Flight Agreement—Reservation of Rights*

Nothing herein contained shall in any respect be in derogation of the rights and obligations of Pan American or Panagra under the Through Flight Agreement as to one another.

22. *Non-Prejudice*

If this Agreement is not approved by the Civil Aeronautics Board or for any other reason does not become effective or if, having become effective, this Agreement should be disapproved, terminated or cancelled the negotiation and the terms of this Agreement and all applications filed and acts done hereunder shall be without prejudice to the rights and future position of any party.

IN WITNESS WHEREOF and in consideration of the mutual covenants contained herein, the parties hereto have executed these premises as of the day and year first above written.

NATIONAL AIRLINES, INCORPORATED

[fol. 2003]

FINANCIAL SUPPLEMENT TO THE INTERCHANGE AGREEMENT BETWEEN NATIONAL AIRLINES INCORPORATED, PAN AMERICAN WORLD AIRWAYS, INC. AND PAN AMERICAN-GRACE AIRWAYS, INC.

1. Formula for Determination of Costs.*

Costs of flight equipment and related services supplied to lessee by lessor pursuant to the Interchange Agreement will be determined separately by type of flight equipment and services relating thereto and shall be based upon National's costs per available seat mile for operating the same type of flight equipment in the same type of service (for this purpose the Douglas DC-7 and DC-7B shall be considered as the same type of equipment). The available seat miles shall be computed by multiplying the revenue miles flown by the seats installed in the various types of aircraft by type of service after excluding seats reserved for crew use. Should National's accounting practices, company procedures or the introduction of new types of equipment seriously distort its costs, any cost so affected shall be adjusted to reflect a normal cost level. Any abnormal costs of introducing new types of aircraft or other abnormal costs which benefit subsequent periods, which are removed from current costs, shall be amortized over a reasonable period for purposes of this contract. This general formula for cost ascertainment shall be subject to the following agreed limitations and determinations:

1.1 Direct Flight Costs

1.11 Flying Operations—Flying operations expense shall be determined as stated above except as follows:

---

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for Air Carriers presently in effect. If any revision is made in such Uniform System of Accounts, this Financial Supplement will be revised accordingly, it being understood, however, that the same elements of cost shall be included in the determinations hereunder.

(1) Flight Crew Salaries and Expenses—Should the flight crews of either the lessor or the lessee be used on the routes of the other party pursuant to paragraph 1(a) of the Interchange [fol. 2004] Agreement, a separate charge will be made based on the available seat mile cost of National for salaries, traveling, training and supervision expenses and general administrative expenses applicable to flight crew salaries.

(2) Gasoline and Gasoline Taxes—The cost of these items shall be based on average consumption per revenue flight hour, including gas consumed in taxiing and run-up time, at average gasoline prices for each month, for the type of fuel used at the various points at which gasoline is delivered to aircraft leased, said prices to include any outside costs incurred in connection with fueling, converted to an available seat mile cost for each type of flight equipment operated in the Interchange Services. The average consumption per hour for each type of flight equipment shall be determined by actual measurement of fuel used on the first fifteen round trip flights on each schedule. The hourly consumption shall be increased by lessee's experience percentage of non-revenue to revenue hours to include non-revenue flying. The figure thus arrived at shall continue to apply except that either the lessor or the lessee may request a revision at any time whereupon a new measurement shall be made on the next fifteen flights on each schedule and a new average consumption per hour converted to an available seat mile shall be determined on the basis of such measurement.

[fol. 2005] (3) Oil, ADI fluid and Related Taxes—The average actual cost of these items per available seat mile flown in the Interchange Services by type of flight equipment shall be used.

(4) Gasoline, oil, ADI fluid and related taxes supplied by the lessee shall be for the account of the lessor.

1.12 Direct Maintenance — Flight Equipment — The available seat mile cost of National for the same type of flight equipment in the same type service shall be used. In the event that it can be determined that overhaul reserves provided by National are either excessive or insufficient, the reserve provision shall be adjusted to reflect the cost level which may reasonably be anticipated.

1.13 Flight Equipment Depreciation—Depreciation expense shall be based upon National's cost per available seat mile for the same type of flight equipment in the same type of service except that if reported costs of aircraft and engines are based upon a life different than 7 years and 10% residual values the reported costs shall be adjusted to a 7-year basis and 10% residual values in making this determination. In the event that National's reported depreciation expense is distorted by the use of fully-depreciated flight equipment, appropriate adjustment will be made in this expense to reflect the normal level of costs.

1.21 Ground and Indirect Maintenance—This element of expense shall be determined by applying to National's direct labor cost per available seat mile by type of equipment in the same type of service National's overhead rate in relation to direct labor used in the maintenance of all types of flight equipment. The lessor and lessee have estimated that 25% of the direct labor and direct materials used [fol. 2006] in connection with ground maintenance included in Accounts 6227 and 6248 relate to maintenance of ground equipment not used in connection with the shop facilities. It is mutually agreed between the lessor and the lessee that such percentage will be subject to revision from time to time as studies of National's accounts may indicate as be-

ing appropriate. Therefore, 25% of the total of these two accounts shall be excluded and the formula for determining the overhead rate for this portion of the shop burden shall be as follows:

$$\frac{\text{Total 6200 expense} - 25\% \text{ of Accounts 6227 and 6248}}{\text{Accounts 5225} + 5226 + 5227 + 25\% \text{ of 6227}} = \text{Burden rate}$$

In computing the burden rate under the formula above, the expenditure of National in the accounts referred to in the numerator and denominator shall be gross before 80 account credits or direct credit transfers of expenses.

1.22 Depreciation—The lessor and the lessee estimate that 18% of all ground equipment depreciation relates to the shop facilities used in the maintenance of flight equipment. It is mutually agreed that such percentage will be subject to revision from time to time as studies of National's accounts may indicate as being appropriate. Therefore, this portion of the ground equipment depreciation of National shall be computed as an overhead item against direct labor used in flight equipment maintenance as follows:

$$\frac{18\% \text{ of Ground Equipment Depreciation}}{\text{Acounts } 5225 + 5226 + 5227 + 25\% \text{ of } 6227} = \text{Burden rate}$$

The cost to be used in the accounts in the numerator and denominator of the above formula shall be gross before 80 account credits or direct credit transfers of expenses.

[fol. 2007] 1.23 General and Administrative Expense—Various items of expense in this category related to flight equipment maintenance have been provided for in the overall distribution of general and administrative expense hereinafter set forth.

1.3 Line Service Expense

The general intention is that services of this nature shall be handled by lessee for its own account and that lessee shall reimburse lessor for the reasonable expenses of any such work as may be agreed the lessor shall perform either directly or by a third party acting in its behalf. Line service shall be deemed to mean only routine line service, such as refueling, turn-around inspection, fire guard, aircraft cleaning, etc., and not emergency repairs or periodic checks or maintenance, such as are normally performed in the shops of the owner of the aircraft.

1.4 Passenger Service Expense

On through flights where lessor furnishes part of lessee's normal complement of cabin attendants, the lessor and lessee agree that the rental shall include a charge for each cabin attendant so furnished by the lessor. This charge shall represent the average available seat mile cost of National for salaries, travel expenses, training and supervision applicable to cabin attendants.

[fol. 2008] The cost of other passenger services to be furnished by lessor shall be based on the cost per available seat mile reported by National in Accounts 6343, "Other Services", 6352, "Passenger Supplies—Other", and 6353, "Other Supplies".

1.5 General and Administrative Expense

General and Administrative Expenses shall be determined by allocating the general and administrative expense of National on the basis of the labor cost reported in each account group.

Certain general and administrative expenses not related to the services performed are to be excluded as follows:

The amounts reported in accounts 6641, 6642, 6665, 6666, 6667 and 6672 shall be excluded in total.

The remaining general and administrative expenses shall be allocated on the basis of labor costs appearing in account groups 5100, 5200, 6100, 6200, 6300, 6400 and 6500. This proration shall be by type of equipment with respect to account groups 5100 and 5200. The total amount of general and administrative expense allocated to the 6200 group shall be re-allocated to the 5200 group of accounts by type of equipment in accordance with the formula set fourth in paragraph 1.21 of this Financial Supplement.

1.6 Investments

In lieu of a return on the lessor's investment devoted to the interchange, the lessee shall maintain a cash deposit with lessor equivalent to the amount of the lessor's investment in flight equipment, including spares and working capital devoted to the interchange services up to twenty-one (21) flights per week over lessee's routes (see paragraph 2 of the Interchange Agreement). The investment in complete aircraft units shall be determined on the basis of the lessor's cost of such aircraft units, except that in the case of DC-6B aircraft such investment shall be determined on the basis of present market value to be agreed upon between the lessor and the lessee, or, in the absence of agreement, by arbitration between them pursuant to the Interchange Agreement. The investment in spare engines, spare [fol. 2009] propellers and flight equipment spare parts and assemblies shall be an amount equal to 30% of the investment determined for the complete aircraft units. The amount of the lessor's investment in flight equipment, including spares, devoted to the interchange services shall be determined by multiplying the average investment per aircraft unit (computed separately for each type), including spares, by the number of units devoted to the interchange operation, less the depreciation paid by lessee pursuant to paragraph 1.13.

For the purpose of computing the investment devoted to the interchange, the number of aircraft units of each type upon which such investment shall be based for each quarter shall be determined by dividing the estimated average revenue hours to be flown per day with lessor's aircraft of such

type over lessee's routes under the Interchange Agreement during such quarter by National's average daily revenue hour utilization during the preceding twelve (12) months with its own equipment of the same type.

The lessee will provide an amount of working capital estimated at one month's cash expenses for the services performed over National's Route No. 31 under the Interchange Agreement, provided that, if the deposit is made by the lessee in cash, the lessor will deliver to the lessee a bond with a surety in such amount of working capital and under terms and conditions reasonably satisfactory to the lessee.

The cash deposit will be adjusted each quarter.

As evidence of the cash deposit by the lessee, the lessor will issue to the lessee its non-interest bearing note for the amount of the deposit computed as of the effective date of the Interchange Agreement, which the lessee may discount without recourse. The lessor will cooperate with the lessee to effect such discount. Such note shall be for a term of seven (7) years or the termination of the Interchange Agreement, whichever shall first occur, with twenty-eight (28) equal quarterly payments which will approximate the [fol. 2010] anticipated reduction of the deposit due to depreciation accruals.

In lieu of a cash deposit the lessee, at its option, may issue its note to lessor for all or any part of the amount of the deposit required pursuant to this paragraph 1.6. Such note shall be for a term of seven (7) years or the termination of the Interchange Agreement, whichever shall first occur, with twenty-eight (28) equal quarterly payments which will approximate the anticipated reduction of the deposit due to depreciation charges, with interest at such rate as will permit the lessor to discount, without recourse, such note at time of issuance at par.

Upon the quarterly redetermination of the deposit as provided in this paragraph 1.6 the lessor will (a) pay to the lessee the amount of any reduction in such deposit over the balance previously required if the lessee shall have on deposit with lessor cash to cover such deposit, or (b) in the

event lessor shall have issued its note or notes as evidence of such deposit, lessor shall apply such reduction first in payment of current amortization on such note or notes and any excess of such reduction over current amortization shall be applied as prepaid amortization of such note or notes in inverse order of maturities, or (c) if the lessee shall have issued its note or notes to the lessor in lieu of such deposit, then lessor shall pay any such reduction of the deposit to the lessee to be used for reduction of such note or notes. In the event of an increase in the required deposit, the lessee will either cover the additional amount required by a cash deposit with the lessor in which event lessor shall issue its note or notes, if lessee so elects, as evidence of such additional deposit with terms and conditions as above provided unless otherwise agreed, or, if lessee so elects, it may issue a note or notes in lieu of such additional deposit with terms and conditions as above provided unless otherwise agreed.

It is the intention of this paragraph 1.6 to give the lessee the election as to whether the deposit shall be made in cash or by its note so that the rate of interest to be paid by the lessee on any notes issued or discounted pursuant to this paragraph 1.6 shall not exceed the rate of interest at which [fol. 2011] the lessee can borrow money on the same terms and conditions.

1.7 Sale of Aircraft

It is contemplated that initially five (5) DC-7Bs and five (5) DC-6Bs shall be devoted to the interchange service. In the event of (a) termination of the Interchange Agreement or (b) withdrawal of any type of aircraft operated in the interchange service, title to one aircraft out of each five aircraft to be operated in the interchange service shall pass to the lessee upon the following terms and conditions:

Payment by the lessee of the difference between the agreed value and the aggregate depreciation paid by the lessee to the lessor on the aircraft (excluding spares) of the type being sold. The agreed value shall be the lessor's cost of such aircraft except that in the case of the DC-6B type of aircraft presently being operated by the lessor, the agreed value shall be estab-

lished on the basis of the market value of such aircraft as of the effective date of the Interchange Agreement, established in accordance with the second sentence of paragraph 1.6 above. The lessor shall have the option forthwith (a) to repurchase at the then current market value or (b) to lease at a rental to be agreed upon, any aircraft sold to the lessee, except that in the case of such aircraft withdrawn from interchange service the lessor shall not have such options with respect to such aircraft sold to the lessee on which the lessee has paid in depreciation an amount equal to 90% of the agreed value of such aircraft as of the date title passes to lessee. In the absence of agreement on the above then current market value or rental, the same shall be determined by arbitration pursuant to the Interchange Agreement.

Title to such aircraft shall not pass to the lessee but shall remain in the lessor until termination of the Interchange Agreement or the withdrawal of the aircraft from [fol. 2012] the interchange service.

This paragraph 1.7 shall be subject to review and modification by mutual agreement, or, in the absence of such agreement, by arbitration pursuant to the Interchange Agreement, in the event any new type or additional aircraft are to be operated in the interchange service (except aircraft which may be required to replace any lost or damaged aircraft), with the understanding that upon such review a similar basis will be followed as was used above with respect to the five (5) DC-6Bs and the five (5) DC-7Bs referred to in this paragraph 1.7.

2. Billings and Base Periods

The payments provided for in this Financial Supplement shall be made within ten (10) days after invoice therefor shall be submitted to the party from which payment is due, which invoice shall be submitted monthly. Determination and billing of the rental of flight equipment and related equipment supplied to lessee by lessor pursuant to the Interchange Agreement for each year's period beginning

January 1 shall be based on National's cost for the year ended June 30 following. Pending determination of such costs based on National's final financial and operating reports to the Civil Aeronautics Board, interim billings may be made on an estimated basis at the rates in effect during the preceding period.

3. Review of Formula

The formula for determination of prices for services rendered under the Interchange Agreement may be reviewed at the request of either the lessor or the lessee made in writing at least fifteen (15) days before the expiration of any annual period. In the event of the making of any such request, the parties will promptly confer with a view to agreeing on such a readjustment, or, in the absence of agreement, by arbitration between them pursuant to the Interchange Agreement.

[fol. 2013] 4. It is hereby understood that this Financial Supplement is subject to paragraphs 1.3, 1.6 and 1.7 being reviewed and approved by National's General Counsel and that such Counsel shall state his views on or before August 10, 1955.

[fol. 2014]

EXHIBIT B

THROUGH FLIGHT AGREEMENT

SUPPLEMENT NO. 48

RELATING TO INTERCHANGE AGREEMENT WITH NATIONAL AIRLINES, INCORPORATED

AGREEMENT made this 4th day of August, 1955, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York Corporation (hereinafter called "PAA"), and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware Corporation (hereinafter called "Panagra"):

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, and supplements thereto

numbered one through seventeen inclusive relating to the charter of Panagra's aircraft to PAA for through operation on certain of PAA's routes north of the Canal Zone and other matters, which agreements are hereinafter referred to as "the Through Flight Agreement"; and

WHEREAS, PAA and Panagra have entered into an agreement with National Airlines, Incorporated, a Florida corporation (hereinafter called "National"), dated as of the date hereof (hereinafter referred to as "the Interchange Agreement"); and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth.

NOW, THEREFORE, THE AGREEMENT WITNESSETH:

102. All recitals and paragraphs of Supplement No. 5 to the Through Flight Agreement are hereby deleted except paragraphs 49, 50, 51 (except for the first parenthetical insertion), 53 (except for the proviso to the last sentence of the amendment made therein), 54 (notwithstanding any provisions of paragraph 59 to the contrary), 57(e) (as modified by paragraph 71), and 57 (g).

103. The last sentence of paragraph 14 of the Through Flight Agreement as amended by paragraphs 51 and 102 [fol. 2015] above is amended to read as follows:

> "PAA and Panagra will agree with each other (and with National if the Interchange Agreement shall become and be effective) in advance on appropriate advertising programs (including newspaper and magazine space, advertising and display pieces and collatoral material) and budgets therefor, for promoting the through flights made pursuant to this Agreement, and the approved expense of all such advertising shall be apportioned among them as from time to time agreed, provided, however, that no charge shall be made for transporting advertising material to the most effective point of use."

104. For the term of the Interchange Agreement, Panagra's aircraft chartered to PAA pursuant to the Through Flight Agreement for through operation between the Canal Zone and Miami, Florida, shall, except as the Civil Aeronautics Board may otherwise permit, be further chartered to National for through operation by National upon the specific terms and conditions set forth in the Interchange Agreement.

105. Panagra hereby constitutes and appoints PAA as Panagra's agent, for the term during which the Through Flight Agreement and the Interchange Agreement shall be simultaneously in effect, to deliver Panagra's aircraft to National at Miami, for the purpose of flights over National's route pursuant to the said agreement and to receive delivery of Panagra's aircraft from National at Miami. PAA is authorized as such agent, on Panagra's behalf, to receive and execute such receipts, to perform such inspections, to make such checks and measurements, and to perform all such other acts as may be necessary or appropriate in connection with the delivery or return of the said aircraft. In acting as such agent with respect to the delivery of Panagra's aircraft to National and the return of Panagra's aircraft by National at Miami, PAA shall be bound to exercise the same and only the same degree of care as PAA exercises with respect to the delivery and return of its own aircraft under similar circumstances.

[fol. 2016] 106. The second sentence of paragraph 15(a) of the Through Flight Agreement as amended is further amended to read as follows:

> "PAA shall be deemed to be in possession of Panagra's aircraft (1) in the case of aircraft turned over to PAA for operation on through flights under this agreement, from the time when such aircraft is so turned over to PAA by Panagra until the time when such aircraft is either (i) returned by PAA to Panagra or (ii) turned over by PAA to National for operation by National pursuant to the Interchange Agreement, in which event the aircraft shall again be deemed

to be in PAA's possession when returned to it by National, and (2) in the case of aircraft turned over to PAA for maintenance, from the time when such aircraft is turned over to PAA at one of the latter's maintenance bases until the time when such aircraft is returned to Panagra, or until it is turned over by PAA to National as provided above; except, in either case, for non-revenue or other special flights (excluding test flights made under PAA custody following maintenance and according to CAA requirements) during such period made at the instance and request of Panagra."

107. Paragraph 17(h) of the Through Flight Agreement (added by paragraph 34 of Supplement No. 2) is amended by adding the following at the end thereof: "and in the case of mileage flown over the route of National pursuant to the Interchange Agreement will be those effective as shown in the "Civil Aeronautics Board Official Airline Route and Mileage Manual" and in any revisions thereof.

108. Paragraph 23(e) of the Through Flight Agreement is amended by adding at the end thereof the words: "and the delivery of possession of Panagra's aircraft to National and the return of such possession from National pursuant to the Interchange Agreement."

109. (a) All reference in Annex 1A to the Through Flight Agreement to "the charter service" shall refer only to the charter service operated by PAA pursuant to said Agreement. All references in said Annex 1A to the total [fol. 2017] revenue miles flown by Panagra's aircraft or to a revenue mile basis shall include revenue miles flown by such aircraft pursuant to the Interchange Agreement, except that (i) in those instances where the expenses to be prorated under paragraph 1 of Annex 1A are not related to the miles flown by Panagra aircraft under the Interchange Agreement shall be omitted, and (ii) in those instances where the expenses to be prorated under paragraph 1 of Annex 1A are only partially related to the miles flown by Panagra aircraft under the Interchange Agreement, the

mileage under the Interchange Agreement shall be included on an appropriately weighted basis.

(b) Paragraph 1A1(1) of said Annex 1A is amended by adding at the end thereof the following: "and Panagra will cause National to advise Panagra at the close of each month of the total gallonage delivered by National to Panagra's aircraft, classified by aircraft types, under the Interchange Agreement."

(c) The last sentence of paragraph 1A3 of said Annex 1A is amended to read as follows:

> "If it shall appear that major items of cost recorded in such accounts are applicable only to the charter service or to Panagra's common carrier service or to the charter service operated pursuant to the Interchange Agreement, provision will be made for removing such costs from allocation and charging such costs directly to the service to which they relate."

(d) The parenthetical phrases in paragraphs 1A3 and 1B of said Annex 1A now reading: ("except for credits arising out of charges to PAA") are amended to read ("except for credits arising out of charges to PAA and of charges to National").

(e) The last sentence of paragraphs 2B and 2C of said Annex 1A are amended by adding at the end the words:

> [fol. 2018] "plus 20% of the available ton miles flown in the charter service operated pursuant to the Interchange Agreement."

110. Paragraph 102 of this Supplement No. 18 shall be effective immediately. The remainder of this Supplement No. 18 shall become effective only in the event that the Interchange Agreement shall become effective and upon the making of an order by the Civil Aeronautics Board approving the Through Flight Agreement as herein modified, and shall remain in effect so long as the Interchange Agreement and the Through Flight Agreement shall remain simultaneously in effect.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their officers thereunto duly authorized on the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 27

Exhibit 1

SUPPLEMENT NO. 1 TO EQUIPMENT INTERCHANGE AGREEMENT

This Supplemental Agreement made this 9th day of August, 1955 between NATIONAL AIRLINES, INCORPORATED, a corporation organized and existing under the laws of the State of Florida (hereinafter referred to as "National"), PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter referred to as "Pan

American"), and PAN AMERICAN-GRACE AIRWAYS, INC., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as "Panagra");

WITNESSETH:

WHEREAS, National, Pan American and Panagra entered into an Equipment Interchange Agreement, dated August 4, 1953, hereinafter referred to as the "Equipment Interchange Agreement"; and

WHEREAS, the parties desire to amend the Financial Supplement to the Equipment Interchange Agreement as hereinafter provided:

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties hereto do hereby agree that the financial supplement attached to and made a part of the Equipment Interchange Agreement is hereby amended in accordance with the financial supplement attached hereto, marked "Revision No. 1, dated August 9, 1955," and made a part hereof.

IN WITNESS WHEREOF the parties hereto have exe- [fol. 2021] cuted these premises as of the day and year first above written.

[fol. 2022]

Revision No. 1
Dated August 9, 1955

FINANCIAL SUPPLEMENT TO THE INTERCHANGE AGREEMENT BETWEEN NATIONAL AIRLINES INCORPORATED, PAN AMERICAN WORLD AIRWAYS, INC. AND PAN AMERICAN-GRACE AIRWAYS, INC.

1. Formula for Determination of Costs.*

Costs of flight equipment and related services supplied to lessee by lessor pursuant to the Interchange Agreement will be determined separately by type of flight equipment and services relating thereto and shall be based upon National's costs per available seat mile for operating the same type of flight equipment in the same type of service (for this purpose the Douglas DC-7 and DC-7 shall be considered as the same type of equipment). The available seat miles shall be computed by multiplying the revenue miles flown by the seats installed in the various types of aircraft by type of service after excluding seats reserved for crew use. Should National's accounting practices, company procedures or the introduction of new types of equipment seriously distort its costs, any cost so affected shall be adjusted to reflect a normal cost level. Any abnormal costs of introducing new types of aircraft or other abnormal costs which benefit subsequent periods, which are removed from current costs, shall be amortized over a reasonable period for purposes of this contract. This general formula for cost ascertainment shall be subject to the following agreed limitations and determinations:

1.1 Direct Flight Costs:

1.11 Flying Operations—Flying operations expense shall be determined as stated above except a follows:

---

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for Air Carriers presently in effect. If any revision is made in such Uniform System of Accounts, this Financial Supplement will be revised accordingly, it being understood, however, that the same elements of cost shall be included in the determinations hereunder.

(1) Flight Crew Salaries and Expenses—Should the flight crews of either the lessor or the lessee be used on the routes of the other party pursuant to paragraph 1(a) of the Interchange Agree-
[fol. 2023] ment, a separate charge will be made based on the available seat mile cost of National for salaries, traveling, training and supervision expenses and general administrative expenses applicable to flight crew salaries.

(2) Gasoline and Gasoline Taxes—The cost of these items shall be based on average consumption per revenue flight hour, including gas consumed in taxiing and run-up time, at average gasoline prices for each month, for the type of fuel used at the various points at which gasoline is delivered to aircraft leased, said prices to include any outside costs incurred in connection with fueling, converted to an available seat mile cost for each type of flight equipment operated in the Interchange Services. The average consumption per hour for each type of flight equipment shall be determined by actual measurement of fuel used on the first fifteen round trip flights on each schedule. The hourly consumption shall be increased by lessee's experience percentage of non-revenue to revenue hours to include non-revenue flying. The figure thus arrived at shall continue to apply except that either the lessor or the lessee may request a revision at any time whereupon a new measurement shall be made on the next fifteen flights on each schedule and a new average consumption per hour converted to an available seat mile shall be determined on the basis of such measurement.

[fol. 2024] (3) Oil, ADI fluid and Related Taxes—The average actual cost of these items per available seat mile flown in the Interchange Services by type of flight equipment shall be used.

(4) Gasoline, oil, ADI fluid and related taxes supplied by the lessee shall be for the account of the lessor.

1.12 Direct Maintenance—Flight Equipment—The available seat mile cost of National for the same type of flight equipment in the same type service shall be used. In the event that it can be determined that overhaul reserves provided by National are either excessive or insufficient, the reserve provision shall be adjusted to reflect the cost level which may reasonably be anticipated.

1.13 Flight Equipment Depreciation—Depreciation expense shall be based upon National's cost per available seat mile for the same type of flight equipment in the same type of service except that if reported costs of aircraft and engines are based upon a life different than 7 years and 10% residual values the reported costs shall be adjusted to a 7-year basis and 10% residual values in making this determination. In the event that National's reported depreciation expense is distorted by the use of fully-depreciated flight equipment, appropriate adjustment will be made in this expense to reflect the normal level of costs.

1.21 Ground and Indirect Maintenance—This element of expense shall be determined by applying to National's direct labor cost per available seat mile by type of equipment in the same type of service National's overhead rate in relation to direct labor used in the maintenance of all types of flight equipment. The lessor and lessee have estimated that 25% of the [fol. 2025] direct labor and direct materials used in connection with ground maintenance included in Accounts 6227 and 6248 relate to maintenance of ground equipment not used in connection with the shop facilities. It is mutually agreed between the lessor and the lessee that such percentage will be subject to revision from time to time as studies of National's accounts may indicate as being appropriate. Therefore, 25% of the total of these two accounts shall be excluded and the formula for determining the overhead rate for this portion of the shop burden shall be as follows:

$$\frac{\text{Total 6200 expense—25\% of Accounts 6227 and 6248}}{\text{Accounts 5225 + 5226 − 5227 + 25\% of 6227}} = \text{Burden rate}$$

In computing the burden rate under the formula above, the expenditure of National in the accounts referred to in the numerator and denominator shall be gross before 80 account credits or direct credit transfers of expenses.

1.22 Depreciation—The lessor and the lessee estimate that 18% of all ground equipment depreciation relates to the shop facilities used in the maintenance of flight equipment. It is mutually agreed that such percentage will be subject to revision from time to time as studies of National's accounts may indicate as being appropriate. Therefore, this portion of the ground equipment depreciation of National shall be computed as an overhead item against direct labor used in flight equipment maintenance as follows:

$$\frac{\text{18\% of Ground Equipment Depreciation}}{\text{Accounts 5225 + 5226 + 5227 + 25\% of 6227}} = \text{Burden rate}$$

The cost to be used in the accounts in the numerator and denominator of the above formula shall be gross before 80 account credits or direct credit transfers of expenses.

[fol. 2026] 1.23 General and Administrative Expense—Various items of expense in this category related to flight equipment maintenance have been provided for in the overall distribution of general and administrative expense hereinafter set forth.

1.3 Line Service Expense

The general intention is that services of this nature shall be handled by lessee for its own account and that lessee shall reimburse lesser for the reasonable expenses of any such work as may be agreed the

lessor shall perform either directly or by a third party acting in its behalf. Line service shall be deemed to mean only routine line service, such as refueling, turn-around inspection, fire guard, aircraft cleaning, etc., and not emergency repairs or periodic checks or maintenance, such as are normally performed in the shops of the owner of the aircraft.

1.4 Passenger Service Expense

On through flights where lessor furnishes part of lessee's normal complement of cabin attendants, the lessor and lessee agree that the rental shall include a charge for each cabin attendant so furnished by the lessor. This charge shall represent the average available seat mile cost of National for salaries, travel expenses, training and supervision applicable to cabin attendants.

[fol. 2027] The cost of other passenger services to be furnished by lessor shall be based on the cost per available seat mile reported by National in Accounts 6343, "Other Services", 6352, "Passenger Supplies—Other", and 6353, "Other Supplies".

1.5 General and Administrative Expense

General and Administrative Expenses shall be determined by allocating the general and administrative expense of National on the basis of the labor cost reported in each account group.

Certain general and administrative expenses not related to the services performed are to be excluded as follows:

The amounts reported in accounts 6641, 6642, 6665, 6666, 6667 and 6672 shall be excluded in total.

The remaining general and administrative expenses shall be allocated on the basis of labor costs appearing in account groups 5100, 5200, 6100, 6200, 6300, 6400 and 6500. This proration shall be by type of equipment with respect to account groups 5100 and 5200. The total amount of general and administrative expense allocated to the 6200 group

shall be re-allocated to the 5200 group of accounts by type of equipment in accordance with the formula set forth in paragraph 1.21 of this Financial Supplement.

1.6 Investment

In lieu of a return on the lessor's investment devoted to the interchange, the lessee shall maintain a cash deposit with lessor equivalent to the amount of the lessor's investment in flight equipment, including spares and working capital devoted to the interchange services up to twenty-one (21) flights per week over lessee's route (see paragraph 2 of the Interchange Agreement). The investment in complete aircraft units shall be determined on the basis of the lessor's cost of such aircraft units except that in the case of DC-6B aircraft such investment shall be determined on the basis of present market value to be agreed upon between the lessor and the lessee, or, in the absence of agreement, by arbitration between them pursuant to the Interchange Agreement. The investment in spare engines, spare [fol. 2028] propellers and flight equipment spare parts and assemblies shall be an amount equal to 30% of the investment determined for the complete aircraft units. The amount of the lessor's investment in flight equipment, including spares, devoted to the interchange services shall be determined by multiplying the average investment per aircraft unit (computed separately for each type), including spares, by the number of units devoted to the interchange operation, less the depreciation paid by lessee pursuant to paragraph 1.13.

For the purpose of computing the investment devoted to the interchange, the number of aircraft units of each type upon which such investment shall be based for each quarter shall be determined by dividing the estimated average revenue hours to be flown per day with lessor's aircraft of such type over lessee's routes under the Interchange Agreement during such quarter by National's average daily revenue hour utilization during the preceding twelve (12) months with its own equipment of the same type.

The lessee will provide an amount of working capital estimated at one month's cash expenses for the services per-

formed over National's Route No. 31 under the Interchange Agreement, provided that, if the deposit is made by the lessee in cash, the lessor will deliver to the lessee a bond with a surety in such amount of working capital and under terms and conditions reasonably satisfactory to the lessee.

The cash deposit will be adjusted each quarter.

As evidence of the cash deposit by the lessee, the lessor will issue to the lessee its non-interest bearing note for the amount of the deposit computed as of the effective date of the Interchange Agreement, with such reasonable terms and conditions as will enable the lessee to discount such note without recourse. The lessor will cooperate with the lessee to effect such discount. Such note shall be for a term of seven (7) years or the termination of the Interchange Agreement, whichever shall first occur, with twenty-eight (28) equal quarterly payments which will approximate the [fol. 2029] anticipated reduction of the deposit due to depreciation accrual.

In lieu of a cash deposit the lessee, at its option, may issue its note to lessor for all or any part of the amount of the deposit required pursuant to this paragraph 1.6. Such note shall be for a term of seven (7) years or the termination of the Interchange Agreement, whichever shall first occur, with twenty-eight (28) equal quarterly payments which will approximate the anticipated reduction of the deposit due to depreciation charges, with interest at such rate as will permit the lessor to discount, without recourse such note at time of issuance at par.

Upon the quarterly redetermination of the deposit as provided in this paragraph 1.6 the lessor will (a) pay to the lessee the amount of any reduction in such deposit over the balance previously required if the lessee shall have on deposit with lessor cash to cover such deposit, or (b) in the event lessor shall have issued its note or notes as evidence of such deposit, lessor shall apply such reduction first in payment of current amortization on such note or notes and any excess of such reduction over current amortization shall be applied as prepaid amortization of such note or notes in inverse order of maturities, or (c) if the lessee shall

have issued its note or notes to the lessor in lieu of such deposit, then lessor shall pay any such reduction of the deposit to the lessee to be used for reduction of such note or notes. In the event of an increase in the required deposit, the lessee will either cover the additional amount required by a cash deposit with the lessor in which event lessor shall issue its note or notes, if lessee so elects, as evidence of such additional deposit with terms and conditions as above provided unless otherwise agreed, or, if lessee so elects, it may issue a note or notes in lieu of such additional deposit with terms and conditions as above provided unless otherwise agreed.

It is the intention of this paragraph 1.6 to give the less the election as to whether the deposit shall be made in cash or by its note so that the rate of interest to be paid by the lessee on any notes issued or discounted pursuant to this paragraph 1.6 shall not exceed the rate of interest at which the lessee can borrow money on the same terms and [fol. 2030] conditions.

1.7 Sale of Aircraft

It is contemplated that initially five (5) DC-7Bs and five (5) DC-6Bs shall be devoted to the interchange service. In the event of (a) termination of the Interchange Agreement pursuant to paragraph 20 of the Interchange Agreement or (b) withdrawal of any type of aircraft operated in the interchange service, title to one aircraft to be designated by mutual agreement as of the effective date of the Interchange Agreement out of each five aircraft to be operated in the interchange service shall pass to the lessee upon the following terms and conditions:

The lessee shall pay the lessor the difference between the agreed value of the designated aircraft and the aggregate depreciation paid by the lessee to lessor on the aircraft (excluding spares) of the type involved. The agreed value shall be the lessor's cost of such designated aircraft except that in the case of the DC-6B type of aircraft presently being operated by the lessor, the agreed value shall be established on the basis of the market value of such designated aircraft as of the

effective date of the Interchange Agreement, established in accordance with the second sentence of paragraph 1.6 above. The lessor shall have the option forthwith (a) to purchase at the then current market value or (b) to lease for a period not to exceed eighteen (18) months, unless otherwise agreed, at a rental to be agreed upon, any such designated aircraft sold to the lessee, except that in the case of such designated aircraft withdrawn from the interchange service the lessor shall not have such options with respect to such designated aircraft sold to the lessee on which the lessee has paid in depreciation an amount equal to 90% of the agreed value of such designated aircraft as of the date title passes to the lessee. In the absence of agreement on the above then current market value or rental the same shall be determined by arbitration pursuant to the Interchange Agreement.

[fol. 2031] It is understood that the lessor shall have the right to substitute an aircraft of the same type and of substantially the same condition as the designated aircraft if the lessor is unable to deliver such designated aircraft because of loss, damage or other causes beyond the lessor's control. In such event the substituted aircraft shall become the designated aircraft for the purposes of this paragraph 1.7.

Title to the designated aircraft shall not pass to the lessee but shall remain in the lessor until termination of the Interchange Agreement or the withdrawal of the aircraft from the interchange service and payment of the full purchase price as prescribed above. Further, it is understood that wherever in the Interchange Agreement and this Financial Supplement the word "aircraft" is used, it shall include the designated aircraft.

This paragraph 1.7 shall be subject to review and modification by mutual agreement, or in the absence of such agreement, by arbitration pursuant to the Interchange Agreement, in the event any new type or additional aircraft are to be operated in the interchange service (except aircraft which may be required to replace any lost or damaged

aircraft), with the understanding that upon such review a similar basis will be followed as was used above with respect to the five (5) DC-6Bs and the five (5) DC-7Bs referred to in this paragraph 1.7.

[fol. 2032] 2. Billings and Base Periods

The payments provided for in this Financial Supplement shall be made within ten (10) days after invoice therefor shall be submitted to the party from which payment is due, which invoice shall be submitted monthly. Determination and billing of the rental of flight equipment and related equipment supplied to lessee by lessor pursuant to the Interchange Agreement for each year's period beginning January 1 shall be based on National's cost for the year ended June 30 following. Pending determination of such costs based on National's final financial and operating reports to the Civil Aeronautics Board, interim billings may be made on an estimated basis at the rates in effect during the preceding period.

3. Review of Formula

The formula for determination of prices for services rendered under the Interchange Agreement may be reviewed at the request of either the lessor or the lessee made in writing at least fifteen (15) days before the expiration of any annual period. In the event of the making of any such request, the parties will promptly confer with a view to agreeing on such a readjustment, or, in the absence of agreement, by arbitration between them pursuant to the Interchange Agreement.

BEFORE THE

CIVIL AERONAUTICS BOARD

Docket No. 4882 *et al.*

In the matter of the

REOPENED NEW YORK-BALBOA THROUGH SERVICE PROCEEDING

Docket No. 7341

In the matter of the

Application of National Airlines, Incorporated, Pan American World Airways, Inc., and Pan American-Grace Airways, Inc. for approval of Equipment Interchange Agreement and Amendment to Through Flight Agreement under Section 412 of the Civil Aeronautics Act and, if deemed necessary, for approval under or exemption from Section 408 of the said Act.

APPLICATION OF NATIONAL AIRLINES, INCORPORATED, PAN AMERICAN WORLD AIRWAYS, INC., AND PAN AMERICAN-GRACE AIRWAYS, INC. FOR APPROVAL OF EQUIPMENT INTERCHANGE AGREEMENT AND AMENDMENT TO THROUGH FLIGHT AGREEMENT UNDER SECTION 412 OF THE CIVIL AERONAUTICS ACT AND, IF DEEMED NECESSARY, FOR APPROVAL UNDER OR EXEMPTION FROM SECTION 408 OF THE SAID ACT

The application of National Airlines, Incorporated (hereinafter referred to as "National"), Pan American World Airways, Inc. (hereinafter referred to as "Pan American") and Pan American-Grace Airways, Inc. (hereinafter referred to as "Panagra") respectfully shows to the Board as follows:

1. National, a Florida corporation, is the holder of a certificate of public convenience and necessity authorizing [fol. 2035] the transportation of persons, property and mail by air on Route No. 31 between New York, N. Y. and Miami, Florida, by various intermediate points.

2. Pan American, a New York corporation, is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail by air between Miami, Florida, and Balboa, Canal Zone, by various intermediate points.

3. Panagra, a Delaware corporation, is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail by air between the Canal Zone and points in South America.

4. National, Pan American and Panagra have entered into an Equipment Interchange Agreement for the provision of through-plane service between New York and Miami on National's route No. 31, Miami and Balboa on Pan American's Latin American route, and Balboa and points on Panagra's route, a copy of which is attached as Exhibit A.

5. Pan American and Panagra have entered into a supplement to the Through Flight Agreement between them dated July 30, 1946, as previously amended, heretofore approved by the Board, a copy of which Supplement is attached as Exhibit B.

6. The parties respectfully request: (1) that the Board approve, under Section 412 of the Civil Aeronautics Act, the Equipment Interchange Agreement, a copy of which is attached as Exhibit A, and the Through Flight Agreement as the same will be amended by the Supplement, a copy of which is attached as Exhibit B; and (2) that if the Board should deem that approval of either of said agreements under Section 408 of the said Act is required, [fol. 2036] that the Board grant such approval or, if the Board considers that a further hearing would be necessary to that end, that the Board exempt the parties from the requirements of Section 408 of the Civil Aeronautics Act

insofar as required to permit the said agreements to become effective.

Respectfully submitted,

NATIONAL AIRLINES, INCORPORATED

EXHIBIT A

Equipment Interchange Agreement

As Amended By Supplement No. 1

THIS EQUIPMENT INTERCHANGE AGREEMENT, made this 4th day of August, 1955, between NATIONAL AIRLINES, INCORPORATED, a corporation organized and existing under the laws of the State of Florida (hereinafter referred to as "National"), PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter referred to as "Pan American"), and PAN AMERICAN-GRACE AIRWAYS, INC., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as "Panagra"):

WITNESSETH:

I. WHEREAS, National is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail between New York, N. Y. and Miami, Florida (such route being sometimes

hereinafter referred to as "the New York-Miami route" or "the Miami-New York route") by various intermediate points;

II. WHEREAS, Pan American is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail between Miami, Florida and Balboa, C. Z. (Ancon, C. Z. or Panama City, Panama) by various intermediate points; and

III. WHEREAS, Panagra is the holder of a certificate of public convenience and necessity authorizing the transportation of persons, property and mail between the Canal Zone and points in South America; and

[fol. 2038] IV. WHEREAS, Pan American is a party to an agreement dated July 30, 1946 with Panagra which has been supplemented by various further agreements (the said agreement as so supplemented being hereinafter called "the Through Flight Agreement"), whereby Pan American agrees to charter, as set forth in said agreement, certain aircraft of Panagra for through operation for and to Panagra's northern terminus at Balboa over certain routes or proposed routes of Pan American specified in such agreement, including Pan American's route between Balboa and Miami referred to in recital II; and

V. WHEREAS, concurrently herewith, Pan American and Panagra are executing a modification of the Through Flight Agreement providing that, for the term of this Agreement, unless the Board may otherwise permit, all flights operated under the Through Flight Agreement shall be through flights to and from New York operated between Miami and New York over the route of National, and making further provision whereby the aircraft of Panagra chartered to Pan American pursuant to the Through Flight Agreement for through operation by Pan American between the Canal Zone and Miami may be leased to National in accordance with this Agreement; and

VI. WHEREAS, in view of the substantial number of persons and the substantial quantity of property and mail

carried by connecting service between points on National's Route No. 31, on Pan American's Miami-Balboa route and on Panagra's route, National, Pan American and Panagra consider it in the public interest to furnish through-plane service to accommodate this traffic as hereinafter provided.

NOW, THEREFORE, in consideration of the premises, it is agreed as follows:

[fol. 2039]

1. *Lease of Aircraft*

(a) National will lease Panagra aircraft (including cargo only aircraft) operated by Pan American from Balboa into Miami under the Through Flight Agreement, for through operation from Miami to New York and intermediate points on National's Route 31 and for return operation to Miami and thence to Balboa and beyond. Also, as provided in paragraph 2(b) of this agreement, Pan American and Panagra, respectively, will lease National aircraft including cargo only aircraft, operated by National from New York to Miami for through operation over Pan American's route to Balboa and Panagra's route beyond and for return operation to Miami and thence to New York. The terms of the lease of National aircraft shall be agreed at an appropriate time and set forth in a supplement to this Agreement.

(b) The lease of Panagra aircraft shall become effective upon the delivery of the aircraft to National at National's loading ramps at Miami by Pan American as agent for Panagra, and the delivery by National of a receipt for such aircraft in a form to be agreed upon, and shall terminate upon delivery by National of the aircraft to Pan American as agent for Panagra at Pan American's loading ramps at Miami and the delivery to National of a similar receipt. The parties shall designate certain persons or certain classifications of employees who shall have authority to make and accept delivery of aircraft and to execute, deliver and accept receipts therefor on behalf of the parties, respectively. All line service work while Panagra aircraft are under lease will be performed by the lessee, it being understood that National at Miami will only be re-

sponsible therefor on northbound through flights. In the event that for any reason an aircraft engaged in operations [fol. 2040] under this Agreement is required to bypass or overfly Miami, the lease shall become effective or shall terminate as the case may be, when such aircraft reaches 25 degrees, 49 minutes, North, or at such other time as may be agreed upon.

(c) Panagra aircraft may be withdrawn from lease at any time because of mechanical defects or when such withdrawal will not unreasonably interfere with the operation of a through flight. In the case of any such withdrawal, the lessor shal substitute another aircraft of the same or comparable type with substantially comparable seating capacity, if such aircraft is available, in time to enable the operation of any flight which otherwise would have been performed with the withdrawn aircraft. Receipts conforming to those to be given at the time of the regular lease and the return of aircraft under subsection (b) shall be executed by authorized personnel at the time of any such withdrawal or substitution.

(d) The route in the continental United States over which through flights are to be operated under this Agreement shall be National's Route No. 31 between Miami and New York, except that stops shall be made at Washington if agreed between Panagra and National, or if agreed between Pan American and National, provided, however, that such stops shall not be on such a number of schedules as would prejudice the purpose of this Agreement to provide through service between New York, Miami, the Canal Zone and points on Panagra's route in South America, and stops shall be made at other intermediate points on National's Route No. 31 as mutually agreed upon between the parties. If National's Miami-New York route shall be extended to any points beyond New York, any or all such flights may be operated thereto by mutual agreement.

[fol. 2041]

2. *Number and Nature of Through Flights and Schedules*

(a) The parties agree that upon this Agreement becoming effective, National will immediately operate between

Miami and New York with Panagra aircraft operated between the Canal Zone and Miami under charter to Pan American pursuant to the Through Flight Agreement, at a frequency of two round trips per day, one of which will be the "El InterAmericano" first-class flight, and the other will be the "El Pacifico" tourist-class flight.

(b) National will operate additional flights between Miami and New York with Panagra aircraft operated between the Canal Zone and Miami under charter to Pan American pursuant to the Through Flight Agreement, provided that National agrees that such additional flights are reasonably required for the convenient handling of through traffic and provided further that if the number of through flights operated under this Agreement shall exceed twenty-one (21) per week, National shall have the option to furnish the necessary additional equipment for such flights in excess of twenty-one (21) in the ratio of the mileage flown over National's Route No. 31 on said additional flights to the total through flight mileage over which said additional flights in excess of twenty-one (21) flights weekly are operated.

(c) In addition to and apart from the above, whenever the parties determine that scheduled cargo-only flights are required for the convenient handling of through cargo traffic, the necessary schedules and equipment to be used on such cargo service will be mutually agreed upon.

(d) The parties will consult from time to time with a view to fixing the schedules of the through flights being operated pursuant to this Agreement in such manner as [fol. 2042] to provide the most convenient and advantageous schedules for the benefit of such through traffic, with due consideration to the need for adequate loads of both domestic and international traffic to provide load factors which will permit the continued operation of such schedules and will provide economical and efficient utilization of the aircraft. Nothing in this paragraph shall in any wise affect the obligations of Pan American to Panagra under paragraph 4(a) of the Through Flight Agreement.

(e) If experience shall demonstrate that the load factors (including both domestic and international through traffic) on the through flights operated pursuant to this Agreement shall be inadequate, the parties shall take appropriate action to increase such load factors through reduction or adjustment of their schedules or otherwise. It is the intention of the parties that within the limitations which may be necessary by reason of the operations under the Through Flight Agreement and this Agreement, through flight schedules and turn-arounds shall be arranged to assure maximum utilization of aircraft leased pursuant to this Agreement, and each party shall exercise due diligence in delivering or redelivering such aircraft.

(f) In routing and selling local and way-to-way traffic, none of the parties shall discriminate in favor of flights not operated pursuant to this Agreement and the parties shall be under a continuing obligation to use their best efforts to develop economic load factors on all flights operated pursuant to this Agreement.

(g) The parties will instruct their respective personnel to cooperate in arranging and adjusting from time to time as occasion may arise reasonable and sound procedures [fol. 2043] for meeting traffic and operating problems that may arise in respect of any particular flight by reason of through flights arriving at Miami northbound or southbound unduly delayed. Due consideration shall be given in this connection to the purpose of this Agreement to provide through plane service for traffic between points on National's Route No. 31 and on Pan American's Miami-Balboa route and points on Panagra's route. Pan American shall give National immediate notice whenever aircraft scheduled to arrive in Miami northbound are to be unduly delayed, and thereafter, in order to accommodate National's Miami-New York traffic, at National's request, another aircraft will be substituted if such aircraft is available at Miami for operation of the scheduled flight to New York and return. It is the intention of the parties that in case of such substitution, or of operation by National of its own aircraft in lieu of the delayed aircraft, the delayed aircraft shall be operated through to New York when agreed to by the oper-

ations personnel of Panagra or Pan American and National. The parties agree to adjust their schedules or to make other appropriate arrangements if after a reasonable trial period National's Miami-New York traffic is unduly inconvenienced by reason of delays in the arrival of interchange aircraft. It is intended that the parties will exercise the same degree of diligence and effort in maintaining schedules to be operated pursuant to this Agreement as each party customarily exercises in operations over its own routes.

3. *Aircraft and Crews to be Operated under Agreement*

(a) Panagra's aircraft operated pursuant to this Agreement over National's Route No. 31 shall, subject to agreement with the authorized representative of National's [fol. 2044] cabin attendants, be operated with Panagra cabin attendants except that there shall be one National cabin attendant, provided, however, that when such cabin attendants are to be in excess of National's normal complement of cabin attendants, for the same class of service, the additional cost shall be defrayed by Panagra. Panagra aircraft shall be operated with the pilots and flight engineers of National on National's Route No. 31 except that with respect to flights which, for operating or other reasons, do not land at Miami, the flight crew then operating the aircraft shall proceed to an appropriate alternate airport. All aircraft operated under this Agreement shall be properly licensed for operation over the routes, and all flight personnel on such aircraft shall be fully licensed and/or qualified for such operation. The parties will furnish each other with all data which may be required for the inclusion of their aircraft and flight personnel as specified in the others' Air Carrier Operating Certificates.

(b) The aircraft which shall be tendered pursuant to this Agreement shall be of a modern type capable of carrying on the services herein contemplated a reasonable load at competitive speeds, and with accommodations and comfort-level measured in the light of the aircraft types currently being operated over the Miami-New York route.

(c) The lessee shall have a right to inspect any aircraft tendered for operation pursuant to this Agreement before

accepting same and may refuse to operate any aircraft tendered which is not in satisfactory operating condition, subject only to customary line service, in the light of regulations of the Civil Aeronautics Administration and prevailing airline standards.

[fol. 2045]

4. *Responsibility for Operations*

The lessee shall have full responsibility for and control over the operation of leased aircraft over its route while under lease to it as provided in this Agreement. The lessee's responsibility for such operation, without limiting the generality of the foregoing, shall include responsibility for and performance of operations dispatch, flight-plan clearance, radio plane guard and in-flight instructions, all communications, navigation and weather facilities and services, all loading and discharge of airplanes, all handling of traffic and passenger service, all necessary airplane and engine inspection and on-line and turn-about maintenance service, and all emergency maintenance to the extent necessary or appropriate for the safety or preservation of the aircraft or to the extent requested by the lessor, provided that the lessee shall not be obligated to perform emergency maintenance at the lessor's request unless it has personnel and facilities capable of performing such emergency maintenance at the point where the aircraft is located. The lessee undertakes to furnish in connection with such operations adequate and efficient ground facilities and personnel to conduct such operations in accordance with approved and modern standards which shall in no event be lower than those provided in the case of its own aircraft, and to treat the lessor's aircraft on a basis of complete equality with its own aircraft.

5. *Traffic*

(a) The parties shall book and route through traffic between points on National's Route No. 31 and the Canal Zone and Panama on Pan American's route and points beyond on Panagra's route in South America via Panagra aircraft to the fullest extent practicable, provided that

[fol. 2046] nothing herein contained shall be deemed to restrict the parties from operating through or connecting flights with each other or with any other carrier and routing traffic via such flights where a substantial improvement of service to the passenger or shipper would result.

(b) In order to assure that through traffic will be handled at maximum efficiency it is agreed that in the case of all northbound and southbound through flights operated over National's route, Panagra, and, subject to Panagra's reasonable requirements, Pan American, shall, from time to time, request National to block off until a reasonable time prior to departure a specific number of seats and a designated amount of mail and cargo capacity which will be designed to accommodate the through traffic reasonably expected, and shall themselves block off for the through flights on their own route a number of seats and an amount of mail and cargo capacity reasonably related to the seats and amount of capacity which they shall have requested National to block off, and the parties shall arrange their reservations control accordingly. If experience over a reasonable time indicates that the seats or capacity so blocked off unduly exceed the through traffic actually carried, the parties shall take appropriate action to prevent nonutilization of capacity, with due regard, however, for the requirements of the through traffic. Subject to the foregoing, it is the intention of this Agreement that the parties will route local and way-to-way traffic on the interchange aircraft in the same manner as on schedules operated with their own aircraft.

6. *Sales, Advertising and Publicity*

(a) The parties shall cooperate and shall use their best efforts to promote and develop traffic to be carried on [fol. 2047] through flights operated under this Agreement. The parties will advertise and otherwise publicize that through plane service is afforded over National's, Pan American's, and Panagra's routes between points on National's Route No. 31 in the northeastern United States and the Canal Zone and Panama and points on Panagra's route in South America. The parties hereto will agree in advance

with each other on appropriate advertising programs (including newspaper and magazine space, advertising and display pieces and collateral material) and budgets therefor, for promoting the through flights made pursuant to this Agreement and the approved expense of all such advertising shall be apportioned among them as from time to time agreed, provided, however, that no charge shall be made for transporting advertising material to the most effective point in use.

(b) National will cause the names of Pan American World Airways, Inc. and Pan American-Grace Airways, Inc., and, if Panagra shall so request, the name "Panagra", in such size and form as the parties may agree and the Pan American and Panagra insignia to be displayed on traffic counters at all airports and sales offices, including city ticket offices, at points in the continental United States (other than Miami) at which Panagra aircraft are operated under lease to National pursuant to this Agreement. At any airport in the continental United States at which Panagra aircraft may be operated under this Agreement Pan American and/or Panagra may, at their expense, if they determine the same to be necessary or desirable, station a reasonable number of personnel who, without interfering with National's procedures, may assist in accommodating through traffic arriving from or departing to points on their respective certificated routes, it being understood that Pan American and Panagra will arrange between [fol. 2048] themselves to avoid duplication of such personnel. Persons so employed shall have access to National's space and facilities at such airports at National's absolute discretion.

(c) Pan American and Panagra will cause the name National Airlines, Inc. in such size and form as the parties may agree and the National insignia to be displayed on traffic counters at all airports and sales offices, including city ticket offices, at points outside the continental United States to which Panagra aircraft are operated.

(d) Panagra, acting through Pan American as Panagra's General Traffic and Sales Agent in the United States, and

Pan American may from time to time indicate to National reasonable methods and procedures which they desire to have established by National in connection with the selling, handling or servicing of traffic originating on or to be carried over their routes and National will put such methods and procedures into effect if agreed by it. The parties agree to furnish each other with periodic reports concerning the traffic sold to and from points on their respective routes in such reasonable detail and such form as shall be requested and mutually agreed.

(c) The name of the lessor, in such form as the lessor may determine, and its insignia shall appear on the exterior of all airplanes leased under this Agreement in addition to an appropriate statement inside the airplane informing the public that the airplane is the lessor's airplane under lease to the lessee.

7. *Liability to Third Parties and Insurance*

(a) The lessee will indemnify the lessor and hold it harmless in respect of any liability (other than to the lessor's flight crews and cabin attendants, if any, engaged [fol. 2049] in the operation of the lessor's aircraft) arising or claimed to arise as a result of lessee's operation, possession or use of the lessor's aircraft during the period of any lease. The lessee will carry passenger and cargo and public liability (including liability of lessor to employees of lessee) and property damage insurance policies covering risks attendant upon the foregoing in companies and with coverage which shall meet the lessor's reasonable satisfaction, such coverage to be in any event at least as extensive as in the case of its own aircraft, and will cause the lessor to be included in its policies as a party insured.

(b) The lessor will indemnify the lessee and hold it harmless (1) in respect of any liability arising or claimed to arise as a result of the operation of lessor's aircraft except when such aircraft shall be leased to the lessee, and (2) from all claims of lessor's flight crews and cabin attendants, if any, engaged in the operation of lessor's aircraft. The lessor will carry passenger and cargo and pub-

lic liability and property damage insurance policies covering the risks attendant on the foregoing in companies and with coverage which shall meet the lessee's reasonable satisfaction, such coverage to be in any event at least as extensive as in the case of its own operations, and will cause the lessee to be included in its policies as a party insured. The lessor will also carry appropriate policies of workmen's compensation insurance with respect to the employees referred to in clause (2) hereof.

(c) All indemnities herein shall include related costs and expenses.

(d) In the event of loss of or damage to or delay in the delivery of baggage or personal effects of a passenger, or cargo, express or mail on an aircraft making a through flight hereunder, the party having possession of the air- [fol. 2050] craft at the time the loss, damage or delay occurs shall, as between the parties hereto, be responsible therefor but in no event in excess of its liability under its stated conditions of carriage. In case it is not possible to establish which party has possession of the aircraft at the time of such loss, damage or delay, any liability or expense arising therefrom shall be shared among the parties in proportion to the revenue received from the transportation of the passenger whose baggage or personal effects shall have been lost, damaged or delayed or from the transportation of the cargo, express or mail which shall have been lost, damaged or delayed.

8. *Damage to Aircraft and Hull Insurance*

The lessee shall be liable for all loss or damage to aircraft or other property under lease to it pursuant to this Agreement within limits (which shall properly reflect the value of such aircraft or other property) to be agreed upon from time to time between the lessor and the lessee, irrespective of any question as to the proper maintenance of the aircraft or other property by lessor. Such value is hereinafter referred to as the "agreed value". If the loss or damage is of such extent that the aircraft is deemed to be a constructive total loss, the lessee shall

pay to the lessor the agreed value of the damaged aircraft and the associated equipment installed therein, as of the date of damage. Upon making such payment the lessee shall become the owner of such aircraft and the associated equipment installed therein and all salvage thereof. The lessee shall not be liable to the lessor for loss of use of the aircraft or other property as a result of loss or damage thereto.

The lessee shall, unless it desires to operate in whole or in part as a self-insurer, procure and maintain in full force [fol. 2051] and effect during the term of this Agreement at its own expense policies of hull insurance insuring against any loss of damage for which the lessee may be liable in an amount equal to the agreed value of each aircraft to be leased hereunder, in companies and under terms of insurance which shall meet the lessor's reasonable satisfaction. Said policies of insurance shall name the lessor as a co-insured and the lessee shall provide to the lessor a certificate of insurance evidencing such coverage. Such certificate of insurance shall have in it a "breach of warranty" clause providing that a breach of the insuring conditions by the lessee will not invalidate the insurance as to the lessor. The lessee agrees to require its insurers to waive any and all rights of subrogation such insurers may or could have against the lessor by virtue of such insurance contracts. The certificate of insurance shall also contain a provision that the lessor shall be given thirty (30) days' prior written notice by the insurers in the event either the insurers or the lessee desire to cancel or make a material change in the insuring conditions of such policies of insurance.

If the lessee desires to operate in whole or in part as a self-insurer, the lessor may require the lessee, prior to the commencement of operations or use of aircraft hereunder, or at any time thereafter, to deliver a bond with a surety and under terms and conditions reasonably satisfactory to the lessor which shall indemnify the lessor against any loss occasioned by such lessee's election not to procure hull insurance coverage in accordance with the provisions of this paragraph provided that a condition of

any such bond shall be that it shall not be cancellable except upon thirty (30) days' prior written notice thereof from the surety to the lessor; and provided further that no such bond shall be required if the amount of the hull [fol. 2052] insurance coverage carried by such self-insuring lessee is at least ninety percent (90%) of the agreed value of the aircraft.

9. *Liens on Chartered Aircraft*

The lessee shall not permit any aircraft leased to it hereunder to remain subject to any mechanics or other lien whatsoever, and shall promptly satisfy or procure the discharge of any lien or garnishment of any nature whatsoever attaching to such aircraft.

10. *Compensation and Financial Provisions*

(a) Rental

National shall pay a rental for aircraft of Panagra leased hereunder at a rate per available seat mile based on National costs to be determined in accordance with the financial supplement attached and made a part hereof.

(b) Expenses

All expenses for the services contemplated to be performed by the lessee while the aircraft is under lease pursuant to this Agreement (except emergency maintenance as provided in paragraph 10(c)), and passenger and cargo liability, public liability and property damage and hull insurance as provided in paragraphs 7(a) and 8 shall be paid by the lessee.

(c) Maintenance

The lessor shall overhaul and maintain (except for turnaround maintenance while the aircraft is in the possession of the lessee) in accordance with its operations specifications, the aircraft leased hereunder. No aircraft shall be leased hereunder unless it is probable that it can be returned to the lessor before the time set for its next pe-

[fol. 2053] riodic inspection under the lessor's operations specifications unless, subject to agreement of the parties, the efficient utilization and routing of such aircraft makes such necessary or desirable. The lessee shall perform at the lessor's expense any emergency repairs or maintenance (not properly a part of on-line or turn-around maintenance service) while the aircraft is in its possession to the extent requested by the lessor, but only to the extent to which it is capable with the personnel and facilities available at the point where the aircraft is located. The charge for such emergency repairs and maintenance shall be a fixed charge per man hour of direct labor, to be determined by agreement of the parties, plus the lessee's actual cost of materials used.

(d) Route mileages to be used in any determination under this Agreement will be those effective as shown in CAB Mileage Booklet No. 1, Airport-to-Airport Mileages over Interstate Routes of Certificated Air Carriers, and in any revisions thereof.

11. *Radio and Communications*

The lessor agrees to the installation in its aircraft of all radio or other communications and navigation equipment which may be necessary for the flight of such aircraft in scheduled operations over the lessee's route. Responsibility for the cost of such installation shall be fixed in a supplementary financial agreement to be entered into between the parties.

12. *Passenger Service*

It is the objective of the parties that on all through flights operated pursuant to this Agreement the quality of service, catering and attention afforded passengers on such flights shall be maintained at a level at least equal [fol. 2054] to the highest quality of service, catering and attention afforded passengers on any competitive international carrier serving Latin America. The parties will consult each other on a program for achieving this objective subject to the cost of maintaining this competitive standard

of service being mutually agreed upon between the parties concerned.

13. *Training*

A training program shall be established designed to qualify flight personnel and other personnel for all operations called for by this Agreement, and the expenses of such programs shall be allocated among the parties concerned in accordance with a supplementary financial agreement to be negotiated and entered into between such parties.

14. *Access to Books and Records*

The lessor and lessee of aircraft leased hereunder shall each have access to the books, records and accounts of the other as may be reasonably required to verify costs, expenditures and other data pertinent to this Agreement. Each party shall also furnish such information with respect to the operation of the leased aircraft as may be reasonably required by the other parties.

15. *Agreements with Other Carriers*

During the term of this Agreement National will not hereafter enter into any interchange agreement with any other carrier providing for the operation of that carrier's aircraft over National's route between Miami and New York which contains financial terms more favorable to such carrier than the financial terms of this Agreement without making such terms available to Panagra at its option.

[fol. 2055]

16. *Construction and Definitions*

(a) It is the intention of the parties that within the general framework and conception of this Agreement the various provisions shall be broadly and liberally construed to accommodate technical, commercial, international and regulatory developments in the field of air transportation to the end that through traffic will be handled at

maximum efficiency and in a manner to meet changing competitive conditions.

(b) Nothing in this Agreement shall be deemed to require any of the parties to take any action in violation of any applicable law, regulation, or order.

(c) This contract shall be construed in accordance with the laws of the State of New York.

(d) The various headings herein and the grouping of the provisions of this Agreement into separate paragraphs shall not be construed to limit or restrict the meaning or application of any provision hereof, and are for the purpose of convenience only.

(e) Reference to the Civil Aeronautics Board and to the Administrator of Civil Aeronautics shall mean any successor Federal agency having jurisdiction similar to that now exercised by the Board and the Administrator.

(f) Reference to specific aircraft includes engines, propellers, and accessories and other equipment of every nature which are physically attached to or in operation on such aircraft.

(g) References to Balboa or to the Canal Zone shall be deemed to include Panama, it being recognized that traffic to and from the Canal Zone presently is handled through the Tocumen Airport in Panama.

[fol. 2056]

17. *Notice*

Notice to National wherever provided in the Agreement shall be given in writing by registered letter addressed to: President, National Airlines, Inc., 3240 Northwest 27th Avenue, Miami, Florida, or to such other address as National may designate in writing. Notice to Pan American wherever provided in the Agreement shall be given in writing by registered letter addressed to: Vice President—Administration, Pan American World Airways, Inc., 135 East 42nd Street, New York, N. Y., or to such other address as Pan American may designate in writing. Notice to Panagra wherever provided in the Agreement shall be

given in writing by registered letter addressed to: President, Pan American-Grace Airways, Inc., 7 Hanover Square, New York, New York, or to such other address as Panagra may designate in writing. Notice shall not be considered given until the date when the same shall have been received as evidenced by the Post Office return receipt or, if the addressee shall have refused to accept the registered notice, the date on which such registered notice shall have been first tendered to the addressee. Notwithstanding the foregoing provisions of this paragraph, notice may likewise be given in writing by letter delivered to the person designated to receive notice as aforesaid, provided a receipted copy is secured.

18. *Arbitration*

From and after the effective date of this Agreement any and all disputes as to the construction or operation of this Agreement shall be submitted to arbitration pursuant to the Commercial Arbitration Rules of the American Arbitration Association as amended and in effect January 1, 1952, (hereinafter referred to as the "Rules") in the manner hereinafter provided; provided, however, [fol. 2057] that the foregoing shall not render subject to arbitration any matter which under this Agreement is subject to agreement between the parties. The party requesting arbitration shall notify the other parties as to the matter to be arbitrated. Within five (5) days after receipt of such notice, the other parties shall notify the party giving the notice whether they claim an interest in the arbitration. If both of the other parties give such notice, the arbitration shall be before three disinterested and unbiased arbitrators appointed by the Administrator (as defined in the Rules). If only one of the other parties shall give timely notice of claim of an interest in the arbitration, such party and the party giving the initial notice shall each appoint an arbitrator within fifteen (15) days after the giving of the initial notice and, within ten (10) days after such appointment, the two arbitrators so appointed shall appoint a third arbitrator. If either party fails to appoint the arbitrator whom such party is entitled

to appoint, or if the arbitrators appointed by or for the respective parties shall fail to appoint the third arbitrator, such then unappointed arbitrator shall be appointed by the Administrator. The award of any two of the three arbitrators shall be final, binding and conclusive upon the parties, and judgment upon the award may be entered in any court having jurisdiction. Any arbitration hereunder shall be conducted in accordance with the laws of the State of New York, and shall be conducted in New York, N. Y. unless the parties shall otherwise agree in writing.

19. *Effective Date*

This agreement shall become effective upon the date when the orders of the Civil Aeronautics Board taking the actions hereinafter specified shall have become effective; provided, however, that if, prior to the date of the initia- [fol. 2058] tion of operations hereunder, any of such orders shall have been stayed either by the Civil Aeronautics Board or by any court of competent jurisdiction, the effective date of this Agreement shall be postponed until the dissolution of such stay:

(1) Approval of this Agreement;

(2) Continued approval of the Through Flight Agreement.

20. *Term*

This Agreement shall terminate, or may be terminated:

(1) If the Civil Aeronautics Board should at any time withdraw its approval hereof; or

(2) If the Civil Aeronautics Board should at any time withdraw its approval of the Through Flight Agreement; provided, however, that anything to the contrary herein notwithstanding such withdrawal of approval shall not prevent National and Panagra from conducting through flights pursuant to this Agreement if Panagra should obtain legal authorization to engage in air transportation between the Canal Zone and Miami or National should obtain legal

authorization to engage in air transportation between Miami and the Canal Zone; or

(3) At the option of any of the parties on six (6) months' written notice and subject to the approval of the Civil Aeronautics Board.

21. *Through Flight Agreement—Reservation of Rights*

Nothing herein contained shall in any respect be in derogation of the rights and obligations of Pan American or Panagra under the Through Flight Agreement as to one another.

[fol. 2059]

22. *Non-Prejudice*

If this Agreement is not approved by the Civil Aeronautics Board or for any other reason does not become effective or if, having become effective, this Agreement should be disapproved, terminated or cancelled the negotiation and the terms of this Agreement and all applications filed and acts done hereunder shall be without prejudice to the rights and future position of any party.

In Witness Whereof and in consideration of the mutual covenants contained herein, the parties hereto have executed these premises as of the day and year first above written.

Revision No. 1

Dated August 9, 1955

FINANCIAL SUPPLEMENT TO THE INTERCHANGE AGREEMENT BETWEEN NATIONAL AIRLINES INCORPORATED, PAN AMERICAN WORLD AIRWAYS, INC. AND PAN AMERICAN-GRACE AIRWAYS, INC.

1. Formula for Determination of Costs.*

Costs of flight equipment and related services supplied to lessee by lessor pursuant to the Interchange Agreement will be determined separately by type of flight equipment and services relating thereto and shall be based upon National's costs per available seat mile for operating the same type of flight equipment in the same type of service (for this purpose the Douglas DC-7 and DC-7B shall be considered as the same type of equipment). The available seat miles shall be computed by multiplying the revenue miles flown by the seats installed in the various types of aircraft by type of service after excluding seats reserved for crew use. Should National's accounting practices, company procedures or the introduction of new types of equipment seriously distort its costs, any cost so affected shall be adjusted to reflect a normal cost level. Any abnormal costs of introducing new types of aircraft or other abnormal costs which benefit subsequent periods, which are removed from current costs, shall be amortized over a reasonable period for purposes of this contract. This general formula for cost ascertainment shall be subject to the following agreed limitations and determinations:

---

* All references to account numbers are to the Civil Aeronautics Board's Uniform System of Accounts for Air Carriers presently in effect. If any revision is made in such Uniform System of Accounts, this Financial Supplement will be revised accordingly, it being understood, however, that the same elements of cost shall be included in the determinations hereunder.

1.1 Direct Flight Costs

[fol. 2061] 1.11 Flying Operations—Flying operations expense shall be determined as stated above except as follows:

(1) Flight Crew Salaries and Expenses—Should the flight crews of either the lessor or the lessee be used on the routes of the other party pursuant to paragraph 1(a) of the Interchange Agreement, a separate charge will be made based on the available seat mile cost of National for salaries, traveling, training and supervision expenses and general administrative expenses applicable to flight crew salaries.

(2) Gasoline and Gasoline Taxes—The cost of these items shall be based on average consumption per revenue flight hour, including gas consumed in taxiing and run-up time, at average gasoline prices for each month, for the type of fuel used at the various points at which gasoline is delivered to aircraft leased, said prices to include any outside costs incurred in connection with fueling, converted to an available seat mile cost for each type of flight equipment operated in the Interchange Services. The average consumption per hour for each type of flight equipment shall be determined by actual measurement of fuel used on the first fifteen round trip flights on each schedule. The hourly consumption shall be increased by lessee's experience percentage of non-revenue to revenue hours to include non-revenue flying. The figure thus arrived at shall continue to apply except that either the lessor or the lessee may request a [fol. 2062] revision at any time whereupon a new measurement shall be made on the next fifteen flights on each schedule and a new average consumption per hour converted to an

available seat mile shall be determined on the basis of such measurement.

(3) Oil, ADI fluid and Related Taxes—The average actual cost of these items per available seat mile flown in the Interchange Services by type of flight equipment shall be used.

(4) Gasoline, oil, ADI fluid and related taxes supplied by the lessee shall be for the account of the lessor.

1.12 Direct Maintenance — Flight Equipment — The available seat mile cost of National for the same type of flight equipment in the same type service shall be used. In the event that it can be determined that overhaul reserves provided by National are either excessive or insufficient, the reserve provision shall be adjusted to reflect the cost level which may reasonably be anticipated.

1.13 Flight Equipment Depreciation—Depreciation expense shall be based upon National's cost per available seat mile for the same type of flight equipment in the same type of service except that if reported costs of aircraft and engines are based upon a life different than 7 years and 10% residual values the reported costs shall be adjusted to a 7-year basis and 10% residual values in making this determination. In the event that National's reported depreciation expense is distorted by the use of fully-depreciated flight equipment, [fol. 2063] appropriate adjustment will be made in this expense to reflect the normal level of costs.

1.21 Ground and Indirect Maintenance—This element of expense shall be determined by applying to National's direct labor cost per available seat mile by type of equipment in the same type of service National's overhead rate in relation to direct labor used in the maintenance of all types of flight equipment. The lessor and lessee have estimated that 25% of the direct labor and direct materials used

in connection with ground maintenance included in Accounts 6227 and 6248 relate to maintenance of ground equipment not used in connection with the shop facilities. It is mutually agreed between the lessor and the lessee that such percentage will be subject to revision from time to time as studies of National's accounts may indicate as being appropriate. Therefore, 25% of the total of these two accounts shall be excluded and the formula for determining overhead rate for this portion of the shop burden shall be as follows:

$$\frac{\text{Total 6200 expense—25\% of Accounts 6227 and 6248}}{\text{Accounts 5225 + 5226 + 5227 + 25\% of 6227}} = \text{Burden rate}$$

In computing the burden rate under the formula above, the expenditure of National in the accounts referred to in the numerator and denominator shall be gross before 80 account credits or direct credit transfers of expenses.

1.22 Depreciation—The lessor and the lessee estimate that 18% of all ground equipment depreciation [fol. 2064] relates to the shop facilities used in the maintenance of flight equipment. It is mutually agreed that such percentage will be subject to revision from time to time as studies of National's accounts may indicate as being appropriate. Therefore, this portion of the ground equipment depreciation of National shall be computed as an overhead item against direct labor used in flight equipment maintenance as follows:

$$\frac{\text{18\% of Ground Equipment Depreciation}}{\text{Accounts 5225 + 5226 + 5227 + 25\% of 6227}} = \text{Burden rate}$$

The cost to be used in the accounts in the numerator and denominator of the above formula shall be gross before 80 account credits or direct credit transfers of expenses.

1.23 General and Administrative Expense—Various items of expense in this category related to flight equipment maintenance have been provided for in the overall distribution of general and administrative expense hereinafter set forth.

1.3 Line Service Expense

The general intention is that services of this nature shall be handled by lessee for its own account and that lessee shall reimburse lessor for the reasonable expenses of any such work as may be agreed the lessor shall perform either directly or by a third party acting in its behalf. Line service shall be deemed to mean only routine line service, such as refueling, turn-around inspection, fire guard, aircraft cleaning, etc., and not emergency repairs or periodic checks or maintenance, such as [fol. 2065] are normally performed in the shops of the owner of the aircraft.

1.4 Passenger Service Expense

On through flights where lessor furnishes part of lessee's normal complement of cabin attendants, the lessor and lessee agree that the rental shall include a charge for each cabin attendant so furnished by the lessor. This charge shall represent the average available seat mile cost of National for salaries, travel expenses, training and supervision applicable to cabin attendants.

The cost of other passenger services to be furnished by lessor shall be based on the cost per available seat mile reported by National in Accounts 6343, "Other Services", 6352, "Passenger Supplies—Other", and 6353, "Other Supplies".

1.5 General and Administrative Expense

General and Administrative Expenses shall be determined by allocating the general and administrative expense of National on the basis of the labor cost reported in each account group.

Certain general and administrative expenses not related to the services performed are to be excluded as follows:

The amounts reported in accounts 6641, 6642, 6665, 6666, 6667 and 6672 shall be excluded in total.

The remaining general and administrative expenses shall be allocated on the basis of labor costs appearing in account groups 5100, 5200, 6100, 6200, 6300, 6400 and 6500. This proration shall be by type of equipment with respect to account groups 5100 and 5200. The total amount of gen- [fol. 2066] eral and administrative expense allocated to the 6200 group shall be re-allocated to the 5200 group of accounts by type of equipment in accordance with the formula set forth in paragraph 1.21 of this Financial Supplement.

1.6 Investment

In lieu of a return on the lessor's investment devoted to the interchange, the lessee shall maintain a cash deposit with lessor equivalent to the amount of the lessor's investment in flight equipment, including spares and working capital devoted to the interchange services up to twenty-one (21) flights per week over lessee's route (see paragraph 2 of the Interchange Agreement). The investment in complete aircraft units shall be determined on the basis of the lessor's cost of such aircraft units except that in the case of DC-6B aircraft such investment shall be determined on the basis of present market value to be agreed upon between the lessor and the lessee, or, in the absence of agreement, by arbitration between them pursuant to the Interchange Agreement. The investment in spare engines, spare propellers and flight equipment spare parts and assemblies shall be an amount equal to 30% of the investment determined for the complete aircraft units. The amount of the lessor's investment in flight equipment, including spares, devoted to the interchange services shall be determined by multiplying the average investment per aircraft

unit (computed separately for each type), including spares, by the number of units devoted to the interchange operation, less the depreciation paid by lessee pursuant to paragraph 1.13.

[fol. 2067] For the purpose of computing the investment devoted to the interchange, the number of aircraft units of each type upon which such investment shall be based for each quarter shall be determined by dividing the estimated average revenue hours to be flown per day with lessor's aircraft of such type over lessee's routes under the Interchange Agreement during such quarter by National's average daily revenue hour utilization during the preceding twelve (12) months with its own equipment of the same type.

The lessee will provide an amount of working capital estimated at one month's cash expenses for the services performed over National's Route No. 31 under the Interchange Agreement, provided that, if the deposit is made by the lessee in cash, the lessor will deliver to the lessee a bond with a surety in such amount of working capital and under terms and conditions reasonably satisfactory to the lessee.

The cash deposit will be adjusted each quarter.

As evidence of the cash deposit by the lessee, the lessor will issue to the lessee its non-interest bearing note for the amount of the deposit computed as of the effective date of the Interchange Agreement, with such reasonable terms and conditions as will enable the lessee to discount such note without recourse. The lessor will cooperate with the lessee to effect such discount. Such note shall be for a term of seven (7) years or the termination of the Interchange Agreement, whichever shall first occur, with twenty-eight (28) equal quarterly payments which will approximate the anticipated reduction of the deposit due to depreciation accruals.

In lieu of a cash deposit the lessee, at its option, may issue its note to lessor for all or any part of the amount of the deposit required pursuant to this paragraph 1.6.

[fol. 2068] Such note shall be for a term of seven (7) years or the termination of the Interchange Agreement, whichever shall first occur, with twenty-eight (28) equal quarterly payments which will approximate the anticipated reduction of the deposit due to depreciation charges, with interest at such rate as will permit the lessor to discount, without recourse, such note at time of issuance at par.

Upon the quarterly redetermination of the deposit as provided in this paragraph 1.6 the lessor will (a) pay to the lessee the amount of any reduction in such deposit over the balance previously required if the lessee shall have on deposit with lessor cash to cover such deposit, or (b) in the event lessor shall have issued its note or notes as evidence of such deposit, lessor shall apply such reduction first in payment of current amortization on such note or notes and any excess of such reduction over current amortization shall be applied as prepaid amortization of such note or notes in inverse order of maturities, or (c) if the lessee shall have issued its note or notes to the lessor in lieu of such deposit, then lessor shall pay any such reduction of the deposit to the lessee to be used for reduction of such note or notes. In the event of an increase in the required deposit, the lessee will either cover the additional amount required by a cash deposit with the lessor in which event lessor shall issue in its note or notes, if lessee so elects, as evidence of such additional deposit with terms and conditions as above provided unless otherwise agreed, or, if lessee so elects, it may issue a note or notes in lieu of such additional deposit with terms and conditions as above provided unless otherwise agreed.

It is the intention of this paragraph 1.6 to give the lessee the election as to whether the deposit shall be made in cash or by its note so that the rate of interest to be paid by the [fol. 2069] lessee on any notes issued or discounted pursuant to this paragraph 1.6 shall not exceed the rate of interest at which the lessee can borrow money on the same terms and conditions.

1.7 Sale of Aircraft

It is contemplated that initially five (5) DC-7Bs and five (5) DC-6Bs shall be devoted to the interchange

service. In the event of (a) termination of the Interchange Agreement pursuant to paragraph 20 of the Interchange Agreement or (b) withdrawal of any type of aircraft operated in the interchange service, title to one aircraft to be designated by mutual agreement as of the effective date of the Interchange Agreement out of each five aircraft to be operated in the interchange service shall pass to the lessee upon the following terms and conditions:

The lessee shall pay the lessor the difference between the agreed value of the designated aircraft and the aggregate depreciation paid by the lessee to lessor on the aircraft (excluding spares) of the type involved. The agreed value shall be the lessor's cost of such designated aircraft except that in the case of the DC-6B type of aircraft presently being operated by the lessor, the agreed value shall be established on the basis of the market value of such designated aircraft as of the effective date of the Interchange Agreement established in accordance with the second sentence of paragraph 1.6 above. The lessor shall have the option forthwith (a) to purchase at the then current market value or (b) to lease for a period not to exceed eighteen [fol. 2070] (18) months, unless otherwise agreed, at a rental to be agreed upon, any such designated aircraft sold to the lessee, except that in the case of such designated aircraft withdrawn from the interchange service the lessor shall not have such options with respect to such designated aircraft sold to the lessee on which the lessee has paid in depreciation an amount equal to 90% of the agreed value of such designated aircraft as of the date title passes to the lessee. In the absence of agreement on the above then current market value or rental the same shall be determined by arbitration pursuant to the Interchange Agreement.

It is understood that the lessor shall have the right to substitute an aircraft of the same type and of substantially

the same condition as the designated aircraft if the lessor is unable to deliver such designated aircraft because of loss, damage or other causes beyond the lessor's control. In such event the substituted aircraft shall become the designated aircraft for the purposes of this paragraph 1.7.

Title to the designated aircraft shall not pass to the lessee but shall remain in the lessor until termination of the Interchange Agreement or the withdrawal of the aircraft from the interchange service and payment of the full purchase price as prescribed above. Further, it is understood that wherever in the Interchange Agreement and this Financial Supplement the word "aircraft" is used, it shall include the designated aircraft.

This paragraph 1.7 shall be subject to review and modification by mutual agreement, or in the absence of such agreement, by arbitration pursuant to the Interchange Agreement, in the event any new type or additional aircraft are to be operated in the interchange service (except aircraft which may be required to replace any lost or [fol. 2071] damaged aircraft), with the understanding that upon such rev a similar basis will be followed as was used above with respect to the five (5) DC-6Bs and the five (5) DC-7Bs referred to in this paragraph 1.7.

2. Billings and Base Periods

The payments provided for in this Financial Supplement shall be made within ten (10) days after invoice therefor shall be submitted to the party from which payment is due, which invoice shall be submitted monthly. Determination and billing of the rental of flight equipment and related equipment supplied to lessee by lessor pursuant to the Interchange Agreement for each year's period beginning January 1 shall be based on National's cost for the year ended June 30 following. Pending determination of such costs based on National's final financial and operating reports to the Civil Aeronautics Board, interim billings may be made on an estimated basis at the rates in effect during the preceding period.

3. REVIEW OF FORMULA

The formula for determination of prices for services rendered under the Interchange Agreement may be reviewed at the request of either the lessor or the lessee made in writing at least fifteen (15) days before the expiration of any annual period. In the event of the making of any such request, the parties will promptly confer with a view to agreeing on such a readjustment, or, in the absence of agreement, by arbitration between them pursuant to the Interchange Agreement.

[fol. 2072]

EXHIBIT B

Through Flight Agreement

Supplement No. 18

Relating to Interchange Agreement with National Airlines, Incorporated

AGREEMENT made this 4th day of August, 1955, by and between PAN AMERICAN WORLD AIRWAYS, INC., a New York Corporation (hereinafter called "PAA"), and PAN AMERICAN-GRACE AIRWAYS, INC., a Delaware Corporation (hereinafter called "Panagra"):

WHEREAS, PAA and Panagra are parties to a certain agreement dated July 30, 1946, and supplements thereto numbered one through seventeen inclusive relating to the charter of Panagra's aircraft to PAA for through operation on certain of PAA's routes north of the Canal Zone and other matters, which agreements are hereinafter referred to as "the Through Flight Agreement"; and

WHEREAS, PAA and Panagra have entered into an agreement with National Airlines, Incorporated, a Florida corporation (hereinafter called "National"), dated as of the date hereof (hereinafter referred to as "the Interchange Agreement"); and

WHEREAS, the parties desire to supplement and amend the Through Flight Agreement as herein set forth.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

102. All recitals and paragraphs of Supplement No. 5 to the Through Flight Agreement are hereby deleted ex-
[fol. 2073] cept paragraphs 49, 50, 51 (except for the first parenthetical insertion), 53 (except for the proviso to the last sentence of the amendment made therein), 54 (notwithstanding any provisions of paragraph 59 to the contrary), 57(e) (as modified by paragraph 71), and 57(g).

103. The last sentence of paragraph 14 of the Through Flight Agreement as amended by paragraphs 51 and 102 above is amended to read as follows:

> "PAA and Panagra will agree with each other (and with National if the Interchange Agreement shall become and be effective) in advance on appropriate advertising programs (including newspaper and magazine space, advertising and display pieces and collateral material) and budgets therefor, for promoting the through flights made pursuant to this Agreement, and the approved expense of all such advertising shall be apportioned among them as from time to time agreed, provided, however, that no charge shall be made for transporting advertising material to the most effective point of use."

104. For the term of the Interchange Agreement, Panagra's aircraft chartered to PAA pursuant to the Through Flight Agreement for through operation between the Canal Zone and Miami, Florida, shall, except as the Civil Aeronautics Board may otherwise permit, be further chartered to National for through operation by National upon the specific terms and conditions set forth in the Interchange Agreement.

105. Panagra hereby constitutes and appoints PAA as Panagra's agent, for the term during which the Through Flight Agreement and the Interchange Agreement shall be simultaneously in effect, to deliver Panagra's aircraft to National at Miami, for the purpose of flights over National's route pursuant to the said agreement and to re-
[fol. 2074] ceive delivery of Panagra's aircraft from Na-

tional at Miami. PAA is authorized as such agent, on Panagra's behalf, to receive and execute such receipts, to perform such inspections, to make such checks and measurements, and to perform all such other acts as may be necessary or appropriate in connection with the delivery or return of the said aircraft. In acting as such agent with respect to the delivery of Panagra's aircraft to National and the return of Panagra's aircraft by National at Miami, PAA shall be bound to exercise the same and only the same degree of care as PAA exercises with respect to the delivery and return of its own aircraft under similar circumstances.

106. The second sentence of paragraph 15(a) of the Through Flight Agreement as amended is further amended to read as follows:

> "PAA shall be deemed to be in possession of Panagra's aircraft (1) in the case of aircraft turned over to PAA for operation on through flights under this agreement, from the time when such aircraft is so turned over to PAA by Panagra until the time when such aircraft is either (i) returned by PAA to Panagra or (ii) turned over by PAA to National for operation by National pursuant to the Interchange Agreement, in which event the aircraft shall again be deemed to be in PAA's possession when returned to it by National, and (2) in the case of aircraft turned over to PAA for maintenance, from the time when such aircraft is turned over to PAA at one of the latter's maintenance bases until the time when such aircraft is returned to Panagra, or until it is turned over by PAA to National as provided above; except, in either case, for non-revenue or other special flights (excluding test flights made under PAA custody following maintenance and according to CAA requirements) during such period [fol. 2075] made at the instance and request of Panagra."

107. Paragraph 17(h) of the Through Flight Agreement (added by paragraph 34 of Supplement No. 2) is amended by adding the following at the end thereof: "and in the case

of mileage flown over the route of National pursuant to the Interchange Agreement will be those effective as shown in the 'Civil Aeronautics Board Official Airline Route and Mileage Manual' and in any revisions thereof."

108. Paragraph 23(c) of the Through Flight Agreement is amended by adding at the end thereof the words: "and the delivery of possession of Panagra's aircraft to National and the return of such possession from National pursuant to the Interchange Agreement."

109. (a) All references in Annex 1A to the Through Flight Agreement to "the charter service" shall refer only to the charter service operated by PAA pursuant to said Agreement. All references in said Annex 1A to the total revenue miles flown by Panagra's aircraft or to a revenue mile basis shall include revenue miles flown by such aircraft pursuant to the Interchange Agreement, except that (i) in those instances where the expenses to be prorated under paragraph 1 of Annex 1A are not related to the miles flown by Panagra aircraft under the Interchange Agreement, the mileage under the Interchange Agreement shall be omitted; and (ii) in those instances where the expenses to be prorated under paragraph 1 of Annex 1A are only partially related to the miles flown by Panagra aircraft under the Interchange Agreement, the mileage under the Interchange Agreement shall be included on an appropriately weighted basis.

[fol. 2076] (b) Paragraph 1A1(1) of said Annex 1A is amended by adding at the end thereof the following: "and Panagra will cause National to advise Panagra at the close of each month of the total gallonage delivered by National to Panagra's aircraft, classified by aircraft types, under the Interchange Agreement."

(c) The last sentence of paragraph 1A3 of said Annex 1A is amended to read as follows:

> "If it shall appear that major items of cost recorded in such accounts are applicable only to the charter service or to Panagra's common carrier service or to the charter service operated pursuant to the Inter-

change Agreement, provision will be made for removing such costs from allocation and charging such costs directly to the service to which they relate."

(d) The parenthetical phrases in paragraphs 1A3 and 1B of said Annex 1A now reading: ("except for credits arising out of charges to PAA") are amended to read ("except for credits arising out of charges to PAA and of charges to National").

(e) The last sentence of paragraphs 2B and 2C of said Annex 1A are amended by adding at the end the words:

"plus 20% of the available ton miles flown in the charter service operated pursuant to the Interchange Agreement."

110. Paragraph 102 of this Supplement No. 18 shall be effective immediately. The remainder of this Supplement No. 18 shall become effective only in the event that the Interchange Agreement shall become effective and upon the making of an order by the Civil Aeronautics Board [fol. 2077] approving the Through Flight Agreement as herein modified, and shall remain in effect so long as the Interchange Agreement and the Through Flight Agreement shall remain simultaneously in effect.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their officers thereunto duly authorized on the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC.

Supplement No. 1 to Equipment Interchange Agreement

This Supplemental Agreement made this 9th day of August, 1955 between NATIONAL AIRLINES, INCORPORATED, a corporation organized and existing under the laws of the State of Florida (hereinafter referred to as "National"), PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter referred to as "Pan American"), and PAN AMERICAN-GRACE AIRWAYS, INC., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as "Panagra");

WITNESSETH:

WHEREAS, National, Pan American and Panagra entered into an Equipment Interchange Agreement, dated August 4, 1955, hereinafter referred to as the "Equipment Interchange Agreement"; and

WHEREAS, the parties desire to amend the Financial Supplement to the Equipment Interchange Agreement as hereinafter provided.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties hereto do hereby agree that the financial supplement attached to and made a part of the Equipment Interchange Agreement is hereby amended in accordance with the financial supplement attached hereto, marked "Revision No. 1, dated August 9, 1955," and made a part hereof.

[fol. 2082] In witness whereof the parties hereto have executed these premises as of the day and year first above written.

SUPPLEMENT NO. 2 TO EQUIPMENT INTERCHANGE AGREEMENT

This Supplemental Agreement made this 22nd day of August, 1955, between NATIONAL AIRLINES, INCORPORATED, a corporation organized and existing under the laws of the State of Florida (hereinafter referred to as "National"), PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter referred to as "Pan American"), and PAN AMERICAN-GRACE AIRWAYS, INC., a corporation organized and existing under the laws of the State of Delaware (hereinafter referred to as "Panagra");

WITNESSETH:

WHEREAS, National, Pan American and Panagra entered into an Equipment Interchange Agreement dated

August 4, 1955, which was amended by Supplement No. 1 dated August 9, 1955, which Agreement, as so amended, is hereinafter referred to as the "Equipment Interchange Agreement"; and

WHEREAS, the parties desire to supplement the Equipment Interchange Agreement as hereinafter provided.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties hereby agree as follows:

1. Interline settlement of revenues derived from, and commissions payable on, the transportation service rendered pursuant to the Equipment Interchange Agreement shall be made in the same manner as though said service were a connecting plane service at Miami operated over the same routes.

2. Until otherwise agreed by the parties, the charge per man hour of direct labor for emergency repairs and maintenance performed by the lessee pursuant to paragraph 10(c) of the Equipment Interchange Agreement shall be as follows:

Straight time	— $5.00 per man hour
Time and a half	— $6.20 per man hour
Double time	— $7.40 per man hour

[fol. 2087] 3. It is hereby agreed in accordance with paragraph 11 of the Equipment Interchange Agreement that radio communications and navigation equipment installed on the aircraft to be initially devoted to services performed pursuant to the Equipment Interchange Agreement will be supplemented and modified in the following respects, that National will bear the following costs relating thereto and that any additional costs will be borne by Panagra:

a. National will pay the cost (including cost of materials) of providing for the additional radio frequencies required for operation over its Miami-New York route up to a maximum of $750.

b. National will pay the cost (including cost of materials) of instrument modification to provide altimeter barometer readings in inches for purposes of operation over its Miami-New York route up to a maximum of $1,000.

In the event any further installation or modification of radio or other communications and navigation equipment on such aircraft or other aircraft shall be required pursuant to said paragraph 11, the responsibility for the cost thereof shall be fixed by further supplementary agreement between the parties.

4. It is hereby agreed in accordance with paragraph 13 of the Equipment Interchange Agreement that until otherwise agreed by the parties each party will, at its own expense, perform, or arrange for, any training of its flight [fol. 2088] personnel or other personnel required for the operations called for under the Equipment Interchange Agreement.

IN WITNESS WHEREOF the parties hereto have executed these premises as of the day and year first above written.

Dear Sirs:

Referring to the Equipment Interchange Agreement dated August 4, 1955, as amended, between your Company,

Pan American World Airways, Inc. and the undersigned Company, this letter when accepted by you will confirm our agreement as follows:

1. For the purpose of paragraph 8 of the Equipment Interchange Agreement, the agreed value of each DC-6B aircraft shall be $1,300,000 and the agreed value of each DC-7B aircraft shall be $2,100,000 unless and until otherwise agreed.

2. For the purposes of paragraph 1.6 and the second sentence of paragraph 1.7 of the Financial Supplement to the Equipment Interchange Agreement, it is agreed that the present market value of each of Panagra's DC-6B aircraft is $1,300,000.

If the foregoing correctly states our agreement, will you kindly sign and return to us one copy of this letter.

Yours very truly,

PAN AMERICAN-GRACE AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 33

November 28, 1955

Mr. Alexander G. Hardy
Senior Vice President
National Airlines, Inc.
Wyatt Building
Washington, D. C.

Dear Mr. Hardy:

With respect to the Financial Supplement to the Interchange Agreement dated August 4, 1955, as amended, this

will confirm our mutual understanding of the intent and agreement with respect to the following:

1. *Section 1.13*—With respect to the second sentence of this Section, it is understood that in the event National's reported depreciation expense is distorted by the use of fully-depreciated flight equipment and it is necessary to adjust National's cost to reflect a normal level of cost, such adjusted depreciation will be determined on an available seat mile basis as contemplated in Section 1.13.

2. *Section 1.6*—Where reference is made in the first and second paragraphs of this Section 1.6 to units devoted to the interchange operation, it means "units or fractions thereof".

   In computing average daily revenue hour utilization as provided in the second paragraph of this Section, it is understood that if at any time such average daily revenue hour utilization is distorted by the phasing out of National's service of the type of aircraft involved, appropriate adjustment will be made to reflect a normal level of utilization.

3. *Section 2*—This Section provides that determination of billing of the rental of flight equipment and related equipment supplied to lessee by lessor pursuant to the Interchange Agreement for each 12 month period beginning January 1 shall be based on National's cost for the year ended June 30 following, and that pending determination of such costs based on National's final financial operating reports to the Civil Aeronautics Board, interim billings will be made on an estimated basis at the rates in effect during the preceding period. Since [fol. 2092] National's fiscal year ends as of June 30 of each year and in order to avoid long periods of interim billings between January 1 of each year and the issuance of National's final financial and operating reports to the Civil Aeronautics Board for the fiscal period ended June 30, it is agreed that the annual period for the determination of billings of the rental of flight equipment and related equipment supplied to the lessee by the lessor shall begin as of July 1 of each year and be based

upon National's cost for the year ended June 30 immediately preceding.

In the event it is deemed necessary to deal with this matter by supplement to the Interchange Agreement, we will accomplish this promptly. Meanwhile, will you please sign a copy of this letter indicating your agreement with the foregoing.

Yours very truly,

PAN AMERICAN-GRACE AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 34

SUPPLEMENT NO. 3 TO EQUIPMENT INTERCHANGE AGREEMENT

THIS SUPPLEMENTAL AGREEMENT, made this 28th day of November 1955, between NATIONAL AIRLINES, INCORPORATED, a corporation organized and existing under the laws of the State of Florida, hereinafter referred to as "National", PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and PAN AMERICAN-GRACE AIRWAYS, INC., a corporation organized and

existing under the laws of the State of Delaware, hereinafter referred to as "Panagra".

WITNESSETH THAT:

WHEREAS, National, Pan American and Panagra entered into an equipment interchange agreement dated August 4, 1955, which was amended by Supplement No. 1 dated August 9, 1955 and Supplement No. 2 dated August 22, 1955, which agreement as so amended is hereinafter referred to as "the Equipment Interchange Agreement"; and

WHEREAS, National, Panagra, Chemical Corn Exchange Bank, Bankers Trust Company, The Chase Manhattan Bank, The Hanover Bank, The First National City Bank of New York and The New York Trust Company are parties to an agreement dated as of November 28, 1955, relating to the discount of certain notes executed and delivered to National by Panagra pursuant to paragraph 1.6 of the Financial Supplement to the Equipment Interchange Agreement, a copy of which agreement is attached hereto, marked "Annex A" and made a part hereof, which agreement, as the same may be amended from time to time, is hereinafter referred to as "the Note Discount Agreement";

NOW, THEREFORE, in consideration of the mutual covenants and conditions herein contained, the parties agree that, in the event Panagra shall, by reason of the failure of National to make any payment as interest as provided in the Note Discount Agreement, pay the then unpaid [fol. 2094] principal amount due on the promissory notes discounted together with an amount equal to interest thereon pursuant to the Note Discount Agreement or issue its own notes in exchange for said promissory notes, then, in addition to any other right or remedy available to Panagra, Panagra shall be subrogated to all rights of the banks, insofar as National is concerned, under the Note Discount Agreement; and, upon notice from Panagra, National shall be deemed to be in default under paragraph 1.6 of the Financial Supplement to the Equipment Interchange Agreement and such default shall be deemed to be a material breach of the Equipment Interchange Agreement.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the day and year first above mentioned.

[fol. 2095] Annex A

THIS AGREEMENT, dated as of November 28, 1955, between PAN AMERICAN-GRACE AIRWAYS, INC. (herein called "Panagra"), NATIONAL AIRLINES, INCORPORATED (herein called "National") and CHEMICAL CORN EXCHANGE BANK, BANKERS TRUST COMPANY, THE CHASE MANHATTAN BANK, THE HANOVER BANK, THE FIRST NATIONAL CITY BANK OF NEW YORK and THE NEW YORK TRUST COMPANY (herein called the "Banks"),

WITNESSETH THAT:

WHEREAS, the Banks entered into a Credit Agreement, dated June 10, 1954 (herein called the "Panagra Agreement"), with Panagra providing for the extension of credit to Panagra from time to time by the Banks, respectively, in an aggregate principal amount of $8,000,000; and

WHEREAS, Chemical Corn Exchange Bank, The First National City Bank of New York and The First National Bank of Miami entered into an Agreement, dated October 17, 1952 (herein called the "National Agreement"), with National providing for the making of loans by said banks

to National and the National Agreement contains certain covenants and agreements on the part of National; and

WHEREAS, National, Pan American World Airways, Inc. (herein called "Pan American") and Panagra entered into an Equipment Interchange Agreement, dated August 4, 1955, as amended, and, pursuant to the provisions thereof Panagra has executed and delivered to National six non-interest bearing promissory notes, five thereof being each in the principal amount of $633,333.33 and one thereof being in the amount of $633,333.35, and National proposes to [fol. 2096] sell and endorse, without recourse, one of said promissory notes to each of the Banks;

NOW, THEREFORE, the parties hereto respectively agree as follows:

FIRST: In order to induce each of the Banks to purchase, at the principal amount thereof, one of said promissory notes, National will from time to time pay to each of the Banks, with respect to the promissory note held by said Bank, an amount equal to interest, at the rate of 3¾% per annum, payable quarterly beginning January 1, 1956 and on the first day of each calendar quarter thereafter, on the principal amount thereof outstanding during the period or portion thereof for which interest is then being paid, less an amount, if any, equal to interest, calculated at the same rate, on any amortization payments, including any accelerated payments, pursuant to the provisions of the promissory notes, of this agreement or of paragraph 1.6 of the Financial Supplement of the Equipment Interchange Agreement, as amended, remaining unpaid beyond the due date thereof, which amount shall be an obligation of Panagra and which Panagra hereby agrees to pay on demand. If the maturity of all of the principal of said promissory notes outstanding shall be accelerated as provided therein, such payment as interest by National shall be made upon demand only to the date of such accelerated maturity.

SECOND: Further in order to induce the Banks to purchase from National the promissory notes as above provided, Panagra hereby agrees with each Bank that, upon any failure of the due and punctual payment of the amount

above agreed to be paid by National as interest on said [fol. 2097] promissory note purchased by said Bank when and as each such payment shall become due and payable as above provided, within ten days after notice in writing of any such failure, Panagra at its option will either (a) pay to said Bank the unpaid principal amount of the promissory note held by it, together with an amount equal to interest thereon, at the rate above specified, accrued to the date of such payment from the first date with respect to which such payment as interest has not been made by National, or (b) issue to said Bank, upon the surrender to Panagra by said Bank of the said promissory note and the Note or Notes, if any, shall then be held by said Bank, outstanding under the Panagra Agreement, its new Note of the tenor and in the form provided by the Panagra Agreement, in an amount equal to the sum of the unpaid principal amounts of said promissory note and Panagra Note or Notes so surrendered, which new Note shall be issued as of and bear interest from the date of the default by National in the payment of interest, payable in equal consecutive quarterly instalments beginning with the first day of January, April, July or September, as the case may be, next succeeding the date of such exchange and ending October 1, 1962. Panagra will, at the time of the surrender, pay to each Bank an amount equal to the interest in default on the promissory note surrendered by it. Said new Notes shall be deemed to have been issued under the Panagra Agreement and each of the Banks agrees to accept said new Note and to surrender said promissory note and Panagra Note or Notes, if any, notwithstanding the fact that the time for the making of loans under the Panagra Agreement may have expired, provided, however, that any issue [fol. 2098] of such new Notes at a time when there shall exist any default under the terms of the Panagra Agreement shall not be deemed a waiver of such default or the effects thereof with respect to the Notes, including the new Notes, outstanding under the Panagra Agreement subsequent to any such exchange.

Panagra further agrees that, unless and until the exchange provided for in the foregoing paragraph of this

section shall take place, it will, in each calendar year beginning with the year 1956 so long as any Notes shall be outstanding under the Panagra Agreement, make a prepayment or prepayments thereon, without penalty, of or aggregating not less than $180,000 or such lesser amount as shall equal the then unpaid balance of such Notes, each such prepayment to be applied in the manner provided in the Panagra Agreement with respect to voluntary prepayments thereunder.

Panagra further agrees that neither the rights of any Bank as the holder of the promissory note purchased by it or of any successor to said Bank shall be subject to any defense, setoff, counterclaim or recoupment whatsoever arising out of any breach by National of any of its obligations arising under or out of the Equipment Interchange Agreement or out of any indebtedness or liability, however arising, at any time owing by National to Panagra. Panagra further agrees that in the case of each payment or prepayment made by it, with respect to the promissory note which may be held by any Bank it will make a payment or prepayment, as the case may be, in a similar amount with respect to the promissory note held by each other Bank.

Panagra further agrees with each of the Banks that so long as any of said promissory notes purchased by said [fol. 2099] Bank shall remain outstanding Panagra will perform and observe the conditions, covenants and agreements contained in the Panagra Agreement and any breach or failure by Panagra to perform or observe any of such conditions, covenants and agreement shall be a default under this agreement notwithstanding the fact that the Notes issued under the Panagra Agreement may have been paid prior to the payment of the final instalment of principal of said promissory notes; and without limiting the generality of the foregoing, further agrees that in any computation of the unpaid principal amount of Notes required by the Panagra Agreement to be made from time to time the unpaid principal amount of Notes shall include the unpaid principal amount of said promissory notes at the time outstanding.

Panagra further agrees that if, at any time, it shall fail to pay any instalment of principal of said promissory notes when the same shall become due or shall fail to make any prepayment as required by the terms thereof or shall fail to observe any of its agreements contained in this agreement, then any and all Notes issued under the Panagra Agreement at the time outstanding shall thereupon become due and payable without presentation, protest or notice of any kind, all of which are hereby waived.

THIRD: The Banks and Panagra agree that the commitment under the pursuant to the Panagra Agreement of each Bank which shall purchase from National a promissory note of Panagra, as above provided, shall be reduced in an amount equal to the principal amount of the promissory note so purchased by said Bank.

[fol. 2100] FOURTH: Chemical Corn Exchange Bank and The First National City Bank of New York, as parties to the National Agreement, hereby consent and agree that the agreement herein contained by National to pay to the Banks respectively amounts equivalent to interest on the promissory notes shall not be considered to constitute a violation of any covenant or agreement on the part of National contained in the National Agreement.

FIFTH: All payments as interest hereunder and all payments of instalments of principal and prepayments under the terms of the promissory notes shall be made to Chemical Corn Exchange Bank on behalf of all of the Banks, all of such payments to be applied pro rata on the amount due to all of the Banks.

This agreement and the promissory notes shall be deemed to be contracts made in the State of New York and entered into under and pursuant to the laws of said State and shall be governed, construed and enforced in accordance with the laws of said State.

This agreement may be executed in two or more counterparts each of which shall constitute an original but which, taken together, shall constitute one instrument.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be duly executed by their respective officers thereunto duly authorized as of the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 35

(Letterhead of Pan American-Grace Airways, Inc., New York, N. Y.)

[Stamp—Received—May 27, 1597]

May 27, 1957

Pan American World Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

ATTENTION: Mr. Erwin Balluder, Vice President

Gentlemen:

Enclosed herewith for your consideration and acceptance is a letter dated April 16, 1957 which we have addressed to National Airlines and which National has accepted, relating to the application of the new Uniform System of Accounts to the Financial Supplement to the Equipment Interchange Agreement dated as of August 4, 1955 between National, Pan American and Panagra.

Item number 4 in said letter provides for payment by National directly to you of maintenance charges related to the operation of the aircraft over National's route pursuant to said Equipment Interchange Agreement. It is understood that the arrangement provided for in said Item 4 is not intended to modify the contractual arrangements between us with respect to maintenance of aircraft and the amounts to be received by Pan American therefor

as set forth in the Through Flight Agreement dated July 30, 1946, as amended, including Paragraph 62 thereof, except that National will pay to you directly the amount referred to in said Item 4 of the letter dated April 16, 1957.

In consideration of your acceptance of said letter dated April 16, 1957, it is agreed that Panagra will be responsible to you for any failure or delay in such payment by National so that Pan American will receive in total all amounts due it under the aforesaid Through Flight Agreement dated July 30, 1946, as amended.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

By /s/ DOUGLAS CAMPBELL

135 East 42nd Street, New York 17, N. Y.

April 16, 1957

National Airlines, Incorporated
3240 N. W. 27th Avenue
Miami 42, Florida

Attention: Mr. J. C. Brawner
Senior Vice President & Treasurer

Dear Sirs:

As you are aware, the Civil Aeronautics Board prescribed a Uniform System of Accounts effective January 1, 1957 which generally revised the accounting procedures for air carriers and included the establishment of a new chart of accounts. For purposes of clarification and in order to conform with the revision to the Uniform System of Accounts, it is necessary that we make a corresponding revision in certain account number designations and pro-

MICRO CARD
TRADE MARK ®

21

12002

MATTHEW BENDER & COMPANY
MB
139-63

microcard

cedures stipulated in the Financial Supplement to the Equipment Interchange Agreement dated as of August 1, 1955, between National, Pan American and Panagra.

Questions have also arisen on the interpretation of certain provisions in said Financial Supplement. In order to resolve these questions of interpretation and record our understanding on the revisions necessary in the Financial Supplement to conform with the changes in the Uniform System of Accounts, we confirm our agreement on the following:

1. Effective January 1, 1957 the account number references and methods of cost determination stipulated in the Financial Supplement to the Equipment Interchange Agreement shall be modified to conform with the Uniform System of Accounts as revised by the CAB effective that date as set forth in the attachment to this letter.

2. For purposes of determining the amount of deposit to be maintained by the lessee with the lessor under Para- [fol. 2104] graph 1.6 of the Financial Supplement and with specific reference to the second paragraph thereof, it is agreed:

   (a) that in the determination for each quarter year of the "estimated average revenue hours to be flown per day with lessor's aircraft of such type over lessee's routes under the Interchange Agreement", the scheduled hours shall be multiplied by the percentage of actual revenue hours flown by National to schedul d hours over National's route in the Interchange operation during the previous twelve months for the respective type of equipment flown.

   (b) that in the determination of both "the estimated average revenue hours to be flown per day" and "National's daily average revenue hour utilization during the preceding twelve months" an adjustment will be made in the computation to exclude the effect of extended abnormal operations resulting from any extended work stoppages and other abnormal factors not recurring in regular day-to-day operations of the respective aircraft.

3. With reference to Paragraph 1.7 of the Financial Supplement dealing with the sale of aircraft, it is agreed that for the determination of the amount payable by the lessee to the lessor under the first indented sentence of the first paragraph, 10-13ths of the aggregate related depreciation paid by the lessee to the lessor on the aircraft of the type involved shall be deducted from the agreed value, as defined, of the designated aircraft. This allocation of depreciation is based upon the relative investment in aircraft to the total investment in flight equipment including spare engines, spare propellers, parts and assemblies used in the determination of the cash deposit required pursuant to Paragraph 1.6 of the Financial Supplement.

4. As the Interchange Agreement provides for through service between New York, Miami and other points on National's Route 31 on the one hand and the Canal Zone and points on Panagra's route in South America on the other hand, it contemplates in substance that each of the three carriers involved will bear its share of maintenance [fol. 2105] expense incident to operation in its respective sector in accordance with the Financial Supplement to the Interchange Agreement, as amended. In practice, all major maintenance work is performed by Pan American World Airways, Inc.

In order to provide for direct payment by National of maintenance costs attributable to its operation of Panagra aircraft over its sector, it is agreed that effective as of January 1, 1957 National will pay to Pan American amounts corresponding to maintenance costs, both direct and indirect (including related burden, depreciation of ground equipment and related costs of general and administrative expenses) as determined pursuant to Paragraphs 1.12, 1.21, 1.22 and 1.5 of the Financial Supplement to the Interchange Agreement, as amended. It is further agreed that amounts payable by National to Panagra, pursuant to Section 10 of the Interchange Agreement and the Financial Supplement, as amended, will not include any amounts pay-

able by National to Pan American under the provisions of this paragraph.

Will you kindly indicate your agreement to the above by signing the attached copy of this letter.

Yours very truly,

PAN AMERICAN-GRACE AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 36

Restatement of account number references and methods of cost determination set forth in the Financial Supplement dated August 9, 1955 to the Equipment Interchange Agreement dated as of August 4, 1955 between National Airlines, Incorporated, Pan American World Airways, Inc. and Pan American-Grace Airways, Inc. to conform with the Uniform System of Accounts as revised by the Civil Aeronautics Board effective January 1, 1957

Paragraph 1.12—Direct Maintenance—Flight Equipment

Add —To direct maintenance costs, as recorded, will be added the value of rotable parts and assemblies which are retired and charged against the reserve for depreciation.

Paragraph 1.13—Flight Equipment Depreciation

Delete —Entire original paragraph.

Substitute —Depreciation expense shall be based upon National's cost per available seat mile for the same type of flight equipment in the same type of service except that if reported costs of aircraft, engines and rotable parts and assemblies are based upon a life different than 7 years and 10% residual values the reported costs shall be adjusted to a 7-year basis and 10% residual values in making this determination. In the event that National's reported depreciation expense is distorted by the use of fully-depreciated flight equipment, appropriate adjustment will be made in this expense to reflect the normal level of costs.

In order to continue provision for the element of cost represented by loss in service value or obsolescence of Flight Equipment Expendable Parts—Account 1310 representing items which were formerly classified as Flight Equipment Spare Parts and Assemblies—Account 1608, a proper adjustment will be made in National's cost per available seat mile of Flight Equipment Depreciation to give effect to such cost.

Paragraph 1.21—Ground and Indirect Maintenance

Delete —Entire original paragraph.

Substitute —The Applied Maintenance Burden—flight equipment available seat mile cost of National for the same type of flight equipment in the same type service shall be used.

[fol. 2107]

Paragraph 1.22—Depreciation

Delete —Entire original paragraph.

Substitute —The portion of National's available seat mile cost represented by Applied Maintenance Burden shall include depreciation of shop facilities used in the maintenance of flight equipment.

Paragraph 1.4—Passenger Service Expense

Delete —Original last paragraph.

Substitute —The cost of other passenger services to be furnished by lessor shall be based on the cost per available seat mile reported by National in Accounts 5542.9 and 5543.9 —General Services Purchased and 5553 —Other Supplies.

Paragraph 1.5—General and Administrative Expense

Delete "The amounts reported in Accounts 6641, 6642, 6665, 6666, 6667 and 6672 shall be excluded in total."

Substitute "The amounts reported in Accounts 6840, 6841, 6865 and 6866 shall be excluded in total."

Delete —Original last paragraph.

Substitute —"The remaining general and administrative expenses shall be allocated on the basis of labor costs appearing in Account

groups 5100, 5200, 5300, 5500, 6100, 6200, 6300, 6500 and 6600. This proration shall be by type of equipment with respect to Account groups 5100 and 5200. The total amount of general and administrative expense allocated to the 5300 group shall be re-allocated to the 5200 group of accounts by type of equipment in accordance with the formula set forth in Paragraph 1.21 of this Financial Supplement, as amended."

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 37

I, GEORGE FOX, hereby certify that I am Assistant Secretary of Pan American Airways, Inc.; that the attached documents are true and complete copies of the documents evidencing an interline traffic agreement between Pan American Airways, Inc. and Pan American-Grace Airways, Inc. as evidenced by:

1. Letter of January 26, 1932 from Vice President and General Manager, Pan American-Grace Airways, Inc. to President, Pan American Airways, Inc.
2. Letter agreement dated April 14, 1932;
3. Memorandum signed by Passenger Traffic Manager, Pan American Airways, Inc. and dated May 12, 1937;
4. Memorandum signed by Passenger Traffic Manager, Pan American Airways, Inc. and dated August 19, 1938;
5. Memorandum dated June 13, 1939 signed by Vice President of Pan American-Grace Airways, Inc.
6. Memorandum from Passenger Traffic Manager, Pan American Airways, Inc. dated June 22, 1939;
7. Letter from Vice President and General Traffic Manager, Pan American-Grace Airways, Inc. dated November 26, 1943;
8. Memorandum signed by Passenger Traffic Manager, Pan American Airways, Inc. dated August 23, 1945;
9. Memorandum signed by Assistant Comptroller, Pan American Airways, Inc. dated August 31, 1945;
10. Memorandum signed by Passenger Traffic Manager, Pan American Airways, Inc. dated September 4, 1945;
11. Memorandum signed by Assistant Comptroller, Pan American Airways, Inc. dated October 1, 1945.

PAN AMERICAN AIRWAYS—PANAGRA COMMISSION ARRANGEMENT—BALBOA

FILE T. C. 4

We are sorry that we did not make ourselves clear in our memorandum to you of August 31st with respect to the commission exchanged between Panagra and Pan American Airways.

In addition to the arrangement whereby our Panama City office sells Panagra series of tickets and the Panama Agencies sells PAA tickets, on which commission in exchanged at the rate of 7½%, all tickets sold by the Balboa airport are of our own series, but we credit Panagra for the transportation over its lines less 7½% commission. Those tickets which their Balboa office in turn issues for transportation over our lines are credited to us by them less the same 7½% commission. The same is true for tickets issued by any of our on-line stations for transportation over Panagra. That portion of the travel over Panagra is credited to them less 7½% commission.

If we can be of any further assistance to you please let us know.

PAA—PANAGRA COMMISSION ARRANGEMENT—BALBOA

FILE T. C. 3

We acknowledge your letter of August 23rd wherein we were requested to advise you of the present arrangement in connection with interchange of commission, if any, between PAA and PANAGRA at Balboa.

In this connection we wish to advise that the Panama Agencies in Cristobal use our ticket form and report their

sales to us regularly. We allow them 7½% commission on all sales made by them.

Our Panama City office sells PANAGRA's tickets and reports the sales directly to PANAGRA less 7½% commission. The Panama City remittances are made to us and we, in turn, issue PANAGRA credit less 7½% commission for the sales.

PAA—PANAGRA COMMISSION ARRANGEMENT—BALBOA

Can you advise me exactly what the present arrangement is in connection with the interchange of commission, if any, between PAA and PANAGRA at Balboa?

As I understand it, either company will pay the other for commission where tickets are sold by one company for the other at the Airport Office. However, at the City Office in Panama, and perhaps at Cristobal, it may be that commission is being paid in these cases. If commission is being exchanged in the latter instances, will you please advise what the rate is, and also advise particularly whether PAA pays PANAGRA for any commission on tickets issued by PANAGRA's general agency in the Canal Zone.

Cable Address
"Panagra"

November 26, 1943

Dear Dick—

When I was in Balboa arrangements had just been completed whereby Panair and Panagra would not pay each other commission on ticket sales effected at the Airport Office.

However, for sales effected at the City Ticket Office commission continued to be paid.

It was my impression that the Eastern Division, Western Division and Panagra, had agreed on this because a new method of accounting was inaugurated, by which commissions were deducted by each division at the time the tickets were reported. This method was being installed while I was there.

Under the circumstances I assume that Mr. Becerra Soto's plan has been dropped for the time-being. Am I correct in this assumption?

PANAIR—PANAGRA COMMISSION

This will confirm our recent conversation and Mr. Vidal's memo to SAGO Accounts, Lima, dated June 13, (copy of which you have) to the effect that PANAIR and PANAGRA

will pay each other 7½% commission instead of 5% on inter-company sales under the same conditions as previously existed with respect to 5%. This is effective July 1, 1939.

COMMISSIONS—PAN AMERICAN AIRWAYS, INC.—PANAGRA

In accordance with your request the following will review and bring you up to date on the commission arrangements existing between the above two Companies:

In January 1932 an agreement was signed for the reciprocal payment of 5% commission.

In March 1935 this agreement was amplified as follows:

Pan American Airways, Inc. will pay to Pan American-Grace Airways, Inc. 5% commission on tickets sold by Pan American-Grace Airways, Inc. and/or its agents for transportation over the lines of Pan American Airways, Inc. and/or its affiliated companies; provided, however, that in any cases where Pan American-Grace Airways, Inc. has arrangements for the payment to its agents of 7½% or 10% commission, Pan American Airways, Inc. will pay to Pan American-Grace Airways, Inc. an additional 2½% or 5% commission to compensate for the aggregate 7½% or 10% which Pan American-Grace Airways, Inc. must pass along to its agents when tickets are sold by sub-agents for passage over the lines of Pan American Airways, Inc. and/or its affiliated companies.

In the reverse cases, 5% commission will be paid by Pan American-Grace Airways Inc. to Pan American Airways, Inc. on tickets sold by Pan American Airways, Inc. and/or its affiliated companies for transportation over the lines of Pan American-Grace Airways, Inc.; provided, however, that in any cases where Pan American Airways, Inc. and/or its affiliated companies have arrangements for the payment to its or their agents of 7½% or 10% commission, Pan American-Grace Airways, Inc. will pay Pan American

Airways, Inc. an additional 2½% or 5% commission to compensate for the aggregate 7½% or 10% commission which Pan American Airways, Inc. and/or its or their affiliated companies must pass along to its or their agents when tickets are sold by such agents for passage over the lines of Pan American-Grace Airways, Inc.

Subsequent to the above agreements, in May 1937 an understanding was reached between the two companies concerning the offices of both companies at Cristobal and Panama City, as follows:

The offices of both companies at both points will sell passenger and express traffic over the lines of the respective companies and their affiliates regardless of which offices of either company at Cristobal and Panama City is presented with passenger or express business. The above outlined commissions will apply in accordance with which company or its agents make the sales.

[fol. 2122] However, in the case of express traffic, although each company may handle express shipments offered to it for transportation over the lines of the other exactly the same as above, there will be no exchange of commission on such express shipments.

We trust the above will bring you up to date on this situation. Will you kindly be governed accordingly.

PAA

PAN AMERICAN AIRWAYS, INC.

General Offices—Chrysler Building—New York City

May 12, 1937

To Traffic Managers
Traffic Department
Mexico, D.F.—Lima

From General Traffic Manager
Traffic Department
New York, N.Y.

SALES—CANAL ZONE

Effective immediately, the Pan American Airways, Inc. and Pan American Grace Airways, Inc. offices in Cristobal and Panama City will each sell passenger and express business over the lines of the respective companies, as well as other companies, regardless of which offices of either company at Panama City and Cristobal is presented with passenger or express business.

As regards passenger sales, the company whose office sells the ticket over the other's lines will receive the usual 5% commission.

In the case of express sales it is desired that these be handled by the office to which the shipper presents business, either Pan American Airways, Inc. or Pan American-Grace Airways, Inc., exactly the same as in the case of passenger sales, but there will be no exchange of commission on express shipments. Will you kindly instruct the local offices in Cristobal and Panama City in accordance with the above?

New York City

April
14
1932

Mr. J. D. MacGregor,
Vice President & General Manager,
Pan American-Grace Airways, Inc.,
122 East 42nd Street,
New York City.

Dear Mr. MacGregor:

This will confirm our verbal agreement regarding return round trip passengers between Buenos Aires and Montevideo; also through passengers who wish stopovers at either Montevideo or Buenos Aires and then continue their passage via Panair do Brasil, S.A. or Pan American-Grace Airways, Inc.

When ticket is issued by Pan American-Grace Airways and passenger returns over Panair do Brasil, S. A., between Buenos Aires and Montevideo, Panair do Brasil, S. A. will bill Pan American-Grace Airways, Inc. for the published one way tariff between these two points less ten per cent (10%). Also, when through passenger wishes stopover at Buenos Aires and then continues passage over Panair do Brasil, S.A., Pan American-Grace Airways will be billed at the regular published tariff between Buenos Aires and Montevideo.

When ticket is issued by Panair do Brasil, S. A. and passenger returns over Pan American-Grace Airways, Inc., between Buenos Aires and Montevideo, Pan American-Grace Airways, Inc., will bill Panair do Brasil, S.A. for

the published one way tariff between these two points less ten per cent (10%). When through passenger wishes stopover at Montevideo, and then continues passage over Pan American-Grace Airways, Inc., Panair do Brasil, S. A. will be billed at the regular published tariff between Montevideo and Buenos Aires.

If this is in accordance with your understanding please sign and return the attached copy to indicate your approval.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.

[fol. 2125]

PAN AMERICAN-GRACE AIRWAYS, INC.

New York, N.Y.
January 26, 1932

Mr. J. T. Trippe, President
Pan American Airways, Inc.
New York, N.Y.

My dear Mr. Trippe:

This will confirm our verbal agreement by which Pan American Airways, Inc. will pay to Pan American-Grace Airways, Inc. in South America 5% commission on tickets sold by them or their agents for transportation over Pan American Airways, Inc. lines.

A similar 5% commission will be paid by Pan American-Grace Airways, Inc. to Pan American Airways, Inc. for tickets sold by them or their agents for transportation over Pan American-Grace Airways, Inc. lines.

The same commission will be paid for the transportation of air express over the respective lines, excluding, of course, valuation and handling charges.

This agreement will be in effect for the period of one year from February 1, 1932 and may be cancelled by either party by giving thirty days written notice.

The details as to the method for carrying out this agreement will be arranged with Mr. Vidal so that this arrangement can be given prompt effect.

It is, of course, understood that the above commission refers to tickets sold by your sectional offices and outside agents and this arrangement is without prejudice to any portion of the cost of your New York Traffic Department which we may arrange to pay.

I am sending this to you in duplicate, and will you please return me one copy with your conformity.

Very truly yours

PAN AMERICAN-GRACE AIRWAYS, INC.

PAN AMERICAN AIRWAYS, INC.
General Offices—Chrysler Building—New York City

June 11, 1937

Pan American Grace Airways, Inc.,
135 East 42nd Street.
New York, N. Y.

Gentlemen:

We plan to operate a land plane service between Rio de Janeiro, Brazil, Asuncion, Paraguay and Buenos Aires,

Argentina and desire to make the first trip southbound into Buenos Aires July 5th, or July 6th, 1937, the first trip northbound out of Buenos Aires July 7th, 1937. We expect to operate initially with a lockheed electra plane shifting later to operation with a Douglas D. C. 3. For the present this service will be confined to one round trip per week due to arrive in Buenos Aires on Mondays, or Tuesdays, and to depart from Buenos Aires on Wednesdays.

As we have no land plane facilities or landing field at Buenos Aires we desire to make use of your facilities at that point including landing field, radio facilities, and shelter and servicing for the plane during its lay over in Buenos Aires.

If you are willing to provide these facilities and services for our operation, it is suggested that we compensate you therefor on the following basis:

(a) For the utilization of all said facilities, and the services of your personnel required for their maintenance and operation including ordinary line service to the plane, we hereby propose to pay to you a proportion of the total cost of operating the said airports, including pay of personnel, expenses of operation, maintenance and communications, such proportion being calculated as follows:

> The number of landings of airplanes of this Company at your airport at Buenos Aires multiplied by the licensed useful load of the said airplanes shall constitute the numerator of the fraction representing this company's share of the said total cost at such airport; the number of landings of airplanes of both this company and your Company at the said airport multiplied by the licensed useful load of the said airplanes shall be the denominator of the said fraction.

[fol. 2127] (b) For any maintenance or repair work which we may request you to do upon our plane or planes, over and above routine line servicing; we hereby propose to pay you the actual cost of labor, plus

150% of such cost for overhead, and the actual cost of materials, plus 20% of such cost for overhead.

If the above arrangement is satisfactory to you will you kindly sign the duplicate original of this letter and return it to us?

Very truly yours,

(Letterhead of Pan American-Grace Airways, Inc., New York, N. Y.)

May 13, 1942

Pan American Airways, Inc.
135 East 42nd Street
New York, New York

Dear Sirs:

In order to compensate you or your subsidiary, Panair do Brasil, for the facilities used by Panagra at Corumba, Brazil, we are agreeable to do so on the basis of a joint facilities arrangement on the following basis.

The cost of the facilities of Operations and Communications used by Panagra to be proportioned between the companies on the basis of Ton-Landings.

For any maintenance or repair work on our planes over and above routine line servicing, we would pay the actual cost of labor, plus 150% of such cost for overhead, and the actual cost of materials, plus 20% of such cost for overhead.

Fuel furnished to Panagra planes would be at cost as the work involved in storage and fueling of planes would be compensated for under the joint facilities arrangement. Passenger supplies, as well as any other supplies excepting spare parts, would be charged at cost.

The cost of operating the staff house in Corumba should not be included in the Joint Facilities calculations until further notice. Panagra will continue to reimburse Panair for the use of the staff house on a fixed rate basis per man.

It is understood and agreed that the Joint Facilities billings to Panagra would be supported by complete details.

If the above arrangement is satisfactory to you will you kindly sign the duplicate original of this letter and return it to us.

Yours very truly,

PAN AMERICAN-GRACE AIRWAYS, INC.

October 28, 1942

The Postmaster General
Post Office Department,
Washington, D. C.

Dear Sir:

In connection with the final rate decisions issued by the Civil Aeronautics Board in Dockets No. 716 and No. 298, you are advised that Pan American-Grace Airways, Inc.,

and Pan American Airways, Inc. have agreed, effective September 1, 1942, to the following apportionment of northbound mail revenue received for mail accepted by Pan American-Grace Airways, Inc. from the various Post Offices in its route and destined to the United States or beyond. Such apportionment is to be made after provision for payment to the United States Post Office Department for services within the United States, it being understood that your department collects directly from the foreign Governments for transportation beyond the United States.

Country of Origin	Percentage of revenue to be apportioned Pan American-Grace Airways, Inc.	Percentage of revenue to be apportioned Pan American Airways, Inc.
Argentina*	77.8%	22.2%
Chile	74.4%	25.6%
Bolivia	67.6%	32.4%
Peru	59.5%	40.5%
Ecuador	44.8%	55.2%
Colombia	30.5%	69.5%

It is understood that Pan American Airways, Inc. shall not be responsible for the collection of the revenue in question or for payment to the United States Post Office Department for services within the United States, all of which will be settled between Pan American-Grace Airways, Inc. and that Department, and that amounts payable to Pan American Airways, Inc. will become payable from Pan American-Grace Airways, Inc. immediately upon completion of the carriage by Pan American Airways, Inc. of the mail to which the payments relate. During the period from July 1, 1942 through August 31, 1942, the percentage of revenue to be apportioned Pan American-Grace Airways, Inc. shall be determined in the manner set forth above and the entire balance shall be payable to the United States [Vol. 2130] Post Office Department, it being understood that no other payment to, or deduction by, the United States

* This includes mail originating in Uruguay and Paraguay so long as it is cleared through the Buenos Aires, Argentine, Post Office.

Post Office Department will be made in respect of such mail from Pan American Grace Airways, Inc. or Pan American Airways, Inc.

This agreement is subject to cancellation by either party upon thirty days' written notice to the other party and to the Postmaster General.

Respectfully yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

Translation

CONTRACT ENTERED INTO BETWEEN PAN AMERICAN AIRWAYS, INC. AND PAN AMERICAN-GRACE AIRWAYS, INC. covering operations in the Republic of PANAMA.

In the city of New York, State of New York, United States of America, on August 23, 1945, between the undersigned, namely—Mr. Howard B. Dean, Vice President, in the name and representation of PAN AMERICAN AIRWAYS, INC., hereinafter called PANAIR, and Mr. Harold J. Roig, President, in the name and representation of PAN AMERICAN-GRACE AIRWAYS, INC., hereinafter called PANAGRA, the contract containing the following clauses has been entered into:

FIRST: PANAIR executed a contract with the Government of the Republic of Panama for the establishment of an air transport service on March 8, 1929, which was amplified by a supplementary contract signed by the same parties on May 29, of the same year; said agreements were approved by the Executive Power of the Republic of Panama pursuant to Law 48 of 1932, with several additions and amendments.

SECOND: On December 6, 1929, after approval by the Executive Power, PANAIR transferred to PANAGRA, in relation to the South American countries served by the latter, some of the rights pertaining (or—belonging) to it by

virtue of the contracts mentioned in the preceding clause, and upon the enactment of Law 48 of 1932, the rights acquired by PANAGRA were made subject to the additions and amendments contained in that same law.

THIRD: On April 28, 1930, the Government of Panama and PANAGRA executed a contract designated No. 14, [fol. 2135] pursuant to which the tariffs relating to the transportation of mail to the Republics of South America were amended. (or—revised)

FOURTH: In accordance with the provisions of Law 48 of 1932, and Contract No. 43 of December 28, 1942, entered into between the Government of Panama and PANAIR, the operating permit granted to the latter expired on December 28, 1943; said permit was renewed for a period of one year counting from said date

FIFTH: By contract No. 45 of December 27, 1944, and, further, as specified in Resolution No. 1808 of June 14, 1945, issued by the First Section of the Ministry of Government and Justice of the Republic of Panama, said contract of PANAIR was renewed until December 29, 1945.

SIXTH: By Resolution No. 1479 of July 21, 1944, issued by the Ministry of Government and Justice of the Republic of Panama, PANAIR was authorized to transfer to PANAGRA the corresponding rights emanating from the aforesaid renewed contract, which terminated on December 28, 1944; however, because of unforeseen and inevitable delays, it has not been possible until now to verify said transfer, which, hereinafter and by virtue of this instrument, is verified.

SEVENTH: That pursuant to the above-mentioned Resolution No. 1808 of June 14, 1945, the Government of Panama granted to PANAIR the corresponding authorization to transfer to PANAGRA such rights as might appertain to the latter, derived from the renewed contract of PANAIR, which will expire on December 29, 1945.

EIGHTH: With the object, first, of insuring that the registers (or—records) in Panama will be full and complete with respect to the rights of PANAGRA, and, second,

[fol. 2136] that PANAGRA will continue enjoying all rights with respect to the renewed contract between the Government of Panama and PANAIR, which will expire on December 29, 1945, PANAIR hereby conveys and transfers to PANAGRA the operating rights granted to PANAIR by the aforesaid renewed contract which will expire on December 28, 1945, it being understood that the rights transferred are those concerning air transportation verified between Panama;* (?) it is understood, further, that PANAGRA, as transferee, acquires with respect to the National Government of Panama, each and all of the obligations which the transferer, PANAIR, has at present, and that the transferee will be directly responsible for default in its undertakings in relation to the Government of Panama.

NINTH: In accordance with clause 22 of Contract No. 8 bis of March 8, 1929. entered into between PANAIR and the Government of Panama, this contract of transfer has been previously authorized by means of the above-mentioned Resolutions, namely, No. 1479 of July 21, 1944, and No. 1808 of June 14, 1945, both issued by the Ministry of Government and Justice and of the Republic of Panama.

IN WITNESS whereof this document is signed in triplicate in the city of New York, State of New York, State of New York, United States of America, on August 23, 1945.

[fol. 2137]

CONTRATO CELEBRADO ENTRE PAN AMERICAN AIRWAYS, INC. Y PAN AMERICAN-GRACE AIRWAYS, INC. SOBRE OPERACIONS EN LA REPUBLICA DE PANAMA

En la ciudad de Nueva York, estado de Nueva York, Estados Unidos de América, el día veintitres de agosto de mil novecientos cuarenta y cinco, entre los suscritos, a saber: El señor Howard B. Dean, Vice-Presidente, en nombre y representación de PAN AMERICAN AIRWAYS, INC., que en adelante se llamará PANAIR, y el señor Harold J. Roig, Presidente, en nombre y representación de PAN AMERICAN AIRWAYS, INC., que en adelante se llamará PANAGRA, se han celebrado el contrato que se expresa en las siguientes cláusulas:

PRIMERA: PANAIR celebró un contrato con el Gobierno de la República de Panamá para el establecimiento de un servicio de transportes aéreos el día ocho de marzo de mil novecientos veintinueve, el cual fué adicionado por un contrato complementario suscrito por lo mismos el día veintinueve de mayo del mismo año, convenios que fueron aprobados por el Poder Ejecutivo de la República de Panamá por media de la Ley cuarenta y ocho de mil novecientos treinta y dos con algunas adiciones y reformas.

SEGUNDA: El día seis de diciembre de mil novecientos veintinueve, previa aprobación del Poder Ejecutivo, PANAIR cedió a PANAGRA, con relación a los paises suramericanos servidos por está última, algunos de los derechos que la correspondián en virtud de los contratos mencionados en la cláusula anterior, y al dictarse la Ley cuarenta y ocho de mil novecientos treinta y dos los derechos adquiridos por PANAGRA quedaron sujetos a las adiciones y reformas contenidas en esa misma ley.

TERCERA: El día veintiocho de mil novecientos treinta el Gobierno de Panamá y PANAGRA celebraron un contrato marcado con el número catorce por medio del cual se reformaron las tarifas referentes al transporte de correo aéreo a las repúblicas de la América del Sur.

CUARTA: De acuerdo con los términos de la Ley cuarenta y ocho de mil novecientos treinta y dos y el contrato número cuarenta y tres del veintiocho de diciembre de mil [fol. 2138] novecientos cuarenta y dos celebrado entre el Gobierno de Panamá y PANAIR, el permiso para operaciones otorgado a esta última expiró el día veintiocho de diciembre de mil novecientos cuarenta y tres, dicho permiso fué renovado por el término de un año a partir de esa fecha.

QUINTA: Por contrato número cuarenta y cinco de fecha veintisiete de diciembre de mil novecientos cuarenta y cuatro, y nuevamente, según consta de la solución número 1808 de fecha catorce de junio de mil novecientos cuarenta y cinco, expedida por la Sección Primera del Ministerio de Gobierno y Justicia de la República de Panamá, el citado contrato de PANAIR fué prorrogado hasta el veintinueve de diciembre de mil novecientos cuarenta y cinco.

SEXTA: Por resolución número 1479 de fecha veintiuno de julio de mil novecientos cuarenta y cuatro expedida por el Ministerio de Gobierno y Justicia de la República de Panamá, PANAIR fué autorizada para traspasar a PANAGRA los derechos correspondiente emanadas del contrato prorrogado y citado, que terminado en veintiocho de diciembre de mil novecientos cuarenta y cuatro; pero por demoras imprevistas o inevitables no fúe posible hasta ahora verificar dicho traspaso, el que, más adelante y por este instrumento, se verifica.

SEPTIMA: Que por la ya citada resolución número 1808 de fecha catorce de junio de mil novecientos cuarenta y cinco el Gobierno de Panamá concedió a PANAIR la correspondiente autorización para traspasar a PANAGRA los derechos que a ésta le correspondiera, derivados del contrato prorrogado de la PANAIR. que expirará el veintinueve de diciembre de mil novecientos cuarenta y cinco.

OCTAVA: Con el objeto, a primero, de que los registros en Panamá sean cabales y completos respecto de los derechos de PANAGRA, y segundo, de que PANAGRA siga gosando de todos derechos respecto del contrato prorrogado entre

el Gobierno de Panamá y PANAIR que expirará el día veintinueve de diciembre de mil novecientos cuarenta y cinco, PANAIR, cede y traspase por el presente instrumento, a PANAGRA los derechos de operación concedidos [fol. 2139] a PANAIR por el ya citado contrato prorrogado que expirará el veintiocho de diciembre de mil novecientos cuarenta y cinco, entendido que los derechos traspasados son los concernientes a trasportes aéreos verificado entre Pánamá; es entendido además que PANAGRA, como cesionaría, adquiere respecto del Gobierno Nacional de Panamá, todas y cada de las obligaciones que ahora tiene la cedente PANAIR y que la cesionaria será responsable directamente de la falta de cumplimiento de sus compromisos en lo que toca al Gobierno de Panamá.

NOVENA; De acuerdo con la cláusula veintidós del contrato número 8 bis de fecha ocho de marzo de mil novecientos veintinueve, celebrado entre PANAIR y el Gobierno de Panamá, el presente contrato de cesión ha sido autorizado previamente por medio de las Resoluciones ya citadas, a saber, la número 1479 de fecha veintiuno de julio de mil novecientos cuarenta y cuatro y la número 1808 de fecha catorce de junio de mil novecientos cuarenta y cinco, ambas expedidas por el Ministerio de Gobierno y Justicia y de la República de Panamá.

En fé de lo cual se firma el presente documento por triplicado en la ciudad de Nueva York, estado de Nueva York, estado de Nueva York, Estados Unidos de América, a los veintitres días del mes de agosto de mil novecientos cuarenta y cinco.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 43

PAN AMERICAN-GRACE AIRWAYS, INC.

PAYMENTS TO PARENT COMPANIES FOR SERVICES

In the course of the negotiations resulting in the Panagra-Pan American Through Flight Agreement (dated July 30, 1946), it was determined that in view of changed conditions it was necessary to reexamine the basis upon which Panagra pays the parent companies for services rendered. No substantial change had been made in such fees since 1941. With the greatly increased volume and complexity of Panagra's business and the corresponding increase in the demands on the parent companies' services, these fees have become wholly inadequate to cover cost of services performed. Consideration and study by the three parties concerned have been in progress for some time and were in progress when schedules supporting Panagra's rate case were first submitted to the Board's staff. The negotiations have now been completed, and the estimated amounts payable for commissions and reimbursable expenses under various categories as hereafter more fully explained will be found summarized in a table at the end of this memorandum.

Since its organization and in accordance with the plan of organization and operation of Panagra which had been contemplated from the outset, Panagra has availed itself of [fol. 2141] the established facilities, organization and connections of its two parent companies for services rendered. A comprehensive account of the services and fees paid from the organization of the company through 1941 appears in the printed *Statement of Evidence* submitted by Panagra at the time of the first rate case (Dockets Nos. 623 and 716), at pages 36 to 111, inclusive.

Following the exhaustive review which was then made by the Board into the services rendered, a fee on the basis of 12.32¢ per revenue mile was found reasonable, effective

July 1, 1942. The fees were paid on this basis from that date until July 1, 1943. As of this letter date a rate of 11.45¢ per revenue mile was established in the second Panagra rate proceeding. From July 1, 1943, through 1945 the fee was computed at a rate of 11.45¢ for the base revenue miles. In the years 1944-45, as additional revenue mileage was added, the fee was increased by 5.37¢ for such revenue miles, or one-half the rate then applicable to the base mileage, in recognition of the additional services being performed as a result of the increased mileage. In the year 1946 the fees were paid by adopting the same total figure paid in 1945.

While the parent companies have continued to render services under the same categories as before and in general have made the same type of facilities available, the sub- [fol. 2142] stantial changes in Panagra's operations* since the date of the first rate case have long required a re-examination of the basis for payment and the amount thereof. This reexamination was deferred due to war conditions and preoccupation with operational problems. The basis which has now been determined upon becomes effective January 1, 1947. Not only does the new arrangement place the basis of payment on a sounder business basis, but it reflects the increased services being performed for Panagra by the parent companies as a result of the expansion of Panagra's operations in all departments.

The payments by Panagra to both Pan American and Grace may be conveniently discussed under two general

---

* In this connection attention is directed to Exhibit 1 of Supplement 1, submitted by Panagra on September 30, 1947, in support of its current rate petition. These figures show that since the approximate date of the first rate case, when the amount of the payment for management fees which has since been in effect was determined, Panagra's total miles flown have increased 130% and its total commercial revenues 303%. The increased volume of passenger activity is reflected in the 319% increase for seat miles available, the 272% increase for passenger miles flown, the 180% increase for revenue passengers carried and the very substantial increase of 353% in passenger revenues. Comparable increases in the freight and express category are also reflected. Available ton miles increased 344% and the tons of freight and express carried increased 561%, while freight and express revenues increased 284%.

headings: (a) commissions on sales, and (b) payment for services other than sales.

[fol. 2143] COMMISSIONS ON SALES

The commission basis established follows the schedule of commissions agreed upon at the IATA Convention in Rio de Janeiro, now before the Board for approval.

In accordance with the IATA scale, Panagra will pay a 10% commission on passenger sales and 7½% commission on air express and cargo sales to both Pan American and Grace for their services as General Sales Agents. Where sales are made by sub-agents they will receive 7½% and 5% respectively and the General Agents will receive 2½%.

Panagra has always used Pan American as its General Sales Agent in the United States and elsewhere except where Panagra operates. In South America the arrangements between Panagra and Grace have varied from time to time. Grace has always been the General Sales Agent in all countries where Panagra operates in South America except Argentina. It has supervised the sales activities in all such countries and, at most points, has operated the actual sales offices. Lima and Santiago sales offices, however, have been currently operated by Panagra under Grace supervision.

The present arrangement contemplates that Panagra will not operate any sales offices for its own account. Pan [fol. 2144] American will continue to handle Panagra sales in all parts of the world except where Panagra operates, and Grace will act as Panagra's General Sales Agent in all countries where Panagra operates except the Argentine, where the sales of both Pan American and Panagra are conducted by Compania de Aviacion Pan American Argentina, S.A. As such agents, Pan American and Grace will be responsible to Panagra for the proper and efficient performance of their functions, in accordance with the usual General Sales Agency arrangements.

In the past Panagra has compensated the parent companies for their sales services only partially and through

the lump sum payment, computed on a mileage basis as described above, made to each of them at the end of the year. This payment has included compensation not only for sales, but for all other services as well. While the lump sum has not substantially increased, all services, and particularly the sales services, have increased. The result is that the method of payment has proved increasingly inadequate and unsatisfactory.

Panagra believes that the urgent necessity of promoting and developing new business will best be served by adopting the accepted and proven commercial practice of compensating the company's Sales Agents in relation to their sales, that is, by the payments of sales commissions. Thus [fol. 2145] the sales organizations of the parent companies will have an adequate incentive to develop business, at no cost to Panagra other than the normal going rate of sale commission.

Both Pan American and Grace have the necessary facilities and personnel to fulfill their obligations as General Agents. This is best shown by past experience. The sales offices and their facilities made available by Pan American were described at some length in the hearings on the Through Flight Agreement, and Pan American's obligations are established by explicit provisions of the Agreement. Grace has facilities for generating and servicing traffic in Panama, Colombia, Ecuador, Peru, Bolivia and Chile. It has actually been handling Panagra traffic sales at various points in these countries since Panagra began business. Under this new arrangement Grace handles sales directly. Sales will be handled at the main and branch offices of Grace in each country along the West Coast and Grace will, where necessary, organize and supervise activities of special sales offices.

As a natural corollary of the new basis of compensation to Grace for its traffic services, Grace is required to assume full liability for the regular sales promotion and traffic expenses incurred in the South American countries where it will act as Sales Agent. Under the arrangements heretofore in effect, Panagra incurred and reimbursed Grace

[fol. 2146] for heavy sales expenses at specific points, notably Santiago and Lima. All expenses applicable to the traffic organization must now be borne by Grace, and a preliminary analysis of the accounts indicates that they total $394,000 in round figures on an annual basis. Panagra will be relieved of this expense. The net adjustment will be somewhat less than this figure as in taking over responsibility for the Lima and Santiago traffic offices commissions earned at these points as a result of traffic sold over other lines will accrue to Grace. These commissions for the year 1947 amount to approximately $116,000 making Panagra's net adjustment about $278,000.

The annual amount payable on sales commissions to Pan American and Grace will, of course, vary with the amount of business done in every year. For 1947 the estimated commissions are Pan American $214,000 and Grace $509,000.

PAYMENTS FOR OTHER SERVICES

Pan American

The other services performed for Panagra by Pan American are rendered principally through the System general and administrative organization and the purchasing and shipping organization. The nature of these services has been fully described in material previously submitted to [fol. 2147] the Board (*Statement of Evidence*, Dockets Nos. 623 and 716), so that no detailed discussion is necessary here. While there have been organizational changes to meet changing conditions, and while the extent of the services rendered by some departments of the Pan American organization vary from year to year, as Panagra's needs requir the general character of the services rendered remains the same.

Panagra has available to it the experience of the entire System organization of Pan American and can call upon any part of this organization for services at any time. The services rendered include a great variety which can be classified generally as traffic (other than sales, which have been dealt with above); purchasing and shipping; engi-

neering and communications; financial, including accounting, tax and insurance phases; public relations; legal; personnel and industrial relations; and liaison with Government and other official bodies.

In view of Pan American's history and the extent of its operations in the field of international aviation, the experience of its organization is unique. The value to Panagra of having such an organization fully available to it is extremely great. This not only saves Panagra the expense of developing and maintaining such an organization for itself, but it also offers to Panagra a much larger and more experienced organization than it could possibly afford otherwise. Panagra is thus enable to keep abreast of developments in all branches of the industry and to [fol. 2148] obtain at all times the benefits of the services and experience of a large and well-equipped organization.

The availability of all branches of the Pan American organization, even though some may not be required by Panagra at all times, is one of the great advantages to Panagra of the arrangement. At the same time, the actual use made of the organization during any period is one criterion of value. It was recognized that, in determining the amount of compensation for the services, different considerations would apply to different types of services. In general, they fall into two classes. One includes the purchasing and shipping services which are directly related to the volume of purchases and shipments and can therefore be compensated on a commission basis as is done in the case of sales. This is not possible in the case of the other services which have to be considered on a different basis.

Pan American has been making purchases of all types of equipment, materials and supplies for Panagra for many years. These purchasing services have been rendered primarily in the United States where the great volume of the items used by Panagra is acquired. The Pan American purchasing department renders these services not only for Pan American but for the various companies associated with Pan American, and accordingly has a wide experience and knowledge of sources of supply. Panagra also obtains

[fol. 2149] the benefit of quantity discounts which are available to Pan American. In more recent years Pan American has also rendered forwarding services. Because of the difficulties of obtaining shipping space and the many governmental and other restrictions which arose during the war, Pan American established an organization to handle all arrangements with steamship companies, as well as to handle related governmental licenses and permits. This department is equipped to perform all services usually performed by shipping brokers.

In the past, these purchasing and forwarding services were compensated through the lump sum fee paid by Panagra. Because of the substantial volume of purchases made in the United States for Panagra, this method of payment had little relationship to the services rendered. Such services are normally performed on a percentage or commission basis and it has now been agreed that such a basis will be followed. Panagra will pay Pan American a commission equal to 2½% of the price of aircraft and engines, and 5% of the price of other equipment, materials and supplies purchased for its account by Pan American. Panagra will also pay a 2½% commission on the United States base price of gasoline and oil furnished to Panagra under contracts negotiated by Pan American for Panagra in the United States. The forwarding commission will be equal to 2½% of the price of the materials shipped in respect of [fol. 2150] which Pan American acts as a shipping broker. These commission rates are the same as those established in arrangements with other companies covering similar services. It is estimated that, upon the basis of the purchases and shipments made during the first nine months of 1947, these commissions for the year 1947 will amount to $122,000.

The determination of the payment for the remainder of the services rendered by Pan American presents a somewhat more difficult problem. No time cards are kept by the personnel who render the services, nor would they be practicable. Moreover, the value of the services could not be measured solely in terms of time devoted to rendering

them since this would not properly compensate for experience brought to the problem. Also, many of the activities of Pan American's organization result in benefits to Panagra even though these activities may not be directed primarily or exclusively toward that end. For example, engineering studies and traffic, legal and accounting studies and forms prepared by Pan American benefit Panagra even though they are not designed primarily for Panagra. This may be true even though the particular study or form may not be used in its entirety by Panagra but is used only for information or as a model by them. It is therefore impossible to determine the value of Pan American's services on a piecework or job order basis, even if this [fol. 2151] were otherwise practicable. Accordingly, it has been agreed that Panagra and Pan American will review the situation periodically for the purpose of allocating to Panagra an appropriate share of the cost of the services made available by Pan American. Such allocation is to be based upon the experience and judgment as to the services made available and the benefits obtained from them. In this manner it has been agreed that the payment for the years 1947 and 1948 is to be $115,000 per year.

In arriving at this figure the Pan American expenses for 1946, the latest full year for which figures were available, were carefully analyzed and weighed in light of the benefits received by Panagra from the various departments. It was realized that some departments or offices either rendered no service to Panagra or rendered service of such limited extent or of such nature that it would not be feasible to consider them for this purpose. The expenses of such departments and offices were excluded for the purpose of the allocation. Likewise, the sales, purchasing and shipping expenses were excluded since they are compensated for by the sales, purchasing and shipping commissions. The remaining expenses were allocated to Panagra in varying amounts depending upon the value to Panagra of the services which they represent. The greatest weight was given to the expenses of those departments which render substantially the same service to Panagra as they do to Pan [fol. 2152] American. For example, the expenses of the

Traffic Department, other than those which are considered allocable to sales functions, were placed in this category. This department prepares and files tariffs and schedules for Panagra just as for Pan American. The expenses of the Pan American Washington office were similarly treated, since this office handles routine contact with Government departments for Panagra as well as for Pan American, billing and collection of mail accounts being among the most important services performed. At the other extreme were the expenses of those departments whose services to Panagra were considered to be nominal. Between these two categories were found departments which render services in varying degrees to Panagra. For example, the Public Relations Department performs services for Panagra but because of the intangible benefit of direct contact in this type of work Panagra was considered to receive a somewhat lesser benefit from the Department's activities than is received by Pan American. This was given due consideration in the allocation. Still other departments render important service to Panagra but devote their activities primarily to Pan American's own operations. For example, many activities of the Legal Department relate solely to Pan American's business. Nevertheless, it is avail-
[fol. 2153] able to serve Panagra. Not only is advice given on specific Panagra problems but many of the forms, particularly traffic forms, prepared by the department are available to and are used by Panagra. Appropriate weight was given to this in the allocation. Finally, the general office expenses which are not assigned to particular departments were allocated to Panagra on the same basis as the expenses of the departments. In this way the parties arrived at a figure which represented a share of the expenses considered to be commensurate with the benefits received by Panagra.

The same type of review will be made periodically to determine the proper amount of compensation. The basis will remain the same but the groups of expenses may be reclassified for the purposes of the allocation in order to give due weight to any change in the value of the services to Panagra.

Grace

The payment which Panagra will make to Grace for other services will cover all non-traffic services rendered by Grace in South America and in New York.

The nature of the Grace non-traffic services in South America has been fully described in earlier material submitted to the Board (*Statement of Evidence*, Dockets Nos. [fol. 2154] 623 and 716) and it is not felt that any detailed discussion is necessary here. Grace has a well integrated and thoroughly trained business organization in each of the five South American countries and in the Canal Zone where it serves Panagra. In addition to offices in each of the capitals it has branches in other important cities of the countries concerned. In Peru these branch offices number 15 and in Chile 10. In each country its organization is headed by a national of that country thoroughly acquainted with both governmental and commercial conditions who is available to Panagra for advice and assistance. Labor relations assistance by Grace has been particularly extensive in Peru, Bolivia and Chile in recent years. The Grace organization also includes legal, financial and commercial staffs, whose specialized experience is on call to Panagra.

The work performed for Panagra varies from year to year and country by country, depending on the special governmental or business problems confronting Panagra at the time. Because of the nature of the services it is impossible to define the precise scope of Grace's activities on behalf of Panagra in advance or to fix in advance the amount of the fee which will be required to compensate for such services. The value of the relationship lies in the availability to Panagra at a moment's notice of an extensive and experienced organization with contacts and know- [fol. 2155] how any part of which can be and is constantly availed of to solve the immediate problem in hand. The Grace organization has made a substantial contribution to the development and maintenance of Panagra's services, and it continues to be of immeasurable assistance in aiding Panagra to meet changing legal, political and competitive conditions, aggravated as they are by increasingly difficult exchange and labor problems.

With these considerations in mind Grace and Panagra have sought to work out a basis of payment which will facilitate the accounting between them and keep payments at the minimum consonant with the services rendered. After discussions between the parties it has been determined that the amount to be paid to Grace for non-traffic services shall be determined periodically in the light of the services actually performed, and that Grace will receive no profit for such services but merely be reimbursed for expenses actually incurred on Panagra's behalf.

In estimating the amount to be paid Grace for non-traffic service in South America, certain calculations must be made. Grace maintains separate books of account for its houses in each country. Since the services performed for Panagra by Grace vary from country to country, it is necessary to prepare the computations on a country to country basis. This involves examination of the Grace records for the [fol. 2156] houses in Panama, Colombia, Ecuador, Peru, Bolivia and Chile. In the case of each country, the expenses incurred on behalf of Panagra fall under two separate categories—direct and indirect. Direct expenses are out-of-pocket payments made by Grace in the conduct of Panagra business other than traffic promotion and sales. The indirect expenses represent Panagra's allocable portion of the general expense of the Grace organization in each country.

Direct expenses include items such as cables, telephone expense, stationery, postage, travelling expenses, salaries of executive, accounting and other clerical personnel working full time on Panagra matters. These are all expenses which would not have been incurred by Grace if Grace had not undertaken to perform the non-traffic services in question for Panagra, and inasmuch as they are direct out-of-pocket expenses, reimbursement is naturally in order. The estimated direct out-of-pocket expenses for non-traffic services by the various Grace houses in South America for the year 1947, based on actual experience for the first eight months of 1947, are set forth on an attached Schedule.

Indirect expenses include such matters as a proportion of the salaries of managerial personnel devoting a portion

of their time to Panagra, and a proportion of rent, build-
[fol. 2157] ing maintenance charges, salaries of clerical personnel working only part time on Panagra matters, and legal expenses, etc. They include also a proportion of departmental expenses of departments handling Panagra's business, including their cashier's, credit and collection departments. The non-traffic activities of the Grace organization in each country served by Panagra have been separately examined in detail and a proration made of these indirect expenses for activities common to Panagra and other Grace activities. The basis of allocation varies in each country, depending upon the extent of Panagra activities in that country and the relationship of those activities to other Grace interests. The various allocations are made on different bases, depending upon the nature of the account involved. Items such as rent and building are mathematically allocable on a square foot or comparable basis. Salaries of persons working part time on Panagra matters are allocable on the basis of individual time estimates. Legal and other special expenses can be determined on the basis of actual billings and time prorations. Whatever basis is used, this will be subject to Panagra's check each year, and its representatives are in a position to know in detail the nature of the services performed and the work [fol. 2158] involved. The estimated indirect expenses for each Grace house in each country served by Panagra for the year 1947 are set forth in an attached schedule.

From the above description of the non-traffic services rendered by Grace in the countries named, and from the very nature of the expenses listed, it is clear that Panagra's only alternative to the arrangement now in effect would be to establish its own integrated organization in each country. This would mean that Panagra would have to find and compensate top management of high caliber, experts on conditions in each country, and organize and maintain credit, collection, cashier's, accounting, cable and other departments, and find or build its own office space. It is not overstating the case to emphasize, in the first place, that the caliber of managerial talent in each of the countries concerned now available to Panagra in the Grace

organization, made possible by the extensive scope of the Grace business as a whole, could not be secured by Panagra working alone because Panagra alone could not afford to pay the compensation necessary to secure managerial talent of this type; and in the second place, that the expense of setting up and maintaining its own independent organization, even of the inferior type it could afford, would result in a far greater cost than that now proposed as compensation to Grace.

[fol. 2159] A variety of non-traffic services is performed by Grace for Panagra in New York.

Foremost are the services of Mr. Harold J. Roig, who has been Panagra's president since 1939, and who receives no compensation from Panagra. While Mr. Roig has other important duties which he performs as an officer of W. R. Grace & Co., he devotes a very substantial part of his time to Panagra matters and is in executive charge of the company's affairs. For substantial periods of time, particularly on his frequent visits to South America, he is concerned full time with Panagra problems.

Through its publication the "Grace Log" and other means, the Grace New York office provides publicity for the Panagra services. Through its Legal Department it provides legal and tax services. Through its experienced officers and staff it advises and assists on many problems arising from time to time requiring South American and other specialized knowledge and experience.

Grace (New York) handles all Panagra cables to and from South America, making available for Panagra's use its private codes, and including coding, decoding, transmittal and delivery of all Panagra cables. A pro rata share of the expense of the cable department is included in the amount charged for New York services on a cost basis.

[fol. 2160] Grace also assists Panagra in arranging transportation for Panagra personnel and their families, both in the United States and to and from South America. This department assists in securing passports and visas, makes reservations on connecting carriers, secures hotel accom-

modations and performs other necessary related services. It also performs various special services for certain Panagra passengers, who by reason of their official position, or other considerations such as health, are given personalized attention as a means of promoting good will for the company. A pro rata proportion of the expense of Grace's transportation department is included on a cost basis.

A proportion of the Grace Medical Department expense is also allocated to Panagra on a similar basis. The Grace Medical Department provides free medical check-up and care for Panagra personnel based in the New York area and their immediate relatives where requested, including the care of a dentist and an oculist.

March 3, 1948.

[fol. 2161] *Summary*

The following statement shows the estimated amounts payable for 1947 for services based on commissions and reimbursement of expenses under the several headings above referred to:

PAA		
Commissions on Traffic Sales Commissions on Purchases)	$214,000	
Commissions on Forwarding)	122,000	
Reimbursement Expenses	115,000.	
TOTAL		$ 415,000
GRACE		
Commissions on Traffic Sales	509,000	
Reimbursement Expenses:		
South America		
Direct (See Schedule)	81,630	
Indirect (See Schedule)	99,968	
New York	66,000	
TOTAL		756,598
TOTAL		$1,207,598
Less net saving (page 7)		278,000
		929,598
In the estimates originally filed the total payable to both companies was estimated at		720,000
Leaving an amount required in excess of the original estimate in order to carry out the revised basis above described.		$ 209,598

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 44

CONFORMED COPY

(Letterhead of Pan American World Airways System, New York, N. Y.)

July 14, 1948

Pan American-Grace Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

Dear Sirs:

This letter, when accepted by you, will constitute the agreement between us with reference to the following matters:

1. Upon request in writing from you, we will use our best efforts to purchase, lease or otherwise acquire, and to ship or cause to be shipped to the point designated by you, such flight or other equipment, machinery, tools, materials, supplies, gasoline, oil and other goods as you shall designate. Such requests need not be in any particular form but may be in the form of requisition or purchase requests, or may be contained in letters, memoranda, radiograms, cables or other communications. In the event that you furnish us with a list of persons authorized to issue such request, we will honor requests signed or issued, or purporting to have been signed or issued, by those, and only those, persons named therein. In the event that no such list is furnished to us, we shall be authorized to honor requests by any officer of your company. It is understood that the requests herein contemplated shall include such arrangements as may have existed from time to time between us for the purchase of flight equipment spare parts and assemblies for your flight equipment of a type different from any of our flight equipment, but that subsequent to the date hereof the requests herein contemplated with respect to such equipment shall include only those having written approval by

[Handwritten marginal notation – 11-1506 – Agreement.]

an officer of Panagra or by an employee designated in writing for the purpose by an officer of Panagra.

2. All of the purchasing and shipping facilities of our Services of Supply will be available for your use. We will furnish you, upon request, with such advice and assistance with reference to purchasing and shipping as are available through that service, which shall include, but not be limited to, advice as to sources of supplies and shipping facilities, assistance in clearance and meeting other governmental requirements, and other similar advice and assistance. It is understood that in making the foregoing services available to you we shall use our best efforts to make all action conform with action in similar cases for our own account, but that we shall not be responsible for any loss that you may incur by reason of your reliance upon advice from us or otherwise in connection with such services, unless caused by our gross negligence or wilful misconduct.

[fol. 2164] 3. All action taken by us pursuant to this agreement shall be in accordance with your instructions, and in the absence of specific instructions we shall be authorized to use our discretion as to vendors, terms of purchase or lease, shippers, routes, terms of shipping contract, insurance and all other matters relating to the carrying out of your requests hereunder.

4. The services under this agreement will, for the most part, be rendered in the United States where our principal purchasing and shipping facilities are located, but any such facilities which we may have available in any other part of the world are also covered by this agreement, and may be utilized by you hereunder.

5. For the foregoing services, you will pay as amounts calculated in the following manner:

(a) 2½% of the vendor's invoice price of aircraft and aircraft engines purchased by us at your request and for your account;

(b) 2½% of the United States base price of gasoline and oil furnished to you under contracts negotiated by us for you at your request in the United States or pur-

chased for you by us at your request in the United States;

(c) 5% of the vendor's invoice price of other equipment, machinery, tools, supplies and other goods, including spare parts for aircraft and engines, purchased by us at your request and for your account;

(d) 2½% of the vendor's invoice price of property included in any shipment in respect of which we act as forwarding agent for you at your request;

(e) For the purposes of this agreement, the vendor's invoice price shall be deemed to be the net total amount shown on the vendor's invoice, less any trade discounts, including any transportation or other charges prepaid by the vendor and included in the invoice in respect of the property to which they relate;

(f) In the case of equipment leased by us for your account, the foregoing payments shall be calculated on the basis of the rentals payable, instead of the invoice price;

(g) None of the amounts provided for in subparagraphs (a), (b) and (c) of this paragraph 5 shall be payable with respect to the DC-6 aircraft or DC-6 spare engines ordered for you prior to January 1, 1947.

[fol. 2165] 6. The foregoing payments will cover all routine services of the type referred to which are performed under this agreement. Any out-of-pocket expenses incurred by us in connection with any special services requested by you in writing, beyond the purchasing and shipping services normally rendered by us, such as special inspection trips, shall be for your account. All costs and expenses of transportation, delivery, insurance, royalties, taxes, duties or other similar charges, as well as the purchase price or rent, relating to property acquired or shipped for you pursuant to this agreement shall be for your account.

7. The payments to be made by you under this agreement will be made in the following manner. A separate open account will be established between us in which all amounts

payable by you hereunder will be recorded as soon as practicable after the acquisition of the property to which they relate or, in the case of leases, after the rent on which the payment is calculated is due. Such amounts will be recorded and payable in the currency in which the obligation with respect to such property or lease was incurred by us. Promptly after the execution of this agreement, you will deposit with us $50,000.00, or a larger sum if you so desire, which will be recorded in said open account and will constitute a revolving fund to be used in settling accounts with vendors, lessors or shippers relating to property acquired for you. You will reimburse us promptly upon submission of invoices for any payments made by us, or any other amounts due to us, hereunder. We shall not be required to keep any deposits or payments made by you segregated from our own funds. Unless you instruct us to the contrary, we will settle the accounts with vendors, lessors or shippers. Any cash discount with respect to property ordered for you will be credited to you in case the net balance in such open account at the time the payment for such property is due shall be in your favor in an amount sufficient to make such payment, regardless of whether or not we shall receive such discount, except in those cases where we do not receive such discount because of dispute with the vendor regarding the invoice, or other similar reason.

8. It is understood that, in taking any action pursuant to the foregoing provisions of this agreement, we shall be acting only as agent for you and you will reimburse us for any payments made by us, indemnify us for all losses which we may incur, and hold us harmless from and against all claims of every nature, including costs and expenses, incurred in connection therewith, which shall be asserted against us, by reason of any action taken by us pursuant to this agreement.

9. In addition to the foregoing, we agree to sell you at your request any parts, equipment, materials or supplies which we shall have on hand in warehouses or other storage points where, in our opinion, there are sufficient stocks available to permit such sales. Except as hereinafter pro-

vided in this paragraph 9, the price payable by you for any such parts, equipment, materials or supplies purchased by you shall be the current net replacement cost at the vendor's point of shipment. In case such parts, equip- [fol. 2166] ment, materials or supplies shall be furnished at your request from stocks at points other than those in respect of which you share regularly in our shop burden expense through charges for maintenance, repair or overhaul of aircraft or engines, the price payable by you shall be the current net replacement cost at the vendor's point of shipment, plus 20% of such costs to cover handling, storage and transportation charges incurred by us. All charges incurred prior to the sale to you in connection with the property referred to in this paragraph 9 shall be absorbed by us, and all charges, including the cost of transportation and insurance and, if forwarding services are requested by you, our 2½% shipping commission, incurred subsequent to the sale shall be for your account. The foregoing prices and charges shall not apply to any item listed as surplus on any list of surplus inventory which we may distribute, but the price, terms and conditions of sale thereof shall be as indicated on such list in effect on the date your order is placed. Payment for any property sold to you pursuant to this paragraph 9 will be made in the manner set forth in paragraph 7, such payment to be recorded in the open account referred to in paragraph 7 as soon as practicable after the property is sold to you.

10. You shall have the risk of loss of any property acquired for you at your request pursuant to this agreement. In the case of property sold to you from our own stocks, you shall have the risk of loss commencing at the time of sale which, unless otherwise agreed, shall be the time the property is selected and set aside for shipment or delivery to you.

11. It is understood that we make no representations or warranties with respect to any property acquired for or sold to you pursuant to this agreement, and that we shall not be responsible for defects of character whatsoever in any such property; provided, however, that the services to be performed hereunder shall include routine action

under manufacturer's warranties normally performed by our purchasing and shipping organization.

12. All action taken pursuant to this agreement shall be subject to any applicable laws and regulations of any government or governmental body having jurisdiction and neither party shall be required to take any action which shall be contrary to any such laws or regulations.

13. Any notice, request or instruction which you are required to give or which you may give hereunder must be given in writing and signed by an officer of your company or by an employee designated in writing by an officer of your company.

14. This agreement shall be effective as of January 1, 1948 and, except as otherwise expressly provided herein, shall cover all requisitions and other requests issued by you on or after that date. This agreement shall continue in [fol. 2167] effect until May 5, 1950, and thereafter until cancelled by either party upon six months' written notice to the other.

If the foregoing correctly states our understanding, will you kindly sign and return to us the enclosed copy of this letter.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.

By /s/ F. GLEDHILL
Vice-President

ACCEPTED: July 14, 1948

PAN AMERICAN-GRACE AIRWAYS, INC.

By /s/ G. VIDAL
Vice-President

[fol. 2168]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 45.

THIS ORIGINAL IS NOT TO BE REMOVED FROM PAN AMERICAN AIRWAYS SYSTEM CONTRACT FILE

MEMORANDUM AGREEMENT REGARDING SERVICES RENDERED AND TO BE RENDERED TO PANAGRA BY THE PARENT COMPANIES AND COMPENSATION THEREFOR

This memorandum sets forth the understanding between Pan American-Grace Airways, Inc. (herein called "Panagra"), Pan American Airways, Inc., (herein called "Pan American"), and W. R. Grace & Co., (herein called "Grace"), regarding certain services to be performed, the method of determining compensation for such services and the amount to be paid for certain of such services for 1947-1948.

1. Pan American shall continue to act as General Sales Agent for Panagra throughout the world except in Argentina, Bolivia, Canal Zone, Chile, Colombia, Ecuador, Peru and Panama City. Pan American may, as to any territory for which it acts as such General Sales Agent except the United States, designate one of its affiliated carriers* or any other concern to act as General Sales Agent for Panagra. Pan American shall continue to be responsible to Panagra for acts of any affiliated carrier or concern so designated. Whenever Pan American shall make such [fol. 2169] designation of an affiliated carrier for any portion of the Western Hemisphere, it shall first obtain the advance written approval of the President of Panagra and shall terminate such designation whenever the President of Panagra shall so request on ninety days' written notice.

* This term, to be specifically defined in the General Traffic and Sales Agency Agreement between Pan American and Panagra, is limited to those companies engaged in the transportation of passengers, mail, express or cargo by air in which Pan American, or any company owning a majority of the capital stock of Pan American, owns a stock interest.

If the President of Panagra fails to approve such a designation or requests the termination thereof, Panagra will at the written request of Pan American release Pan American from its obligations to act as General Sales Agent for that part of the Western Hemisphere covered by such designation and will execute appropriate amendments to the Through-Flight Agreement reflecting such release.

2. Panagra shall act as General Sales Agent in Ecuador, Peru, Bolivia and Chile for Pan American and for each of Pan American's affiliated carriers in those of said countries for which said affiliated carrier shall have at the time appointed Pan American and its affiliated carriers general sales agent, except that it shall not so act for Avianca in Ecuador. Panagra may at any time on ninety days' written notice ~~decline~~ decline to act for any affiliated carrier in one or more of the countries for which it is General Sales Agent. In the event the president of Panagra fails [fol. 2170] to approve or requests termination of the designation of an affiliated carrier of Pan American under paragraph 1 above, then that affiliated carrier may on ninety days' written notice discontinue Panagra as its general sales agent in any of said countries. Panagra shall delegate to Grace its full responsibility for the performance of this general sales agency, and Grace shall hold Panagra harmless for the performance of Panagra's obligations to Pan American and its affiliated carriers. Panagra shall continue to be responsible to Pan American and its affiliated carriers for acts of Grace pursuant to such delegation and such delegation shall not constitute Grace a sub-agent.

3. Grace shall continue to act as General Sales Agent for Panagra in Panama City, Canal Zone, Colombia, Ecuador, Peru, Bolivia and Chile and shall be responsible to Panagra for carrying out of all Panagra's obligations arising from the appointment of Panagra as General Sales Agent by Pan American and its affiliated carriers as specified in paragraph 2 above.

4. (a) For services rendered as General Sales Agents, in accordance with the foregoing paragraphs 1, 2, and 3,

[fol. 2171] commissions shall be paid at the following rates, namely, a 10% commission on all passenger traffic, including excess baggage, and 7½% commission on all cargo and express traffic sold; and in addition Panagra may at its discretion pay to Grace for handling or other service a 5% commission on its revenues from incoming cargo and express on shipments on which Panagra determines such payment to be justified. Where sales are made by a sub-agent, the General Sales Agent shall be entitled to retain an overriding commission of 2½%. These commissions shall be payable commencing January 1, 1948. No other compensation shall be paid for the services rendered by Panagra, Grace or Pan American as such General Sales Agents except to the extent specifically provided herein or in any General Sales Agency Agreement.

(b) Panagra shall turn over to Grace the full amount of all General Sales Agent commissions paid to it by Pan American and its affiliated carriers and the full amount of any other sales commissions paid to Panagra under interline agreements or otherwise resulting from traffic sold by Grace as General Sales Agent for Panagra.

(c) In connection with the assumption by Grace of responsibilities as General Sales Agent at various points, particularly Lima and Santiago, Panagra will discontinue [fol. 2172] its existing general selling activities at these points. Certain expenses incurred by Panagra at the above and other points in 1947, as set forth in more detail in Annex A attached, shall be assumed by Grace. Grace shall assume the similar expenses incurred by Panagra in 1948.

5. General Sales agency agreements covering the understandings recorded in paragraphs 1 to 4 inclusive of this memorandum and otherwise describing and clarifying the obligations of the parties will be prepared promptly. Nothing in such agreements shall relieve Pan American of any obligation to Panagra already assumed under the Through Flight Agreement; provided, however, that the said agreement shall be modified in the event of the contingency specified in paragraph 1 hereof.

6. Pan American will continue to render purchasing and shipping services to Panagra. Panagra will enter into

a formal purchasing and shipping agreement with Pan American as of January 1, 1948, under which Panagra will pay to Pan American the following commissions on equipment, materials and supplies specifically ordered by Panagra and purchased for Panagra by Pan American:

(a) 2½% of the vendor's invoice price of aircraft and aircraft engines;

[fol. 2173] (b) 2½% of the United States base price of gasoline and oil furnished under contracts negotiated by Pan American in the United States or purchased for Panagra by Pan American in the United States;

(c) 5% of the vendor's invoice price of other equipment, machinery, tools, supplies and other goods, including spare parts for aircraft and engines, purchased;

(d) 2½% of the vendor's invoice price of property included in any shipment in respect of which Pan American acts as forwarding agent at Panagra's request.

None of the amounts provided for in subparagraphs (a), (b) and (c) of this paragraph 6 shall be payable with respect to the DC-6 aircraft or DC-6 spare engines ordered for Panagra prior to January 1, 1947.

7. In addition to the foregoing purchasing services, Pan American agrees to sell to Panagra at Panagra's request any parts, equipment, materials or supplies which Pan American shall have on hand in warehouses or other storage points where, in Pan American's opinion, there are sufficient stocks available to permit such sales. Except as hereinafter provided, the price payable by Panagra for [fol. 2174] any such parts, equipment, materials or supplies purchased by Panagra shall be the current net replacement cost at the vendor's point of shipment. In case such parts, equipment, materials or supplies shall be furnished at Panagra's request from stocks at points other than those in respect of which Panagra shares regularly in Pan American's shop burden expense through charges for maintenance, repair or overhaul of aircraft or engines, the price payable by Panagra shall be the current net replacement cost at the vendor's point of shipment, plus 20% of such

cost to cover handling, storage and transportation charges incurred by Pan American. All charges incurred prior to the sale to Panagra in connection with the property referred to in this paragraph 7 shall be absorbed by Pan American, and all charges, including the cost of transportation and insurance and, if forwarding services are requested by Panagra, Pan American's 2½% shipping commission, incurred subsequent to the sale shall be for Panagra's account. The foregoing prices and charges shall not apply to any item listed as surplus on any list of surplus inventory which Pan American may distribute, but the price, terms and conditions of sale thereof shall be as indicated on such list in effect on the date Panagra's order [fol. 2175] is placed.

8. In addition to the sales, purchasing and shipping services provided for above, Pan American will continue to make available to Panagra the services and facilities of its general and administrative organization in New York. Grace will continue to make available to Panagra the services and facilities of its entire organization both in the United States and in South America. The nature of the services which the companies will render Panagra is more fully described in the attached memorandum entitled "Payment to Parent Companies for Services", dated March 3, 1948. In order that Panagra may obtain the fullest advantage of the availability of these services and facilities, it is agreed that Panagra may from time to time indicate in writing to Pan American and Grace the precise type of available services, facilities, information and consultation desired, and Pan American and Grace agree that they will use their best efforts to provide service to Panagra of the type and character specified and in the manner so indicated.

Panagra agrees to credit Pan American and Grace as full compensation for services rendered by such companies to Panagra during 1947 with $522,075.- and $853,415.-, of which $148,043.- represents sales commissions paid or payable by Pan American and its affiliated carriers through Panagra, respectively, less amounts heretofore paid on [fol. 2176] account of such services to Pan American and

Grace respectively in respect of 1947 and, in the case of Grace less expenses assumed by Grace hereunder amounting to $393,947.-. These amounts were computed in accordance with the said memorandum entitled "Payments to Parent Companies for Services", and cover the services referred to therein. The foregoing amounts do not include sales commissions paid or payable by Panagra to foreign affiliates of Pan American; nor do they include sales commissions paid to sub-agents.

For services referred to above to be furnished during the year 1948, excluding services as General Sales Agent and services of Pan American covered by paragraph 6 of this memorandum, which are to be compensated on the commission basis herein described, Panagra agrees to pay Pan American $115,000.- and to pay Grace $251,976.-

The amount payable to Grace and Pan American for years subsequent to 1948 for services other than sales, purchasing and forwarding for which specific commissions are provided, will be determined in the manner described in the memorandum entitled "Payments to Parent Companies for Services", dated March 3, 1948, and an effort will be made to agree upon the amounts payable for each year as promptly as possible after the beginning of such [fol. 2177] year. It is understood that while Pan American and Panagra each maintains separate general offices in New York for its own account, certain office functions such as telephone switchboard and mail handling are now pooled and will continue to be pooled for convenience, and the payment herein provided for covers Panagra's full share of such pooled services. In accordance with past practice, Pan American shall continue to charge Panagra with out-of-pocket expenses, such as postage, specifically incurred at the request of Panagra and resulting from such pooled services. Long distance telephone calls made by Panagra through Pan American's switchboard, except calls made over existing tie lines with Washington or other tie lines not charged by Pan American directly to its divisions shall be charged to Panagra.

In accordance with past practice, Grace shall continue to charge Panagra with out-of-pocket expenses incurred at

the request of Panagra by the Grace offices in New York and Washington, such as postage, the cost of cables, long distance telephone calls, travel expenses and the medical examination of Panagra employees assigned for service abroad.

9. Pan American shall continue to print and file Panagra's schedules and tariffs and to print and distribute [fol. 2178] timetables, tickets and similar traffic documents as Panagra shall request in writing from time to time, and shall receive no compensation for such services but shall be reimbursed by Panagra for Panagra's appropriate share of all out-of-pocket expenses incurred in connection therewith in accordance with past practice.

10. Pan American will cause its subsidiary Compania Pan American Argentina, S. A. to continue to render sales and other services jointly to Panagra and Pan American in Argentina, and the same method for determining joint basis of reimbursement of Compania Pan American Argentina, S.A. as is now in effect will continue and will be applied in light of conditions existing from time to time. Pan American shall regularly consult with Panagra regarding the joint activities of Compania de Aviacion Pan American Argentina, S.A. and with particular reference to sales policies, personnel, the annual budget, advertising programs and expenditures, subject to joint reimbursement.

11. To facilitate operation of all phases of this agreement, both immediate and long term, Grace and Pan American will each designate one of its officers stationed in the [fol. 2179] United States and authorize him to act for Grace or Pan American, as the case may be, in the resolution of any problems referred to him by Panagra's executive management which may arise under this arrangement and which have not promptly been solved to Panagra's satisfaction by the administrative sales or operating personnel immediately concerned.

12. This agreement shall in no respect alter or repeal any provision of the Through Flight Agreement; provided

however, that the said agreement shall be modified in the event of the contingency specified in paragraph 1 hereof.

13. This agreement shall remain in effect until May 5, 1950, and thereafter until terminated by any party hereto by six months' written notice to the other two parties. In the event of such termination, Pan American and Grace shall continue to make available to Panagra the services and facilities being provided at the date of the execution of this agreement, and Panagra shall continue to avail itself of such services and facilities and compensate therefore at amounts then to be determined.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 46

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

THIS AGREEMENT, made this tenth day of ~~August~~ September, 1948, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and PAN AMERICAN-GRACE AIRWAYS, INC., a corpo-

---

[Change in first paragraph initialed but illegible.]

ration organized and existing under the laws of the State of Delaware, hereinafter referred to as "Panagra":

WITNESSETH THAT, for and in consideration of the mutual covenants and agreements herein contained, Pan American and Panagra hereby agree as follows:

1. Pan American hereby appoints Panagra, and Panagra agrees to act as, General Traffic and Sales Agent in Bolivia, Chile, Ecuador and Peru for Pan American and its other affiliated carriers, except that Ecuador shall not be part of the territory in which Panagra shall act as such General Traffic and Sales Agent for AVIANCA nor shall any, or any part of any, of said countries specifically excluded in the designation of any of said affiliated carriers pursuant to paragraph 22 hereof, be a part of the territory in which Panagra acts as such General Traffic and Sales Agent for said affiliated carrier, the territory in which Panagra is hereby appointed to act as General Traffic and Sales Agent being hereinafter sometimes referred to as "Panagra General Agency Territory". As such General Traffic and Sales Agent, Panagra agrees that it will perform such services as may be appropriate to promote passenger, mail, express, and cargo traffic over the lines of Pan American and its affiliated carriers and to arrange for transportation of passengers, baggage, mail, express and cargo over such lines, including the furnishing of necessary personnel, office space, equipment and supplies and doing all other things appropriate to carry out the following activities:

(a) Solicitation and sale within the Panagra General Agency Territory of passenger, mail, express and cargo transportation for Pan American and its affili- [fol. 2181] ated carriers, including furnishing instructions to, and supervision of such solicitation and sale by, Panagra's General Sales Agents and sub-agents appointed in accordance with this Agreement;

(b) Performance of such acts and preparation and checking of such documents in the Panagra General Agency Territory as may be required for the transportation of passengers, baggage, mail, express and

[Change in paragraph 1 initialed but illegible.]

cargo and movement of aircraft over the lines of Pan American and its affiliated carriers, including the making of arrangements for the presence of such government officials as may be required in connection therewith.

(c) Checking such baggage of outgoing passengers at points in the Panagra General Agency Territory as is to be through checked from points served by Panagra to points served by Pan American or its affiliated carriers, it being understood that baggage of passengers traveling over the lines of Panagra and thence over the lines of Pan American or its affiliated carriers will be through checked by Panagra only if, and to the extent that, the parties shall expressly so agree; collecting for the account of Pan American and its affiliated carriers any excess baggage charges payable with respect to any baggage checked by Panagra for transportation over the lines of Pan American and its affiliated carriers; receiving and forwarding by carriers with which Pan American or Panagra has forwarding arrangements any trunks or other heavy baggage delivered to Panagra for that purpose by passengers traveling, or proposing to travel, over the lines of Pan American or its affiliated carriers, and collecting any charges payable therefor;

(d) Making arrangements in the Panagra General Agency Territory on behalf of such passengers for transportation to and from airport terminals and for hotel accommodations at points of call of Panagra, Pan American and its affiliated carriers and at other cities;

[fol. 2182] (e) Making reservations for and facilitating transportation over the lines of Pan American and its affiliated carriers and connecting carriers;

(f) Furnishing such advice and information as Pan American may from time to time request with respect to transportation formalities required by governments in the Panagra General Agency Territory pertaining to passengers, baggage, express and cargo moving over the lines of Panagra, Pan American, or its affiliated carriers;

(g) Distribution of such timetables, advertising materials and other information covering the services of Pan American and its affiliated carriers as Pan American may from time to time reasonably request;

(h) Maintaining and operating at points served by Panagra in the Panagra General Agency Territory centrally located sales offices for the sale of passenger, express and cargo transportation over the lines of Pan American and its affiliated carriers, which offices shall be staffed with competent traffic and sales personnel for the promotion and sale of passenger, mail, express and cargo transportation over the lines of Pan American and its affiliated carriers and for the handling of all matters pertaining thereto pursuant to this Agreement, it being contemplated that the entire sales organization of Panagra will be available to perform services pursuant to this Agreement, but nothing contained in this Agreement shall obligate Panagra to establish any new office or organization at any point not served by Panagra in order to render any service to Pan American.

(i) Publicizing, in the Panagra General Agency Territory, in such appropriate manner as Pan American shall request, that Panagra is the General Traffic and Sales Agent for Pan American and its affiliated carriers, which shall include, but not be limited to, appropriate statements to that effect in Panagra's [fol. 2183] advertising in the Panagra General Agency Territory relating to travel to the points served by Pan American and its affiliated carriers;

(j) Providing, when Pan American shall so request at any of Panagra's principal sales offices (which shall be deemed to be for purposes of this agreement, Panagra's principal sales office in Santiago, Chile, Lima, Peru, La Paz, Bolivia, Quito and Guayaquil, Ecuador, and such other points as shall be mutually agreed upon from time to time), at least one responsible sales representative who shall be assigned the specific and primary duty of developing and selling transportation

over the lines of Pan American and its affiliated carriers;

(k) Furnishing Pan American with appropriate reports, monthly and at such other times as may be requested by Pan American, as to the extent and character of sales made by each Panagra sales office or agency for Pan American and its affiliated carriers;

(l) Making personal visits through sales representatives to sub-agencies and to persons and firms which have been or which are potential customers for transportation via Pan American and its affiliated carriers, it being understood that, if Pan American so requests, a representative of Pan American may accompany Panagra's sales representatives on any such visits;

(m) Holding regular meetings, if requested by Pan American, between the appropriate representatives of Panagra and Pan American in the Panagra General Agency Territory, at such intervals as shall be mutually agreed upon, to review ways and means of developing traffic, including the determination of sales policies and advertising programs for development of traffic over the lines of Pan American and its affiliated carriers;

(n) Keeping Pan American's principal officers as currently informed as Panagra's principal officers with regard to developments coming to Panagra's attention affecting traffic over the lines of Pan American [fol. 2184] and its affiliated carriers, including proposed schedules and tariff change activities of competitors, air mail and parcel post matters, and all other pertinent information pertaining to the sale and movement of traffic over the lines of Pan American and its affiliated carriers, and consulting with Pan American as to Panagra's public educational activities, giving Pan American full opportunity to suggest how such activities may be conducted in a manner which will provide maximum benefit to Pan American and its affiliated carriers;

(o) Requiring any general-sales agent appointed by Panagra in the Panagra General Agency Territory to

function on behalf of Panagra in lieu of a sales office operated directly by Panagra to provide adequate sales office facilities, it being understood that all such offices, as well as offices operated directly by Panagra, shall be decorated and furnished in accordance with reasonable specifications and design in keeping with recognized airline practice and shall satisfy the functional requirements of such offices, that all such offices at points served by Panagra shall accentuate their identity as sales offices for Panagra and Pan American, and that all such sales offices and general sales agencies shall be furnished with modern office equipment and telephone installations adequate to provide the highest type of service to the public;

(p) Providing traffic and sales personnel, including those of Panagra's general sales agents, responsible for the handling and development of traffic over the lines of Pan American and its affiliated carriers who shall be adequately trained in airline practice and suitably indoctrinated in required procedures, methods and information to enable them to furnish satisfactory performance hereunder, it being agreed that a reasonable number of sales representatives who come in contact with the public in Panagra's principal sales offices in the Panagra general agency territory shall be bilingual, [fol. 2185] i.e. English and Spanish speaking, and that the sales staff in the Panagra General Agency Territory shall not only include sales personnel sufficient to staff adequately Panagra offices and general sales agencies, but also shall include as many outside solicitors as may be reasonably required to produce the best sales effort for Pan American and its affiliated carriers;

(q) For the purpose of instructions covering procedures for the sale and handling of passenger, cargo and mail traffic over the lines of Panagra and Pan American or its affiliated carriers, making available to all of Panagra's offices the several traffic and sales manuals issued by Pan American including all reissues and revisions thereof and supplements thereto and requiring that the provisions of such manuals be followed.

All action taken by Panagra as such General Traffic and Sales Agent, whether specifically referred to herein or otherwise, shall be in accordance with instructions, rules, regulations, rates and tariffs of Pan American and its affiliated carriers. Pan American's representatives may from time to time visit Panagra's sales offices and general agencies for the purpose of discussing with Panagra's sales representatives any and all aspects of their selling activities for Pan American and its affiliated carriers; provided, however, that Pan American shall consult with Panagra a reasonable time prior to making such visits regarding the purpose of such visits, and a representative of Panagra may, if Panagra desires, accompany such representatives of Pan American on such visits.

2. Panagra agrees to designate as its agents for the purposes of this Agreement all of its authorized sales agents in the Panagra General Agency Territory, to appoint such additional agents as Pan American may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in, the instructions (including published agency rules, regulations, policies and practices) given by Pan American, and to cancel the appoint- [fol. 2186] ment of any agent, for the purposes of this Agreement, upon request by Pan American.

3. Pan American hereby authorizes Panagra to issue (a) tickets, or exchange orders exchangeable for tickets, for transportation of passengers (but not to check baggage unless the parties hereto shall so agree) and (b) airwaybills or other appropriate forms of contract for transportation of express and cargo over the lines of Pan American and of its affiliated carriers and to execute and issue all other documents necessary or appropriate for such transportation, all in the form, and subject to and in accordance with the tariffs, rates, rules and regulations and the terms, provisions and conditions of the tickets, airwaybills and other transportation contracts, prescribed and approved from time to time by Pan American or its affiliated carrier, as the case may be, it being understood that no such ticket, exchange order, airwaybill or contract will be issued unless

an advance reservation shall have been made for the transportation, if required by such tariffs, rules and regulations, and Panagra shall have received payment of the total charges payable therefor at the point of issuance in accordance with such tariffs, rules and regulations, or shall have made arrangements satisfactory to Pan American for the collection of such charges, and that Panagra will not, directly or indirectly, or through any agent or broker, or otherwise, rebate, or remit any portion of the charges specified in said tariffs. Pan American agrees to accept and to carry out the obligation of, or to cause the appropriate affiliated carriers to accept and to carry out the obligation of, each ticket, exchange order, airwaybill, or contract so issued by Panagra. Such airwaybill or contracts may provide for turning over to other transportation agencies for onward carriage by them of express or cargo destined to points beyond points served by Pan American and its affiliated carriers, and in such event it is agreed that Pan American and its affiliated carriers will act in accordance with the terms of such provision. In issuing tickets, exchange orders airwaybills and contracts for transportation over the lines of Pan American or any of its affiliated car- [fol. 2187] riers, Panagra shall be deemed to act only as an agent of Pan American or its affiliated carrier, as the case may be. Panagra, including its officers, employees, agents, or servants, shall not be liable, and Pan American agrees to indemnify Panagra, including its officers, employees, agents, or servants, and hold it harmless from and against all claims, for any loss, damage, injury or delay of any nature whatsoever, including costs and expenses, which shall occur in connection with the transportation services of Pan American or in connection with the carrying out or failure to carry out any obligation to third parties arising by reason of action taken by Panagra as General Traffic and Sales Agent for Pan American, pursuant to this Agreement unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of Panagra, its officers, employees, agents or servants. Pan American agrees to cause its affiliated carriers to enter into appropriate agreements similar to and on the same terms as the agreement in the foregoing sentence under which they will agree to indemnify and hold harmless Panagra from any such

loss, damage, injury, delay, costs and expenses, in connection with their respective transportation services or the carrying out of obligations to third parties arising out of action by Panagra as General Traffic and Sales Agent for such affiliated carriers, respectively. Pan American shall furnish to Panagra from time to time the aforementioned tariffs, rates, rules and regulations and information regarding the transportation services currently being offered by Pan American and its affiliated carriers. Any act which Panagra is authorized or permitted by this paragraph to take may be taken through an agent of Panagra authorized in accordance herewith.

4. (a) In case Panagra shall receive notice of any claims relating to transportation over the routes of Pan American or its affiliated carriers, Panagra will immediately notify Pan American of such notice, giving all pertinent information available.

(b) In case any tariff, rate, form of ticket, exchange order, airwaybill or other transportation contract, or any rule or regulation of Pan American or its affiliated carriers relating to transportation over their lines, shall be [fol. 2188] modified or amended at any time, or in case any service of Pan American or its affiliated carriers shall be suspended, modified or cancelled, Pan American will notify Panagra as far in advance as practicable of the effective date of any such modification, amendment, suspension or cancellation, it being understood that Pan American will indemnify and hold harmless Panagra from and against all losses, including costs and expenses, by reason of claims insofar as they arise out of such modification, amendment, suspension or cancellation and the sale by Panagra of transportation prior to receipt by Panagra of notice thereof.

(c) Panagra shall make no refund of any fare, charge, or other sum relating to transportation over the lines of Pan American or its affiliated carriers, unless such refund shall be in accordance with the tariffs, rules, regulations and instructions of Pan American.

(d) In case any claim shall be asserted against Panagra in respect to transportation over the lines of Pan American or any of its affiliated carriers, or in case any action at

law; suit or proceeding shall be instituted against Panagra relating thereto, Panagra shall promptly notify Pan American and promptly transmit to Pan American from time to time all communications, legal processes and other documents and information coming into the possession of Panagra and relating to such claim, action at law, suit or proceeding. Panagra shall permit Pan American to settle and to conduct the defense against any such claim, action at law, suit or proceeding and Panagra will cooperate with and assist Pan American, to the extent requested by Pan American, in settling or conducting the defense against any such claim, action at law, suit or proceeding.

5. Pan American hereby agrees to pay or reimburse Panagra the following amounts:

(a) In the case of sales made in the Panagra General Agency Territory by Panagra or any agent of Panagra:

(i) *For Passenger Transportation* over the lines of Pan American and its affiliated carriers, a [fol. 2189] commission equal to either (1) in case such transportation shall have been sold directly by Panagra or a general sales agent of Panagra, 10% of the total amount of the fares for such transportation (including excess baggage weight charges but excluding valuation and insurance charges on baggage) collected by Panagra or its general agent in the Panagra General Agency Territory including fares for such passenger and excess baggage transportation sold in the Panagra General Agency Territory by Panagra or its general sales agent and furnished under Universal Air Travel Cards acceptable to Pan American or its affiliated carriers or under government transportation requests or warrants presented by passengers for transportation over the lines of Pan American or any of its affiliated carriers, but excluding any fares payable to other carriers, under tickets and exchange orders issued by Panagra or its general agent in accordance with the provisions of this agreement; or (2) in case such transportation shall have been sold by or through

an agent of Panagra (other than a general sales agent of Panagra) or by another carrier authorized so to do, 2½% of the total amount of the fares for such transportation, excluding charges for excess baggage weight, and 10% of the excess baggage weight charges collected by Panagra or its general agent, either directly or through its agents, in the Panagra General Agency Territory, including fares for such passenger and excess baggage transportation sold in the Panagra General Agency Territory by such agents of Panagra or such carriers and furnished under Universal Air Travel Cards acceptable to Pan American or its affiliated carriers or under government transportation requests or warrants presented by passengers for transportation over the lines of Pan American or any of its affiliated carriers, but excluding any fares payable to other carriers, under tickets and exchange orders issued by Panagra in accordance with the provisions of this Agreement, plus the commission, if any, payable to such agents in [fol. 2190] accordance with the rules and regulations of Pan American then in effect, and of which Panagra has been advised, it being understood that in such case the commission, if any, payable to the agent, shall be paid to the agent and Panagra will retain the balance equal to 2½% of the fare and 10% of the excess baggage weight charges, and

(ii) *For Express or Cargo Transportation* over the lines of Pan American and its affiliated carriers a commission equal to either (1) in case such transportation shall have been sold directly by Panagra or a general sales agent of Panagra, 7½% of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation, collected by Panagra or its general agent in the Panagra General Agency Territory, or, in the case of collect shipments collected otherwise on behalf of Pan American or any of its affiliated carriers, including transportation sold in the Panagra General Agency Territory by Panagra or its general sales

agent and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers, under airwaybills or other cargo transportation contracts issued by Panagra in accordance with the provisions of this Agreement; or (2) in case such transportation shall have been sold by or through an agent of Panagra (other than a general sales agent of Panagra) or by another carrier authorized so to do, 2½% of the total amount of such charges (not including valuation, insurance, C.O.D. or collect charges), collected by Panagra or its general agent either directly or through such agents in the Panagra General Agency Territory, or, in the case of collect shipments, collected otherwise on behalf of Pan American or any of its affiliated carriers, including transportation sold in the Panagra General Agency Territory by such agents or such carriers and furnished under government bills of lading or similar warrants furnished by shippers, but exclud- [fol. 2191] ing any charges payable to other carriers under airway bills or other cargo transportation contracts issued by Panagra in accordance with the provisions of this Agreement, plus the commission, if any, payable to such agents in accordance with the rules and regulations of Pan American, it being understood that in such cases the commission, if any, payable to the agent shall be paid to the agent and Panagra will retain the balance equal to 2½% of the charges.

(b) In the case of sales made by Panagra outside the Panagra General Agency Territory:

(i) *For Passenger Transportation* over the lines of Pan American and its affiliated carriers, a commission equal to 2½% of the total amount of the fares for such transportation, excluding charges for excess baggage and valuation and insurance charges on baggage, collected by Panagra on behalf of Pan American or any of its affiliated carriers, including

fares for such transportation sold by Panagra and furnished under Universal Air Travel Cards acceptable to Pan American or its affiliated carriers or under Government transportation requests or warrants presented by passengers for transportation over the lines of Pan American or any of its affiliated carriers, but excluding any fares payable to other carriers under tickets and exchange orders issued by Panagra in accordance with the provisions of this Agreement; and

(ii) *For Express or Cargo Transportation* over the lines of Pan American and its affiliated carriers, a commission equal to 5% of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation, collected by Panagra, or, in the case of collect shipments collected otherwise on behalf of Pan American or any of its affiliated carriers, including transportation sold by Panagra and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers [fol. 2192] under airway bills or other cargo transportation contracts issued by Panagra in accordance with the provisions of this Agreement.

(c) Any out-of-pocket expenses specifically requested and approved by Pan American which are incurred by Panagra in carrying out special services (including advertising or publicity) requested by Pan American under this Agreement, it being understood that routine expenses of distribution of information, timetables and advertising material to sub-agents and prospective travelers and shippers and similar activities which are classed as a general agent's normal sales promotional activities shall not be reimbursable hereunder.

Except with respect to transportation issued under Universal Air Travel Cards, government transportation requests or warrants, or government bills of lading or warrants or collect shipments, as provided above, the commissions shall be payable hereunder only in

respect of the aforementioned fares and charges actually collected by Panagra or the said sales agents and paid over to Pan American and no commission shall be payable with respect to any fare or charge which shall be refunded, except as otherwise specifically authorized by Pan American. Sales of express and cargo transportation with transportation charges collect shall be deemed to have been made by the party who issued the airwaybill and not by the party who collects the charges.

6. In case Pan American or any of its affiliated carriers receives a commission from any other air, rail, water or bus carrier for the sale of such carrier's passenger tickets, exchange orders or cargo transportation documents issued directly by Panagra or by an agent of Panagra in the Panagra General Agency Territory or elsewhere in connection with interline transportation over the lines of Pan American and its affiliated carriers and such other carrier, Pan American shall pay Panagra or such agents the amount of such commission.

7. Panagra hereby appoints Pan American, and Pan American agrees to act as, General Traffic and Sales Agent for Panagra in the United States of America and throughout the world except in Argentina, Bolivia, Colombia, Chile, Ecuador, Peru, Panama City, R.P., and the Panama Canal [fol. 2193] Zone, the territory in which Pan American is hereby appointed to act as General Traffic and Sales Agent being hereinafter sometimes referred to as the "Pan American General Agency Territory". As such General Traffic and Sales Agent, Pan American agrees that it will perform such services as may be appropriate to promote passenger, mail, express and cargo traffic over the lines of Panagra and to arrange for transportation of passengers, baggage, mail, express and cargo over such lines, including the furnishing of necessary personnel, office space, equipment and supplies and doing all other things appropriate to carry out the following activities:

(a) Solicitation and sale within the Pan American General Agency Territory of passenger, mail, express

and cargo transportation for Panagra, including furnishing instructions to, and supervision of such solicitation and sale by, any general sales agents of Pan American and sub-agents, appointed in accordance with this Agreement;

(b) Performance of such acts and preparation and checking of such documents in the Pan American General Agency Territory as may be required for the transportation of passengers, baggage, mail, express and cargo and movement of aircraft over the lines of Panagra, including the making of arrangements for the presence of such government officials as may be required in connection therewith;

(c) Checking such baggage of outgoing passengers at points in the Pan American General Agency Territory as is to be through checked from points served by Pan American or its affiliated carriers to points served by Panagra, it being understood that baggage of passengers traveling over the lines of Pan American or its affiliated carriers and then over the lines of Panagra will be through checked by Pan American or its affiliated carriers only if, and to the extent that, the parties shall expressly so agree, collecting for the account of Panagra any excess baggage charges payable with respect to any baggage checked by Pan American or its affiliated carriers for transportation over the lines of Panagra, receiving and forwarding by carriers with which Panagra or Pan American has for- [fol. 2194] warding arrangements any trunks or other heavy baggage delivered to Pan American or its affiliated carriers for the purpose of passengers traveling, or proposing to travel, over the lines of Panagra, and collecting any charges payable therefor;

(d) Making arrangements in the Pan American General Agency Territory on behalf of such passengers for transportation to and from airport terminals and for hotel accommodations at points of call of Panagra and Pan American and at other cities;

(e) Making reservations for and facilitating transportation over the lines of Panagra and connecting carriers;

(f) Furnishing such advice and information as Panagra may from time to time request with respect to transportation formalities required by governments in the Pan American General Agency Territory pertaining to passengers, baggage, express and cargo moving over the lines of Pan American or its affiliated carriers and Panagra;

(g) Distribution of timetables, advertising materials and other information to agents and the public covering the services of Panagra as Panagra may from time to time reasonably request;

(h) Maintaining and operating, at points served by Pan American or its affiliated carriers in the Pan American General Agency Territory and at such other points in the continental United States which Pan American shall from time to time determine, which points shall include New York, Chicago and Washington, centrally located sales offices for the sale of passenger, express and cargo transportation over the lines of Panagra, which offices shall be staffed with competent traffic and sales personnel for the promotion and sale of passenger, mail, express and cargo transportation over the lines of Panagra and for the handling of all matters pertaining thereto pursuant to this Agreement, it being contemplated that the entire sales organization of Pan American and its affiliated carriers will be available to perform services pursuant to this Agreement, but nothing contained in this Agreement [fol. 2195] shall obligate Pan American or its affiliated carriers to establish any new office or organization to render any service to Panagra at any point not served by Pan American or its affiliated carriers except as otherwise specifically provided herein with respect to the continental United States;

(i) Publicizing in the Pan American General Agency Territory, in such appropriate manner as Panagra

shall request, that Pan American is the General Traffic and Sales Agent for Panagra, which shall include, but not be limited to, appropriate statements to that effect in Pan American's advertising in the Pan American General Agency Territory relating to service to Latin America;

(j) Providing, when Panagra shall so request, at any of Pan American's principal sales offices, which for purposes of this Agreement are those referred to in subparagraph (b) of paragraph 11 of the Agreement dated July 30, 1946 between Pan American and Panagra (which Agreement as the same may be amended from time to time is hereinafter referred to as "The Through Flight Agreement"), as well as Miami, Florida, Los Angeles, California, San Francisco, California, New Orleans, Louisiana, and such others as shall be mutually agreed upon from time to time, at least one responsible sales representative who shall be assigned the specific and primary duty of developing and selling transportation over the lines of Panagra; and providing in other sales offices in the continental United States, in which Panagra may reasonably request it, similar responsible sales representatives who shall be assigned to such duties;

(k) Furnishing Panagra with appropriate reports, monthly and at such other times as may be requested by Panagra, as to the extent and character of sales made by each Pan American office or agency or its affiliated carriers for Panagra;

(l) Making personal visits in the United States through sales representatives to sub-agencies, and to persons and firms which have been or which are potential customers for transportation via Panagra, it being understood that, if Panagra so requests, a representa- [fol. 2196] tive of Panagra may accompany Pan American's sales representatives on any such visits.

(m) Holding regular meetings, if requested by Panagra, between the appropriate representatives of Pan American and Panagra in the Pan American General

Agency Territory, at such intervals as shall be mutually agreed upon, to review ways and means of developing traffic, including the determination of sales policies and advertising progress for development of traffic over Panagra;

(n) Keeping Panagra's principal officers as currently informed as Pan American's principal officers with regard to developments coming to Pan American's attention affecting traffic over the lines of Panagra, including proposed schedules and tariff changes, activities of competitors, air mail and parcel post matters, and all other pertinent information pertaining to the sale and movement of interline traffic over the lines of Pan American or its affiliated carriers and Panagra, and consulting with Panagra as to Pan American's public educational activities, giving Panagra full opportunity to suggest how such activities may be conducted in a manner which will provide maximum benefit to Panagra;

(o) Requiring any general sales agent, appointed by Pan American to function on behalf of Pan American in lieu of a sales office operated directly by Pan American, to provide adequate sales office facilities, it being understood that all such offices, as well as offices operated by Pan American, shall be decorated and furnished in accordance with reasonable specifications and design in keeping with recognized airline practice and shall satisfy the functional requirements of such offices, that all such offices in the United States shall accentuate their identity as sales offices for Pan American and Panagra, and shall be furnished with modern office equipment and telephone installations adequate to provide the highest type of service to the public;

(p) Pan American's traffic and sales personnel, including that of its general sales agents, responsible for the handling and development of traffic over the lines of Panagra, shall be adequately trained in air- [fol. 2197] line practice and suitably indoctrinated in required procedures, methods and information to en-

able them to furnish satisfactory performance hereunder. A reasonable number of sales representatives in the United States of America who come in contact with the public in Pan American's principal sales offices shall be bilingual, i.e., English and Spanish speaking. The sales staff in the Pan American General Agency Territory shall not only include sales personnel sufficient to staff adequately Pan American offices and general sales agencies, but also shall include as many outside solicitors as may be reasonably required to produce the best sales effort for Panagra.

All action taken by Pan American as General Traffic and Sales Agent whether specifically referred to herein or otherwise, shall be in accordance with instructions, rules, regulations, rates and tariffs of Panagra. Panagra's representatives may from time to time visit Pan American's sales offices and general agencies for the purpose of discussing with Pan American's sales representatives any and all aspects of their selling activities for Panagra; provided, however, that Panagra shall consult with Pan American a reasonable time prior to making such visits regarding the purpose of such visits and a representative of Pan American may, if Pan American desires, accompany such representatives of Panagra on such visits.

8. Pan American agrees to designate as its agents for the purposes of this Agreement all of its authorized sales agents in the Pan American General Agency Territory, to appoint such additional agents as Panagra may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in, the instructions (including published agency rules, regulations, policies and practices) given by Panagra and to cancel the appointment of any agent, for the purposes of this Agreement, upon request by Panagra.

9. Panagra hereby authorizes Pan American and its affiliated carriers to issue (a) tickets, or exchange orders exchangeable for tickets, for transportation of passengers, and (b) airwaybills or other appropriate forms of contract

[fol. 2198] for transportation of express and cargo over the lines of Panagra and to execute and issue all other documents necessary or appropriate for such transportation, all in the form, and subject to and in accordance with the tariffs, rates, rules, and regulations, and the terms, provisions and conditions of the tickets, airwaybills and other transportation contracts, prescribed and approved from time to time by Panagra, it being understood that no such ticket, exchange order, airwaybill or contract will be issued, unless an advance reservation shall have been made for the transportation, if required by such tariffs, rules and regulations and Pan American or one of its affiliated carriers shall have received payment of the total charges payable therefor at the point of issuance in accordance with such tariffs, rules and regulations, or shall have made arrangements satisfactory to Panagra for the collection of such charges, and Pan American will not, directly or indirectly, or through any agent or broker, or otherwise, rebate or remit any portion of the charges specified in said tariffs. Panagra agrees to accept such ticket, exchange order, airwaybill or contract so issued by Pan American or one of its affiliated carriers. Such airwaybills or contracts may provide for turning over to other transportation agencies for onward carriage by them of express or cargo destined to points beyond points served by Panagra, and in such event it is agreed that Panagra will act in accordance with the terms of such provision. In issuing tickets, exchange orders, airwaybills and contracts for transportation over the lines of Panagra, Pan American and its affiliated carriers shall be deemed to act only as agents for Panagra. Neither Pan American nor any of its affiliated carriers, including their officers, employees, agents, or servants, shall be liable, and Panagra agrees to indemnify and hold harmless Pan American and its affiliated carriers, including their officers, employees, agents or servants, from and against all claims, for any loss, damage, injury or delay of any nature whatsoever, including costs and expenses, which shall occur in connection with the air transport services of Panagra or in connection with the carrying out or failure to carry out of any obligation to third parties, arising by reason of action taken by Pan American or any of its

affiliated carriers as General Sales Agent for Panagra pursuant to this Agreement, unless such loss, damage, injury [fol. 2199] or delay shall be caused by the negligence or wilful misconduct of Pan American or one of its affiliated carriers, including their officers, employees, agents or servants.

Panagra shall furnish to Pan American and its affiliated carriers from time to time the aforementioned tariffs, rates, rules, regulations and information regarding the transportation services currently being offered by Panagra. Any act which Pan American or its affiliated carriers is authorized or permitted by this paragraph to take may be taken through an agent of Pan American or its affiliated carriers authorized in accordance herewith.

10. (a) In case Pan American or its affiliated carriers shall receive notice of any claim relating to transportation over the routes of Panagra, Pan American or its affiliated carriers will immediately notify Panagra of such notice, giving all pertinent information available.

(b) In case any tariff, rate, form of ticket or exchange order, airwaybill or other transportation contract, or any rule or regulation of Panagra relating to transportation over its lines, shall be modified or amended at any time, or in case any service of Panagra shall be suspended, modified or cancelled, Panagra will notify Pan American as far in advance as practicable of the effective date of any such modification, amendment, suspension or cancellation, it being understood that Panagra wil indemnify and hold harmless Pan American and its affiliated carriers from and against all losses, including costs and expenses, by reason of claims insofar as they arise out of such modification, amendment, suspension or cancellation and the sale by Pan American or an affiliated carrier of transportation prior to receipt by Pan American of notice thereof, or in case of a sale by an affiliated carrier, prior to receipt of notice thereof by such carrier if transmitted promptly by Pan American.

(c) Pan American or its affiliated carriers shall make no refund of any fare or other sum relating to transportation over the lines of Panagra, unless such refund shall be in accordance with the tariffs, rules, regu- [fol. 2200] lations and instructions of Panagra.

(d) In case any claim shall be asserted against Pan American or any of its affiliated carriers in respect of transportation over the lines of Panagra, or in case any action at law, suit or proceeding shall be instituted against Pan American or any of its affiliated carriers relating thereto, Pan American shall promptly notify Panagra and promptly transmit to Panagra from time to time all communications, legal processes and other documents and information coming into the possession of Pan American and relating to such claim, action at law, suit or proceeding. Pan American shall permit Panagra to settle and to conduct the defense against any such action at law, suit or proceeding, and Pan American will cooperate with and assist Panagra, to the extent requested by Panagra, in settling or conducting the defense against any such claim, action at law, suit or proceeding.

11. Panagra hereby agrees to pay or reimburse to Pan American the following amounts:

(a) In the case of sales made in the Pan American General Agency Territory by Pan American or its affiliated carriers or any agent thereof:

(i) *For Passenger Transportation* over the lines of Panagra, a commission equal to either (1) in case such transportation shall have been sold directly by Pan American or its affiliated carriers or a general sales agent of Pan American, 10% of the total amount of the fares for such transportation (including excess baggage weight charges but excluding valuation and insurance charges on baggage) collected by Pan American or its general sales agent in the Pan American General Agency Territory including fares for such passenger and excess baggage trans-

portation sold in the Pan American General Agency Territory by Pan American or its general sales agent and furnished under Universal Air Travel Cards [fol. 2201] acceptable to Panagra or under government transportation requests or warrants presented by passengers for transportation over the lines of Panagra, but excluding any fares payable to other carriers under tickets and exchange orders issued by Pan American or its affiliated carriers or its general sales agent in accordance with the provisions of this Agreement; or (2) in case such transportation shall have been sold by or through an agent of Pan American or its affiliated carriers (other than a general sales agent of Pan American) or by another carrier authorized so to do, 2½% of the total amount of the fares for such transportation excluding charges for excess baggage weight, and 10% of the excess baggage weight charges, collected by Pan American or its general sales agent, either directly or through its agents in the Pan American General Agency Territory, including fares for such passenger and excess baggage transportation sold in the Pan American General Agency Territory by such agents of Pan American or such carriers and furnished under Universal Air Travel Cards acceptable to Panagra or under government transportation requests or warrants presented by passengers for transportation over the lines of Panagra, but excluding any fares payable to other carriers, under tickets and exchange orders issued by Pan American in accordance with the provisions of this Agreement, plus the commission, if any, payable to such agents in accordance with the rules and regulations of Panagra, then in effect, and of which Pan American has been advised, it being understood that in such case the commission, if any, payable to the agent, shall be paid to the agent and Pan American will retain the balance equal to 2½% of the fare and 10% of the excess baggage weight charges, and

(ii) *For Express or Cargo Transportation* over the lines of Panagra, a commission equal to either (1) in

case such transportation shall have been sold directly [fol. 2202] by Pan American or a general sales agent of Pan American, 7½% of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation collected by Pan American or its general sales agent in the Pan American General Agency Territory or, in the case of collect shipments, collected otherwise on behalf of Panagra, including transportation sold in the Pan American General Agency Territory by Pan American or its general sales agent and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers, under airwaybills or other cargo transportation contracts issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement; or (2) in case such transportation shall have been made by or through an agent of Pan American (other than a general sales agent of Pan American) or by another carrier authorized so to do, 2½% of the total amount of such charges (not including valuation, insurance, C.O.D. or collect charges) collected by Pan American or its general agent either directly or through such agents in the Pan American General Agency Territory or, in the case of collect shipments, collected otherwise on behalf of Panagra, including transportation sold in the Pan American General Agency Territory by such agents or such carriers and furnished under government bills of lading or similar warrants furnished by shippers, but excluding any charges payable to other carriers under airwaybills or other cargo transportation contracts issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement plus the commission, if any, payable to such agents in accordance with the rules and regulations of Panagra, it being understood that in such cases the commission, if any, payable to the agent shall be paid to the agent and Pan American will retain the balance equal to 2½% of the charges.

[fol. 2203] (b) In the case of sales made by Pan American or any of its affiliates except Compania de Argentina

Aviacion Pan American S.A. outside the Pan American General Agency Territory:

(i) *For Passenger Transportation* over the lines of Panagra a commission equal to 7½% of the total amount of the fares for such transportation, excluding charges for excess baggage and valuation and insurance charges on baggage, collected by Pan American or any of its affiliated carriers on behalf of Panagra including fares for such transportation sold by Pan American or any of its affiliated carriers and furnished under Universal Air Travel Cards acceptable to Panagra, or under government transportation requests or warrants presented by passengers for transportation over the lines of Panagra, but excluding any fares payable to other carriers under tickets and exchange orders issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement; and

(ii) *For Express or Cargo Transportation* over the lines of Panagra, a commission equal to 5% of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation, collected by Pan American or any of its affiliated carriers, or, in the case of collect shipments, collected otherwise on behalf of Panagra, including transportation sold by Pan American or any of its affiliated carriers and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers under airwaybills or other cargo transportation contracts issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement.

(c) Any out-of-pocket expenses specifically requested and approved by Panagra which are incurred by Pan American or its affiliated carriers in carrying out

---

Change indicated in paragraph (b) initialed but illegible.

special services (including advertising or publicity) [fol. 2204] requested by Panagra under this Agreement, it being understood that routine expenses of distribution of information, timetables and advertising material to sub-agents and prospective travelers and shippers and similar activities which are classed as a general agent's normal sales promotion activities shall not be reimbursable hereunder.

Except with respect to transportation issued under Universal Air Travel Cards, government transportation requests or warrants, government bills of lading or warrants, or collect shipments, as provided above, commissions shall be payable hereunder only in respect of the aforementioned fares and charges actually collected by Pan American or its affiliated carriers or the said sales agents and paid over to Panagra, and no commission will be payable with respect to any fare or charge which shall be refunded, except as otherwise specifically authorized by Panagra. Sales of express and cargo transportation with transportation charges collect shall be deemed to have been made by the party who issues the airwaybill and not by the party who collects the charges.

12. In case Panagra receives a commission from any other air, rail, water or bus carriers for the sale of such carriers' passenger tickets, exchange orders or cargo transportation documents issued directly by Pan American or its affiliated carriers or by an agent thereof in the Pan American General Agency Territory or elsewhere in connection with interline transportation over the lines of Panagra and such other carrier, Panagra shall pay Pan American, its affiliated carriers or such agents, the amount of such commission.

13. All amounts payable hereunder, including all amounts collected on behalf of either party for transportation sold, shall be paid by crediting Panagra or Pan American, as the case may be, in open account in U. S. currency. The amounts payable in respect of each month to be so credited as soon after the end of such month as is practicable. Settlement of balances in said open account or accounts

shall be made in U. S. currency in accordance with arrangements agreed upon from time to time between the parties.

14. Nothing herein contained shall be deemed to require Panagra or Pan American or any of its affiliated carriers [fol. 2205] to initiate or maintain service between any particular points.

15. All expense for telegrams, cables, radiograms or other communications sent in connection with or pursuant to this Agreement, including communications relating to reservations and cancellations of reservations, shall be borne by the sender.

16. (a) In transferring shipments of interline baggage, accompanied or unaccompanied, and cargo, from Pan American or any of its affiliated carriers to Panagra, or vice versa, pursuant to this Agreement, it shall be the responsibility of the party from whose lines the shipment is transferred, but without incurring any liability for loss of revenue in cases of missed connections, to deliver such baggage or cargo to the other party at such location and hours as shall be agreed upon in writing by the parties.

(b) Whenever baggage or cargo is to be transferred for onward transportation hereunder and completion of such transportation necessitates compliance with the laws and regulations pertaining to importation and transit or exportation and transit of the country of the point of transfer, it shall be the responsibility of the transferring party to comply with such laws and regulations and to deliver, where necessary, to the onward carrying party prior to or simultaneously with the transfer, proper evidence of compliance with that country's laws and regulations pertaining to such importation and transit, or exportation and transit; provided, however, that in any case where compliance with such laws and regulations can be made only by the onward-carrying party, it shall be the onward-carrying party's responsibility to comply therewith.

17. In the event that Pan American shall have made arrangements with any other carrier (hereinafter referred to as an "Interline Agreement"), pursuant to which Pan American and its affiliated carriers are authorized to sell transportation over the lines of such other carrier and such other carrier is authorized to sell transportation over the lines of Pan American and its affiliated carriers, it is understood that Panagra is an affiliated carrier of Pan [fol. 2206] American for the purposes of the Interline Agreement and Panagra is hereby authorized to sell transportation, and agrees to honor transportation sold, pursuant to the Interline Agreement, subject to all the terms and conditions thereof. The basis of compensation and the other principal features of all Interline Agreements in effect at the time will be set forth in the appropriate instructions, tariffs, rules and regulations currently furnished to Panagra by Pan American and copies of such agreements will be furnished to Panagra upon request.

In the event that Panagra shall have made arrangements with any other carrier (hereinafter referred to as "Panagra Interline Agreement"), pursuant to which Panagra is authorized to sell transportation over the lines of such other carrier and such other carrier is authorized to sell transportation over the lines of Panagra, it is understood that Panagra may and is hereby authorized to make provision in the said Panagra Interline Agreement whereby Pan American and its affiliated carrier is authorized to sell transportation over the lines of such other carrier and such other carrier is authorized to sell transportation over the lines of Pan American and its affiliated carrier. Copies of all such agreements will be furnished to Pan American promptly after execution.

It is further understood that, with respect to any transportation sold in accordance with an Interline Agreement or a Panagra Interline Agreement:

(a) Settlement will be effected between Pan American and Panagra in the same manner as settlement is effected with respect to transportation sold pursuant to this Agreement, or in such other manner as may be mutually agreed upon;

(b) Panagra shall have all of the rights and obligations, and only the rights and obligations, provided under such Interline Agreement with respect to affiliated carriers of Pan American;

(c) Pan American and its affiliated carriers shall have all of the rights and obligations, and only the rights and obligations, provided under such Panagra Interline Agreement with respect to Pan American and its affiliated carriers;

(d) Except as otherwise provided for in Paragraph [fol. 2207] 5(i), 5(ii), 11(i) and 11(ii) hereof, no commission or other compensation or payment (including reimbursement of commissions or payment to sub-agents or others) will be paid by or to Panagra except to such extent as may be provided in the Interline Agreement or the Panagra Interline Agreement as the case may be;

(e) In the case of the Interline Agreement, Panagra agrees to indemnify and hold harmless Pan American from and against all claims, including costs and expenses, and to reimburse Pan American for all amounts paid by Pan American pursuant to the Interline Agreement or otherwise by reason of any action taken by Panagra pursuant to this paragraph 17. In the case of the Panagra Interline Agreement, Pan American agrees to indemnify and hold harmless Panagra from and against all claims, including costs and expenses, and to reimburse Panagra for all amounts paid by Panagra pursuant to the Panagra Interline Agreement or otherwise by reason of any action taken by Pan American pursuant to this paragraph 17.

18. (a) In case Pan American shall take action of any kind in connection with the sale by Panagra of transportation over the lines of a carrier with which Pan American has an interline agreement, or the sale by any such carrier of transportation over the lines of Panagra, Pan American shall be deemed to be acting only as agent for the carrier over whose lines such transportation is to be carried out and shall be

under no liability to Panagra in connection therewith, including, but without limitation, liability for payment of commissions or other payment unless collected by Pan American on behalf of Panagra, except that Pan American shall be liable for any loss or damage resulting from its own negligence or wilful misconduct.

(b) In any case Panagra shall take action of any kind in connection with the sale by Pan American or any of its affiliated carriers of transportation over the lines of a carrier with which Panagra has an interline agreement, or the sale by any such carrier of transportation over the lines of Pan American or any of its affiliated carriers, Panagra shall be deemed to be [fol. 2208] acting only as agent for the carrier over whose lines such transportation is to be carried out and shall be under no liability to Pan American or any of its affiliated carriers in connection therewith, including, but without limitation, liability for the payment of commissions or any other payments unless collected by Panagra on behalf of Pan American or any of its affiliated carriers, except that Panagra shall be liable for any loss or damage resulting from its own negligence or wilful misconduct.

19. Each party shall be liable for, and shall reimburse, defend and hold harmless the other, from and against all loss, including costs and expenses relating thereto, arising out of any action taken by such party contrary to or omitted to be taken by such party in accordance with this Agreement. Without limiting the generality of the foregoing, it shall cover loss resulting from fines, penalties or detention expenses imposed by any government or governmental agency (or which any government or governmental agency attempts to impose) provided, however, that when such loss is incurred in any case involving the following circumstances, it shall be charged as follows:

(a) When the fines, penalty or detention expense involves a passenger who is ticketed for a stopover at the point of transfer from lines of one party to the lines of the other, the loss involved shall be for the account of the onward carrying party.

(b) When the fine, penalty or detention expense results from facts not apparent upon reasonable examination at the time the passenger was processed for travel at the original point of departure or stopover point referred to in subparagraph (a) above, as the case may be, his qualifications for entry into the country imposing such fine, penalty or detention expense having appeared to be proper and complete (including, but not limited to, cases involving errors on the part of consular officials and changes of law or regulations while the passenger was en route), such loss shall be prorated between Panagra, Pan American and its affiliated carriers in proportion to the revenue which each shall receive from the carriage of the passenger.

[fol. 2209] The party against which any fine, penalty or detention expense is imposed (even though the loss resulting therefrom is, by the terms of this Agreement, subject to reimbursement in whole or in part by another party) shall be responsible for the defense thereof, it being understood that all reasonable efforts shall be taken by such party to obtain the remission of such fine, penalty or detention expense. Each interested party will cooperate and assist the defending party to the extent reasonably requested of it, furnishing all data and information related to such fine, penalty or detention expense in its possession or available to it.

20. Amounts paid by Pan American or its affiliated carriers or Panagra in settlement of claims for concealed loss or damage (i.e., loss or damage not observed or detected and recorded prior to delivery to the passenger or consignee) to express, cargo or baggage transported over the lines of Panagra and of Pan American or its affiliated carriers, as the case may be, shall, after crediting any amounts received from other carriers, not affiliated carriers of Pan American, in respect of such loss or damage, be prorated between Pan American and Panagra on the basis of the ratio of the miles of carriage performed by

Panagra, on the one hand, and Pan American and its affiliated carriers on the other, with respect of such express, cargo or baggage.

21. Any claim or controversy arising out of or relating to this Agreement or to the manner of performance of breach thereof shall be referred to, and settled by, arbitration in the manner provided in paragraph 25 of the Through Flight Agreement.

22. The term "affiliated carriers" whenever used in this Agreement shall, for the purpose hereof, be deemed to mean such companies, other than Panagra, engaged in the transportation of passengers, mail, express or cargo by air, in which Pan American or any company owning a majority of the capital stock of Pan American, owns a stock interest and which Pan American may from time to time designate in writing to Panagra; provided, however, that whenever Pan American shall make such designation of an affiliated carrier for any portion of the Western hemisphere, it shall first obtain the advance written ap- [fol. 2210] proval of the President of Panagra and shall terminate such designation whenever the President of Panagra shall so request on ninety days' written notice. If the President of Panagra fails to approve such designation or requests the termination thereof, Panagra will, at the written request of Pan American, release Pan American from its obligations to act as General Traffic and Sales Agent for that part of the Western hemisphere covered by such designation and will execute appropriate amendments to the Through Flight Agreement.

23. This Agreement cancels and supersedes all existing arrangements between the parties relating to the same subject matter, except that it shall not cancel, supersede, or in any way modify any provision of, or obligation specified in, the Through Flight Agreement, provided, however, that the Through Flight Agreement shall be modified in the event of the contingency specified in paragraph 22 hereof, nor shall this Agreement modify any provision of an agreement dated July 30, 1946 between W. R. Grace & Co. and Pan American Airways Corporation or an agree-

ment dated July 14, 1948 between Pan American, Panagra and W. R. Grace & Co. relating to parent company services and compensation therefor.

24. Neither party may assign this Agreement or any obligation imposed on such party hereunder; provided, however, that nothing herein contained shall prevent either party from carrying out its obligations hereunder in all or any portion of its General Agency Territory through a general sales agent, subject to the following conditions:

(a) The appointment of any such general sales agent shall not release such party from its obligations hereunder;

(b) The entire commission payable hereunder with respect to any action in the territory for which such general sales agent is appointed shall be paid to such general sales agent; and

(c) The party appointing any such general sales agent shall notify the other in writing of such appointment and the territory to which it relates and of any change in such appointment or territory; and

(d) Such general sales agent acting for the purposes of this Agreement shall be, and remain throughout the duration of the appointment for such purposes, a general sales agent acting for the appointing party in the territory to which the appointment relates.

[fol. 2211] 25. The provisions of this Agreement shall be subject to any applicable rule or resolution, including but not limited to rules or resolutions relating to commissions, of the International Air Transport Association or the Air Traffic Conference of America or any similar body or organization, or any branch, committee or conference thereof which is binding upon either party to this Agreement, or to any applicable agreement made by either party to this Agreement and approved by the International Air Transport Association, the Air Traffic Conference of America, or any such similar organization which is binding upon

either party to this Agreement, and said provisions shall be deemed to be amended by any such rule, resolution or agreement. Information applicable to this Agreement regarding such rules, resolutions and agreements which are not directly available to either party hereto as a member of the organization which adopted or approved the same, will be furnished to the other party within a reasonable time after the effective date thereof.

26. Any notice required or permitted to be given pursuant to this Agreement shall be duly given if sent by mail or delivered by hand, in the case of notice to Pan American, to the Vice President—Traffic and Sales, Pan American Airways, Inc., 135 East 42nd Street, New York 17, New York, United States of America, or to such other person or such other address as Pan American may from time to time designate for that purpose, and in the case of notice to Panagra, to the General Traffic Manager, Pan American-Grace Airways, Inc., 135 East 42nd Street, New York 17, New York, United States of America, or such other person or such other address as Panagra may from time to time designate for that purpose.

27. This Agreement shall become effective on *September 10, 1948*, and shall continue in effect until May 5, 1950; provided, however, that either party may after that date terminate this Agreement by giving six (6) months' written notice of termination to the other party. Termination of this Agreement shall not relieve either party from any obligation or liability on its part arising from or connected with tickets, exchange orders, airwaybills or other contracts for transportation issued or effective prior to such [fol. 2212] termination nor shall it relieve either party from any liability on its part based upon any state of facts existing prior to such termination.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 47

I, Joseph J. Cantwell, hereby certify that I am Assistant Secretary of Pan American World Airways, Inc.; that the attached document is a true and complete copy of the document evidencing the following agreement:

Letter Agreement, dated December 10, 1951, between Pan American World Airways, Inc., and Pan American-Grace Airways, Inc., providing for the handling of Pan American passenger sales for the account of Panagra on a lift basis in lieu of the previous sales reporting procedure.

/s/ JOSEPH J. CANTWELL
Assistant Secretary

Dated: May 12, 1952

Subject: LIFT VS. SALES

December 10, 1951

Mr. J. S. Woodbridge, Comptroller
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

Dear Mr. Woodbridge:

Sometime ago you asked that Panagra give consideration to handling PAA passenger sales for account of Panagra on a lift basis in lieu of the present sales reporting procedure which has been the practice up to now. On the basis of discussions with you, I am pleased to confirm our agreement to change over to a lift basis as from November 1, 1951 with the understanding that you are agreeable to accepting a surcharge equivalent to 2% of the net charge between our two companies each month corresponding to passenger tickets lifted, it being understood that the 2% surcharge is to compensate Panagra for the breakage on unflown tickets and is based upon Panagra's ratio of unflown tickets written off to Revenue during the past two calendar years. In adopting the foregoing change in procedure, it is understood that either company may at six-months intervals request a prospective review of the arrangement, should any inequities develop.

In our discussions you mentioned that PAA was agreeable to considering placing a deposit with Panagra equivalent to any estimated lag in the receipt of cash liquidations on a lift basis. Panagra is not at this time suggesting such a deposit, but I wish to reserve the right to bring the matter up for consideration at a future date if experience indicates any appreciable inequity to Panagra.

If the foregoing correctly states our understanding, will you please so indicate in the space provided below.

Yours very truly,

/s/ K. A. LAWDER
K. A. Lawder
Vice President & Comptroller

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 48

(Letterhead of Pan American-Grace Airways, Inc., New York 5, N. Y.)

March 6, 1956

Pan American World Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

Gentlemen:

Reference is made to your letter of January 5, 1956. In that letter you refer to your letter to us dated December 1, 1948, designating certain carriers as affiliated carriers of Pan American pursuant to paragraph 22 of the General Traffic and Sales Agency Agreement between our respective companies, dated September 10, 1948, and you propose the following changes in the designation of such carriers:

1) Effective as of January 1, 1955, Panair do Brasil, S.A., acts as General Traffic and Sales Agent for Pan American in Brazil and Paraguay, except that they will not act as General Traffic and Sales Agent with respect to the sale of passenger transportation in the Federal Dis-

trict and State of Rio and in the State of Sao Paulo, and Panair do Brasil, S.A., will act as General Traffic and Sales Agent for Panagra in such countries except as indicated above.

2) Pan American hereby designates Aeronaves de Mexico, S.A., pursuant to the provisions of paragraph 22 of the General Traffic and Sales Agency Agreement between our respective companies, dated September 10, 1948, as an affiliated carrier of Pan American solely with respect to matters relating to interline sales and Panagra acting as General Traffic and Sales Agent under said Agreement.

This letter will constitute the written approval to the foregoing changes as required by paragraph 22 of the said [fol. 2216] General Traffic and Sales Agency Agreement to be given by the President of Panagra, except that insofar as concerns payment of commissions, it will be necessary for us to use an effective date of January 1, 1956 for the changes in the territory in which Panair do Brasil acts as Panagra's General Agent. I understand that this point has been discussed and agreed between our respective accounting departments.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 49

(Letterhead of Pan American-Grace Airways, Inc., New York 5, N. Y.)

[Stamp—Received—Apr 24 1956—John C. Leslie]

April 24, 1956

Pan American World Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

Dear Sirs:

This will confirm our understanding with respect to your purchasing services in connection with the purchase by Panagra of four DC-8 aircraft, spare engines, components and parts (hereinafter collectively called "spares") therefor, as authorized by the Panagra Board of Directors at its meeting on December 20, 1955, and in connection with the purchase of two additional DC-8 aircraft and spares therefor in case the option which you have granted to Panagra with respect to such two additional aircraft is exercised.

Pan American will perform purchasing services as agent for Panagra in accordance with the purchasing and shipping agreement dated July 14, 1948, in connection with the purchases of said aircraft and spares, subject to the exceptions below.

The commissions to be payable by Panagra to Pan American for such services in respect of said six DC-8 aircraft and the initial provisioning of spares therefor will be at the following rates:

[fol. 2218] 2½% on the first $5,000,000 of purchase price
1½% on the next $5,000,000 of purchase price
1% on the balance of the purchase price

Provided, however, that the purchase price of the original four DC-8 aircraft and spares shall be taken into account

to determine the rates of commission applicable to the two aircraft and spares on option only if the scheduled delivery dates therefor are not later than one year after the scheduled delivery date for the last of said four aircraft.

As used herein, the term "initial provisioning of spares" shall mean all spares for DC-8 aircraft in respect of which Panagra has authorized or placed firm orders prior to the scheduled date for delivery to Panagra of the first DC-8 aircraft.

The commissions payable to Pan American as provided herein will be paid by Panagra as follows:

25% one year after the date of this letter
25% two years after the date of this letter
25% three years after the date of this letter,
The balance upon delivery of the aircraft or equipment to which such commissions relate

The first three payments will be based upon the estimated aggregate purchase price, and the final payment will be adjusted to reflect the final purchase price.

Your commissions for all purchasing services rendered to Panagra other than those provided for herein will be [fol. 2219] at the rates specified in the purchasing and shipping agreement dated July 14, 1948.

If the foregoing correctly sets forth our understanding, will you kindly sign and return to us the enclosed copy of this letter.

Very truly yours,

Attention: Mr. Douglas Campbell,
Vice President & General Manager

Dear Sirs:

Reference is made to the Lease Agreement dated September 9, 1955 between our respective companies, relating to the lease by Panagra to Pan American of four (4) Douglas Model DC-6 aircraft and to the lease by Pan American to Panagra of one (1) Douglas Model DC-6B aircraft.

Your letter to us dated September 9, 1955, relating to such modifications to the leased aircraft as are described in Douglas Service Bulletins Nos. 558 and 569 and which may be required by a mandatory Civil Aeronautics Administration (CAA) airworthiness directive, states that the cost of any such modifications will be for the account of the lessor. We have heretofore requested that Panagra incorporate into the four (4) Douglas Model DC-6 aircraft leased to Pan American the modifications described in Douglas Service Bulletin No. 569, even though the accomplishment of such modifications has not been made mandatory by a CAA airworthiness directive. This letter, when accepted by you, will confirm our agreement with respect to the following matters relating to the accomplishment of such modifications:

1. Pan American has heretofore issued its purchase order to cover the procurement, as agent for Panagra, of four

(4) kits of parts required for the accomplishment of the modifications described in Douglas Service Bulletin No. 569, at the price of $21,500 for each kit. Such purchase order was issued to the Douglas Aircraft Company, Inc., in accordance with the provisions of the Purchasing and Shipping Agreement between our respective companies [fol. 2221] dated July 14, 1948.

2. Pan American will, as agent for Panagra, issue its purchase order to the Douglas Aircraft Company, Inc. to cover accomplishment of the modifications described in Douglas Service Bulletin No. 569, in the four (4) Model DC-6 aircraft leased to Pan American under the above-mentioned Lease Agreement, including installation of the parts referred to in paragraph 1 above. Such modification work will be performed by the Douglas Aircraft Company at its plant at Tucson, Arizona, and the estimated cost of such work is $93,487 per aircraft.

3. All costs payable to Douglas Aircraft Company, Inc. pursuant to paragraphs 1 and 2 above, and all other costs payable pursuant to the terms of the aforementioned purchase orders, shall be borne by Panagra.

4. In consideration of your agreement to have such modifications incorporated at your expense in the aircraft leased to Pan American even though the accomplishment of such modifications has not been made mandatory by a CAA airworthiness directive, no commission provided for in paragraph 5 of the above mentioned Purchasing and Shipping Agreement will be payable by Panagra to Pan American in connection with the purchase orders issued in accordance with the provisions of paragraphs 1 and 2 above. Likewise Pan American, at its cost and with its personnel, will ferry the aircraft from Miami, Florida to the Douglas plant at Tucson, Arizona and return. All other terms and conditions set forth in the Purchasing and Shipping Agreement dated July 14, 1948 between our respective companies shall be deemed to be applicable to the transactions referred to in paragraphs 1 and 2 above.

If the foregoing correctly sets forth our understanding in regard to these matters, will you please indicate your

acceptance on the enclosed copy of this letter and return the same to us. This letter supersedes our letter to you dated June 4, 1957, relating to the same subject matter.

Very truly yours,

I, Josiah Macy, Jr., hereby certify that I am Assistant Secretary of Pan American World Airways, Inc.; that the attached documents are true and complete copies of the documents evidencing the following agreement:

Exchange of correspondence dated respectively June 3, June 7 and June 26, 1957, between Pan American World Airways, Inc. (Pan American) and Pan American-Grace Airways, Inc. (PANAGRA), whereby the designation of Aerovias Nacionales de Colombia, S.A. (AVIANCA), as an affiliated carrier of Pan American under the General Traffic and Sales Agency Agreement dated September 10, 1948, between Pan American and PANAGRA, shall be terminated effective June 18, 1957, with respect to the Republic of Perú, so that Perú shall cease to be a part of the territory in which PANAGRA will act as General Traffic and Sales Agent for AVIANCA pursuant to the said General Traffic and Sales Agency Agreement. (CAB No. 2473).

Attention: Vice President Traffic & Sales

Dear Sirs:

By letter dated December 1, 1948, Pan American designated certain airlines as "affiliated carriers" pursuant to paragraph 22 of the General Traffic and Sales Agency Agreement dated September 10, 1948, between Pan American and Panagra. Among the carriers so designated was Aerovías Nacionales de Colombia (AVIANCA).

By letter dated February 9, 1949, the President of Panagra gave his approval of such designation as required by paragraph 22 of the said General Traffic and Sales Agency Agreement. These designations have since been modified by letters dated January 5, 1956, from Pan American to Panagra, and March 6, 1956, from Panagra to PAA.

This letter constitutes a request pursuant to the said paragraph 22 that the designation of AVIANCA as an affiliated carrier of Pan American be terminated with respect to the Republic of Perú, so that Perú shall cease [fol. 2224] to be a part of the territory in which Panagra will act as General Traffic and Sales Agent for AVIANCA pursuant to the said General Traffic and Sales Agency Agreement. Although the provisions of paragraph 22 specify that the request for termination be given on ninety days' notice, we request that the ninety-day notice provision be waived in this instance, and that such termination be made effective on the date on which AVIANCA inaugurates its proposed service to Perú.

Very truly yours,

Andrew B. Shea
President

Attention: Mr. Andrew B. Shea,
President

Dear Sirs:

We wish to acknowledge receipt of your letter dated June 3, 1957; requesting that the designation of Aerovias Nacionales de Colombia, S.A. (Avianca) as an affiliated carrier of Pan American under the General Traffic and Sales Agency Agreement dated September 10, 1948 between our respective companies be terminated with respect to the Republic of Peru.

You letter states that, although the provisions of paragraph 22 of the General Traffic and Sales Agency Agreement specify that the request for termination be given on ninety (90) days notice, Panagra requests that the ninety (90) days provision be waived in this instance and that such termination be made effective on the date on which Avianca inaugurales its proposed service to Peru. We are taking this matter up with Avianca, and will advise you as soon as we have been able to make appropriate arrangements with them.

Very truly yours,

PAN AMERICAN WORLD AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 51

FINAL

GENERAL TRAFFIC AGREEMENT

THIS AGREEMENT, made and entered into this 11th day of March, 1932, by and between PAN AMERICAN AIRWAYS, INC., a New York corporation, having its principal office in New York, N. Y., (hereinafter called "Pan American"), party of the first part, and SOCIEDAD COLOMBO-ALEMANA DE TRANSPORTIS AFRIOS, a Colombian corporation, having its principal office at Barranquilla, in the Republic of Colombia, (hereinafter called "Scadta"), party of the second part,

WITNESSETH:

WHEREAS, Pan American and its affiliated companies specified in the definition of the term "Operating Affiliate" in Paragraph "SECOND" below are engaged in the general business of the transportation of passengers and property by air in the Continental United States, the Bahamas, West Indies, Virgin Islands, the Windward and Leeward Islands, Trinidad, the Guianas, Mexico, Canal Zone, and Central and South America, and in the interior of certain of said countries; and

WHEREAS, Scadta is engaged in the general business of the transportation of passengers and property by air in Colombia, and has contracts for air transportation service in Venezuela, Ecuador and Panama; and

WHEREAS, the parties desire to cooperate for their mutual advantage, in the manner herein contemplated,

NOW, THEREFORE, for and in consideration of the sum of One Dollar ($1.00) cash in hand paid by each of the parties hereto to the other, the receipt whereof is hereby acknowledged, and of other good and valuable considerations, the parties hereto mutually agree as follows:

FIRST: That this agreement shall not in any way affect, or relate to, and that the performance of same shall not

in any way interfere with, the transportation, handling, dispatch or distribution of mails carried by Scadta or Pan American or any company affiliated with Pan American [fol. 2228] in the Pan American Airways System.

SECOND: That for the purposes of this agreement the following definitions of the terms used herein are adopted and shall apply:

The term "Operating Affiliate" shall refer to the following named companies, and such other companies as Pan American Airways, Inc. may from time to time, after notice to Scadta, designate to be included within such term for the purposes of this agreement:

Panair do Brasil, S. A., and Cia. Mexicana de Aviacion, S. A.

The term "common points" shall mean points where both Scadta and Pan American, or both Scadta and any Operating Affiliate, are engaged in receiving and/or dispatching persons and/or property by air.

THIRD: Pan American agrees (a) to direct, or cause its Operating Affiliate or Affiliates to direct, to the offices of Scadta, at common points, persons carried by Pan American or its Operating Affiliate or Affiliates to, or coming to its or their offices at, common points, who signify an intention or desire to travel by air to points then served by the lines of Scadta, or to such points and thence by any means to other points, and (b) to tender, or cause its Operating Affiliate or Affiliates to tender, to Scadta, at common points, all shipments of property carried by Pan American or its Operating Affiliate or Affiliates to, or coming to its or their offices at, common points, and consigned, or to be consigned, for carriage therefrom by air, or by air and/or a transportation service of the nature and character of the transportation service operated by Scadta, to points to which the transportation service operated by Scadta extends, or to such points and thence by any means to other points; provided that such person or the consignor of such property does not require that the transportation shall be by some other route or by some other service or does not prescribe requirements inconsistent with Scadta's rates, tariffs, rules, regulations and

form of contract of carriage, and provided that neither Pan American nor any of its Operating Affiliates shall be required to deprive itself or themselves of the longest pos-
[fol. 2229] sible carriage of persons or property over its or their own lines, or in the transportation service operated by it and/or them, and provided that the authorization granted by Scadta in Paragraph "FOURTH" hereof shall not be deemed to be limited by reason of any of the matters referred to in "(a)" and "(b)" above.

Scadta agrees to receive, at common points, such persons desiring so to travel, for onward or initial transportation therefrom to points then served by the lines of Scadta, and such property so consigned, for onward or initial transportation therefrom to points to which the transportation service operated by Scadta extends, all subject to and in accordance with the tariffs and rates, and subject to the rules and regulations, of Scadta, and subject to the terms, provisions and conditions of the current forms of tickets or bills of lading which shall then have been approved by Scadta for use in connection with such trans, ortation of passengers and property.

Scadta agrees to furnish to Pan American and its Operating Affiliates from time to time the aforementioned tariffs, rules and regulations and the aforementioned forms of tickets and bills of lading, and full information regarding the transportation service at the time offered by Scadta.

Advertising matter issued by Pan American or any of its Operating Affiliates which refers to the service of Scadta shall be submitted to, and approved by, Scadta before it is used.

FOURTH: Scadta hereby authorizes Pan American, and each of its Operating Affiliates, and such agents and representatives of Pan American or of one or more of its Operating Affiliates as Pan American or such Operating Affiliate or Affiliates may appoint for the purpose, and as may be approved by Scadta, to issue to each person who may desire to obtain a ticket for passage over any of the lines operated by Scadta for the transportation of passengers, an order exchangeable for a ticket, or a ticket, in a form

approved by Scadta, and to check the baggage of such person over said lines, subject to, and in accordance with, the form or forms of baggage check or contract approved by Scadta, and to issue to each person desiring to consign [fol. 2230] property for carriage in the service operated by Scadta for the transportation of property, a bill of lading in a form approved by Scadta, (which ticket, check, contract or bill of lading may, if mutually agreed in writing by the parties hereto, relate to through transportation over the lines of Pan American or its Operating Affiliate or Affiliates and Scadta), and to execute or issue all other documents necessary or appropriate to the transportation of such persons or property, all subject to and in accordance with such tariffs, rates, rules and regulations relating to the transportation of passengers, baggage and/or property as shall at the time be prescribed or approved by Scadta and as shall have been furnished to Pan American and its Operating Affiliates, and subject to and in accordance with such laws as shall be applicable to such transportation. It is understood that no ticket exchange order, ticket, baggage check, or other form of contract purporting to entitle the holder to transportation on the lines of Scadta, and no bill of lading or express receipt covering any shipment of property for carriage in the transportation service operated by Scadta, will be issued in any form other than the current form on which Pan American and its Operating Affiliates have received the approval of Scadta, and that no such ticket exchange order, ticket, baggage check, contract, bill of lading or express receipt will be issued unless reservation for the accommodations required has been made, or otherwise than subject to and in accordance with the tariffs, rules and regulations of Scadta which have been furnished to Pan American and its Operating Affiliates, and unless Pan American, or one of its Operating Affiliates, or Scadta shall have received payment of the total charges, at the rates in force at the time as furnished to Pan American and its Operating Affiliates, or arrangements satisfactory to Scadta and Pan American shall previously have been made respecting the payment of such charges.

Scadta agrees to accept each such ticket and baggage check, and to issue its ticket in exchange for each such [fol. 2231] ticket-exchange order so issued, and to receive each such passenger and his baggage for whom and which such ticket exchange order, or ticket, and baggage check, have been so issued, for transportation over the lines of Scadta, and each shipment of property for which such bill of lading has been so issued, for carriage in the transportation service operated by Scadta, all subject to and in accordance with the terms, conditions and provisions of such ticket exchange order, or ticket, and baggage check, or such bill of lading or express receipt, respectively, and subject to all such rules and regulations.

It is further understood and agreed that in the event that Pan American or any of its Operating Affiliates shall receive notice of the cancellation of any ticket exchange order or ticket for passage over any of the lines of Scadta, or notice of any claim respecting baggage or other property delivered to Scadta, Pan American will notify, or will cause one of its Operating Affiliates to notify, Scadta immediately upon the receipt of such notice.

It is understood that Pan American and each of its Operating Affiliates, and each of the aforementioned agents and representatives, in issuing a ticket exchange order, ticket, baggage check or other contract for passenger and/or baggage transportation over the lines of Scadta, or in issuing a bill of lading or express receipt for the carriage of property in the transportation service operated by Scadta, shall be deemed to be acting only as the agent of Scadta, and for such transportation service, and shall not be liable or responsible for any injury to, or the death of, any person, or for any loss to any person, or for any injury to, loss of, or delay in transporting or delivering any baggage, express or other property, occurring on any of the lines of Scadta or in the aforementioned transportation service, or caused by, or arising from, any act of Scadta, or any of its officers, agents, employees or servants, and Scadta hereby agrees to indemnify and hold harmless Pan American, and each of its Operating Affiliates, and each such agent and representative, from and against all [fol. 2232] claims and damage for any such injury, death, loss or delay.

In the event that any tariff or rate, or any form of ticket exchange order, ticket, baggage check, bill of lading, express receipt or transportation contract, or any rule or regulation of Scadta, for or relating to the transportation of passengers or property over the lines of Scadta or in the transportation service operated by Scadta, shall be changed at any time, or any service operated by Scadta for the transportation of persons or property shall be changed, suspended, or cancelled, Scadta shall notify Pan American and each of its Operating Affiliates thereof at least fifteen days prior to the effective date of such change, suspension or cancellation, and in the event of a suspension such notice shall state the period of suspension as nearly as may be, and it is agreed that neither Pan American nor any of its Operating Affiliates shall be under any liability with respect to any ticket exchange order, ticket, baggage check, contract, bill of lading or express receipt for transportation over any of the lines of Scadta or in the transportation service operated by Scadta which may have been issued by Pan American or any of its Operating Affiliates or any of the aforementioned agents or representatives (in accordance with the tariffs, rates, rules and regulations, and in the forms, furnished to Pan American or its Operating Affiliates) prior to the receipt by Pan American and its Operating Affiliates of notice of such changes, or of such suspension or cancellation of service, or prior to the expiration of said fifteen day period.

FIFTH: Scadta agrees (a) to direct to the offices of Pan American, or of its Operating Affiliate or Affiliates, at common points, persons carried by Scadta to, or coming to the offices of Scadta at, common points, who signify an intention or desire to travel by air to points then served by the lines of Pan American, and/or its Operating Affiliate or Affiliates, or to such points and thence by any means to other points, and (b) to tender to Pan American, or its Operating Affiliate or Affiliates, at common points, all shipments of property carried by Scadta to, or coming to the offices of Scadta at, common points, and consigned, or to be consigned, for carriage therefrom by air, or by [fol. 2233] air and/or a transportation service of the nature

and character of the transportation service operated by Pan American, and/or its Operating Affiliate or Affiliates, to points then served by the lines of Pan American, and/or its Operating Affiliate or Affiliates, or to which the transportation service operated by Pan American, and/or its Operating Affiliate or Affiliates extends, or to such points and thence by any means to other points; provided that such person or the consignor of such property does not require that the transportation shall be by some other route or by some other service or does not prescribe requirements inconsistent with the rates, tariffs, rules, regulations and form of contract of carriage of Pan American and/or its Operating Affiliate or Affiliates, and provided that Seadta shall not be required to deprive itself of the longest possible carriage of persons or property over its own lines, or in the transportation service operated by Seadta, and provided that the authorization granted by Pan American in Paragraph "SIXTH" hereof shall not be deemed to be limited by reason of any of the matters referred to in "(a)" and "(b)" above.

Pan American agrees to receive, or to cause its Operating Affiliate or Affiliates to receive, at common points, such persons desiring so to travel, for onward or initial transportation therefrom to points then served by the lines of Pan American and/or its Operating Affiliate or Affiliates, and such property so consigned, for onward or initial transportation therefrom to points to which the transportation service operated by Pan American and/or its Operating Affiliate or Affiliates extends, all subject to and in accordance with the tariffs and rates, and subject to the rules and regulations, of Pan American and its Operating Affiliate or Affiliates, and subject to the terms, provisions and conditions of the current forms of tickets or bills of lading which shall then have been approved by Pan American and its Operating Affiliate or Affiliates for use in connection [fol. 2234] with such transportation of passengers and property.

Pan American agrees to furnish to Seadta from time to time the aforementioned tariffs, rules and regulations and the aforementioned forms of tickets and bills of lading.

and full information regarding the transportation service at the time offered by Pan American and its Operating Affiliates.

Advertising matter issued by Scadta which refers to the service of Pan American or of any of its Operating Affiliates shall be submitted to, and approved by Pan American before it is used.

SIXTH: Pan American hereby, on behalf of itself, and each of its Operating Affiliates, authorizes Scadta, and such agents and representatives of Scadta as Scadta may appoint for the purpose, and as may be approved by Pan American, to issue to each person who may desire to obtain a ticket for passage over any of the lines operated by Pan American, or any of its Operating Affiliates, for the transportation of passengers, an order exchangeable for a ticket, or a ticket, in a form approved by Pan American, and to check the baggage of such person over said lines, subject to, and in accordance with, the form or forms of baggage check or contract approved by Pan American, and to issue to each person desiring to consign property for carriage in the service operated by Pan American, and/or its Operating Affiliates, for the transportation of property, a bill of lading in a form approved by Pan American, (which ticket, check, contract or bill of lading may, if mutually agreed in writing by the parties hereto, relate to through transportation over the lines of Scadta and Pan American or its Operating Affiliate or Affiliates), and to execute or issue all other documents necessary or appropriate to the transportation of persons or property, all subject to and in accordance with such tariffs, rates, rules and regulations relating to the transportation of passengers, baggage and/or property as shall at the time be prescribed or approved by Pan American, and as shall have been furnished to Scadta, and subject to and in accordance with such laws [fol. 2235] as shall be applicable to such transportation. It is understood that no ticket exchange order, ticket, baggage check, or other form of contract purporting to entitle the holder to transportation over the lines of Pan American and/or its Operating Affiliate or Affiliates, and no bill of lading or express receipt covering any shipment

of property for carriage in the transportation service operated by Pan American and/or its Operating Affiliate or Affiliates, will be issued in any form other than the current form on which Scadta shall have received the approval of Pan American, and that no such ticket exchange order, ticket, baggage check, contract, bill of lading or express receipt will be issued unless reservation for the accommodations required has been made, or otherwise than subject to and in accordance with the tariffs, rules and regulations of Pan American and/or its Operating Affiliate or Affiliates which have been furnished to Scadta, and unless Scadta, or Pan American, or one of its Operating Affiliates, shall have received payment of the total charges, at the rates in force at the time as furnished to Scadta, or arrangements satisfactory to Pan American and Scadta shall previously have been made respecting the payment of such charges.

Pan American agrees to accept, and to cause its Operating Affiliate or Affiliates to accept, each such ticket and baggage check, and to issue its or their ticket in exchange for each such ticket exchange order so issued, and to receive each such passenger and his baggage for whom and which such ticket exchange order, or ticket, and baggage check, have been so issued, for transportation over the lines of Pan American and/or its Operating Affiliate or Affiliates, and each shipment of property for which such bill of lading has been so issued, for carriage in the transportation service operated by Pan American, and/or of its Operating Affiliate or Affiliates, all subject to and in accordance with the terms, conditions and provisions of such ticket exchange [fol. 2236] order, or ticket, and baggage check, or such bill of lading or express receipt, respectively, and subject to all such rules and regulations.

It is further understood and agreed that in the event that Scadta shall receive notice of the cancellation of any ticket exchange order or ticket for passage over any of the lines of Pan American, or of any of its Operating Affiliates, or notice of any claim respecting baggage or other property delivered to Pan American or any of its Operating Affiliates, Scadta will notify Pan American immediately upon the receipt of such notice.

It is understood that Scadta, and each of the aforementioned agents and representatives, in issuing a ticket exchange order, ticket, baggage check or other contract for passenger and/or baggage transportation over the lines of Pan American and or its Operating Affiliate or Affiliates, or in issuing a bill of lading or express receipt for the carriage of property in the transportation service operated by Pan American, and/or of any of its Operating Affiliates, shall be deemed to be acting only as the agent of Pan American, and/or its Operating Affiliate or Affiliates, and for such transportation service, and shall not be liable or responsible for any injury to, or the death of, any person, or for any loss to any person, or for any injury to, loss of, or delay in transporting or delivering any baggage, express or other property, occurring on any of the lines of Pan American, or of any of its Operating Affiliates, or in the aforementioned transportation service, or caused by, or arising from, any act of Pan American, or of any of its Operating Affiliates, or any of its or their officers, agents, employees or servants, and Pan American hereby agrees to indemnify and hold harmless Scadta and each such agent and representative, from and against all claims and damage for any such injury, death, loss or delay.

In the event that any tariff or rate, or any form of ticket exchange order, ticket, baggage check, bill of lading, express receipt or transportation contract, or any rule or regu- [fol. 2237] lation of Pan American and/or its Operating Affiliate or Affiliates, for or relating to the transportation of passengers or property over the lines of Pan American and/or its Operating Affiliate or Affiliates or in the transportation service operated by Pan American and/or its Operating Affiliate or Affiliates, shall be changed at any time, or any service operated by Pan American and/or its Operating Affiliate or Affiliates for the transportation of persons or property shall be changed, suspended, or cancelled, Pan American shall notify Scadta thereof at least fifteen days prior to the effective date of such change, suspension or cancellation, and in the event of a suspension such notice shall state the period of suspension as nearly as may be, and it is agreed that Scadta shall not

be under any liability with respect to any ticket exchange order, ticket, baggage check, contract, bill of lading or express receipt for transportation over any of the lines of Pan American and/or its Operating Affiliate or Affiliates or in the transportation service operated by Pan American and/or its Operating Affiliate or Affiliates which may have been issued by Scadta or any of the aforementioned agents or representatives (in accordance with the tariffs, rates, rules and regulations, and with the forms, furnished to Scadta) prior to the receipt by Scadta of notice of such changes, or of such suspension or cancellation of service, or prior to the expiration of said fifteen day period.

SEVENTH: It is understood that nothing in this agreement shall be construed as requiring Pan American or any of its Operating Affiliates or Scadta to initiate or maintain service between any particular points.

EIGHTH: Each of the parties hereto will at all times furnish to the other all information which the other may require with reference to the tariffs subject to this agreement, and will give to the other the assistance of its technical staff and data in so far as it may be practicable to do so.

NIXTH: This agreement shall continue in force for a period of five (5) years from the date hereof, and thereafter until notice

Dear Sirs:

Referring to the General Traffic Agreement entered into between you and ourselves under the above date, we wish to confirm our mutual agreement supplementing such Agreement as follows:

1. Said Agreement provides that advertising matter issued by you or by us or by any of our Operating Affiliates,

(the term "Operating Affiliates" as herein used to have the same meaning as expressed in such General Traffic Agreement) which refers to the service of the other party shall receive the prior approval of such other party before it is used. It is understood, however, that you or ourselves, or any of our Operating Affiliates, may, without receiving the prior approval of the other, and each of us agrees to, include in its published passenger and express tariffs and schedules relating to transportation to and from points common to your lines and to those of the Pan American Airways System (a) references that connections via the lines of the other party from such points to points on such other party's lines, respectively, are available, and (b) upon request of the other party, such of its passenger and express tariffs and schedules as it may furnish, all such tariffs to be stated only in United States of America currency. It is understood that neither you nor ourselves, nor any of our Operating Affiliates shall be responsible for any inaccuracy in any of the tariffs or schedules of the other, except to see that the same as published are in conformity with the copies furnished by the other. It is further understood that each of you, ourselves and our Operating Affiliates shall be privileged to change any of its tariffs or schedules at any time, without the consent of the other, and that no responsibility shall attach to the other with respect to any such change, except as to the issuance of ticket exchange orders, tickets, baggage checks or bills of lading as provided in said General Traffic Agreement.

2. (a) We will pay to you with respect to each ticket and bill of lading issued to you, and accepted by us, covering transportation over any of the lines of the Pan American Airways System, the following percentages, same to be computed on fares, charges and tariffs at the rates in force at the time as furnished by us to you, and in United States of America currency at the current rate of exchange:

[fol. 2239] (i) 5% of the fare collected by you, or any of your agents or representatives, relating to transportation over the lines of the Pan American Airways System, under each such

ticket, (or if the total fare under such ticket covers transportation over the lines of the Pan American Airways System and also the Scadta Airways System, 5% of the portion thereof collected by you or such agents or representatives which relates to transportation over the lines of the Pan American Airways System).

(ii) 5% of the weight or volume charge collected by you or such agents or representatives relating to transportation over the lines of the Pan American Airways System under each such bill of lading; (or if the total weight or volume charge under any such bill of lading includes charges for transportation over the lines of the Pan American Airways System, and also of the Scadta Airways System, 5% of that portion of such charge which relates to transportation over the lines of the Pan American Airways System).

(iii) 50% of the handling charge collected under each such bill of lading.

(iv) You are hereby authorized to collect for our account the fares and charges under each such ticket, baggage check and bill of lading or such portions as relate to transportation over the lines of the Pan American Airways System.

(b) You will pay to us with respect to each ticket and bill of lading issued by us, and accepted by you, covering transportation over any of your lines, the following percentages, same to be computed on fares, charges and tariffs at the rate in force at the time as furnished by you to us, and in United States of America currency at the current rate of exchange:

(i) 5% of the fare collected by us, or any of our Operating Affiliates, or agents or representatives thereof, relating to transportation

over the lines of the Scadta Airways System, under each such ticket, (or if the total fare under such ticket covers transportation over the lines of the Pan American Airways System and also of the Scadta Airways System, 5% of the portion thereof collected by us, or any of our Operating Affiliates, or agents or representatives thereof, which relates to trans- [fol. 2240] portation over the lines of the Scadta Airways System).

(ii) 5% of the weight or volume charge collected by us, or any of our Operating Affiliates, or agents or representatives thereof, relating to transportation over the lines of the Scadta Airways System under each such bill of lading, (or if the total weight or volume charge under any such bill of lading includes charges for transportation over the lines of the Pan American Airways System and also of the Scadta Airways System, 5% of that portion of such charge which relates to transportation over the lines of the Scadta Airways System).

(iii) 50% of the handling charge collected under each such bill of lading.

(iv) We are hereby authorized to collect for your account the fares and charges under each such ticket, baggage check and bill of lading or such portions as relate to transportation over the lines of the Scadta Airways System.

(c) It is understood that no commissions will be payable with respect to any portion of the transportation charge under any such bill of lading which is based upon value of shipment or goods, or with respect to charges for handling or transporting baggage carried as such.

(d) The accounts between you and ourselves or our Operating Affiliates shall be made up in United States currency and balances struck at the end

of each month. Balances shall be payable within thirty days thereafter on such reasonable terms and conditions as the party entitled to receive the payment may fix.

3. It is understood that, until otherwise mutually agreed upon between you and ourselves, notwithstanding the provisions of Paragraph "SIXTH" of said General Traffic Agreement, at those points outside of Colombia at which you and either ourselves or any of our Operating Affiliates each maintains an agent or representative for the issuance of tickets, baggage checks or bills of lading, (as for instance at Maracaibo at present) your agent shall not be authorized to issue a ticket, baggage check or bill of lading covering transportation between any two points on our lines and/or those of any of our Operating Affiliates, or from the point at which such agents or representatives are located to any point on our lines or any of the lines [fol. 2241] of any of our Operating Affiliates, whether or not the initial or any intermediate transportation under such ticket, baggage check or bill of lading be over your lines, it being understood that you will refer all such passengers and shippers to our agent or representative at such place.

4. In making reservations for passengers or shipments, (a) the expense of all messages between points on the lines of the Pan American Airways System, will be borne by us, and (b) the expense of all messages between points on the lines of the Scadta Airways System will be borne by you.

If the foregoing correctly expresses your understanding of such supplemental agreement we would appreciate your indicating your approval and acceptance on the attached copy of this letter and returning same to us.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 52

[Handwritten notations—extra—2105.1—Avianca.]

I, Joseph J. Cantwell, hereby certify that I am Assistant Secretary of Pan American Airways, Inc.; that the attached document is a true and complete copy of the document evidencing the following agreement:

General Traffic & Sales Agency Agreement, dated November 1, 1949, between Pan American Airways, Inc. and Aerovias Nacionales De Colombia, S. A.

/s/ JOSEPH J. CANTWELL
Assistant Secretary

Dated: November 14, 1949

[fol. 2243]

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

THIS AGREEMENT, made this 1st day of November, 1949, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and AEROVIAS NACIONALES DE COLOMBIA, S.A., a corporation organized and existing under the laws of the Republic of Colombia, hereinafter referred to as "AVIANCA":

WITNESSETH THAT, for and in consideration of the mutual covenants and agreements herein contained, Pan American and Avianca hereby agree as follows:

1. Pan American hereby appoints Avianca, and Avianca agrees to act as, General Traffic and Sales Agent in Colombia for Pan American and its affiliated carriers (as defined in Paragraph 21 hereof), the territory in which Avianca is hereby appointed to act as General Traffic and Sales Agent being hereinafter sometimes referred to as "Avianca General Agency Territory". As such General Traffic and Sales Agent, Avianca agrees that it will perform such services as may be appropriate to promote passenger, mail and

cargo traffic over the lines of Pan American and its affiliated carriers and to arrange for transportation of passengers, baggage, mail and cargo over such lines, including the furnishing of necessary personnel, office space, equipment and supplies and doing all other things appropriate to carry out the following activities:

(a) Solicitation and sale within the Avianca General Agency Territory of passenger, mail and cargo transportation for Pan American and its affiliated carriers, including furnishing instructions to, and supervision of such solicitation and sale by, Avianca's Passenger and Cargo Sales Agents appointed in accordance with this Agreement.

(b) Servicing all Passenger and Cargo Sales Agents of Pan American and its affiliated carriers located within the Avianca General Agency Territory; and if and as required by Pan American, obtaining remittances of funds from and paying to such agents commissions for sales of transportation made over the lines of Pan American and its affiliated carriers, all in accordance with the policies, practices, rules, regulations [fol. 2244] and instructions of Pan American pertaining thereto.

(c) Performance of such acts and preparation and checking of such documents in the Avianca General Agency Territory as may be required for the transportation of passengers, baggage, mail and cargo and movement of aircraft over the lines of Pan American and its affiliated carriers, including the making of arrangements for the presence of such government officials as may be required in connection therewith.

(d) Checking such baggage of outgoing passengers at points in the Avianca General Agency Territory as is to be through checked from points served by Avianca to points served by Pan American or its affiliated carriers, it being understood that baggage of passengers traveling over the lines of Avianca and then over the lines of Pan American or its affiliated carriers will be through checked by Avianca only if, and to the extent that, the parties shall expressly so agree; col-

lecting for the account of Pan American and its affiliated carriers any excess baggage charges payable with respect to any baggage checked by Avianca for transportation over the lines of Pan American and its affiliated carriers; receiving and forwarding by carriers with which Pan American or Avianca has forwarding arrangements any trunks or other heavy baggage delivered to Avianca for that purpose by passengers traveling, or proposing to travel, over the lines of Pan American or its affiliated carriers, and collecting any charges payable therefor;

(e) Making arrangements in the Avianca General Agency Territory for adequate ground transportation from and to the airport for passengers, baggage and cargo transported or to be transported over the lines of Pan American or any of its affiliated carriers;

(f) Making arrangements on behalf of such passengers for adequate hotel accommodations in the Avianca General Agency Territory and at points of call of Avianca, Pan American and its affiliated carriers, and [fol. 2245] at other cities.

(g) Making reservations for and facilitating transportation over the lines of Pan American and its affiliated carriers, and connecting carriers;

(h) Furnishing such advice and information as Pan American may from time to time request with respect to transportation formalities required by governments in the Avianca General Agency Territory pertaining to passengers, baggage and cargo moving over the lines of Avianca, Pan American, or its affiliated carriers;

(i) Distribution of such timetables, advertising materials and other information covering the services of Pan American and its affiliated carriers as Pan American may from time to time reasonably request;

(j) Maintaining and operating at points served by Avianca in the Avianca General Agency Territory centrally located sales offices for the sale of passenger

and cargo transportation over the lines of Pan American and its affiliated carriers, which offices shall be staffed with competent traffic and sales personnel for the promotion and sale of passenger, mail and cargo transportation over the lines of Pan American and its affiliated carriers and for the handling of all matters pertaining thereto pursuant to this Agreement, it being agreed that a reasonable number of sales representatives who come in contact with the public in Avianca's principal sales offices in the Avianca General Agency Territory shall be bilingual, i.e. English and Spanish speaking, and it being contemplated that the entire sales organization of Avianca will be available to perform services pursuant to this Agreement but nothing contained in this Agreement shall obligate Avianca to establish any new office or organization at any point not served by Avianca in order to render any service to Pan American or its affiliated carriers.

(k) Publicizing, in the Avianca General Agency Ter- [fol. 2246] ritory, in such appropriate manner as Pan American shall reasonably request, that Avianca is the General Traffic and Sales Agent for Pan American and its affiliated carriers;

(l) Furnishing Pan American with appropriate reports, monthly and at such other times as may be requested by Pan American, as to the extent and character of sales made by each Avianca sales office or agency for Pan American and its affiliated carriers;

(m) Making personal visits through sales representatives to sales agencies and to persons and firms which have been or which are potential customers for transportation via Pan American and its affiliated carriers, it being understood that, if Pan American so requests, a representative of Pan American may accompany Avianca's sales representatives on any such visits;

(n) Providing traffic personnel responsible for the handling of traffic over the lines of Pan American and its affiliated carriers who shall be adequately trained in

airline practice and suitably indoctrinated in required procedures, methods and information to enable them to furnish satisfactory performance hereunder;

(o) For the purpose of instructions covering procedures for the sale and handling of passenger, cargo and mail traffic over the lines of Pan American or its affiliated carriers, making available to all of Avianca's offices the several traffic and sales manuals issued by Pan American including all reissues and revisions thereof and supplements thereto and requiring that the provisions of such manuals be followed.
